Africa; 1,721 in Greenland; 1,077
in Labrador; 349 among the North
American Indians; 68 in Australia,
and 9 in Thibet. The expenditure
last year was 109,432 thalers, be-
sides the expense of the Surinam
and Labrador missions, which are
defrayed by auxiliary societies in
Holland and England.

JOHN STREET ANNIVERSARY.—Pro-
posed Endowment.—The one hand-
red and fourth anniversary of the
John street Methodist Episcopal
Church was observed on Sunday
last. Rev. Dr. Tiffany preached in
the morning, and Rev. Dr. Ridg-
way in the evening. Rev. E. L.
Janes, one of the former pastors,
presided at the love-feast in the
morning, and Rev. H. F. Pease,
presiding elder of the district, at the
pastor's remembrance in the afternoon.
Philip Phillips conducted the sing-
ing. Bishops Janes was among the
ministers present in the evening.
Large congregations attended, and,
as usual on such occasions, gave
liberally. The pastor, Rev. L. S.
Weed, asked the congregation for
\$2,400, a sum sufficient with pre-
vious receipts to meet the current
expenses for the year, and the whole
amount was cheerfully contributed.

At the evening meeting, after the
whole amount called for had been
completed, the pastor read a letter
which contained the pledge of the
writer, Mr. George H. Shaffer, to
give \$500 toward the proposed sum
of \$50,000 for the endowment of the
church. Seven others in the con-
gregation immediately announced
severally the same for the same
purpose.—New York Christian Ad-
vocate, November 5.

The National Conference of the
Unitarian churches was held last
week in New York, attended by 447
delegates, from 163 churches and
20 associations and conferences.
There were reported 20 local con-
ferences, of which 6 had been or-
ganized during the year. During
two years 15 ministers from other
denominations have joined the Uni-
tarians. The Boston Theological
School (Mr. Hepworth's) has been
merged in the Cambridge Divinity
School. It was advised that a
church costing \$100,000 be erected
in Washington, and that a Uni-
tarian building be put up in Boston.
Efforts to establish a Unitarian
theological review have not met
with encouragement; and, therefore,
\$5,000 were given by the Unitarian
Association to aid Old and New. It
was hoped that before long it would
be found possible to have a larger
space in it given to theological and
denominational matter. The action
on the main question, by which a
compromise between the radical
and conservative wings was effected,
is given in our editorial columns.
It was reported that \$60,000 had
been raised in Chicago for a the-
ological seminary, and it was de-
sired that an endowment of \$100,000
be raised. Sympathy was expressed
with Humboldt College, Iowa.—
Independent, November 6.

IT IS DIFFICULT to tell exactly the
state of Protestantism in Mexico.
In the capital the largest congrega-
tion, Romero's, holds worship 4
times on the Sabbath, in order to
accommodate the crowds, as their
hall will hold only 400, and is
crowded. A second congregation
has 250 attendants and a third 160,
while in all there are 12 different
gatherings in the city. In the
valley of Mexico there are some 20
more, and over 40 in the country.
One of the largest is in the village
of Cos, in Zacatecas, where a former
mayor is leader and publishes a
Protestant paper. In Mexico Mr.
Riley has been publishing another
newspaper.

Through the beneficence of a few
gentlemen in this city the Protest-
ants in the capital will soon take
possession of the finest church in
the city, with the exception of the
cathedral. Mexico is so impover-
ished, and the Protestants are so ill-
able to do more than to struggle
under the burden of their own con-
gregations, that they can do little to
extend the work. The expense has
been borne entirely by the American
and Foreign Christian Union, with
the exception of the salaries of the
Bible Society agents and a few
hundred dollars aid from the Tract
Society. The Christian World, or-
gan of the Union, publishes full
accounts of the work. As we have
seen, it is the most hopeful feature
of this movement that it is of native
origin; and there is reason to be-
lieve that with its intense evan-
gelistic character it will, if properly
aided in its feebleness, ere long be
extended by Mexican evangelists
into Cuba and all Spanish America.
Independent.

True it is most painful not to meet
the kindness and affection you feel
you have deserved, and have a right
to expect from others; but it is a
mistake to complain of it, for it is
of no use; you cannot extort friend-
ship with a cocked pistol.

As we hold a candle to the flame
until it is full lighted, so we must
hold ourselves to Christ and his
word by meditation.—Bengel.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, NOVEMBER 19, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. B. ANDREWS,
REV. W. SHAPARD,
REV. J. B. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY,
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KREMER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

Tennessee Colored Conference.

This body closed a very pleasant session at Brownsville, Tennessee, last week. Bishop Doggett was very much pleased with the Conference. We had a very pleasant home at Bro. Henry Taylor's. Bro. Taylor was also at his post, affording very valuable service in the Conference, who appreciate his services. They are determined to raise their ministerial standard higher than it ever has been, and ordain no man who cannot read. The appointments, so far as we have learned, gave very general satisfaction. We copy from the Western Methodist the following, in regard to it:

"This body closed its fourth session in Brownsville, October 31, Bishop Doggett presided, and gave universal satisfaction. The Rev. Thomas Taylor, superintendent, was present, and aided in the business; also Rev. Samuel Watson, editor of the Christian Index. The session was very harmonious, and productive of much good. This Conference was organized by Bishop Paine three years since. It has grown until now it numbers one hundred and fifty preachers in full connection. These, with the lay members, make a very large body. The Bishop was agreeably surprised, both in regard to its numbers and the intelligence of its members. He ordained between forty and fifty deacons, and some twelve or fifteen elders.—Christian Index.

A BLESSED RELIGIOUS REVIVAL is progressing at the Second Street church in this city, under the faithful labors of the pastor, Rev. Dr. Slater. Very precious influences prevail, and the promise is most cheering for an extensive and glorious work of grace throughout the congregation. Twenty-five persons have professed faith in Christ, and twenty-five mourners were bowed at the altar of prayer on Tuesday evening. During the year now closing Dr. Slater has received one hundred and thirty-nine persons into the church, and at present he has the names of eleven candidates for membership. We record with great joy and thankfulness this good work of God, and pray that it may long continue, and increase in power.—Western Methodist.

BISHOP KREMER having attended the Indian Mission Conference, is "visiting the churches" in Arkansas. The Rev. E. J. Dawne informs us that the Bishop preached in Fayetteville, November 4, and his preaching was with power—deeply impressing his hearers. He was delighted with the country, and everybody with him. Our correspondent adds: "Our mountain city is getting to be the place for not only 'apples,' but all good things, Bishops included."—Western Methodist.

"The streams of religion run deeper or shallower," says Calcott, "as the banks of the Sabbath are kept up or neglected." A preacher in Holland called the Sabbath God's dyke, shutting out an ocean of evils.

A MIND TO WORK.

Greater praise could not have been bestowed upon the devoted company engaged in rebuilding the temple than that "the people had a mind to work." We wish it could be truthfully applied to all congregations, and that this disposition to labor for God could be found in all who profess to love the Saviour. Where this mind exists obstacles will not deter. Expenses for idleness will not be framed from the presence of the most formidable enemies. If the disposition exists there will be courage to face the foes of the truth, and a spirit that will not flinch in the hour of severest trial. The slothful soul will always find a lion in the way, and invent abundant pretexts for inaction. There will be no fit opportunity, or the desired occasion for successful effort does not arise. The moment for entering the field has not yet arrived, or circumstances do not altogether promise the largest returns for the time and toil to be expended. It is easy enough to stand all the day idle if we desire to do so. There will be plenty of reasons which idleness and cowardice can suggest to satisfy the conscience of the easy-going and self-indulgent Christian. Mole hills become mountains in the eyes of the doubting and timid heart, and the conclusion is reached that nothing can be done for the present.

To undertake a great work like rebuilding the temple, in the presence and amidst the vexations of numerous and malignant enemies, would be little short of madness. Many people seem to fear nothing so much as losing time and labor in the cause of religion, and rather than risk anything of either, they are content to do nothing. It is seldom that we cannot find some specious vindication for indifference in our own incompetency and lack of gifts for any useful activity in the sphere of religious duty. There is no time, or, if time permits, then the talent is wanting. The real trouble is that the "mind to work" is wanting. There is no disposition to make sacrifices and to toil for God. Where the disposition to work exists there will always be means and opportunities of doing something for the glory of God. Hindrances and obstacles there will always be—enemies will scoff at the builders of the temple; they will point the finger of scorn and shoot their arrows; but the devoted believer will work in spite of opposition. In weariness, in perplexity, in temptation and weakness he will make diligent use of all opportunities. He will not wait for organizations and combinations, but he will put his hand to the work as an individual in the field where Providence has appointed his lot. Neither will he wait for the opportunity, but he will make it. He will not delay for the more convenient season, but at once begin to move.

The mind to work is the substantial condition and qualification. This presence of all other conditions amounts to nothing without this; the possession of every other qualification effects nothing without this. In its absence we see everywhere gifts and occasions of the greatest usefulness thrown away, and the loudest calls are unheeded. How the walls of the spiritual temple would rise, how her towers would be strengthened and her borders enlarged if the people had a mind to work! There are many adversaries, no doubt. There are Sanballats and Tobiahs, and the Arabians; but the greatest of all enemies to the progress of the truth is in the indifference and unbelief of the professed friends of religion. The powers of darkness were never more active, the devices of Satan were never more adroitly framed, and the mystery of iniquity never wrought more vigorously. All the principles and agencies of evil are preternaturally alert in literature and in society. There should be a corresponding vigilance and zeal on the part of all who are set for the defense of Zion.

What is this mind to work, if it be not the faith which worketh by love? What is it, if it be not the constraining love of Christ animating and firing the soul, and cloth-

ing the Christian with zeal as with a garment? Before we array our legion of excuses for inaction, let us be sure that the mind to work is in us. Before pleading want of time, opportunity and gifts, let us see if the real cause does not lie deeper, and in ourselves rather than in our circumstances. The removal of all serious obstacles may be effected by simply seeking for a deeper consecration to God. Our way may be more hedged up by unbelief than by the providence of which we are prone to complain. In the readiness of idle Christians to exculpate themselves it is seldom indeed that they hit upon the true reason—the want of a deep and abiding spirituality. A mind to work is our need. How few working members in any church—how passing few who possess this spirit of absorbing devotion to Christ! The cause of Christ is languishing because you, reader, are not properly awake to your duty. The few faithful ones are hindered and discouraged by your lukewarmness; the hands of your pastor hang down in weariness while he mourns over your indifference. May God give all his people a mind to work!

The M. E. Church in Louisiana.

The statement of Rev. L. C. Matlack in reference to the work of the Church North in Louisiana, which appears in the New York Christian Advocate of October 27, is uncommonly truthful and candid. In a letter from the same source, published in September, the writer claims that the membership of the Northern Church is considerably greater than that of the Methodist Episcopal Church South. He states that our membership is eight thousand and seventy-eight, and theirs eight thousand four hundred and eighty-two. As some surprise has been expressed and explanations sought, we will allow Mr. Matlack to explain the matter himself by quoting from his letter on the same subject, published a month later. It should be borne in mind that more than one-half of the colored members claimed by them were already in our church, and organized and under discipline and instruction.

The white membership in our communion of over eight thousand is not more than two hundred in Louisiana. And these are found in three of the New Orleans churches—Ames, Felicite Street and Second German Mission. In the six other churches of the city, and in all the churches in the entire State, not one white person is to be found. Such is the record after five years of labor have been expended here.

This is the first statement we have noticed in which there has been a hint as to the color of the Northern membership here in the South. This distinction has been ignored in all their astounding exhibitions of numbers. We are glad to find one writer and minister of the Methodist Episcopal Church who recognizes the *suppremo veri*, and has the courage to tell the truth. The prospects of increasing their white membership in Louisiana are not flattering, as the following paragraphs show:

What five years more may accomplish cannot now be determined; but two years' experience and observation of the present method of operating has not encouraged large expectations of our success, except with the people of African descent, and also those of German ancestry. My previous article suggests the reason of this.

The white Methodists of the Church South are a unit in opposition even to our presence here. Their pastors ignore us. Their people, with very rare exceptions, withhold all fellowship. The mass of the white people not Methodists make our Northern and loyal affinities all-sufficient reasons for standing afar off from us, so that in three rounds of quarterly meetings, held over a district one hundred and thirty-six miles in length, I have not seen three white faces at all of them. A few "loyal" white men hold office in portions of the State, but their interests and inclinations both lead them to the old-established "white man's" churches. Even in New Orleans, where white respectability would find itself in no wise compromised by attendance at our elegant Ames chapel, Northern men and Methodists not a few fail to make an appearance.

For the present, and for an indefinite future, in my judgment, access to the white population, in commu-

nities where Protestant churches now abound, is almost impossible. New Orleans may be an exception, under a new plan of missionary labor here, in destitute neighborhoods. And more may be accomplished in this one city with that class.

The brother's usual candor and acumen could readily give a reason for the charges of coldness, disfavor and lack of fellowship of which he complains. So far as he and his brethren assume the role of proselytizers, and hold our church property unlawfully, we are compelled to regard them with no great warmth of fraternal feeling. The stolen churches, it is true, were turned over to them by a military order, but the manner of stealing them does not change the character of the theft. They hold by this military warrant three churches here in New Orleans which belong to the Church South, and were for the most part built by the efforts and money of the white people. In Maryland and in other places where the entire membership of churches joined the Church South, did our Northern brethren allow them to retain the church property? It must not be forgotten, in this connection, that our white churches were for a time taken possession of by the same military authority, and only restored upon compulsion.

We give the remainder of the letter from which the above extracts are taken. We are glad that the Northern Church is about to enter the field of Roman Catholicism. Let us anticipate a single sentence before the whole is given: "It is not well that our work be limited to the cities other men have built, nor to the vineyards others have planted." We say emphatically: "It is not well." Were our brother's thoughts running upon the subject of the stolen churches when he wrote that golden sentence?

There remains, however, a large field not occupied by Methodists of either body, nor by Protestants of any sect. Roman Catholic services only, or none at all, are observed. In many neighborhoods none at all is the rule. The people are creoles—that is, they were born near the tropics, and are of foreign extraction. Although natives of Louisiana, they are almost universally of French parentage, and trace their lineage to the Catholic French colonists. Their Catholicism is of a different type from that of the Irish—more tolerant—allowing even of attendance occasionally with that of Protestant worshippers. Such was the case even fifty-two years ago, when the venerable Daniel De Vinne was traveling in this work, now New Orleans district.

How little has been done to invade and conquer these regions for Christ is seen in the fact that, after fifty years of Methodist labor in this State, the aggregate of white communicants in both bodies is less than nine thousand persons. Shall this condition of things remain undisturbed? Must our relation here as a church be only that of a missionary society to freedmen? Can we do nothing largely aggressive upon the kingdom of Satan? It is not well that our work be limited to the cities other men have built, nor to the vineyards others have planted.

We shall appeal directly to this Missionary and to the Episcopal Boards for men and means with which to make trial for one year to establish missionary posts on new ground among a class hitherto neglected by Protestants. Failing in this appeal, or if disappointed in the results, we shall submit, from a well ascertained necessity, to be always only the Afro-American Conference of the Methodist Episcopal Church.

MISSISSIPPI COLORED CONFERENCE. The Mississippi Colored Conference of the Methodist Episcopal Church South commenced its third session in Vaiden, Mississippi, November 4, 1870, at ten o'clock A. M. Bishop Doggett was present, and opened Conference with reading the Scriptures, singing and prayer, and a few introductory remarks.

THE SOUTHERN FARMER, published at Memphis, Tennessee, is a very valuable periodical. The November number is more than usually interesting, and is filled with matter of the greatest importance to Southern planters and farmers. Terms, \$2 a year.

SPECIAL ATTENTION is directed to the announcement from the faculty of East Alabama College, which we publish this week.

Whatever is done by those around you, be yourself fully determined to walk in the most excellent way.

THE REDUCTION.

The action of the book agent in reducing the subscription price of the Nashville Christian Advocate is producing "no small stir" in the Advocate family. The Western Methodist has come down to the Nashville gauge. From the expressions which we find in other papers, we judge that they apprehend much damage from this course of the General Conference organ. The only point we have thought of in connection with the subject is whether the greatest good of the entire church will be secured. If the course adopted at Nashville kills off some of the other church papers, will our Methodism be advantaged by it? If the Nashville Advocate were to secure every one of their subscribers, would there be any gain? But it is almost certain that the result would be fewer readers of a church paper, and a great loss to our church in influence, piety and intelligence. While we think that we have as many church papers as the wants of the church require, we should not like to see the number less. There is room and patronage for all, and an ample field for the extension of their circulation. Taking this view of the matter, we doubt whether the General Conference would have distinctly advised the reduction of the price of the Nashville Advocate. If such a step had been anticipated, the resolution respecting the cheapening of our publications would have received some important modifications. We imagine that Dr. Redford has been actuated by a sincere purpose to subserve the best interests of the whole church; but, in common with many others, we fear he has made a serious mistake. The editor of the St. Louis Christian Advocate makes the following points:

1. It is the opinion of brethren that the instructions of the General Conference to reduce the prices, of which they were aware, had reference chiefly and primarily to the books and particularly to the hymn book and Discipline. They were, therefore, disappointed that the Nashville Advocates should be made the subject of the first and an extraordinary reduction in price, the books not even sharing the favor, and the reduction being placed first where it ought to be made last, for the reason that the most of the Conferences are not dependent upon the Book Concern for a weekly religious periodical, but are exclusively for the hymn book and Discipline.

2. The plans of the agent contemplated the reduction of the price of that periodical down to the point of cost, and adopting the policy that periodicals should not be "a source of revenue to the Publishing House." With that policy they do not agree, as in the first instance and in preference to the other books named—the hymn book which enters into the worship of the church, and the Discipline which contains the code of laws by which it is governed. These, it is their opinion, and they suppose it is a public sentiment, ought to be, more than all other publications, favored with advantages for wide circulation, and for this purpose profits ought to be made on other publications of not such general value and demand to be applied to cheapening them.

3. It is considered that injustice is done to the Annual Conference organs by this policy, the ultimate result of which, it is thought, will be compulsory reduction in their prices, which, with their limited resources, they cannot afford; and being thus virtually subjected to a competition with the paper upheld by the resources of the Book Concern, which may waive profits on its periodicals, and remain sustained by the other departments of its business. In this connection doubts were entertained of the practicability of publishing that paper at the figures proposed without loss, but which the agent assures us can be done.

Dr. Myers, in the Southern Christian Advocate, closes a lengthy article with the subjoined observations:

We therefore believe that Dr. Redford, wise as he is, in putting down the price of the Nashville Advocate has made a serious mistake. It was worth fully \$3 a year. Everybody knew it. To publish it at less was to encourage the people to look for truth and religion at less than their true value. They are prone enough to depreciate the gospel in every form—and hence they pay so stintingly for it. It is an error at "headquarters" to encourage this withholding of its fair value from the gospel and its instrumentalities. If anything was made at

the price, the Publishing House was entitled to it. It gave the "quid pro quo," and nobody was cheated, defrauded or damaged, and it should have maintained this fact. And this profit thus honestly made by the paper, which had advantages for circulation, and a hold upon the people's purse, which books can never have, should have been used to equalize their chances of distribution among the people by making them cheaper. Besides this, it will take a great many more subscribers to bring to the House the same aggregate of money the old price would have brought; and these will be those who take the paper because it is a good paper, large, the organ of the church officers, not those who take it because it is cheap—cheaper than its worth indeed—but because of its real value. We risk little in saying, very few will take it at \$2 who would not have done so at \$3; and still that they got more than the worth of their money. Then how much of what the church would willingly have given, that might have been used to reduce the price of books, has been lost to it by this new policy? And besides this, our friend Redford has unwittingly damaged the circulation of every other church paper, even where he has not increased that of his own—for he has put a false plea into the mouths of penurious Methodists, who know nothing and perhaps care nothing about the real facts of the case—that \$3 is too much to pay for a church paper, and they consequently abandon their own organ, and yet do not patronize that of the Publishing House.

But the mistake is made, and perhaps cannot be undone. Meanwhile let wise men think that because Dr. Redford in haste has made it, that is no reason why others should make a like mistake. But lest there be too few of these wise men, the Southern Christian Advocate must prepare for the worst, and it, therefore, though reluctantly, must open its columns wider for promiscuous advertisements—unless the preachers forbid by getting us, before the first of January, two thousand new subscribers. And if subscribers complain that they get too little reading and too much advertising, our friend Redford has hereupon shouldered, which have borne up the Publishing House, and he can afford to take on him the blame the new policy may invoke.

Death of the Rev. Adam S. Riggs.

In our last issue we noticed the death of the Rev. Adam S. Riggs, presiding elder of the McMinnville district, Tennessee Conference. On the authority of one of the daily papers, it was stated that he died on Wednesday, but he lingered until Saturday night, October 23, when he sweetly fell asleep in Jesus. In his death we have lost one of our chosen friends—a man whom we highly esteemed and loved. He was a devoted Christian and an excellent minister of Christ. We loved to hear him preach; his sermons were plain, pointed and highly evangelical—just the man we should like for our pastor. He was a man greatly beloved by all who knew him, and his death is considered a public calamity. His funeral took place in Shelbyville on Monday, October 31. All business houses were closed, and a solemn stillness, broken only by the knell which sounded forth from the steeples of all the churches, attested the profound grief of the entire community. A special train was sent by the superintendent of the railroad to take a large company from Nashville who wished to show their respect for their former pastor and friend. The remains, by particular request, were conveyed to the Presbyterian church—the largest in Shelbyville—the cortege being the most imposing ever seen in that city. The church was crowded to its utmost capacity. Many ministers of different denominations were in attendance; the Rev. Mr. Bryson, pastor of the Presbyterian church, the Rev. Drs. Young and Kelley, and Felix R. Hill, assisted in the service. Solemn dirges were sung by the choir, and a discourse was delivered by the devoted friend of the deceased, the Rev. Dr. McFerrin. The discourse was highly appropriate, and produced a powerful effect on the vast audience. After its delivery, the remains were conveyed to the cemetery and deposited by the side of those of his first, presiding elder, the Rev. Samuel S. Moody—one of the noblest men that ever lived and died. There they lie, sleeping together sweetly until the voice of the archangel and the trump of God shall wake them from their long repose. What a greeting when they shall rise together at the resurrection of the just! The solemnities at the grave were performed by the Masons, of whose fraternity he was a worthy member. Nashville Christian Advocate.

Principles believed will add fiber to the soul, but sentimental cant clogs the soul with dead matter.

PRAISE.

It is the melody of the heart. And just as the heart is attuned, so will the melody thereof be poured forth. If set to objects earthly, temporal, the praise will be of things of time and sense. If set to heavenly things the melody will be of a sublimer, richer strain—this key-note bringing into consonance all parts and sustaining the unison until the close.

All nature is full of melody to God. The "music of the spheres" is the voluntary and willing melody of praise that floats out from every part of the great universe of God, saying: "Praise him, sun and moon; praise him, ye stars of light; praise him, ye heaven of heavens." The earth, once the fair and spotless garden of God, blurred as it is by sin, has tongues of praise, a voice of melody. The babbling brook, the rolling river, the majestic ocean, all utter praise. The humble ambush, the tastily arranged park, the symmetrical garden, the grand old native forest, all utter praise. The insignificant pebble, the mighty granite, the sea-girt rock, all utter praise. The blushing rose, the modest lily, the parti-colored geranium, all utter praise. The warbling lay of the forest songster, every genus of every species of beasts, every living creature, all utter praise. Earth's myriad voices, united in accordant strains, form a grand orchestra, which utters forth praise to God.

Man, the greatest of all, having the greatest capacity of all for praise, is loth to praise his Maker, and stands dumb in the presence of all until the chords of his heart are touched by the divine affluents. Then he begins the endless theme of praise; then, attuned to higher anthems, he calls upon "all within him to praise the Lord." He looks at himself and says: "I will praise thee, for I am fearfully and wonderfully made." He looks at the earth, ye dragons and all deeps, fire and hail, snow and vapors, stormy wind fulfilling his word, mountains and all hills, fruitful trees and all cedars, beasts and all cattle, creeping things and flying fowls, kings of the earth and all people, princes and all judges of the earth, both young men and maidens, old men and children, let them praise the name of the Lord; for his name alone is excellent, his glory is above the earth and heavens." He looks at the heavens and says: "Praise him, ye heaven of heavens, and ye waters that be above the heavens." Thus the sweet singer of Israel chants God's praise in one hundred and fifty psalms, and closes with that climactic note: "Let everything that hath breath praise the Lord. Praise ye the Lord."

Let us learn of David to praise the Lord, imbibe and cultivate its spirit, utter its voice, realize its sweet and heavenly influence. To the "broken and contrite heart" God offers the "garment of praise for the spirit of heaviness," that with exultation he may sing: "O Lord, I will praise thee; though thou wast angry with me, thine anger is turned away, and thou lovest me." To the faithful who stand on enchanted ground, and "bring the sacrifice of praise," "praise is comely" for they declare: "Praise waiteth for thee, O God, in Zion." To the way-worn veteran, who is looking out from his lofty point of experience to catch glimpses of that city of which it is written, "Thou shalt call thy walls salvation, and thy gates praise," his anthem of praise is: "Thy statutes have been my song in the house of my pilgrimage," and when life's fleeting breath is spent

"Praise shall employ my nobler powers; My days of praise shall ne'er be past While life and thought and being last, Or immortality endures."

To no kind of begging are people so averse as to begging pardon; that is, when there is any serious ground for doing so. Where there is none, this phrase is as soon taken in vain as other momentous words are upon light occasions.—Anon.

Those who will not return to the duties they have neglected cannot expect to return to the comforts they have lost.

NEWS FROM THE CHURCHES.

DAYTON, ALA., Nov. 9, 1870.

Mr. Editor: I have just closed a meeting of two weeks' continuance at this place, in which I received into the church twenty-three members—five by certificate and eighteen from the world. The number of conversions I do not know definitely; I know of fourteen or fifteen certainly. I was compelled, for want of help, to close the meeting with a number of penitents at the altar. Most of the converts were connected in some way with the Sabbath school. I was assisted during the first week by Dr. J. Hamilton, of Mobile, and the second by Dr. A. H. Mitchell, presiding elder, and Rev. T. S. Abernethy, Sr.

We have here the best colored congregation I have ever served. They have never left us, and ask to be continued next year in charge of the pastor of the white congregation. Of this I hope Bishop McTyeire will make a note, and in making the appointment for this place look out a man of a good constitution.

I am closing out my fourth year with these good people. I will be able to report all my collections, and the presiding elder and preacher paid up. This I have done every year. Yours truly,

JAS. D. CAMERON.

ONE GRACE LEFT FOR THE RICH.

The following address of Dr. Thos. Brainard, of Philadelphia, delivered many years since, manifested much skill and faithfulness, and was attended with wonderful success, though previous efforts—thirty-nine in number—had proved unavailing. One rich man put down \$10,000, and others followed liberally, till a complete success was attained. This is the address to the rich:

"Brethren, the Lord has denied to you the privilege of exercising many of the most precious graces of the Christian character, which, in his infinite mercy, he has vouchsafed to the rest of us. You never knew what it was to repose absolute, unassisted faith in God for the things of this world. You never had to go to sleep at night without knowing where your breakfast was to come from. You never had a sick child wasting away for the want of costly luxuries. You never had to deny yourself the gratification of the impulses of pity when a sufferer came to the door. You never had to endure the humiliation of being damned for an honest debt without knowing whether you could ever pay it. All these unspeakable advantages in developing Christian character an inscrutable Providence has taken from you and bestowed upon us poor men. The one solitary grace of the Christian life which has been denied to us and given to you is the grace of liberality, and if you don't exercise that, the Lord have mercy on your souls!" United Presbyterian.

They who doubt the truth of religion because they find no Christian who is perfect, might as well deny the existence of the sun because it is not always noonday.

Obituaries.

Died, near Pelham, Choctaw county, Alabama, NATHAN GILBERT, son of J. H. and Eliza Johnson, aged two years, eleven months and twenty-nine days.

Little Nathan, who was but a sunbeam in the home of his now desolate parents, and who gladdened their hearts by his sprightliness of mind and affectionate disposition, just as he began to be the pride of his father and the hope of his mother, passed like the bubble upon the ocean, which springs up, glitters for a moment in the sunbeam, breaks, and is lost in the broad expanse which first gave it birth. So the spirit of little Nathan, though it glittered but for a moment upon the shores of time, has launched out upon the broad abyss of eternity, where it will rest in the bosom of him who said: "Suffer little children to come unto me, and forbid them not, for of such is the kingdom of heaven." S. H. T.

TRIBUTE OF RESPECT.

The following preamble and resolutions were passed by the Autaugaaville (Alabama) Sabbath school:

WHEREAS, It has pleased God, in his wise and merciful providence, to remove from our midst and from this Sabbath school WILLIAM M. HOWARD, by death, to his reward on high; and WHEREAS, We esteemed him as a youth of promise to society; agreeable and affable in his intercourse with the world; strongly attached to the church and her institutions, especially the Sabbath school; good and obedient as a child, and the cherished hope of a widowed mother and family; therefore, be it

Resolved, 1. That we meekly bow to this dispensation of God's providence, feeling assured that the Judge of all the earth will do right.

2. That his death, so sudden and unexpected, has occasioned sadness and sorrow throughout the school, and that we mourn his loss with Christian humility and resignation.

3. That we deeply sympathize with his bereaved and afflicted mother, brothers and sister, and commend them in our affections, and with our prayers, to him who can "temper the winds to the shorn lamb."

T. J. MOTLEY,
J. H. WARREN,
JOSEPH WILKINSON,
Committee.

Autaugaville, Ala., Oct. 8, 1870.

Died, at his residence in Claiborne county, Mississippi, September 29, 1870, THOMAS YOUNG, M. D.

Dr. Young was born in Union district, South Carolina, on the fifteenth of November, 1801. He married Mrs. A. A. Callum, of Mississippi, January 14, 1844.

He was engaged in the practice of medicine in Claiborne county for many years—an ornament to his profession, and eminently successful as a practitioner. For many years he was a member of and steward in the church. I need hardly say he was consistent in his life and faithful in office. Three sons bear his name and honor his memory; his widow lives, bereaved.

A short time before his death he returned from a visit of exposure, much fatigued, laid aside his case of medicines, and observed to his wife: "I shall have no more use for this case. I have done with the practice of medicine." A few days before his death he said: "Have no funeral sermon preached to eulogize me at my burial; let the burial service be read, and lay me away to rest. Place no stone or monument at my grave. I shall be glad to be remembered by my friends, without eulogies or the use of marble."

In his last hours he was tranquil and hopeful. Trusting in Christ, he triumphed over death, to live forever. A life full of years, full of usefulness, he closed in peace.

B. JONES.

Dr. WILLIAM J. GIBSON was born in Columbia county, Georgia, on the third of November, 1808, and died near Fayette, Jefferson county, Mississippi, on Monday, the first of August, A. D. 1870.

The following was received from a lady friend in Jefferson county, Mississippi, who had long, well and favorably known the deceased:

"Dr. R. N.—Dear Sir: Dr. Gibson became a member of my father's family about the twenty-seventh of November, 1841. He remained with us until November 27, 1850, at which time he was married to Mrs. Elam. During the nine years he was with us we never once had cause to regret his being an inmate of Clifton. On the contrary, he was ever a welcome member of the fireside circle; and by his genial disposition, social manners and unceasing fund of knowledge added not a little to our home enjoyments. Dr. Gibson was a member of the Methodist Church, and the June after his arrival in this State placed his lot in old Cane Ridge church.

"My earliest recollection of him is that he often presided at family prayer. He was a zealous Christian, and took

an active part in the removal of 'Cane Ridge' to its present locality. After his marriage his membership was moved to Fayette.

"Dear old friend of my youth, and counselor of my maturer years! I know that he is at rest, and now holds his membership in a church where neither sorrow nor death can enter."

In addition to the preceding extract from a letter received by the writer from Mrs. Laura McGill, daughter of Mr. Israel Coleman, in whose family our deceased friend for a series of years was domiciled, some more lines may be added. The early training and proclivities of Dr. Gibson were Methodististic. He never renounced the principles thus early instilled, nor has the writer ever known him to desert a friend nor fear a foe. Firm, fixed, steadfast, reticent, diffident and modest, he bound to him his friends as with "hooks of steel." He apprehended a sudden death, and was prepared for the summons. His work was accomplished—his reward where affliction is no more known.

Brother JAMES FORBES died at his residence in Tensas parish, Louisiana, May 4, 1870, aged sixty years.

He was born in Marion district, South Carolina, whence he removed in early life to Mississippi, from which State he subsequently removed to this parish, where he resided until his death. He was married, in 1858, to Miss Emily A. Smith, who, with her three children, survives to mourn his loss.

About sixteen years ago he joined the Methodist Episcopal Church South as a seeker of religion. He never professed great attainments in religion; yet judging by his life, and the sentiments he expressed, he was in advance of some who, with less timidity, more readily believe themselves what they desire to be. On all suitable occasions he owned his Lord. He long made it a rule to be found among the penitents at the altar in every meeting he attended, and ever thus sought Zion's prayers and help to become a conscious child of God. He assured the writer, shortly before the sickness that ended his mortal life, that he would willingly give up all the world, and die at that moment, could he but possess the Christian's assurance of heaven. Moreover, though his disease was rapid and painful, he gave himself, to devout and earnest prayer, and on the evening of his death was heard to exclaim: "O glory to God!" Surely we need no more evidence of the correctness of his faith or the safety of his immortal spirit.

Brother FORBES was an excellent citizen, and in all the relations of life commended the respect and won the love of men. Blessed with ample means—for he was diligent in business—he became the friend of many who but for him would have suffered much. Quietly, without ostentation, it was his delight to relieve the widow and the fatherless; and no needy brother ever appealed to him in vain. With drones, spendthrifts, and such like, he had not much sympathy; but the honest, deserving poor were the objects of his regard and the beneficiaries of his bounty.

Indeed there was an exceeding luster in his life of mercy and benevolence that few are privileged to possess. His house was the home of the preacher, and many of the weary sons of Asbury have found comfort and kindred spirits beneath his roof, where they were cheered and refreshed amid the toils of life.

Many God in his mercy visit and support the bereaved ones of that now broken household! Many confidence in the infinite love and sufficiency of God enable hope to picture to their faith a glad reunion where sickness, pain and death are felt and feared no more!

A FRIEND.

Pimples and Brown Spots on the face, Eruptions, Blisters, Scrofulous Diseases, and all sores arising from impure blood, are cured by Dr. Pierce's Alt. Ext. or Golden Medical Discovery. As an Anti-Bilious and Liver medicine, and for habitual constipation of the bowels, it works wonderful cures. Sold by druggists. Pamphlet on the above diseases sent free. Address Dr. B. V. Pierce, Buffalo, New York.

FIVE CENTS ADDITIONAL will buy shoes with Silver or Copper Tips, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. **sent 3mr**

THE GREAT REPROBATE
Eureka Aluminum Gold Watch Co.
HAVE APPOINTED
L. V. DEFOREST & CO., JEWELERS,
40 and 42 Broadway, New York,
SOLE AGENTS FOR THE U. STATES,
and have authorized them to sell their great Eureka Aluminum Gold Watches for \$3, and to warrant each and every one to keep correct time for one year. This Watch we guarantee to be the best and cheapest time-keeper that is now in use in any part of the globe. The works are in double cases, Ladies' and Gent's size, and are beautifully chased. The cases are made of the metal now so widely known in Europe as Aluminum Gold. It has the exact color of gold, which it always retains; it will stand the test of the strongest acids; no one can tell it from gold only by weight. The Aluminum Gold being 1-10 lighter. The works are made by machinery, same as the well known American Watch. The Aluminum is of great merit, hence we can afford to sell the Watch for \$3 and make a small profit. We pack the Watch safely in a small box and send it by mail to any part of the United States on receipt of \$3.50—duty cents for packing and postage. Address all orders to
L. V. DEFOREST & CO.,
40 and 42 Broadway, N. Y.

AGENTS WANTED IN ALL PARTS OF THE UNITED STATES TO SELL
L. V. DEFOREST & CO.'S
ALUMINUM GOLD JEWELRY
Agents are making \$200 to \$300 per week selling the Aluminum Jewelry. The best imitation of gold ever introduced. It has the exact color, which it always retains, and stands the test of the strongest acids. No one can tell it from gold only by weight—the Aluminum Gold being about 1-10 lighter. L. V. DeForest & Co. are selling their goods for one-half the price gold jewelry is sold for, and on most liberal terms to agents—one-fourth cash, balance in thirty, sixty and ninety days. We send persons wishing to act as agents a full and complete assortment of Gold, Silver, and Steel Jewelry, Rings, Lockets, Ladies' and Gent's Chains, Pins, Rings, Sleeve Buttons, Studs, etc., for \$100—\$25 to be paid when the goods are received, the other \$75 in thirty, sixty and ninety days. Parties wishing to order goods and act as agents will address

CHILDREN TEETHING.
Mrs. WINSLOW'S SOOTHING SYRUP
FOR CHILDREN TEETHING,
greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is
SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give relief to yourselves, and
Relief and Health to Your Infants.
We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "What we know," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for
"Mrs. Winslow's Soothing Syrup,"
having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.
Sold by Druggists throughout the world.

**J. W. BLACKMAN'S
COMMERCIAL COLLEGE.**
61 CAMP STREET,
Corner Commercial Place, N. O.
Open day and evening the entire year. Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from fifteen to fifty years of age attend. Instruction given privately to each student, who has a separate desk to himself, and is put through a thorough and systematic course of study to qualify him for the situation he intends to fill. Persons who have neglected their education are here specially prepared for business. Students from the country may obtain board in the family of the principal.

Terms—Twenty per cent. less than other Commercial Colleges in this city. Cost of all Commercial Course only \$100. Average time, three to four months. The principal has been a professional teacher in New Orleans since 1851. For circulars address
J. W. BLACKMAN,
nos 1y New Orleans.

**SOUTHERN METHODIST
Male High School, New Orleans.**
The exercises of the second session of this institution will commence on MONDAY, the 21st day of September proximo, in the basement of the German Methodist Church, Dryades street, between Felicite and Enterprise.

The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither pains nor expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which a thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their mental qualifications, but also their ability to impart instruction.

The rates of tuition have been fixed as low as is consistent with thorough instruction. For further information as to terms, etc., apply at the School.
D. I. RAST, Principal.

REVIEWS.—Bishop J. C. Keener, D. D., Rev. L. P. Parker, D. D., Rev. J. B. Walker, D. D., Rev. J. C. Miller; Messrs. J. P. Harrison, William H. Foster, H. F. Given, John G. Parham, William H. Dameron, W. S. Mount.

The Child's Corner.

A MASQUERADE.

A little old woman before me
Went slowly down the street,
Walking as if weary
Were her feeble, tottering feet.

From under her old poke bonnet
I caught a gleam of snow,
And her waving cap-string floated,
Like a pennon, to and fro.

In the folds of her rusty mantle
I sudden her footstep caught,
And I sprang to keep her from falling,
With a touch as quick as thought.

When under the old poke bonnet
I saw a winsome face,
Framed with the flaxen ringlets
Of my wee daughter Grace.

Mantle and cap together
Dropped off at my very feet;
And there stood the little fairy,
Beautiful, flushing, sweet!

Will it be like this, I wonder,
When at last we come to stand
On the golden, ringing pavement
Of the blessed, blessed land?

Leading the rusty garments
We wore in the years of time,
Will our better selves spring backward,
Swerve in a youth sublime?

Instead of the shape that hid us,
And made us old and gray,
Shall we get our child-hearts back again,
With a brightness that shall stay?

I thought—but my little daughter
Slipped her dimpled hand in mine;
"I was only playing," she whispered,
"That I was ninety-nine."

The Household.

TEMPERANCE DEBATE.

Two boys met at the corner of the principal street in the village of P. James Stone, the larger boy, was carrying a tin pail, and from the manner in which he held it as he walked it was evident that it was full of something very good—milk, perhaps. But it was carefully covered up, so that Johnny Sands could not see what it was. The boys saluted each other.

"How are you, Jim?"

"Hello, Jack!"

It isn't nice to say "Jim" instead of James, or "Jack" instead of John; but those boys thought it was pretty. Some large people regard this vulgar custom as evidence of smartness, and their use of nicknames is the exact copy which the boys imitate when speaking to each other.

"Where are you going?" asked John.

"O, I've been," was James' laconic reply.

"Been? Where?"

"Well—what do you want to know for?"

"Nothing, little curious, that's all."

"You'll solemnly promise not to tell, will you?" said James, looking all about him.

"Of course," answered John, whose curiosity was excited by the mysterious manner of his friend. The latter said nothing, but led John out into the meadow behind the village. They both sat down on the grass under a spreading oak.

"It's warm," said James, wiping his face with his handkerchief.

"That's true enough," answered John, following the example of his companion.

"Wouldn't it be jolly now if we only had something to drink—something to strengthen us, you know?" slyly remarked James.

"I wish I had some good fresh buttermilk," replied John, smacking his lips.

"Buttermilk! ha, ha, ha!" laughed James. "Why, you nippy, there is no strength in that; you might as well eat your old boots. Here—smell of that!" Saying this, he uncovered his pail and raised it to the nostrils of his companion.

"What is it? It smells like medicine."

"Why, Jack, you are the greenest fellow I ever saw—actually!"

"I—I s'pose I am; but you haven't told me what this stuff is."

"It is—but taste of it!"

This, however, John refused to do until James told him what it was. The latter took a deep draught, and then, looking rather contemptuously at John, he said:

"The fellows would all laugh at you, Jack, if I should tell them that you couldn't tell pure rye whiskey from medicine."

"Rye whiskey!" exclaimed John, springing to his feet; "is that whiskey?"

"Well, s'pose it is; what of it? What are you looking so dramatical about?"

"Jim, you are on the high road to drunkenness."

"If you say that again I'll thrash you," exclaimed James eagerly.

"Well, now you are!" said John boldly. "I earnestly advise you to throw the rest of that dreadful stuff away."

"Pure whiskey won't hurt anybody," said James.

"O, yes it will. Pure whiskey intoxicates, and anything that intoxicates is destructive to mind, body and soul. Besides, I don't believe that your whiskey is pure."

"It's very queer that you know so much about whisky, while you cannot tell what it is when you see it," sneered James.

"My father is a physician, as you know," said John, "and I get my information as to the nature of intoxicating drinks from him; and my own eyes teach me the effects of them, for I see drunkards every day. Father says—"

"O, I know what you are going to say—that I have been drinking bad rum, logwood and other disagreeable things; but I got this at the York House—there, you musn't tell, you know."

"Pure as you think it, doesn't it make you feel sick and giddy—dizzy, I mean?"

"O, yes. I have to lie down awhile sometimes, but that will wear off after a time."

"It didn't wear off in your father's case, Jim," said John in an altered tone. A long pause followed this home-thrust, during which James' thoughts were busy with the past. He remembered distinctly when his father was a respectable moderate drinker. He also remembered his gradual tendency downward until *delirium tremens* finished the story of his life. And was he not following very early in the footsteps of his dishonored parent? The thought made him shudder; and, almost unconsciously, he struck the pail a blow with his foot, and the poisonous liquid flowed upon the ground. John noted this with great satisfaction, but said nothing. He expected to see some effects of the draught James had taken, but observing none, he expressed his surprise.

"O, I have become accustomed to small quantities," said James. "I am a little light-headed, and might stagger some if I tried to walk; but it would require four times that quantity to intoxicate me. Say," he added suddenly, "what does your father think of total abstinence?"

"He says it is the only safe rule."

"It isn't in the Bible, anyhow."

"There is no express precept, it is true, in favor of total abstinence; but it condemns drunkenness in an awful manner, and experience has shown that most men are not safe unless they wholly abstain. Therefore we argue that the spirit of the Bible is in favor of total abstinence."

"Spoken like a preacher!" said James admiringly. John blushed, and said that if there were any merit in the argument it must be attributed to his father.

"But," said he, "don't you see how impossible it would be for Christ, the Saviour of the world, to sanction anything which would in any degree destroy the souls he designed to save?"

"Jack," said James, interrupting his comrade, "have you got religion?"

This question was so suddenly asked, and was apparently so irrelevant, that for a few moments John was embarrassed. Should he answer it or not? If he did, James might ridicule him; if he did not, he might throw away, by his refusal, an opportunity for saving a soul. He recovered himself; and, looking frankly into James' face, he answered bravely: "Yes."

"I thought so. Well, I don't believe, Jack, that I'll ever become anything, either in this world or in the next, unless I become a Christian. I feel already a dreadful appetite for all kinds of stimulants, and I am sure that until I get religion I cannot conquer it entirely. I suppose you'll think I am a young philosopher, but I'm somewhat older than you, Jack; and then I have often studied the subject—for I might as well confess that I have felt bad over my ruinous ways. Well, as I was going to say, I have carefully watched Christians, and I notice when they are converted they become different. Now, if I could become different from what I am there would be hope for me; don't you see? What shall I do, Jack, to become a Christian?"

John, who had prepared for ridicule only, was astonished at the turn in the conversation. And is it not often the case that individuals whom we least suspect of entertaining religious thoughts are more tender in spirit and more easily approached than we imagine? This fact ought to encourage young Christians to speak to their companions on the subject of salvation. Many a youth may thus be led to the Saviour, and preserved from the sin which has ruined so many—intemperance. And how happy it will make the young servant of Christ to know that he has saved a soul from death.

It is, perhaps, needless to add that John directed the repentant boy in the way to the cross, and that James found strength to resist his appetite for strong drink by a change of heart.

Is there not some young friend of yours whom you can influence in the same way?—*New York Christian Advocate.*

The Farm and Garden.

THE COST OF FENCES.

A writer in the Illinois Agricultural Report for 1864 says: "The fences of the United States have cost more than the houses, cities included; more than the ships, boats and vessels of every description, which sail the ocean, lakes and rivers; more than our manufactures; of all kinds, with their machinery; more than any one class of property, aside from real estate, except, it may be, the railroads of our country." This may seem like an exaggerated statement, but a little estimate will show that it is not so extravagant as would first appear.

The first cost of the fences of New York State was between \$100,000,000 and \$150,000,000. Robinson gives it as \$144,000,000. Assuming this to be approximately correct, and estimating the first cost of the fences of the other States on the same basis, we have, as the total first expense of the fences of the whole country, the vast sum of \$1,296,000,000!

This requires to be renewed once in ten years, giving \$129,600,000 as the annual cost, to which should be added, however, at least half as much more for repairs, making the aggregate of \$194,400,000 as the annual national expense—a sum, we believe, below the actual figures, yet quite beyond comprehension. Nicholas Biddle estimated that the "fence tax" of Pennsylvania was \$10,000,000 a year. General James T. Worthington, of Ohio, says that there are eighteen million acres of land in Ohio inclosed with forty-five thousand miles of fences, at a prime cost of \$115,000,000, and at a yearly expense for repairs, etc., of \$7,680,000.

If roadside and boundary fences can be dispensed with, half the cost of fencing will be saved. That cost is now an annual tax of \$1.50 on every acre of improved land in the United States—the "fence tax" being twice or three as great as the aggregate of the State and local taxes combined.

Why cannot a large portion of this outlay be saved for some profitable investment? Every dollar released from fences may be added to productive wealth. Fences are dead capital; they pay no interest, and are a constant drain upon the pocket. As Mr. Greeley says: "We poison our land with fences; they are a shelter for weeds, as well as a vast and useless expense." The indirect waste which they inflict is almost as great as their direct cost. A Virginia zigzag fence occupies five acres for every hundred inclosed, thus imposing a five per cent. tax on the market value of the soil—a tax that would be felt to be oppressive if it was for the payment of the national debt instead of to shelter a growth of weeds.

Shall we fence stock out or in? There is no doubt that our people now expend four times as much money to fence stock out as would be required to fence it in. Our present custom, which commands universal fencing, is the worst blunder the practical American people ever made. Enterprising and original in many matters, they are here following slavishly, generation after generation, the habit of the earliest English colonies—following it, though very expensive and inconvenient, because it is "the good old way." Europe has learned a more rational method. There are ten times as many fences in Illinois as there are in Germany, and Dutchess county, in New York, has more than all France. In France, Germany and Holland farmers hold their lands in common, with only narrow paths between.

The continental system of having few or no fences is evidently the best; and even exclusive England is slowly adopting it. America will inevitably follow, for economy, taste, thorough tillage, fair play and good sense command it, and the time will come, before many years, when the absence of farm fences will be a sign of progressive culture.

The immense cost of sustaining fences; the inconvenience of having them always in the way of thorough tillage, and of easy ingress and egress to the premises; the impassable snow-drifts accumulated by them; the shelter they afford to weeds and briars; the protection they afford to many of the worst animal pests of the farm, and their unsightly appearance generally throughout the country, as the receptacle of stone heaps, piles of brush and dead trees, to say nothing of the countless acres rendered worse than useless by their occupancy, would seem sufficient reasons for disposing of fences wherever not indispensable for purposes of pasturing.—*Exchange.*

MODE OF MANAGING A RESTIVE HORSE.

A groom, mounted on a high-mettled hunter, entered the High street of Coldstream, and when opposite Sir John Major's banks' monument the horse began to plunge and rear to a fearful extent, swerving to the right and then to the left, but go forward he would

not, nor could all the exertions of the groom overcome his obstinacy. The street was filled with people expecting to see the animal destroy himself on the spikes of the iron railing round the monument, when Mr. McDougal, saddler, walked up to the groom and said: "I think, my man, you are not taking the proper method to make the horse go; allow me, if you please, to show you a trick worth knowing." "Well," said the groom, "if you can make him go, it's more than I can," which Mr. McDougal took a piece of whipcord, which he tied with a firm knot on the end of the animal's ear, which he bent gently down, fastening the end of the string to the check buckle of the bridle; this done, he patted the horse's neck once or twice, and said: "Now let me see you go quietly home, like a good horse." Astonishing to relate, the horse moved off as gently as if nothing had happened. Mr. McDougal says he has seen in London horses which no manner of force could make go, while this mild treatment was always successful.—*Kelso Chronicle.*

Scientific.

Good lean meat contains fifty per cent. of water, thirty of fat and but twenty of fibrine, albumen, gelatine and mineral matters. A good extract of beef, like Liebig's, contains no fat, but seventeen per cent. of water, a little more gelatine and a little less albumen than lean meat, four times as much mineral matters, and fifty-one per cent. of creatine and other secondary albuminous products. These latter, not found in fresh meat, are very stimulating, even more so than fresh meat, and excite the digestive organs, aiding them to dispose of food which would not be digested without this aid. Of course, such extracts are not to be depended on alone for food.

Huxley insists that those who claim to have succeeded in producing life by "spontaneous generation" (the term may be excused as more generally intelligible than *heterogenesis* or *abiogenesis*) must be mistaken, as the experiment is constantly tried on an enormous scale, with contrary results. Meats, fruits, vegetables, the very materials of the most fermentable and putrescible infusions, are preserved to the extent of thousands of tons every year, in tin cans or glass jars, and kept for years, without putrefying, fermenting or getting moldy. He asks what it can be but the exclusion of germs that prevents the growth of *Vibriones* and *Bacteria*? This question defenders of the theory are bound to answer. Air is not necessary for fermentation or for the life of these protozoa; so its exclusion cannot be the cause.

A curious case of death is recorded in the Moravian, and is worthy of a place in this scientific record. That paper says of Michael Baalie, a colored preacher at Twistwyk, near Gradenenthal, South Africa: "The manner of his death was enigmatical. At a store in the neighborhood, a tame ostrich was running about, which had conceived a dislike to Baalie, because he had refused to give it some bread which it had smelled in his pocket. As soon as it saw him, a few days after this occurrence, it at once ran toward him. As a creek separated them, Baalie sat down, and his opponent remained on the watch on the other side. After an hour's waiting, the bird got tired and commenced to feed again; whereupon Baalie stepped into a boat, and in a quiet manner as possible rowed across. As soon, however, as the ostrich observed him, it started in pursuit, chasing him into the house of the storekeeper. It remained close by, without moving from the spot. The storekeeper, who enjoyed the sport, told Baalie he was too fearful, and that the ostrich would retreat if he marched boldly up to it; and, in case it did not, that he could easily master it by seizing it by the neck. Baalie took a stick and went toward the bird, which at once attacked him, and, before he could defend himself, kicked him in the abdomen on the same spot where he had sustained an injury the day before. He died in a few days afterward."—*Independent.*

THE PRAYER IN THE NIGHT.—One dark, stormy night mother woke up. Hark, who is talking? The wind is blowing. It is not that. Who is talking? Mother did not speak; she kept still to hear what her little girl said. "Alice was not fretting; she was not worrying. She was not afraid of the dark or the wind. How do you know? I will tell you what she was saying—saying all to herself in her snug little bed by her mother's side: 'God, take care papa, mamma, I. Dear, grand God, take care papa, mamma, I. God take care birdies. Dear God up in the sky, I love you, I do, I do,' and with that her little voice died away, and she fell asleep again."

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,
SOUTHERN MUSIC HOUSE,
80 & 82.....BARONNE STREET.....80 & 82
New Orleans.

The house of WERLEIN is the oldest, established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS AND ORGANS that this country affords are being sold at ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS,
HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS,

Strings, Violins, Guitars, Banjos, Flutinas, Accordions, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE
OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our Factory.

Very respectfully,
PHILIP WERLEIN,
Southern Agent for Dunham & Sons, Marshall & Miltner, and Hale Piano Manufacturers, New York; and Needham & Son, manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rosewood case, carved legs, front round corners, serpentine moldings, possessing sweet, powerful and deep tone, with perfect touch..... price, \$450 00
Style 6 Organ—Five stops, diapason, violin, octave, piccolo and tremelo, five octave, two sets reeds, with "on and off" tremelo and combination swell, oil-finished black walnut case, paneled all around, with moldings, brackets and engraved ornaments, music desk and carpeted double blowing pedals..... 150 00
Style 10—Six stops, two sets reeds..... 165 00
Style 13—Eight stops..... 185 00
Style 20—Eleven stops..... 365 00
Please send for price lists of Pianos and Organs. no 14 ly

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS.
We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mountings.	Price.
28-Inch Bell..... 250 lbs.	400 lbs.	\$65 00
36-Inch Bell..... 650 lbs.	800 lbs.	135 00
40-Inch Bell..... 800 lbs.	1000 lbs.	175 00
48-Inch Bell..... 1200 lbs.	1500 lbs.	265 00

These Bells are warranted for one year against breakage in ordinary use.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

on the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven south of Jackson, will reopen on

The 1st of September, 1870.

Thorough instruction in all the branches given.

Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$35 for the term of forty weeks. The languages and music extra. A deduction of \$50 made for pastors of churches. Number of pupils last term, 165.

For catalogue address

ly30 3m

H. F. JOHNSON, President.

EAST ALABAMA COLLEGE,

AUBURN, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages afforded.

It is just the place to train Methodist boys, and there is room for three hundred, if every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOPTON, President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE and R. W. RAYNE,

General Agents for the Arrow Tie, 124 Carondelet St., New Orleans.

BRACES AND TRUSSES.—DR. JOHN C. AKUPELL.

Dr. Akupell informs the medical profession and others that he has constantly on hand and for sale a complete assortment of BAYNARD'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, neuralgic weakness, and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and nervous affections, constipation and chronic diarrhoea, female derangements and extreme debility, the womb, Rectum, Piles, prolapsus-ani, and weakness of the male and female system.

These light, cool and springy appliances are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in a treatment; place the above affections in a new and more hopeful light, and often cure cures where medicine can only mitigate, any more than it can cure a hernia or a dislocated joint.

He specially desires an examination of these appliances by the profession and others. Where necessary the professional application of the above braces will be under his supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adopted by the United States government for the use of the army and navy. Terms cash. Consultations free. Send for their pamphlet, it is better to call.

Office and residence, 152 JULIA STREET, near Camp, New Orleans. Jell 1 y

NOTICE. DR. IDAHOE'S.

Rocky Mountain Indian Remedy, FOR THE BLOOD.

This remedy will cure Rheumatism, Gout, and all kinds of disease of the skin, and every variety of Cutaneous Eruption, from the simplest rash to the most inveterate scurf, Leprosy, Blisters, Piles, Pimples, Brown Discolorations, Scaly Rash, Tetter, Ringworms, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat, and Croup. Scalds, Ulcers, Scrofula, and Cancer, all yield to its influence in a few applications.

PRICE, \$1 PER BOTTLE.

Within two months this remedy has created a sensation among the people afflicted with the above diseases. It never fails to cure radically the very worst case; and the demand for the medicine is very great.

DR. IDAHOE'S.

Rocky Mountain Indian Salve, FOR CORNS, BUNIONS AND PILES.

This Indian Salve cures Corns, Bunions and Piles in a few applications, radically. The buyer will apply the Salve but two or three times, when the inflammation will be removed at once. It is never known to fail. Price, Fifty Cents a box.

For sale by all Druggists, and at FLEMING'S Patent Medicine Depot, corner of Tchoudre and Magazine streets.

Consultation free. 25 St. Charles Street, in the office of A. Boncher, New Orleans, La.

For testimonials refer to our pamphlet. Country orders promptly attended to.

UNDER THE ICE.

HOW CERTAIN ANIMALS LIVE IN WINTER.

Our readers know that there are two kinds of respiratory apparatus—lungs which inhale air, abstract oxygen from it, and give, in return, chiefly carbonic acid; and gills which absorb the oxygen dissolved in water, and also give off chiefly carbonic acid which is more readily dissolved in water than the oxygen. The apparatus is possessed by mammals, birds, etc.; the latter by fishes; and as lungs are incapable of taking oxygen out of water, and gills cannot take it from the air, or, in other words, as lungs cannot breathe air, and gills cannot breathe water, animals with lungs are drowned in water, while fish are drowned in the air. A small number of amphibious animals possess both lungs, and can therefore breathe either air or water, and thus live in both. It has been, however, observed that muskrats and other swimming mammals with lungs could travel a considerable distance under ice without reaching any breathing hole on the surface, and it was for a long time a problem how they succeeded in living so long and traveling so far without access to the atmosphere. The problem has been answered by S. Newhouse, in a work called *Trapper's Guide*, from which we extract the following:

"Muskrats have an envious method of traveling long distances under the ice. In their winter excursions to their feeding grounds, which are frequently at great distances from their abodes, they take in breath at starting and remain under water as long as they can. They rise to the ice and breathe out the air in their lungs, which remains in bubbles against the lower surface of the ice. They wait till this air recovers oxygen from the water and ice and then take it in again, and go on till the operation has to be repeated. In this way they can travel almost any distance and live any length of time under the ice."

"The hunter sometimes takes advantage of this habit of the muskrat in the following manner:

"When the marshes and ponds where muskrats abound are frozen over, and the ice is thin and clear, on striking into their houses with his hatchet, for the purpose of setting his traps, he frequently sees a whole family plunge into the water and swim away under the ice. Following one for some distance he sees him come up to renew his breath in the manner above described."

"After the animal has breathed against the ice, and before he has time to take it in again, the hunter strikes with his hatchet directly over him, and drives him away from his breath. In this case he drowns in swimming a few rods; and the hunter, cutting a hole in the ice, takes him out. Mink, otter and beaver travel under ice in the same way; and hunters have frequently told me of taking otters in the manner I have described, when these animals visit the houses of the muskrat for prey."—*Manufacturer and Builder*.

The chemical analysis of rain water is held of high importance, because it has been said that, as it is the washings of the atmosphere, it ought to give us information upon the deleterious substances that are mixed with the air we breathe. And, curiously enough, examinations have proved that the drops that fall over the sea are much purer than those that fall in the neighborhood of great cities or extensive manufacturing; for while the former contain only a little harmless salt, the latter are strongly impregnated with poisonous acids, generated by coal combustion. At Manchester seven grains of vitriol have been collected from a gallon of rain water, a proportion fatal to vegetation, and likely to have effect upon the public health; for the acid must exist in the air before it can get in the cloud-droppings, and while in the atmosphere it is taken into the lungs. Rain, however, comes from the higher air; we breathe the lower strata. In view of this fact, some Italian chemists have considered that, instead of testing the rain to learn what adulterates the atmosphere, we ought to analyze the dew, because that is formed in the region which man tenants, and ought to contain only those organic or inorganic corpuscles which are likely to affect him.

CHRISTIAN INFLUENCE.—Every Christian who is not laboring to be conformed to the image of Christ is depriving mankind of some good which can be communicated by his agency alone. On the other hand, he who lives in habitual communion with God is surrounded by divine influence, silent and impalpable, it is true, yet not less real. Like the high priest, he comes from the holiest place, with the odor of incense fresh about him. His life is the most eloquent of sermons, and

the amount of good which he does, merely by living in the world as a Christian ought to live, is beyond the power of human calculation. To the church, pious example, though of very high importance, is not essential to an appreciation of the truth and sanctity of your faith; but the exclusively worldly man gathers most, if not the whole of his ideas of true religion, not from the standard testimony of the Bible, nor from the representations of faithful ministers, but from the example of those who are said to be under its influence. It is the volume of man's life which he reads; and as its page is fair or blotted, so does he decide upon the nature and the value of the faith whose characters, it is alleged, are written there.—*The Christian*.

CORAL.

Mr. Darwin some years ago prepared a map, in which were put down all the reefs of coral which surround the numerous islands in the Pacific. In one almost straight line of ten thousand miles, from Pitcairn Island to China, these reefs stud the vast ocean. The reefs are classified, for convenience, into three groups: 1. The *atoll* reef is a circular or curved ridge of coral, visible at low water, but nearly covered at high water, and having a tranquil lake in the center. The diameter varies from one to sixty miles, in different examples, and the shape is usually an irregular oval. There is generally a profound depth of ocean at a very short distance from the *atoll*.

In one case the depth is one thousand feet at a distance of less than a quarter of a mile; but, far more noteworthy than this, there is one *atoll* at two hundred feet from which no soundings could be found with twelve hundred feet of line; and another, where seven thousand feet found no bottom a mile and a quarter distant! The interior lake, or lagoon, is never profoundly deep. We may therefore picture to ourselves an *atoll* as the top of a steep conical submarine mountain, with a kind of crater at the summit. 2. The barrier reef differs from an *atoll* in having one or more islands within it; it forms, in fact, a barrier around an island or islands, at some considerable distance, and separated by a moat of very deep water.

Some of them run along parallel to the shore; in some the islands have joined to form a continuous strip of dry land, while in many instances the island forms a very lofty mountain. 3. The shore reef resembles a barrier reef, in having land within or near it; but the dry land is very near and the intervening water shallow, while in most instances there is no island or islets, the whole reef being submerged at high water. In all the three kinds—*atoll*, barrier and shore—the reef has been formed by countless myriads of coral insects, working at the construction of their hollow dwellings. Mr. Darwin, by tracing a local connection between volcanoes and reefs, arrived at a conclusion that wherever an *atoll* or barrier reef had been formed the bed of the ocean had subsided, while at the spots where shore reefs occur the bed of the sea is either uprising or stationary.

Islands and mountains in the Pacific have been submerged by the subsidence of the ocean bed; and when the subsidence had taken place to a certain extent, coral insects set to work at their busy labors; for whether in the Pacific or the Mediterranean, the insect always works in the water, but at no great depth below the surface. All three kinds are satisfactorily accounted for on this view, as being three stages of development. The shore reefs are formed first, as a fringe of coral around the coast of an island; by further subsidence each of the latter develops into an *atoll* reef, by the insects constantly building on the top of it. The Pacific coral is, doubtless, as beautiful as that of the Mediterranean, but being more remote from inhabited countries, it has not much chance of being worked.—*Chambers' Journal*.

JUST AS I AM.—Some time ago a poor little boy came to a city missionary, and, holding up a dirty and worn-out bit of printed paper, said: "Please, sir, father sent me to get a clean paper like that." Taking it from his hand, the missionary unfolded it and found that it was a page containing the lines which began thus:

Just as I am, without one plea,
But that thy blood was shed for me,
And that thou biddest me come to thee,
O Lamb of God, I come.

The missionary looked down with interest into the face upturned to him, and asked the little boy where he got it and why he wanted a clean one. "We found it, sir," said he, "in sister's pocket after she died, and she used to sing it all the time while she was ill, and she loved it so much that father wanted to get a clean one and put it in a frame, to hang it up. Won't you please give us a clean one, sir?"

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,
654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."—*Agassiz*.

Introduction to the Study of Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our age; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine hundred and thirty in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by its pupils this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend to the attention of all interested in educational improvements and progress.

HAWESSEE COLLEGE,

MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to invite the attention of friends in the Cotton States to the excellent location, delightful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has boarding arrangements for about fifty students. The steward supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half per Week

Tuition is \$40 per annum. Students will be received at any time, and charged to the end of the term. For circulars address

REV. F. M. GRACE,

Madisonville, Tenn.

CENTENARY MALE INSTITUTE,

SUMMERFIELD, ALABAMA.

reopens on the FIRST MONDAY of next October.

The school is in good condition. It has had a steady increase every year since it has been in the hands of the present teachers.

The total expenses from October to July will be only \$251.50.

Luncheons will run daily between Summerfield and Selma at the opening of the session.

JOHN MASSEY, Principal.

MEMPHIS CONFERENCE FEMALE INSTITUTE, JACKSON, TENN.

This old and popular institution affords all the advantages of a first class Female College, and is steadily improving.

Charges are moderate. Full session begins September 5, 1870.

For catalogues address the President.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY,

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on WEDNESDAY, SEPTEMBER 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Licentiate in the ministry and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes.....\$30 00

Tuition in Grammar School.....25 00

Tuition in Law Department.....40 00

Incidental.....2 00

(Tuition and incidental fee required in advance.)

Boarding fee, paid once.....5 00

Boarding can be had in the best families at from \$16 to \$20 per month.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. B. Wood

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, NOVEMBER 26, 1870.

NO. 45.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Nov. 19.—Viscount Trevelyan has had an unofficial interview with Secretary Fish, and will soon be received as the successor of Mr. Berthemy. Berthemy has informed Secretary Fish that Trevelyan's credentials are on the way from Paris.

It has been ascertained from the proper authorities that no important correspondence has recently occurred bearing on the Alabama claims or the Eastern question. Delegations from New Mexico and Colorado are here, urging their admission into the Union.

GAZETTE, Nov. 21.—Captain Combs, of the brig Ellen Bernard, from New York, when four days out, latitude thirty-two degrees twenty-two minutes, longitude seventy-three degrees, eleven minutes, fell in with schooner Morning Star, of Ritchieville, New Brunswick, dismantled and full of water. He sent a boat to her and took off William Eddy, cook and steward, who reported having been on the wreck nine days, with nothing to eat or drink except codfish. Captain Matthias Bell was washed overboard at the time the schooner capsized; also John Bell, the mate, and three seamen, William Bell, Mark Hutchin and William Quinn, all belonging to Ritchieville.

The schooner sailed from Cape Hayti, October 15, bound for Boston, with a cargo of logwood, hides and coffee.

MONTGOMERY, Nov. 21.—The Alabama Legislature met to-day at twelve M. No quorum of the Senate present. The House was temporarily organized, but adjourned without transacting any business. There are many rumors afloat as to the object of the Senate in not meeting to-day, as more than a quorum was in the city.

The Senate and House are to count the vote cast at the late election. It will probably be done this week, and the new officers installed. Governor Lindsay, Senators Warren and Spencer, Congressman Hays and other prominent politicians are in the city.

SAN FRANCISCO, Nov. 21.—The late election returns from Nevada make the Assembly a tie, and give the Senate a Republican majority of three.

The election of delegates to the Legislative Council in British Columbia was held on the fourteenth instant. The Victoria candidates pledged to the Dominion scheme, which will be successful.

EVANSTON, ILL., Nov. 21.—A fire was discovered on the steamer Norman at half-past four this morning. She was cut loose, and, with the steamer Pine Bluff, floated in the stream and was burned to the water's edge. While burning she loaded against the new steamer City of Evansville and destroyed it. Humphrey, Lewis & Co.'s wharft, with a large amount of freight, was also destroyed.

MINNESOTA, Nov. 22.—Rev. Dr. Harnes, pastor of the First Baptist Church, died this afternoon of renal fever.

NEW YORK, Nov. 22.—Louis E. Branger, formerly assistant adjutant general of Louisiana, was committed to the Tombs to-day, to await a re-arrest from Governor Warmoth, on the charge of forgery.

WASHINGTON, Nov. 23.—Advises from Mexico say that the conditions offered on the Tehuantepec railroad bill were such as to render Congress nominally worthless. Juarez returned the bill to Congress with certain observations, and it is believed, will pass in an amendable shape soon.

Reports to the Census Bureau from two hundred counties show an increase in the negro population.

A dispatch to the Navy Department from Key West announces the killing of Chief Engineer Kolton, by Surgeon King, of the Albatross, in a fracas on shore.

Census reports from Wilmington, North Carolina, show the population to be thirteen thousand four hundred and thirty-five.

FOREIGN.

MADRID, Nov. 17.—The Duke of Madrid was proclaimed King by the Cortes. The Carlisle twelve blank votes.

LONDON, Nov. 17.—The idea of a twelve blank vote from the powers conferred, to Prussia, has been abandoned.

An Austrian dispatch, in reply to the dispatch of the Emperor, is identical with Great Britain's.

The evening papers concur in the vigorous war measures.

The merchants here decline to charter Russian vessels. Turkey is preparing for a desperate conflict.

CONSTANTINOPLE, Nov. 17.—The Sublime Porte did not receive Gortschakoff's note until yesterday. The dispatch is conciliatory in tone, but insists upon a revision of the treaty of 1856.

The Ottoman government will make an energetic reply. London, Nov. 17.—Exceptions from military service in Russia have been limited, and all classes have been summoned.

VIENNA, Nov. 17.—In the Reichsrath the debate on the address of the crown closed to-day by Hatoeki, who justified the dissolution of the chambers.

BRUSSELS, Nov. 17.—The Independence Belge says Prussia will intervene in favor of the Pope.

LONDON, Nov. 19.—A warlike feeling decidedly prevails all over England. An important division exists in the cabinet on the Russian question, which will likely lead to the dissolution of the ministry.

Granville insists that England must now put down her foot firmly. Gladstone hesitates to commit himself for or against war on the present provocation.

LONDON, Nov. 19.—Dispatches from Tours state that England, with the approval of the provisional government, has renewed her proposals for an armistice based upon a pecuniary war of compensation, the razing of the frontier fortresses, and the neutralization of Alsace and Lorraine, the great powers guaranteeing the fulfillment of these conditions by any future French government. A congress is to assemble to settle these questions and also to deliberate upon the Eastern question. Dispatches from Vienna state that American policy is suspected to be in favor of Russia on the Eastern question, and that Austria has sent a firm reply to St. Petersburg and also to Berlin.

LONDON, Nov. 21.—News from Montevideo to October 27 has been received. Revolutionary crisis in Uruguay continues. Business in the city was paralyzed. The city was threatened with an attack by the Blanco party.

LONDON, Nov. 21.—Wade, secretary of the British legation in China, writes from Peking under date of November 8, saying: There will probably be no necessity for the employment of a military force to obtain redress for the Tientsin outrages.

LONDON, Nov. 21.—A special from Brussels says there is every indication that Von Moltke is anticipating a supreme effort by Trochu, and fearing the ability of the Germans to successfully resist a sortie in force, has ordered the abandonment of the former plan of the expeditions in the west and southwest of France, and the concentration of all forces in the immediate neighborhood of Paris. Mauteuffel has been stopped in his march toward Amiens, and ordered to join the army of Saxons investing north Paris, while the Duke of Mecklenburg and the army of Prince Frederick Charles having effected a junction between Etampes and Pontoise, are approaching Paris from the south. These movements will increase the force investing Paris to three hundred and seventy thousand men.

On the other hand, the armies of the Loire, east and north, are without any formidable foe in their front. Chancellor Hothorley has formally notified his colleagues he will resign his office should the government declare war against Russia. Bright, Lowe, Cardwell and Childers, however, will do the same.

The city is full of rumors to the effect that Prince Gortschakoff has informed Lord Granville of his willingness to withdraw his note, and submit Russia's claims to a congress.

A correspondent at Rome, fifteenth instant, describes the preparations there making for the reception of Victor Emanuel. By order of the Pope, every church will be closed during the King's presence in the city.

The States of the Church have been placed under an interdict.

LONDON, Nov. 21.—A writer in the Pall Mall Gazette urges the sending of John Bright to Washington as envoy from Great Britain to insure pacific relations with America in the present crisis.

It is reported that Russia has fifty ironclad monitors at Nikolaief, drawing less than eighteen feet of water. The Russian fortifications at Azof have been greatly strengthened, and are represented to be impregnable.

The Levant Herald, of the nineteenth, says it has reason to believe that the Sublime Porte has ordered the military reserves to be called into service.

A number of German vessels are blockaded in Yarmouth harbor by French ironclads. London, Nov. 23.—It is reported here to-day that Turkey, for the sake of peace, is anxious to have the Black sea opened.

Semi-official statements received from Vienna to-day deny that Austria has proposed a conference relative to the Eastern question, and also deny that Italy has declined to co-operate with England and Austria for the enforcement of the provisions of the Paris treaty.

PARIS, Nov. 23.—In the Diet yesterday Count Androssy, on being questioned, declined to give any information as to negotiations with Russia touching the Black sea difficulty.

ST. PETERSBURG, Nov. 23.—To an address from a Lithuanian regiment, the Czar replied yesterday: "I hope there will be no war, but if God wills it, you will prove your known devotion."

LONDON, Nov. 23.—The Times has a special dispatch from Constantinople, that the Sultan invokes the interposition of the guaranteeing parties.

The Morning Post has information confirming the report that Italy will act in concert with England and Austria.

LONDON, Nov. 23.—Late Calcutta advices announce that the threatened Russian complications have completely prostrated business. The market is overstocked with Manchester goods. Heavy losses are expected.

The war office distinctly contradicts the monarch's reception of a reply from Russia.

The annexation of Bavaria to North Germany is imminent. The annexation treaty with Wurtemberg was signed to-day.

All foreigners, including neutrals, are forbidden to leave Paris. The Prussians had already forbidden them to pass Prussian lines.

Versailles dispatches of yesterday report several skirmishes south of La Loupe, in all of which the French were successful. The eighty-third French regiment captured one gun from the Prussians.

THE RUSSIAN NOTE.

WASHINGTON, Nov. 19.—The following is the text of Russia's note: TARKOFF BELLO, October 20.

BARON: In making the communication to the principal Secretary of State of her Britannic majesty, presented to you by the orders of his majesty the Emperor, you will be good enough to make its import and objects clearly understood. When at the commencement of the year 1866 a conference was talked of for the purpose of preventing the war then imminent in Germany by the assembling of a congress, in discussing the basis of it with Earl Russell you were able to point out to him the compensation, and the guarantee which certain eventualities of a nature to modify the statu quo existing in the East would render necessary to Russia. This was recognized by Earl Russell with the utmost fairness. He did not deny that every alteration effected in the text and the spirit of the treaty of 1856 must lead to the revision of that document. Although these eventualities have not been realized, Lord Granville will not deny that that treaty has suffered grave modifications in one of its essential parts. What cannot but impress Russia in these modifications is not the factitious and hostile tendency toward her, of which they bear the stamp. It is not the consequences that may result to a great country from the establishment on her frontier of a small quasi independent State. It is above all the facility with which, ten years after its conclusion, a solemn transaction, invested with European guarantees, can be infringed in its letter and spirit under the very powers which ought to be its guardians.

In the presence of such a precedent, what value can Russia attach to the efficacy of this agreement and to the guarantee of security that she believed she had found in the principle of the neutralization of the Black sea. The equilibrium established in the East, therefore, is destroyed to the detriment of Russia, and the resolution taken by our august master is to re-establish it.

Her Britannic majesty's government would never consent to leave the security of its coasts to the mercy of an agreement, which is no longer respected, and it is too just not to recognize that we have the same duties and the same rights; but what we especially desire to establish is that this decision implies no change in the policy his majesty the Emperor follows in the East. You have several times already been made to enter into explanations with the cabinet of London, upon the general views the two governments had upon this important question, and to point out a conformity of principles and of interests, which we have noted with much satisfaction.

We have deduced, therefore, that it is neither from England nor from Russia that the dangers can come which could threaten the Ottoman empire. That the two cabinets have an equal desire to maintain its existence as long as possible by the settlement and conciliation of the differences between the Porte and the Christian subjects of the Sultan, and that in case a decisive crisis should occur notwithstanding these efforts, both are equally resolved to ask the solution above all in a general agreement of the great powers of Europe: "We have not ceased to entertain these views. We believe that their complete analogy renders a serious misunderstanding possible between her Britannic majesty's government and ours.

We attach the utmost value to it as the best guarantee for preserving the peace, and the equilibrium of Europe from the dangers which may result from the complications in the East.

He hopes that there will be no misunderstanding. By order of his majesty the Emperor your excellency is authorized to reiterate the assurance of this to Lord Granville. We shall sincerely congratulate ourselves if the frankness of these explanations should contribute to it by removing all possibility of misunderstanding between her Britannic majesty's government and us. I am, etc., GORTSCHAKOFF.

A VALUABLE salt mine was recently discovered at Kittanning, Pennsylvania, by workmen who had bored to a depth of one thousand and twenty-five feet in quest of oil.

THE TEN largest libraries in the United States contain altogether over one million books.

ASTRONOMICAL PROPHECY.—Prof. Smith, astronomer royal for Scotland, predicts that next winter, and probably that of 1871-72, will be correspondingly cold. From observations made since 1847 it appears that a hot time occurs about every eleven years, followed at an interval of about two years by a very cold time.

TERRIBLE MASSACRE OF FEJEES. THREE HUNDRED PERSONS BUTCHERED.

The Auckland (New Zealand) Herald of October 6 says: By the United States steamship Resaca we have the Fiji News to the twenty-seventh of August. Our last advices reported the massacre, on the Ba coast, of three hundred and seventy natives by the heathen mountaineers occupying the central hills of Viti Levu. These savages appear to have been active on the opposite side of their hills, in which the Rewa river takes its rise. The tribe of Korobalava, having determined to secede from the heathens of Solo-i-ra and join the Christians of Matailaban, was suddenly attacked by the Solo-i-ra people, and two hundred and sixty killed. It is hoped that these massacres will unite the Christian tribes, who are immensely superior to the mountaineers in numbers and resources, but divided by intestine feuds. In that case the mountaineers could speedily be subdued. On the small island of Boga the natives have also been fighting, and two killed. At Kadava a white man, named Edward Heritage, went to the house of another, named George Lockington, and, being intoxicated, a quarrel ensued. Lockington sent for some Fijians to help him. Heritage kept them at bay with a revolver, and fired three shots without mischief. He then went to his boat and armed his half-caste boys to make an attack on Lockington and the natives. Lockington then shot Heritage with duck-shot in the forehead, but the wound, though serious, is said not to be fatal. The corporation of Fiji settlers had proved a failure, and was adjourned sine die by the delegates at their first meeting. The inhabitants of Levuka have, therefore, decided to form a local corporation, and have requested Cakobau to issue a commission to certain of their number to administer law in his name.

Our last advices reported the massacre, on the Ba coast, of three hundred and seventy natives by the heathen mountaineers occupying the central hills of Viti Levu. These savages appear to have been active on the opposite side of their hills, in which the Rewa river takes its rise. The tribe of Korobalava, having determined to secede from the heathens of Solo-i-ra and join the Christians of Matailaban, was suddenly attacked by the Solo-i-ra people, and two hundred and sixty killed. It is hoped that these massacres will unite the Christian tribes, who are immensely superior to the mountaineers in numbers and resources, but divided by intestine feuds. In that case the mountaineers could speedily be subdued. On the small island of Boga the natives have also been fighting, and two killed. At Kadava a white man, named Edward Heritage, went to the house of another, named George Lockington, and, being intoxicated, a quarrel ensued. Lockington sent for some Fijians to help him. Heritage kept them at bay with a revolver, and fired three shots without mischief. He then went to his boat and armed his half-caste boys to make an attack on Lockington and the natives. Lockington then shot Heritage with duck-shot in the forehead, but the wound, though serious, is said not to be fatal. The corporation of Fiji settlers had proved a failure, and was adjourned sine die by the delegates at their first meeting. The inhabitants of Levuka have, therefore, decided to form a local corporation, and have requested Cakobau to issue a commission to certain of their number to administer law in his name.

ASTRONOMICAL PROPHECY.—Prof. Smith, astronomer royal for Scotland, predicts that next winter, and probably that of 1871-72, will be correspondingly cold. From observations made since 1847 it appears that a hot time occurs about every eleven years, followed at an interval of about two years by a very cold time.

TERRIBLE MASSACRE OF FEJEES. THREE HUNDRED PERSONS BUTCHERED.

The Auckland (New Zealand) Herald of October 6 says: By the United States steamship Resaca we have the Fiji News to the twenty-seventh of August. Our last advices reported the massacre, on the Ba coast, of three hundred and seventy natives by the heathen mountaineers occupying the central hills of Viti Levu. These savages appear to have been active on the opposite side of their hills, in which the Rewa river takes its rise. WASHINGTON, Nov. 19.—The following is the text of Russia's note: TARKOFF BELLO, October 20.

BARON: In making the communication to the principal Secretary of State of her Britannic majesty, presented to you by the orders of his majesty the Emperor, you will be good enough to make its import and objects clearly understood. When at the commencement of the year 1866 a conference was talked of for the purpose of preventing the war then imminent in Germany by the assembling of a congress, in discussing the basis of it with Earl Russell you were able to point out to him the compensation, and the guarantee which certain eventualities of a nature to modify the statu quo existing in the East would render necessary to Russia. This was recognized by Earl Russell with the utmost fairness. He did not deny that every alteration effected in the text and the spirit of the treaty of 1856 must lead to the revision of that document. Although these eventualities have not been realized, Lord Granville will not deny that that treaty has suffered grave modifications in one of its essential parts. What cannot but impress Russia in these modifications is not the factitious and hostile tendency toward her, of which they bear the stamp. It is not the consequences that may result to a great country from the establishment on her frontier of a small quasi independent State. It is above all the facility with which, ten years after its conclusion, a solemn transaction, invested with European guarantees, can be infringed in its letter and spirit under the very powers which ought to be its guardians.

In the presence of such a precedent, what value can Russia attach to the efficacy of this agreement and to the guarantee of security that she believed she had found in the principle of the neutralization of the Black sea. The equilibrium established in the East, therefore, is destroyed to the detriment of Russia, and the resolution taken by our august master is to re-establish it.

Her Britannic majesty's government would never consent to leave the security of its coasts to the mercy of an agreement, which is no longer respected, and it is too just not to recognize that we have the same duties and the same rights; but what we especially desire to establish is that this decision implies no change in the policy his majesty the Emperor follows in the East. You have several times already been made to enter into explanations with the cabinet of London, upon the general views the two governments had upon this important question, and to point out a conformity of principles and of interests, which we have noted with much satisfaction.

We have deduced, therefore, that it is neither from England nor from Russia that the dangers can come which could threaten the Ottoman empire. That the two cabinets have an equal desire to maintain its existence as long as possible by the settlement and conciliation of the differences between the Porte and the Christian subjects of the Sultan, and that in case a decisive crisis should occur notwithstanding these efforts, both are equally resolved to ask the solution above all in a general agreement of the great powers of Europe: "We have not ceased to entertain these views. We believe that their complete analogy renders a serious misunderstanding possible between her Britannic majesty's government and ours.

We attach the utmost value to it as the best guarantee for preserving the peace, and the equilibrium of Europe from the dangers which may result from the complications in the East.

He hopes that there will be no misunderstanding. By order of his majesty the Emperor your excellency is authorized to reiterate the assurance of this to Lord Granville. We shall sincerely congratulate ourselves if the frankness of these explanations should contribute to it by removing all possibility of misunderstanding between her Britannic majesty's government and us. I am, etc., GORTSCHAKOFF.

A VALUABLE salt mine was recently discovered at Kittanning, Pennsylvania, by workmen who had bored to a depth of one thousand and twenty-five feet in quest of oil.

NOVEMBER.

BY ALICE CART.

O winds! ye are blowing too rough, too rough,
Thrilling and chilling too soon the hours,
And the summer has not been long enough
For all your beauty, my flowers, my flowers!
Not half, nor half of long enough
For all your beauty, my dear, dear flowers!

O frosts! ye are falling too soon on the leaf,
Dulling the graces and dimming the
And the summer has been too brief, too brief,
For all your cooling, my doves, my doves!
Too brief, the summer has been too brief
For all your cooling and wooing, my doves!

O waters! hold to your fountains fast,
Nor diminish from the hedge-rows nooks,
And the summer has gone too fast, too fast
For all your sweetness, my brooks, my
Too fast, the summer has gone too fast
For all your ringing and singing, my brooks!

O clovers, clovers! keep to your red
And sickle your little leaves gray with dew;
Too early the summer shades are fled,
For all your moaning, my insect crew—
Aye, all too early summer has fled
For all your droning, my insect crew!

Oh! wash from your roundness not, fair
Moon,
But make the land with your brightness
And the summer has gone too soon, too soon
For all my joy because of the light—
Too soon, the summer has gone too soon
For all my joy because of the light!

Ah! colder, colder the shadow slides,
And leaning upward the daisy stands,
Like one o'er-reaching the icy tides
To catch the touches of loving hands—
Aye, reaching to catch o'er the closing tides
The last warm touch of the loving hands.

And the daisy will die, and the waning moon
Will fall in the sky, and the murmuring
Stand hushed, and my life will be o'er too
soon,
For all my joy because of His love,
Who made the land, and the leaves, and the
moon,
And all that is fair, with the light of His
love.

The Duty of the Church to Educate Her Own Children.

MR. EDITOR: That age has long since passed away when the church regarded ignorance the mother of faith and devotion. There is now no controversy among Protestants about the importance of education and denominational schools. The mind of the church seems, however, entirely taken up in building up colleges. At the same time, in my judgment, they greatly overlook and culpably neglect the foundation upon which their colleges are to be built up and liberally sustained.

The question is often asked: Why do our colleges fail from year to year to obtain the requisite number of students to sustain them? One says we have more colleges than we need; another that the preachers fail to do their duty, and a third that we need men of outstanding reputation to act as professors; and it may be the Conference put the wrong man in the field as agent. Now whatever of truth there may be in any or all of these apologies, the main difficulty is found in a proper appreciation and management of our primary schools.

If the Methodist Church had one hundred educated Methodist male and female teachers engaged in teaching Methodist schools in Alabama, properly directed by the pastors of the churches, both in town and country, the more wealthy and better educated in those primary schools would naturally seek higher advantages in education, and instead of agents and professors spending more money in hunting up students than their tuition is worth, the students would naturally make their way from Methodist schools to Methodist colleges. Our ministry generally are very zealous about keeping their own children in their own Sunday schools, and very properly so, but are culpably indifferent as to who is engaged in teaching in the week-day school. The week-day school is where character is permanently formed, and where the moral and religious views of the teacher permeate gradually but certainly the whole life, mind and character of the children.

I do not know of one purely Methodist preparatory school in Alabama. No wonder that Methodist children go to convents, and Presbyterian and Baptist colleges when we, by our ministerial action, if not teaching, show that it makes no difference who educates our children—Catholic or Protestant or infidel. Until the church all over the land wakes up to her duty and interest upon this subject we may not expect to see our college halls filled up.

When will Methodist people learn to respect their own church, her own intelligence? I have no objection to other denominations educating their own children. It is their duty to do so. But I know communities where the population is three to one Methodist, and not a single Methodist teacher in the academy, and the pastor of the Methodist church complaining that some of his members have sent their children to Catholic schools.

Our agents and preachers can never sustain our colleges until we commence at the right place. Let every preacher see to it that his church is properly and fully represented in the school on his station, and let the presiding elder look to this matter on his district, and instruct the church in her duty to herself and her children upon this subject. There is an almost entire want of educational advantages on our circuits. In this direction we have too many churches and too many schools, and in most instances neither as they should be—churches nor schools. Allow me to make a few suggestions on this subject.

Build central churches, and in connection central Methodist academies, and put intelligent, educated Methodist teachers in them. It may be replied: We cannot get them. And why? Because on the present plan, where every man wants the church and school house at his own door, the salary for teaching is so divided that no man capable of instructing the children can afford to do it for the pay.

Many of the people are looking to the public school system for help. It is almost an entire failure in Alabama—money wasted as it is now managed. If each quarterly conference and district conference would take up the subject not of sending our poor young men to college, but take up the subject of building up permanent Methodist academies within their own bounds, they might educate hundreds where they educate tens. We speak often of liberality to the churches. I fear many of us, both preachers and laymen, are making a scapegoat of what we call liberality to bear off the sins of negligence and infidelity to our own church and children.

S. P. RICHARDSON.

Lake Providence District Conference.

MR. EDITOR: Our District Conference has just closed. It met in the bright, promising little town of Delhi, on the Vicksburg and Shreveport railroad. The houses in this town are painted or whitewashed, and with its several stores, lawyers' offices, railroad, etc., is quite a busy little place. Judging from appearances, I should say the people there mean to be something.

The District Conference was by no means uninteresting; on the contrary, it was a pleasant time. It might have been more so, however, and the work of the church in this district might have been better attended to, if there had been more members in attendance. The number of members present was, however, very small in comparison with the number in the district. We who were there—we who saw and felt how much the object of the meeting was defeated—were strongly tempted to pass some pretty sharp resolutions. But then we thought that men who did not love the church enough to attend from a sense of duty, were probably too far gone to be benefited by resolutions.

The conference, however, did do something, or rather it resolved to do something, and the intentions of the conference I embody in the resolutions passed:

Resolved, That a Historical Committee be appointed to gather and write in a blank-book all items of interest in the history of the work of the church in this district.

Resolved, That the members of this body are required to gather all such items as are in their reach and forward to the committee.

In the above I have given you an abridged form of the resolutions. The committee appointed were Rev. F. T. Rawson, Oakley, Franklin

parish, Louisiana, chairman; Dr. W. S. McIntosh, Rayville, Richland parish, Louisiana, and the Hon. F. H. G. Taylor, Ila, Carroll parish, Louisiana.

If any of the brethren of the Louisiana Conference have items of interest connected with the history of Methodism in this district they will confer a favor by sending them to one of the above committees as soon as possible.

Another resolution was passed, which I give you entire:

Resolved, That the sentiment of this conference is that intemperance has increased to an unusual and alarming extent, and that even the church is at present somewhat involved in the unhappy results of this great social disease, and therefore we feel it the duty of the church to make, at this particular time, unusual effort to stay the mighty tide, and to enforce upon its members the more careful observance of the existing laws of the church on this subject.

There was a good deal of discussion in reference to the various interests of the church, and, in spite of the small attendance, good, I think, has been done. We had no Bishop, but our presiding elder filled the chair about as well. I have held three meetings on my own circuit, where, I believe, I have not labored in vain. This, though one of the most agreeable circuits I ever had, is a peculiar one, and my chief business this year is to harmonize. The churches are not compact; they need training, and much work of a peculiar nature. This I am giving them to the extent of my ability.

I shall have about \$100 missionary money, \$60 widows', orphans' and superannuates' money, and other collections in proportion.

The Advocate is gaining ground. I have broken the ice, and I believe proper exertions will put it into every Methodist family.

I never loved a people as I love these. They have wound themselves so about my heart that I feel I cannot do enough for them.

The delegates to the Annual Conference are: Captain H. P. Wells, Hon. F. H. G. Taylor, Dr. W. S. McIntosh, and Brother—Brigham: The alternates are: Judge W. W. Campbell, Rev. W. Kellar, R. West Hatch and H. W. Drake.

The next District Conference is to be held at Delhi, and we requested the presiding elder to fix the time in August. There is more leisure then, and we want a full attendance.

REV. WILLIAM WINANS DRAKE.

The Lord has sent upon us a time of deep mourning. He has called from among us his servant, the Rev. William Winans Drake, who died at Greenville, Mississippi, on the twenty-seventh of September, 1870.

The sad event has brought a bitter grief to his brethren of the Mississippi Conference, and a loss to the church that only the Master can repair. In the narrower circle of his family, and the few special friends who know his worth, and who saw him in all the phases of his exalted character and noble life, there is a pang of grief and a sense of loss which time and grace can only mitigate, not efface.

He was a worthy son of a distinguished father, the late Dr. B. M. Drake, of the Mississippi Conference, whose life-long labors in the ministry are a rich treasure to Methodism in Mississippi. The mother of the deceased, a woman of rare natural qualities and of superior attainments in grace—the sister of Prof. W. H. N. Magruder, of Baton Rouge, Louisiana—is now bowed with almost insupportable sorrow by the death of that son whom she rejoiced to see in his father's place, and who in every way was so great a delight to her yearning heart in her declining days. But she knows how to say: "The Lord gave and the Lord hath taken away; blessed be the name of the Lord." It is a mournful pleasure now to her to recall the visit she made to that son during the past spring, when she saw him at his own home, among the people to whom he had devoted nearly all the years of his pastoral life. She saw a home pure and tender in its affections, exalted in the tone of its life, sanctified by the

presence of the Spirit of the Lord, and ordered as became an elder in the church of God. She saw the energy, the gentleness, the cheerfulness, the self-sacrifice, the persistent constancy and the superior judgment which made him an example and guide in the family and in the church. She saw in him, too, the power of faith in Christ to sustain the soul in the severest trials and the heaviest responsibilities.

In the family he mingled the sweetness of Christian love with the firmness and dignity of the patriarch. To the wife of his youth he was almost an idol. There was in him a depth of meaning, a fullness of tender sympathy, a richness of noble impulses and purposes, an intenseness of yearning anxiety for the good of souls, a patience of endurance, and a beautiful symmetry of character, known only to her. To speak of her loss, and the loss to their little Bessie and Walton, beggars the power of language. It is mockery to intrude words upon an anguish so deep and unutterable as that which afflicts the heart of the bereaved wife. In deep sympathy we can only bow in silent and profound reverence before the awful dispensation of our heavenly Father. That Father knows what he does, and he will be the guide and support of the widow and the fatherless. O may the fullness of his blessed promise be realized in this case!

Brother Drake was born in Jefferson county, Mississippi; November 12, 1843. As was to be expected of a child brought up in the nurture and admonition of the Lord, at the age of twelve years he gave himself to God, at a camp meeting held at Spring Hill. He was a noble Christian boy, with a character marked for its integrity; a loving, dutiful son, and an affectionate brother. The home life of his boyhood teemed with incidents which he tenderly cherished for the sacredness of the blended life of joys and duties, play and pleasure, lesson and example, that went on in that Christian family of the parents—six sons and a daughter. The mother and three sons are left. Writing to his brother Steele, in June last, he says: "I would find great pleasure in paying another visit to Magnolia Springs and renewing the sacred recollections that gather round the spots where we played together and worked together, and loved; where our childish love flowed always in a living tide, untroubled, unsmiled, and free from pretense and gloss. * * I have feelings that shun expression; and, strange enough, I have been always most reluctant to express them to those who were most intimately associated with me in those scenes. * * Those scenes and times will never lose their beauty to me. But it is an unsatisfied look with which I look at scenes that are past and can never return; especially when I think of the havoc that time has made among the dear persons who were the actors, and how scattered the few who are still remaining. Such is life. It is unsatisfying all through, from childhood to age. The soul, uneasy and confined from home, rests and expatiates in a life to come. This life, with its limited conditions, is not large enough fully to engage the wide desires of the heart," etc.

In August following he says to the same brother: "I hope our lives will flow together again in a home far happier than the one we have left." These passages display the inner workings of a soul highly wrought in the texture of its faculties, and profoundly moved by the facts of this life, even as they occur in the simplicity of childhood, and by the still more powerful questions that the soul starts concerning its own nature and destiny. He read life by the light of the gospel of Christ. He studied and served Christ not only as the Reliever of the soul from the doom of hell, but also as the divine exponent of the nature and resources and destiny of man as man. That soul and body should be reunited in a triumphant resurrection was to him a source of supreme joy.

He was taking his academic course in Centenary College, Louisiana, when the war cut it short at the close of his junior year. Yet so diligent and proficient had he been, and so earnestly did he continue to devote himself to study, that the trustees of that institution, when they met after the close of the war, conferred upon him the unsolicited honor of the bachelor's degree. His appreciation of the distinction, and of the kindness of the trustees, was equal to his merit of the honor. While at Centenary he became deeply concerned about the doctrine and profession of perfect love. He determined to search the matter to the bottom. For weeks he fasted and prayed, and imposed upon himself every kind of self-denial, that he might obtain the blessing professed by many around him. He turned from books and professions to his own experience and the word of God, and became satisfied that the thing he was seeking was already in him, as a germ, and was only to grow to its full development. He regarded the day of ones conversion as the date of his salvation, and the date also of the beginning of perfection. He never found reason to change his view on this subject. His own life showed how faithful he was to the grace given when he was born of God.

He embraced the doctrines and discipline of Methodism with all his heart. He saw in the itinerant ministry the only efficient means of carrying the gospel to the poor. To this aggressive form of work he devoted himself with unwavering fidelity, actually enduring some of its severest trials. In 1862 he was admitted on trial in the Mississippi Conference, and was sent as junior preacher to Port Gibson and Colored mission. The year 1863 he spent as chaplain in the army, and 1864 on Adams Colored mission. In 1865 he was ordained deacon by Bishop Paine, and began that course of labors in Greenville district which ended with his life. He went to Lake Lee and Leota, where he spent a year of incessant toil, and laid the foundation of that personal influence and usefulness that became so remarkable throughout the district. His work for 1866 was Greenville and Lake Lee. The year following he was made elder by Bishop Paine, and put in charge of Greenville district and station, and was the only traveling preacher on the district. He had the same charge the next year. At the last session of his Conference he was left in charge of the district only. The first year of his stay in that region he had chills, but had had no serious attack since, until the spring of this year. The malady increased in severity and persistency, so much so as to cause anxiety, and finally alarm to his friends, though he himself did not fear. He was urged to leave the malarious district until the sickly season should pass; but misfortune had left Greenville without its appointed pastor, and Brother Drake, as the only minister at hand, insisted that he must stay with his people. His brother Perry writes to me: "He was taken with a chill on Friday night, the twenty-third of September; was out attending his duties all day Saturday; had another chill that night, and again on Sunday morning. In a few hours congestion of the kidneys set in, and after that he was scarcely conscious at all."

We need not the dying words of the man of God to assure us of his safety, but even the unconscious utterances of the soul will tell how its conscious hours have been spent. Our brother, in his delirium, "spoke much of his work," and once, when the cup of medicine was presented, asked: "Is it the sacramental cup? I'll take it." When it was known that the fatal disease had seized him, the stricken people crowded about the door of the parsonage to inquire of his condition and to offer sympathy and help. It was like children wring with agony for a dying father. Brother Drake left the manuscript of a half finished sermon, which he had been preparing to preach on the Sabbath that proved to be his last on earth. It is hoped that this fragment will be furnished for publication in the Advocate, especially as it breathes

the yearning of his soul for that people among whom and for whom he had so long labored. He had expected to see the members of the church growing in the power of a spiritual life, and the unconverted coming into the fold of Christ. He had recently held a protracted meeting, which seemed to yield no fruit. His soul grieved over the apparent coldness and worldliness around him, and it seems he intended to pour out his soul to his people in a pathetic portrayal of the yearnings of the Christian ambassador for the souls committed to his care. That people must now hear his voice from the rostrum of death. Truly they will allow the man whose life so beautifully illustrated

the truth he preached, and whose devotion to them made him a martyr to the good of their souls, though dead, yet to speak to them. O may they live his life, that their end may be like his!

The distinguishing characteristic of Brother Drake was integrity, wholeness—intellectual, moral and spiritual wholeness. His mind was finely balanced; he had a good memory, a sober, strong imagination, and a comprehensive, logical thought. He grasped his subject vigorously, and drew the lines of his analysis sharply. He pressed every proposition to its ultimate premises, and sounded the foundation of the truth. He studiously avoided the drapery of language, seeking to present the truth in the might of its own simplicity. The burden of the Master's commission lay heavy upon his heart. His preaching had the fervor and vigor of a soul in which the truth lived and grew; and he carried into all his ministrations a burning desire to do immediate good. His style was sober, earnest, clear, strong and straightforward. He was a laborious student. He read several books this year on horseback, and he had weekly readings in the Greek Testament with one of his preachers. He carefully wrote his sermons, but preached them extemporally. He studied his people as well as his books. In their actual lives and experiences he found the great facts and principles with which he had specially to deal in preaching the gospel. He was a man of remarkably sound judgment, rarely mistaken in a man or a measure. This, with his broad sympathies and commanding talent, fitted him for the post of presiding elder, and made him the trusted counselor of men of all ages. The preachers of his district confided in his judgment as much as they loved his sweet simplicity of his companionship. To Brother Drake's untiring efforts and sound judgment is due the reorganization of Greenville district. He went, as the itinerant only can go, into the neglected and unknown places on the bayous, and drew the people together and formed societies, and ministered the ordinances of the house of God and made their souls glad. The brethren of his Conference will remember the report he gave of his work at their last session—how he urged the importance of his work, and how he thrilled their hearts with admiration and hope. When that name is called at your next session, brethren, the awful silence of death will be the answer. Sorrow will fill your hearts; the lovely image will pass before you, but he will not be there to report and counsel and enjoy your communion, and to make you glad. Yet, thank God, he will be with you. O let us imitate his example, his faith, his devotion, that we may wear the crown with him!

W. T. J. SULLIVAN.

Good Advice.—For the multitude of enterprising persons who consider it their special vocation to speak on all possible occasions in Sunday schools we offer a word of gratuitous advice: Have the grace and common sense sometimes to decline. When you do speak, be sure you have something to say, and say it short—especially if you have a large audience of tired, restive children.

ONE of the neatest instances of the misuse of negatives is furnished by a bull of Cobbett's. In one of his "Rural Rides" he says: "I saw a corn standing in ricks; a thing I never saw before, and would have believed it had I not seen it."

SUNSET THOUGHTS.

BY PERDITA.

Bonny folds the dewy evening,
Golden splendors o'er the field,
Shedding round a hallowed something
Which the daylight cannot yield;
Comes a pause and shadowy stillness,
When the soul is fain to list
To its own and mute communings,
In the twilight's purple mist.

Comes the darkness, softly clasping
Tired hearts with fingers kind,
Falling all the world so gently
That its troubles lost we find;
That its troubles lost we find;
Prophet low the dusky silence,
Taking shapes of loved ones dear,
Keeping us in pleasant nation,
Just as if they all were near.

There's a comfort in the evening,
Not alone in rest from day,
When the duties all are finished,
And each garment laid away;
But it is a spirit-courier,
Linking thoughts 'twixt those afar,
Bringing words and tones forgotten,
In the gleaming of some star.

There's a gladness in the evening,
When the busy, bustling thoughts
Flit away from tired workers,
Leaving quiet on all hearts;
Then the twilight zephyrs, sighing
Tenderly o'er sleepy flowers,
Seem the wings of prayers up-flying
Through the hush of sunset hours.

Ah! dear Angel of the Evening,
What a magic touch is there
In thy white head of starlight,
As it trembles in the air!
For it draws the soul toward heaven—
Very near the pearly gates—
Till it thinks the light of even
Is God's smile on him who waits.

And that smile shines all about him
Who awaiteth in the night,
As the soothing, peaceful evening,
Ere the morning's bursting light—
Shines, oh! hearts with sorrow breaking,
Ever round your life's dark way,
Only called ere morning's waking,
Forth must see the twilight ray.

PAY YOUR PREACHER.

The Conference year is fast drawing to a close. The preachers are winding up their year's work preparatory to a new start in the toils and privations of itinerant life. In a month or more they leave you for Conference, and many of them will never return to labor among you again. They, in the economy of our church and in the order of Providence, will go to labor in other fields. Many are now anxious and troubled, and are beginning to feel uneasy about how they are to meet their engagements with the merchant and the grocer. These little debts were contracted upon the faith of promises made by their board of stewards, and up to the first day of November about one-half or two-thirds of the small amount allowed them has been paid in to them. Will you, my brethren—yeon, stewards, to whom is intrusted the support of God's ministers and their families—will you suffer them to leave you unpaid? Must they leave the work with debts unpaid and promises broken, and thereby bring reproach upon themselves and the church? I hope not. The laborer is worthy of his hire. Therefore see that they are paid all you have promised them, for God knows it is little enough when every cent of it is paid.

Your preacher may not have done all that he might have done had he been more favorably or differently situated. You may have cause of complaint against him. What of all that? If you hire a laborer to work for you he may not do just what you wish or desire. And is that just grounds for refusing to pay him what you promised? No, sir, it is no such thing. You wouldn't pay him, perhaps, but the law compels you to do it. So your complaints of want of efficiency and faithfulness do not justify you in starving your preacher and his family. He is accountable to the great Head of the Church for his lack of service, and if he has been an unfaithful watchman God will make him suffer for it. And if you have been unfaithful in your promises to him, and thereby make him, in part, an unfaithful watchman—well, then you will suffer too, in my judgment.

"Well, but he is no pastor. He has not visited among his people." Perhaps if he had been ascertained by substantial evidence that he would have been different. And perhaps he had a sick family to nurse and look after. His family is large, and you did not

make the assessment large enough to cover his actual necessary expenses, and he was compelled to work at something else to help out a support. I am satisfied that if you had allowed an ample support for his family he would not have engaged in teaching, farming, merchandising, or any other employment.

"I think whenever a preacher's family gets so large and burdensome he ought then to locate." Well, may be so. If you had called him to preach perhaps he would locate. That is no reason that you should refuse to pay your preacher.

"He can't preach, any way, and he is not the man we want here on this work." Perhaps, my brother, the fault is in you. If you had given—no, I won't say that—if you had paid him something like one-tenth of what you ought to have paid, you would have appreciated the gospel, and you would have considered him a pretty good preacher, and perhaps the very one for the work. A real "skin-fint" stingy, close-fisted man is an irreligious man; and an irreligious man cannot appreciate a preacher nor his preaching. Don't you know that a man appreciates what he pays for? Certainly. A man don't appreciate a thing that costs him nothing. Religion and money are pretty closely allied. There is one thing I can affirm most positively: The more liberal a man is the more religious he will be; and vice versa.

"He don't hold class meeting." He ought by all means to do that. But let me remind you, my brother, that it is exceedingly hard to hold class meeting with an irreligious, backslidden church; and a church that does not pay its preacher cannot, by any sort of possibility, have religion enough to enjoy a fourth rate stump speech, much less a good, old-time, Holy Ghost class meeting. That won't do.

"But he hasn't visited me but a time or two this whole year." Ah! well, there is a reason for it—must be. Did you ever think to invite him to your house? "Well, no, I never did; but then he should have come any way." My brother, preachers are a good deal like children in some things. When they take a good look into a person's face they know at once whether they will do to "take to" or not. And then preachers are like most other men—they want to see and feel that they are treated with some attention. There are some people, and they are to be found in the church too, who have the faculty of making a preacher feel very uncomfortable—like he was an intruder. When he did visit you, how did you treat him? Did you give him anything? No, sir; you drew your purse-strings to their last tension, and all the while felt uneasy for fear he would call upon you for a contribution for some purpose; and it was a great relief to you when he left you. Did you invite him to come again? No, sir, you didn't; and you did not care a "hawbe" if he never did come back again. And all this complaint is only a miserable pretext to cover up your miserably stinginess, so as to give some little plausibility to your pitiful excuse for not paying your preacher. More anon.

DIDN'T CARE TO GO.

"Prayer meeting and lecture as usual, on Wednesday evening, in the lecture room. Dear brethren, I urge you all to attend these weekly meetings. Forego not the assembling of yourselves together."

Some of the "dear brethren" reported themselves in this way: "Brother A. thought it looked like rain, and concluded that his family, including himself, of course, had better remain at home. On Thursday evening it was raining very hard, and the same Brother A. hired a carriage and took his whole family to the Academy of Music, to hear Mr. Agassiz lecture on the 'Intelligence of the Lobster'."

"Brother B. thought he was too tired to go, so he stayed at home and worked at the sled he had promised to make for Billy."

"Sister C. thought the pavements were too slippery. It would be very dangerous for her to venture out. I saw her next morning going down the street to get her old bonnet 'done up.' She had an old pair of stockings drawn over her shoes."

"Sister D. thought there wouldn't be more than a dozen people at prayer meeting. She doesn't like those little meetings, so she didn't go. If she had gone there would have been thirteen. I met her next evening at a social gathering, where there were just ten folks. She said she had spent a 'delightful' evening."

"Brother E. thought he might be called upon to lead in prayer, or make some remarks. He stayed at home. Next day he went around with a petition, praying Congress to repeal the tax on beeswax. His name headed the list of petitioners, and he spoke eloquently, and waxed warm as he urged his reasons in favor of repeal."

"Three-fourths of the members stayed at home. God was at the prayer meeting. The pastor was there. One-fourth of the members were there, and God blessed them. The persons who stayed at home were each represented by a vacant seat. God don't bless empty seats."—United Presbyterian.

Methods of Raising Church Monies.

BY REV. A. D. VAIL.

The question is often asked, "What is the best method of raising the money necessary to the support of our free churches?" It is not simply how to raise a certain needed sum of money, but, how can it be obtained with the least friction and grumbling? How can it be divided among the whole membership so that each may give their portion? How can it be raised regularly and promptly, and thus the material support of the church become what it was intended to be, a means of grace to the Christian giver?

We propose to answer the above questions, so far as possible, by indicating a few of the most successful methods now employed by our churches, both large and small, in country and city. We select those which have become the settled and favorite methods of the churches using them.

1. The first method is one used by several of our large churches. On a certain fixed Sabbath every year, as soon as possible after Conference and moving time, a statement is made in the public congregation of the prospective expenses for the year, and of the amount necessary to be raised monthly. A call is then made for subscriptions to be paid to the church monthly in advance. The older and wealthier men start the subscription according to their means or the needs of the church. A gives ten dollars a month, B gives eight dollars, and so on through to Y and Z, who give twenty-five or ten cents a month. If after going through the whole congregation, morning and evening, there is a deficit, those who have already subscribed are asked for a small increase of their previous subscription. The whole amount necessary must be and is provided for on this Sabbath. Every member is expected to be present at this annual meeting, either in person or by proxy, to announce his subscription. In case of absence it is common to put the brother down for the same sum as paid last year. These amounts are paid in monthly in advance to the class leaders, or, in some churches, to a collector appointed by the official board for this purpose. The above plan has been in use for many years and works well, and "subscription day" is one of the most delightful and blessed of all the year. And, having provided in advance for all the financial wants of the church, they are ready to enjoy and profit by the service of the sanctuary.

2. Another and very different method is often employed, as follows: At the first meeting of the official board of the church after Conference a full and careful estimate is made of all the expenses for the following year. This amount, after deducting a certain sum to be raised by the plate collections, is divided among the classes, to be raised therein by weekly or monthly contributions. It is divided according to the amounts raised by these classes during previous years. Class No. 1 takes ten per cent. of the whole amount to be raised; class No. 2 takes twenty or five per cent.; and so on until the whole amount is taken. Then each leader brings before his own class the amount to be raised by that class, and they provide for it. Each leader uses his own wisdom as to the peculiar method of distributing the amount over his class. This system generally wakens a strong and healthy emulation among the classes; all are most anxious to raise the amount apportioned to them, and if any fall short there will be good reason for the same. After the amounts have been decided upon in the official board, the statement is made in the public congregation of the amounts apportioned to the various classes the previous year, and the amount actually raised; and then the prospective expenses and apportionments for the following year.

3. Another method adopted by some of our churches is as follows: At the beginning of the Conference year there is very carefully distributed through the whole church and congregation a printed blank similar to the following:

WESLEY M. E. CHURCH.
May 15, 1871.
How much will you give monthly during the coming year for the support of this church?
Amount \$..... Name.....
Under the signature is printed: "Members of the church will please fill out and give this card to their leaders within two weeks. Members of the congregation who are willing to aid us are requested to fill out this card and give the same to—, the treasurer of the church, who will receive their contributions." On the back of the card is printed the prospective expenses for the year. These cards are neatly handed in within two weeks. After that time it is made the duty of every leader to call upon every member of his class who has not returned his card, and to obtain his subscription. After this system has once been adopted, every member, whether he attend class or not, expects to be called on for his subscription. It is generally found that by reaching all a sufficient amount is obtained to meet all the expenses. Or if there be any deficit it is so small as to be easily raised by a public collection.

4. A new method which has been adopted by several churches in our large cities, and found to work well, is as follows: A beautifully lithographed or printed blank form, with the name of the church and a few appropriate texts, is prepared at the beginning of the Conference year, and offered to each member to be filled out. The blank is about as follows:

FLETCHER M. E. CHURCH.
I agree to pay \$..... dollars monthly for the support of the Fletcher M. E. Church.
Signed.....
Appended to this are twelve coupons, one for each month. These coupons are filled out by the church treasurer with the monthly amount given by each member, and signed by himself as treasurer. As A, B and C pay their monthly subscription the treasurer tears off the coupons for the month and gives them to A, B and C as their receipts for the month's payment. On the back of the blank the expenses for the year are printed. This plan involves a considerable amount of writing; but it is thoroughly systematic, and is found to work well.

The above plans contain the important, essential features of those which are found to work with the most complete success. It is not impossible that some other plan may be devised by selecting the best points from all the above that would be found best adapted to those churches that in town or country are reorganizing their financial methods. Our successful churches have settled a few points in the matter of conducting church finances, and to these they cling tenaciously.

1. Each church must have some settled, business-like system of finances, to which they must steadily adhere.

2. No plan is successful or Christian that does not embrace the whole membership, so that each shall give something directly and regularly to the support of the church.

3. The whole expenses for the year must be provided for in advance in definite subscriptions.

4. There must be annually or oftener a full and definite statement of expenses and receipts presented to the congregation. Thus the members know "where all the money goes," and have a definite amount by which to determine their individual obligations.

5. There must be a feeling of obligation to pay the monthly subscription at the time appointed as sacred as to pay a note in the bank.

Any plan to be worked with success will require some one's time and business talent to direct it, or else the best of plans will fail. The difficulty of raising money in our churches arises far oftener from the slow, tardy, timid, unsettled policy of the official boards than from the lack of liberality on the part of the people. Congregations are educated for years into giving without conscience or system or promptness, or any definite knowledge as to where their money goes. To very many the idea of subscribing a definite sum, to be promptly and regularly paid, is foreign to their conception of a free church. And it is just here in our systems of finance that we need one of the greatest of all the possible revivals in the church.—New York Christian Advocate.

AN AGENT was sent to collect funds for a college. On reporting after he came back an excess of expenses over subscriptions, he added: "But, gentlemen, I have found great encouragement to pray."

A KALAMAZOOLOGICAL specimen writes to a "school board" in Ohio that he will take a school, as he has of Pori, thought it better for the children to go to the "orthodox" College 4 yrs at Detroit Michigan and am 26 yrs ayeage."

MEN honor sincerity, and the creed of every class is this: "An honest man's the noblest work of God."

RELIGIOUS INTELLIGENCE.

The Primitive Baptists of south-west Georgia announce that they will excommunicate any member who takes advantage of the bankrupt or homestead law.

SIR FRANCIS LYVETT, a distinguished Methodist layman, offers \$250,000, if the Wesleyan Conference will raise an equal amount within ten years, to build fifty chapels in London.

The Book Committee of the Methodist Episcopal Church have entered charges against Dr. Lananah, and have suspended him by a vote of nine to four till those charges can be investigated.

A CONFERENCE of members of Presbyterian bodies in Scotland have met in Montreal, and agreed to recommend to their several churches an organic union on the basis of the Westminster Confession of Faith.

REV. DR. LANAHAN, one of the agents of the New York Book Concern, was suspended by the Book Committee, at its late session in Cincinnati, until the charges against him are investigated next January. The suspension only refers to his office as agent, and not his ministerial standing.

TWO LADIES, one living in Ohio, and the mother of several children, the other a young lady from New Orleans, were recently received as converts to Judaism by Dr. Lilienthal, of Cincinnati. In the case of the New Orleans convert, Dr. Lilienthal employed every dissuasive argument in vain.

PITCAIRN'S ISLAND now contains sixty-six inhabitants, of whom thirty are males and sixteen females. There are twenty in the day school and sixty in the Sabbath school. It will be remembered that most of the descendants of the mutineers of the "Beatty" left Pitcairn's for Norfolk Island, where they now live almost as secluded as before. A ship does not touch there once a year.

THE ROMAN CATHOLICS in France are alarmed by the progress of Protestantism in that country, and a society sprang up in Paris shortly before the war, aiming to publish Roman Catholic books and journals at exceptionally low prices, employing girls to do the work, and promising them, at twenty-one, a small dowry, and, if they like, a small shop in some country town for the sale of these books and journals.

THE GAZETTE of Cologne, of October 10, publishes a third list of Roman Catholics who protest against papal infallibility. The list comprises about one hundred and fifty names, from nineteen places. The "Central Committee for the Movement Against Papal Infallibility," at Cologne, urges its friends to hasten the collection of signatures in all parts of Germany. The bishops of the opposition continue to be silent, or submit.

THE EPISCOPAL BOARD of Missions, at the annual meeting held in New York, took action favoring the value of organizations of trained laymen and of Christian women in prosecuting the aggressive work of the church, and appointing a committee to consider the matter and report the best means of associating the organized or individual efforts of women in the educational and missionary work of the church.

A CORRESPONDENT of the London Church Review says that the theological status of the Church of England clergy can be generally classified by their neck-gear. "There are parsons with collars and cravats—these are, as a rule, Low Church; there are parsons with cravats and no collars—these are, as a rule, High Church; and there are parsons with collars and no cravats—these are, as a rule, Broad Church."

SOME TIME AGO the Princess Louise expressed a strong wish to enter the Anglican Sisterhood at Clewer. The proposal met with small favor from the Broad Church—Queen; and it is supposed this circumstance quickened her consent to her daughter's marriage with the son of the Duke of Argyll. A few years ago, believing that old barriers should be broken down, he established one of his sons in mercantile life. Now a social barrier in the other direction is broken down, and the Duke gives the Queen's daughter a wine merchant for brother-in-law.

UNIVERSALIST CONVENTION.—The Ohio State Universalist Convention met in Columbus last week. On Wednesday, October 27, the principal subject discussed was the Sunday school work, in which there was considerable division of sentiment expressed by delegates. Mr. W. W. King, of Zanesville, said that one of the greatest and most crying evils of the times was the sending of Universalist parsons of their children to the so-called orthodox Sunday schools. Rev. Mr. Canfield, of Pori, thought it better for the children to go to the "orthodox" schools than to go on the streets and imbibe profanity and vice.

Rev. Mr. Spaulding, of Cincinnati, thought it better for a Universalist father to stay at home and teach his children than allow them to go

to any other than a good Universalist Sunday school.—Western Christian Advocate.

THE BISHOPS of Germany who opposed the doctrine of papal infallibility before it was proclaimed by the Vatican Council seem to have abandoned all further resistance. One of them, the Bishop of Breslau, offered his resignation, in order to be spared the necessity of proclaiming the novel doctrine in his diocese; but when the Pope refused to accept the resignation, he withdrew it and advised his dioceses to submit. It now seems unlikely that any bishops will take part in the agitation for repudiating the doctrine of papal infallibility and the authority of the Vatican Council, which is still actively continued among the laity and a portion of the priesthood. It is expected that all the professors of theology of the University of Bonn will be suspended by the Archbishop of Cologne, as they persist in refusing submission to the council.—Methodist.

THE thirty-fifth annual meeting of the Board of Missions of the Protestant Episcopal Church was held in New York, October 24, and the following days. The Bishop of Illinois being the leading Bishop present, presided. The expenses of the Domestic Committee were reported to be \$127,854; the receipts, \$95,987.30; leaving a deficit of \$31,866.71. The receipts of the Foreign Board were \$80,063.58; the expenditure, \$87,415.68. The report of the Commission of Homo Missions to Colored People states that nineteen new schools had been established. The number of teachers employed, including clergy, is thirty-nine; the number of scholars is two thousand and sixty-nine. The receipts up to October 1, including balance in the treasury, are \$17,581.38. There has been paid to missionaries and teachers \$14,219.36; deficit, \$991.80. The document concludes with an appeal for \$14,000 to carry on its work during the coming year.

PUTTING ON MOURNING.

When or whenever it arise, that when one dies and goes to heaven all the family shall shroud themselves in deepest black? And the women especial victims? Somewhere the custom must have arisen since the days of our ancestors—the Saxons or Picts and Scots, whose only clothing was painted on! Is it going further, or will there be some resistance and a return to the right way? Some women spend half their lives under crape, a sort of self-imposed penance, hot, heavy, unwholesome. Men may wear a badge of mourning for a time, and then resume light clothes and yellow gloves if they will. A man may do this while his wife continues to mourn for his friends, and do agonously sweeter under her crape. A few dare to brave Mrs. Grundy and follow out their convictions by refusing to yield to this absurd demand of custom.

We think it is growing worse and worse. A family will wear crape three years, and black dresses three years more, for a mother who went straight to heaven, and who would say to them: "Mourn not for me." And so strong is the force of example that some one else must do the same, or it ebbs a want of feeling. Now it is no small thing to take away so much that is bright and cheerful in one's surroundings for so many years of life, and submit to a dress, hot, heavy and inconvenient. There is but one life to live. Why spoil this?

The whole is foolish, wasteful and wicked expense, and is often a burden that can ill be borne by those who can by no means afford it, and yet dare not ignore a custom. It is for those who have money and common sense to set the example and oppose so senseless a fashion. Precisely what can be done by concerted action we do not see. The country is overrun now with committees, societies, organizations, clubs and associations. We cannot afford any more if there be any other way. It is one of those cases in which individually a great many are right, and collectively they all go wrong. It is no time to get up extra moral courage under the shock of deep affliction. But one gets so weary of the mockery and semblance of woe, crape, flowers and gay mourning! Can't men help women out of this bondage by suggesting some badge of mourning which shall say, like the band of a man's hat, "I have lost a friend?" As it is, in many cases the dress is a greater trial than the loss! It is a mere custom; for some nations wear yellow, and scarlet or blue, which means just as much, and are more sensible and less burdensome.—Correspondent Christian Union.

THE lost art of painting on marble in durable colors is said to have been lately rediscovered, after a long series of experiments, by an artist in New York.

VENETI gets \$80,000 from the Egyptian Viceroy for his new opera, "Aida."

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, NOVEMBER 26, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BANTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

DEATH OF COLONEL GOLSAN.

The following note contains the sad announcement of the death of a most devoted and useful Christian:

ACTONVILLE, ALA., Nov. 19, 1870.
DEAR DOCTOR: Colonel Jacob L. Golsan, of Autaugaville, died last night at thirty-five minutes past seven. He was a truly great and good man, and died a triumphant death. He was superintendent of the Sunday school and a pillar in the church. A more extended notice will be sent you for publication very soon.

Yours, Wm. A. EDWARDS.

THE SAN FRANCISCO SPECTATOR.

We find the following statements in the St. Louis Christian Advocate. We missed the number of the Spectator which gave the proceedings of the Pacific Conference and the new arrangements for the paper. We heartily endorse all the editor of the St. Louis Advocate says in reference to the Spectator and its able management, and wish the present editors all prosperity.

The Pacific Conference at its late session expressed appreciation of the ability and services of Dr. Fitzgerald, the former editor, and approbation of the action and editorial management of the Publishing Committee upon the resignation of the editor. Bro. C. A. Klose, the publisher, receives assurances of confidence and the high estimate by the Conference of the services he has rendered to Southern Methodism on the Pacific coast. The plans and hopes for the coming year are particularly mentioned in the letter of our California correspondent, to which we refer the reader. The Conference found it impracticable to pay an editor's salary or to spare a competent man from the pastoral work, and the former arrangement has been continued—Wick B. Parsons being the resident managing editor, with W. E. Gober, W. F. Compton and George Siman Editorial Committee. Rev. Jesse Wood, during last year the stationed preacher at San Francisco, was Bro. Parsons' predecessor, writing over the single star. Its sparkle and the luster of the whole galaxy of stars and other signs in the editorial page have constrained the admiration of the church and press throughout our connection. Bro. Parsons, who was a member of the late Conference, is the only layman in the editorial corps of our church. We offer him most cordial greetings, and, together with his editorial associates and his publisher, best wishes for a pleasant and prosperous journalistic year.

Attention is called to the advertisements of Orange Judd & Co. that appear this week. Hearst and Home is now conducted by this enterprising publisher and journalist. The Agriculturalist is still the able and interesting periodical it has long been, and is growing more valuable and popular every year.

ROOTS OF BITTERNESS.

The human heart is desperately wicked, and our fallen nature is filled with the spontaneous growth of noxious weeds. Even the converted soul may detect the springing up of evil tempers and desires, and feel the need of a more thorough cleansing and of a more complete victory. Sin is a bitter root, as exhibited in the various forms of vice and corruption in the individual. The sincere penitent realizes the inveterate character of the poison; the conscientious believer feels the bitterness of it in his conflicts with inbred corruption. Pride, selfishness and unbelief are plants which sometimes give a great deal of trouble, if they do not altogether blight and destroy the religious life.

It is, however, as descriptive of mischievous persons in the society of the good that the term is used in Scripture. "Root of bitterness," as used by Paul, does not refer to the manifestation of sin in the justified believer, but stands rather for a perverse and sinful member of the church. The admonition of Moses was to the same effect when he says: "Lest there should be among you a root that beareth gall and wormwood." The history of all religious societies and congregations justify the warnings on this subject. Nothing is so much to be deprecated as those whose presence in the church is a continual element of commotion and discontent. One sinner of this sort in a congregation destroys much good, and embarrases, if he does not neutralize, all endeavors to build up and advance the cause of Christ. The on-breaking sinner, who has so far fallen as to recognize but little restraint in his religious vows and associations, is not always the most injurious. He does much harm in many ways, scandalizing the cause, confirming sinners in their unbelief and discouraging the righteous. But he may, with all his wickedness, bring no discord and no heresies among his brethren. The society is not rent asunder, uncharitableness is not promoted, and the heart of the organization continues healthy and vigorous.

We must suppose a different character was intended, and one peculiarly qualified to trouble and defile. The disposition and qualifications to give trouble in the church are often found in connection with an exemplary morality, and the profession of the highest sanctity; often associated with the greatest industry and the most conspicuous gifts. Nor is it necessary to suppose that these troublesome people are altogether wanting in sincerity. With their perverse mental idiosyncrasies, with their inordinate self-esteem, and their ambition to direct and control, there may be the utmost sincerity. There may be also the utmost religiousness; the most punctilious observance of duties and engagements, and the honest assumption of a superior type of piety. The power of such a person for evil in a church, in a Sunday school and in all organized religious enterprises, is very great. The most mischievous characters in the church have been among the most sincere and devoted. They have done more to disturb the peace, to foster a bad spirit and to break down and cripple the work of the Lord, than the more indifferent and ungodly professors. We have known those in the church, whose integrity and uprightness we hesitate to distrust, who would most conscientiously destroy, where they are not permitted to shape the policy, and lead in its accomplishment.

The trouble which a sour and discontented spirit can induce is beyond estimate. One perverse member may chill the spiritual atmosphere, engender distrust and contention, and be a perfect incubus and marplot to the spiritual prosperity of a congregation. The scriptural metaphor is not too strong, which characterizes such persons as roots of bitterness—"a root that beareth gall and wormwood." They are poisonous plants in the social garden and in the soil of the church, giving out nothing but the most pernicious and deadly

odors and exhalations. They have not only the power to trouble, but also to defile. False doctrines and false practices are spread with facility. Tares need no further cultivation after they are once cast into the field; they are sure to thrive in the soil which has been carefully prepared for the wheat. Evil communications corrupt more or less, and chiefly in the temper and spirituality of the soul. The work of social disintegration begins, the unity of the Spirit is lost, and the communion of saints is infringed by the spirit of bitterness and suspicion. One poisonous spirit is the means of poisoning many, of leading many from the path of charity and duty, and of finally bringing about their shipwreck.

The admonitory language of inspiration suggests that these roots of bitterness may be guarded against by the Christian society. It is not impossible that the divine warning may in some instances lead the sinner in Zion to repentance, and move him to return to the Bishop and Shepherd of his soul. It may also bring the heady and perverse spirit to a more humble and Christian mind, and it may prevent such a development in some by reminding all of their liability. Beyond this, every society is to guard against the danger by "looking diligently." Whether in Conference, school or congregation, the troubles of Israel should be identified and properly understood. Where this is the case their power for evil is greatly lessened, if they be not altogether disarmed. By thus looking diligently, and by trying the spirits, much of the harm may be avoided. When the root of bitterness becomes known few will fall victims to its poisonous influences. Hypocrites, demagogues and perverse men will have but few followers when their real characters are discerned. Their power to trouble and defile is in the concealment of their real character. Where the disguise is thoroughly penetrated not much damage is likely to ensue. All true Christians owe it to themselves and to the cause of God that they exercise the greatest discretion in reference to this common and formidable source of evil. They are to see to it that they do not allow themselves to be duped and hoodwinked by the artful, the designing and the ambitious. A firm and conservative course on the part of the discreet and spiritually minded will generally hold the evil-doers in check, and frustrate their sinister designs.

GEN. LEE AND THE CATHOLICS.

Bishop Marvin is contributing some delightful letters to the St. Louis Christian Advocate. In the last one, written about the time of the session of the Trinity Conference, the Bishop exposes one of the many manifestations of papal trickery and deception. It will be remembered that Bishop Marvin delivered the literary address at the last commencement of Washington College. It was then, probably, that he became more intimately and personally acquainted with the great Confederate leader.

On reaching Jefferson I met the intelligence of General Lee's death. It made me sad. I had loved him before I had ever seen him. Acquaintance deepened the affection. His personal traits charmed me. The great man of war was the simple-hearted Christian gentleman of the home circle, dispensing a hospitality as unaffected as it was elegant.

The Roman Catholics of Jefferson had a solemn high mass for the repose of his soul. What artful men those priests are! Denying the possibility of salvation to a Protestant, yet they make a great parade of their mass in behalf of one who has no connection whatever with their church. According to their uniform teaching, General Lee, who consciously rejected and repudiated Romanism, is not in purgatory, but in hell, where no sacrifice of the mass can reach him. But it will be a popular thing with the Southern people, and therefore they will "offer up the body, blood, soul and divinity of Christ" in his behalf, as if he were a good papist and were only in purgatory. If they are sincere in their avowed belief, what a piece of blasphemous trifling with the blood of Christ in this popular effort.

General Lee had not left the repose of his soul to the hazard of

papal attorneyship. He had not depended upon the official and fictitious "sacrifice of the mass." He had himself offered the "sacrifices of God," which are "a broken and contrite spirit," with faith in the only High Priest of the new covenant.

It was an occasion of great interest with me when, unknown to him and by mere accident, I heard, from an adjoining room, his morning prayer with his household. The devout simplicity of the prayer struck me. "This fervent, effectual prayer" availed much for the "repose of his soul" in time and in eternity. He had taken refuge in Christ, lived in him, died in him. "Blessed are the dead that die in the Lord; yea, saith the Spirit, for they rest from their labors, and their works do follow them." This departed Christian, dying in the Lord, has entered into rest—has gone to his Master to be with him where he is, according to his promise. Yet these officious, impertinent priests affect to help him through purgatorial torments with pretentious forms.

The logic of the affair is this: All Protestants, who are such intelligently and consciously, must suffer the eternal torments of hell. General Lee was an intelligent, conscious Protestant. Therefore he is in purgatory, and not in hell, and the mass will hasten him through. A large proportion of papal logic is just about on a par with this.

The policy of the business is this: Never mind about creeds. General Lee is idolized by the Southern people. A solemn parade about him, now that he is dead, will produce a fine popular effect in the interest of our church. No doubt that, according to the creed, he is lost beyond all hope or help. But the people will think little of that. They will be greatly impressed by an imposing service with which his name is connected.

The nearest to anything like an expression of contempt I heard from the honored lips of this man was a remark upon the decree of the council, then in session, declaring the Pope infallible. He held the whole affair to be a blasphemous farce.

DEATH OF REV. WILLIAM E. PELL.

This venerable and beloved brother died suddenly, on last Friday, at his residence, just as he had finished eating his dinner. He had enjoyed his usual health up to the moment of his death. He died of heart disease. His death has spread gloom over the entire community. And well it might, for he was a man of eminent worth in all the relations of life.

Years ago he filled the important post of editing this paper, when it was known as the Christian Advocate. His services in this department were highly valuable to the church. His career as a political editor is well known to have been that of a high-minded gentleman, always honest and fair in his discussions, judicious in his advice, sound in his conclusions, laboring to promote the peace and prosperity of the country.

As a father, husband, friend, citizen, Christian, editor and minister, William E. Pell stood eminent in excellence of character, a pillar of strength to the virtue, intelligence and prosperity of the State, and a tree of fruitfulness to the church of our blessed Redeemer.

The funeral services took place on last Sabbath afternoon in the Methodist church, conducted by Rev. B. T. Blake. The unusually large and solemn congregation in attendance bore testimony to the high esteem and warm affection he had won in this city and vicinity. His death is an irreparable loss to the church and State, but he has gained the everlasting inheritance of the saints of light.

May the rich consolations of the gospel cheer the saddened hearts of his deeply bereaved family.—*Raleigh Episcopal Methodist, November 19.*

EXCHANGE AND REAL ESTATE BROKERS IN MOBILE.—Price Williams & Son, of our sister city of Mobile, are engaged in the business of exchange and real estate brokers. A glance at their references is sufficient to satisfy those who do not know them of their reliability and high standing. All who have occasion for the services of brokers in their line cannot do better than to patronize them. For further information see their card in the column of new advertisements.

IT WILL BE SEEN by reference to our advertising columns that our old friend and brother, William Barrett, has formed a copartnership, and is now conducting the stationer's business under the style of Barrett, Seymour & Co., at the old stand, No. 60 Camp street, New Orleans. The firm shall have all the good wishes and patronage we can command. It is worthy of the greatest success.

A TRIUMPHANT DEATH.

Last week we gave some notice of the death and burial of the Rev. Adam S. Riggs, of the Tennessee Conference. The following account of his sickness and death is contained in the funeral sermon of Dr. McFerrin. It is a remarkable death indeed; an affecting and glorious record.

Bro. Riggs was taken sick on Monday night, at the Conference which convened at Pulaski, October 5, 1870. He suffered intensely; was delirious part of the time; recovered enough to return home on Saturday, the fifteenth; was affected with stupor the following day or two. Tuesday night he became much worse. Wednesday I called at his house en route for my appointment, Trinity; found him quite low. When I entered his room he beckoned me to his bedside; said he was glad to see me; that he had made his will; had said all he wished to say; thought he might get well, but it was all right with him; that I must not leave him until he died or began to get well. He talked about death as a thing indifferent; seemed happy all the time. There were constant expressions: "Bless the Lord!" "Bless the Lord, O my soul, and all that is within me, bless his holy name!" His physician advised against any conversation, which restraint he could not well bear. He said "volumes were constantly passing through his mind, and he was not allowed to express them;" "that he had visions and views of Jesus and glory, such as he had never expected on earth." He dwelt upon the fullness of the gospel of Christ; said to me: "You need not be afraid to

"Preach him to all, and cry in death, Behold—behold the Lamb!"

Speaking of the preachers, he said: "If there is a body of men on earth I love, they are Methodist preachers; with them I could be chained to the stake; could endure anything." He mentioned several by name—McFerrin, Green, Hanner, Summers, Hunter and others—said: "Tell my brethren of the Tennessee Conference there is not a man of them but I love; tell them that I passed away as clearly as I could under the circumstances, not being allowed to talk." Between four and five o'clock one morning during his sickness he thought himself dying; his family and friends were assembled around his bed, when he called for Bishop McKendree's farewell song: "All is well." No one knew it but his wife, who was weeping as though her heart would break. She told him she could not sing. He told him she could sing the hymn: "O sing to me of heaven." He again asked us to sing, "All is well"—said if we could not he would sing it himself. She commenced—her tremulous voice rose like the sound of a broken harp. In the second stanza he joined her. A smile of triumph illumined his face as they sang:

"There's not a cloud that doth arise To hide my Saviour from my eyes, I soon shall mount the upper skies!"

and while she, utterly overcome by emotion, ceased to sing, he finished—"All is well!" "All is well!" It was the most moving scene I ever beheld—a wife singing the triumph of her dying husband! During the day he called his family to him, one by one, gave them his dying counsel and his last blessing; his language seemed to me as eloquent as heaven's own dialect. I cannot forbear repeating some things that were spoken. To his wife he said: "You have been to me all that a wife could be to a husband; keep the children together; send them to school; train them for God." One sentence deserves a green and flowery immortality: "You have never hindered me from going to an appointment." To his oldest daughter, an affectionate, fragile creature, whom he called the idol of his heart, he said: "Sue, you'll be the last to leave me, I reckon, and the first to greet me on the other shore—live religiously and meet me in heaven." Thus he talked to each one of them, and when he came to Kelly, the youngest, a little girl of five brief summers, he said: "Now bring my babe, and lay her in my bosom." When brought, he folded her in his arms, saying: "Kelly, to me you are the sweetest gift God ever gave; he a good girl, mind your ma, love your brothers and sisters, and may the blessings of God, the Father, Son and Holy Ghost be yours forever! Now kiss me again, again, again, again."

To his son-in-law he said: "John, I gave you the idol of my heart; I make this request: I want you to join the church with her, live a Christian, and meet me in heaven." He then called his neighbors who were present, and spoke to each one of them, encouraging those who were Christians to live religiously, and exhorting those who were not to become so. He then said to me: "O that I could, like Samson, slay more at my death than in my life!" He still lingered on the shore for several days, although he said he

had entered the cold waters of death. I reached his home on Thursday night. He was sinking, but perfectly rational. He knew me. He reached out his hand, grasped mine with eagerness, and said: "I am almost gone, but all is right!" From time to time he assured me that all was right, all clear. Several times with a loud whisper he praised the Lord. I said to him: "Bro. Riggs, Paul said, 'For to me to live is Christ, but to die is gain; it is better to be absent from the body and present with the Lord; nevertheless, for the sake of the church he was willing to remain. You are willing yet to live and labor, if the will of God be so.'" He said: "Yes." "But if God call you, are you willing to die?" "Yes," he responded. "Glorious death!"

NEW PUBLICATIONS.

VALUABLE WORKS. By John Harris, D. D., late president of New College, London. Five volumes, 12mo, cloth \$7.50. Published by Gould & Lincoln, Boston.

We have received the above mentioned volumes from R. J. Harp, of the Depository, 112 Camp street, New Orleans. They are substantially bound, printed on the best of paper, and comprise a most valuable set of solid standard books. The titles and subjects of the several volumes are as follows:

THE FATHER-ADAMITE EARTH: A Contribution to Theological Science.

The contents of this volume are: Preface; Primary Truths; Principles Deducible from the Preceding Truths; Inorganic Nature; Organic Life; Sentient Existence.

MAN PRIMEVAL, or the Constitution and Primitive Condition of the Human Being.

This volume is divided into three parts. The first treats of the divine method, the second of the reason of the method, and the third of the ultimate end.

PATRIARCHY, OR THE FAMILY: Its Constitution and Probation.

This volume is divided into four parts—the divine method, the law of change or history of the probation of the family, the reason of the method and of the history, and the ultimate end of the family probation and economy as a means of divine manifestation.

THE GREAT TEACHER: Characteristics of our Lord's ministry.

This interesting volume comprises five essays on the following topics: 1. The authority of our Lord's teaching. 2. The originality of our Lord's teaching. 3. The spirituality of our Lord's teaching. 4. On the tenderness and benevolence of our Lord's teaching. 5. Our Lord's teaching practical.

THE GREAT COMMISSION, or the Christian Church Constituted, and Changed to Convey the Gospel to the World.

This volume is a most valuable contribution to our missionary literature, and has accomplished incalculable good. It is divided into six parts, as follows: 1. The missionary enterprise viewed generally in its relation to the word of God. 2. The benefits of the missionary enterprise. 3. Encouragement of Christians to prosecute the missionary enterprise. 4. Objections to the missionary enterprise. 5. The wants of the Christian church as a missionary society examined. 6. Motives to enforce entire devotedness to the missionary enterprise.

The last two volumes are probably best known to the Christian public. Twenty years ago their influence upon the churches was profound, and none can read them without profit. Next to these we rank Patriarchy or the Family as of great practical importance. The other volumes are elaborate, profound, speculative, and will fail to interest the majority of readers. The set, handsomely put up in a neat box or case, can be obtained at the Methodist Depository, 112 Camp street, where nearly all the freshest literature is to be had.

VALERIE AYLMER. A novel. By Christian Reid. New York: D. Appleton & Co. 1870.

A friend at our elbow who has sampled the book speaks well of it. The author is a lady of Carolina, whose father was a soldier in the Confederate army, and was killed at the battle of Bull Run. We are indebted to the publishers for a copy. Paper cover, two hundred and twenty-one pages.

Amongst periodicals which we

greatly prize, we have received the American Agriculturist; Good Words; Good Words for the Young; grandly illustrated this month; the Southern Farm and Home, published by J. W. Burko & Co., Macon, Georgia; Sunday School Journal, for teachers and young people, published by Carlton & Lanahan, New York; Appleton's Journal of Literature, Science and Art; the Sunday Magazine; the Nineteenth Century; the Manufacturer and Builder, a superb number this month; the Household, published at Brattleboro, Vermont; Hearth and Home, now published by Orange Judd & Co., New York; and Peters' Musical Monthly, a periodical filled exclusively with the choicest and most recent music, and published by J. S. Peters, New York.

Missionary Appropriations of the M. E. Church for 1871.

The appropriations for our mission work at home and abroad were completed by the Missionary Committee at its concluding session on Saturday, and the apportionment of the following sums for missions during the year 1871 on a basis of \$700,000, inclusive of \$75,000 required to meet drafts not yet fully due:

Africa	\$2,800
South America	11,044
China	32,796
Germany and Switzerland	27,900
Denmark	7,059
Sweden	12,700
Norway	8,710
Iceland	81,302
Bulgaria	9,504
Mexico	12,000
Italy	12,000
Total, Foreign Missions	224,198 64
Domestic Missions—foreign population	48,150
California Chinese	9,000
Missions among the Indians	4,000
Missions among Americans	281,500
Missions in United States Territories	13,300
Miscellaneous	80,900
Grand total of appropriations	660,238 54
To which add for indebtedness	10,942 51
Total	671,181 05

In the Conference missionary appropriations the usual allotments of St. Louis and Kansas were reduced to \$14,000 and \$6,000 respectively. New York Methodist, November 19.

LUTHER ON PREACHING.—Cursed are all preachers that in the church aim at high and hard things, and neglecting the saving health of the poor unlearned people, seeking their own honor and praise, and there-with to please one or two ambitious persons. When I preach I sink myself deep down. I regard neither doctors nor magistrates, of whom are here in this church above forty; but I have an eye to multitudes of young people, children and servants, of whom are more than two thousand. I preach to these, directing myself to them that have need of the door. Will not the rest hear me? The door stands open upon them; they may be gone. I see that the ambition of preachers grows and increases; this will do the utmost mischief in the church, and produce great disquietness and discord; for they will need teach things touching matters of State, thereby aiming at praise and honor; they will please the worldly wise, and meantime neglect the simple and common multitude.

STOVES.—It will be seen by referring to our list of new advertisements that G. W. W. Goodwyn has removed to No. 52 Gravier street, where he deals in stoves, tinware, and everything in the way of tinners' furnishing goods. There is no more experienced dealer and manufacturer in this line, and none who is longer and more favorably known to the people of New Orleans. See card for full information.

The Virginia Annual Conference of the Methodist Protestant Church, at its recent session, resolved, by a vote of thirteen to twelve, to unite with the Virginia Conference of the Methodist Episcopal Church South, which has just held its session in Lynchburg, of which we hope to give the proceedings in our next issue.

NEW MONTHLY MAGAZINE.—To preachers or others who will send us ten subscribers we will send a copy free. Price, \$3.
A. H. REDFORD, Agent.

Married.

On the eighth of November, 1870, by the Rev. J. B. Stone, at the residence of the bride's uncle (William B. Augustus), JOHN LEE WILLIAMS, of Macon, Mississippi, to Miss MARIALA AUGUSTUS.

At the Methodist church in Whistler, Alabama, on the thirteenth of November, 1870, by the Rev. J. J. Grace, Mr. AMEL VETTER and Miss JULIA KORN, both of Whistler, Alabama.

On the fifteenth of November, 1870, in Whistler, Alabama, by Rev. J. J. Grace, Mr. EDWARD WHITTAKER to Miss KATE PRESTON, youngest daughter of Mrs. L. Preston, of Whistler, Alabama.

By Rev. John Wilkinson, on the tenth instant, at the residence of the bride's mother, near Keachie, WILLIAM H. WEA, Esq., of Shreveport, to Miss LENA V. CROWDER, of the former place.

November 10, 1870, at the residence of the bride's mother, in Black Hawk, Mississippi, by the Rev. Chas. B. Galoway, Mr. S. H. HARRIS to Miss S. M. STEPHENS.

November 15, 1870, at the residence of the bride's father, in Holmes county, Mississippi, by the same, Mr. JAMES A. RATHBUN to Miss MARY CLOWDER.

November 22, 1870, at the residence of the bride's father, Mr. C. Dillon, in this city, by Rev. P. M. Goodwyn, Mr. W. G. WILKINSON, of Donaldsonville, Louisiana, to Miss ANNE C. DILLON.

Obituaries.

Departed this life, August 24, 1870, TALITHA CATHARTIS, daughter of S. D. and M. A. Smithhart, aged five years, seven months and six days. Dearest little Katie has

Gone to that God whose tenderness Protects each fragile flower, Transplants them to a garden fair, In Eden's blooming bowers.

Farwell, dearest Katie, for awhile! We leave thee now, with God's smile for your sunshine, and heaven your happy home.

ACENTIE.

Mrs. ANN WHITE, daughter of Benjamin and Elizabeth Johnson, was born in Abbeville district, South Carolina, in 1821, and died in Nockmbe county, Mississippi, August 31, 1870. She was married to Willis White October 3, 1839, and for thirty-one long years she traveled life's rugged pathway happily together.

Sister White was raised by pious parents, whose godly admonitions and earnest prayers were successful in pointing her mind heavenward, and finally, in 1847, at a camp meeting in Pickens county, Alabama, culminated in her sound conversion to God. Sister White was the kindest of Christian women, possessing rare qualifications in the domestic circle. The outgushing of her natural impulses was of the purest character to those she knew well. God had endowed her with a noble and generous spirit, and she never avoided but rather sought opportunities which manifested this heavenly attribute. For many years her home was seldom without guests. Those who were connected to her by the ties of nature will rise up in the brightness of eternity, and call her blessed for her unremitting and disinterested kindness to them. Her course in life was such as to secure the confidence and esteem of the community in which she lived. She and her noble-hearted husband ever tendered an open door to the weary itinerant. Often the writer, worn down by the fatigue incident to itinerant life, has approached the door of their hospitable home, and been met by this sainted woman always with a smile of welcome on her face.

For many long years she was the subject of deep affliction, but as a meek and submissive Christian she did not murmur or complain that hers was a hard lot. However, in her last days her suffering was so intense that with an humble spirit she prayed to be released from her house of clay.

She said but little on the subject of death. Just before she died she took her husband by the hand, but could not speak, such was her suffering. She gave him a look, which we humbly pray will ripen in his conversion, that finally they may meet in that pure and blissful home where death is a stranger.

J. B. STONE.

JAMES NELSON McCADLEY, son of the late Rev. John McCauley and Martha Hamilton McCauley, was born in Frederick county, Maryland, on the tenth of March, A. D. 1821, and died at his home, in the presence of his very aged and pious mother, his wife, and two children—being the only living issue from his marriage—near Sulphur Springs, Madison county, Mississippi, on the fifteenth of May, A. D. 1870, of typhoid pneumonia.

He was converted to God and joined the Methodist Episcopal Church South at Pleasant Grove camp meeting, in Madison county, Mississippi, near his late residence, in the year A. D. 1836. He is said to have been born of God and the Spirit while in the arms of that

memorable Methodist preacher, the Rev. Mr. Steel. For thirty-four years Brother McCauley lived in the church militant without reproach and above suspicion. I have known him ever since my boyhood—say twenty years—and never heard aught that sapped his character.

He lived an humble, modest, discreet, temperate, honest and consistent Christian—a member of our church. He never went to extremes in religion—hot to-day and cold to-morrow. God gave him as a legacy measurably the serenity, tranquillity and equipoise of mind and soul that so eminently characterized his extremely aged and recently sainted mother. Consequently he lived and died in the church, in Christ, and in glorious prospect of everlasting rest and eternal life. He was conscious that the hour of his departure was at hand. The fact did not alarm him. He prophetically told his aged mother that their separation could be but short; and in a few months the aged mother in Israel fell asleep in Christ. He bade wife and children good-by, asked them to meet him in heaven, commended them to the benedictions of God, and committed them to the care of his heavenly Father. For several days before his death, down to the last ability to speak, he evidenced his security in Christ, and pleaded with all for reconciliation with God in Christ. He leaves a helpless family. May God be a husband to the wife, and a father to the daughter and little son!

J. K. HAMBLEN.

Arrest that terrible Catarrh, and thus avoid a consumptive's grave, by using Dr. Sage's Catarrh Remedy. The proprietor will pay \$500 reward for a case he cannot cure. Sold by druggists, or send sixty cents to Dr. R. V. Pierce, Buffalo, New York, and receive it by mail. Pamphlet sent free.

FIVE CENTS ADDITIONAL

will buy shoes with Silver or Copper Tips, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. Sent 3mr

STOVES.....STOVES.....STOVES.

These are not the best the world ever saw, nor do I pretend to say that they will last for ages and generations to come; neither will they bake bread or warm rooms without some little wood or coal, and just the least bit of fire, judiciously applied. But I do believe they are just as good as any now in use, and with the same care in using and skill in managing will perform as well, and prove as durable and economical as the most approved pattern. For sale by

G. W. W. GOODWYN, Manufacturer and dealer in all kinds of plain Tinware, Japaned Ware, Stamped Tinware, both plain and reticulated, Tinners' Furnishing Goods; Bankers' Patent Safety Cans, for shipping oils, turpentine, alcohol, benzine, and all kinds of liquids which require safety in packing.

ALL JOB WORK of all kinds, in Tin and Sheet Iron, promptly attended to. Stoves and Stove Pipe repaired and fitted up to order on the shortest notice, and on the most reasonable terms, at my new store,

SUPPLIED WITH NEWS.

HOME

"HEARTH AND HOME," one of the

best Home Newspapers in the world, will greatly contribute to ALL the above. Every number is a most beautiful Paper, finely illustrated with many large, excellent ENGRAVINGS, both pleasing and instructive. It contains pithy editorials upon live topics; a great variety of carefully prepared reading matter; an unequalled, practical Household Department; a capital Children's Department, that charms and benefits the Little Ones, and larger people too. You will like it MUCH. It should be in every HOME.

TAKE IT HOME.

You can get HEARTH AND HOME of the news-dealers at eight cents per copy; or the publishers will mail it weekly, from now to the end of 1871, at the reduced yearly subscription price of \$3. For \$4 they will send it, and also the superb American Agriculturist, from now to the end of 1871—or the Agriculturist alone for \$1.50 for the same time. TRY

"AMERICAN AGRICULTURIST."

You want both of them. They are entirely different. HEARTH AND HOME brings a very choice weekly budget of News, Miscellany, Housekeeping, etc. American Agriculturist comes along monthly, with its 44 great pages packed full of carefully prepared, condensed information for the Farm, the Garden, the Household, the Little Folks—with very many fine ENGRAVINGS. It is so valuable and so highly prized that it is constantly read by over a MILLION PEOPLE in City, Village and Country.

TAKE THEM BOTH HOME.

Taken together, HEARTH AND HOME and American Agriculturist contain choice, reliable reading matter, of a kind, character and amount to meet the chief wants of nine-tenths of all the families in the Country, and in City too. They will contain no trash, no unreliable or impure or tedious nonsense, that one will hesitate to carry home. The two Journals give over \$30,000 worth of splendid, pleasing and instructive ENGRAVINGS during each year. TO ENCOURAGE A FULL ACQUAINTANCE WITH THESE STERLING OLD JOURNALS, THE PUBLISHERS OFFER BOTH OF THEM FOR \$4 A YEAR (JUST THE PRICE ASKED FOR ONE UNTIL RECENTLY.) SUBSCRIBERS FOR ONE OR BOTH JOURNALS FOR 1871 RECEIVE THE REMAINING NUMBERS OF THIS YEAR FREE.

TRY THEM A YEAR.

A LILY'S WORD.
BY LUCY LARSON.

My delicate life—
Blossom of fragrant snow,
Breathing on me from the garden—
How do you find it so sweet to live?

"One loving smile of the sun
Charm me out of the mold;
One tender tear of the rain
Makes my full heart unfold.
Welcome whatever the kind heavens give,
And you shall find it as sweet to live."

SEA FLOWERS.

"Flowers in the sea," are there? Yes, plenty of them, and of the most beautiful shapes and colors; very difficult to gather, I grant you, and inconvenient to stroll among, but flowers as lovely and as varied as those which grow in our gardens upon dry land. People upon this earth who walk about, as most of us do, looking no further for beauty than just what we can see without thought or trouble, have very little idea of the marvelous variety and perfectness of the works of God. Surely if we should learn about and understand for ourselves something of the myriad, the endless forms of life and beauty with which this world is filled, and then could look up toward the glorious heavens with its other countless worlds, and say from our hearts, "My Father made them all," we might have some better idea of what it is to be called the "children of God."

But it was not of this great subject which I meant to speak, but only of one of the most curious of these varied forms of beauty with which the world is filled, and one of which some of you may never have learned. You look at the sea with its foaming crests and its blue mighty billows, and you feel as if beneath was a black watery depth, without beauty or loveliness, wherein dwell huge monsters and scaly fish and strange slimy creatures, but you do not know, perhaps, that there are also caves glittering as if with precious stones, and whole beds of exquisite flowers of every shape and color. I think there is hardly a flower you have seen which does not have something very like it growing far down beneath the dark waters. But the strange part of it is that these are not flowers only, but living creatures too; they go off, some of them, on journeys to other homes, found colonies and die; and yet they look only like bright flowers, feathery ferns or budding twigs. Is it not wonderful? Yet not more so than thousands of things which we see every day without even stopping to think about them.

It is only of a very few of these strange flowers that I can tell you, but that will be enough, if you think about and understand it, to make your eyes open very wide with wonder. First we have the Sea Anemones, looking like large red flowers, growing along the sides of rocks or in the bottom of the sea. You would think them a bed of bright poppies whose stems had forgotten to grow, for the flowers are set close down upon their root-like feet; yet these bright poppies can crawl over the rocks on which they live, and ring forth from their red mouths little poppies which fasten on to the same rock, or sail off in the blue waters to a home of their own. These flowers have their stings, too, like nettles, if they are touched; and if you should have the courage to grasp them and break them in pieces, each piece would be a new creature, with a life all its own.

Then, too, there are the Sea Lilies (Crinoids, they are called,) with stalks from which they seem to grow out of the rocks, and bell-like flowers pure as white garden lilies, or tinted lovely delicate hues. Then there are the Ferns—Feather Stars, some of them are called—with soft feathery branches like a delicate fern, and a tiny stem which, when the creature is young and fragile, holds it tight to rocks or sea-weeds. Some of these ferns are held tight all their lives, rooted by this stem, but most of them when they grow older break away from it and sail off into the water like the little anemones. Then, too, there are creatures like mushrooms, which swim about in the cold Northern seas, and live on smaller creatures, who are also trying to keep up a poor frozen sort of life among the icebergs. There is a very curious flower creature also, called the Gorgon's head, which lies spread out in the water with its red or green leaves. Take it up out of the water, however, and you will find it clinging sharply to your hands, but before you have time to shake it off the strange creature is gone. He gathers his long limp leaves up like a folded flower, and is already dead.

There are other sea-flowers which grow in masses, and are somewhat like clusters of Verbena or Dwarf Phlox. The bodies of the little creatures, whose heads have this flower-like appearance, are pale blue, and they, when they choose, can draw themselves in their cup-

like houses, and leave only their bright green heads up, like an unopened flower bud. Others grow along stems, from which they branch out in beautiful star-shaped flowers, of the loveliest blue, crimson or lilac.

But the most wonderful and beautiful of all these flowers are the Corals. You have heard of them, and seen pieces of their work in breastpins or necklaces, I suspect. People say, who have seen them growing far out in the deep sea, that no beds of flowers can be more brilliant nor more varied than the great Coral gardens which stretch for hundreds and hundreds of miles under the sea. It is only lately that people have learned that these were not only wonderful flowers, but still more wonderful insects. The coral branches which we sometimes see of so many beautiful shapes have been stripped of all their flower-creatures, which die, shrivel up and crumble away as soon as they are taken out of their ocean home. If we could clothe one of these branches again with life you would be almost wild with delight at its beauty. Over the stony branches we would see a covering of jelly-like cells, and out of each cell a lovely flower rising, perhaps of bright rose-color, with feathery petals of pure white, which wave as if they were swayed by a breeze. You can hardly imagine any colors which are not found in these lovely coral gardens; and then, sailing about among them all, are other flower-like creatures. Sea Cucumbers, with feathery heads; bright star-flowers of violet, yellow or crimson, and all manner of brilliant and strange creatures. We often hear of coral islands many miles around, and these you must know are built by these pretty, delicate flower creatures, for they form, or deposit, as it is called, this stony substance which we call coral, working silently on generation after generation, for hundreds or thousands of years, until they have built up miles of these stony branches of white, pink or red, under the waves. One generation of flowers dies, to be sure, but immediately fresh flowers are ready to take the place and build higher the work of their parents. Waves heat against them and break off great lumps of coral, but they only build the firmer, till they form a strong wall, inside of which the delicate flowers wave their feathery arms peacefully in the placid water. Some families of these corals have built reefs, as they are called, nearly a thousand miles in length, along the Australian coast; others have built up hundreds of round islands in the midst of the Pacific ocean.

I shall only try to tell you of one more of these sea flowers, and that is a very curious one indeed, for it seems to have a most treacherous disposition. For my part I think that alone would be enough to show people that it is no flower but a mischievous animal, because flowers only live to do good and give pleasure. This Sea Flower is like a large double German Aster, with long petals of a delicate green, tipped with a beautiful rose-color. The flower is rooted to a rock, and the lovely petals wave about in the water. But then they are not petals or leaves at all, but only so many cruel arms holding a deadly poison, which they reach out for any unfortunate little fish who shall come near to look at their beauty; and this is not a flower after all, but a greedy creature with a great open mouth, which is hidden safely under the beautiful waving arms; and "well," says a writer, "do these arms perform their duty, for the instant that a foolish little fishlet touches one of the rosy lips, he is struck with poison as fatal to him as lightning. He immediately becomes numb, and in a moment stops struggling, and then the other beautiful arms wrap themselves around him, and he is drawn into the huge, greedy mouth, and he is seen no more. Then the lovely arms unclose and wave again in the water, looking as innocent and harmless as though they had never touched a fish."

Is not this wonderful? And yet it is one of the least of the wonders with which this mighty universe abounds. The air, the earth, the water, are filled with myriad creatures a thousand times too small for you to see or feel, yet all beautifully and wonderfully made; and of all these we should remember our Saviour's words: "Your heavenly Father feedeth them."—*Baltimore Christian Advocate.*

GOD WORKS SILENTLY!—Drop a piece of wool on the floor. Do you hear it? No. It is noiseless. How about the snow? Does it make a great shout to tell us it is coming? Certainly not. "He giveth snow like wool." It is noiseless! And this is altogether characteristic of divine operations. The great forces of the universe are mute. The sun never speaks. The atmosphere is mute. Gravitation has no tongue!

He who does his work well generally does it at a profit.

The Farm and Garden.

ORANGE CULTURE IN FLORIDA.

I promised to give you an article on the orange and its cultivation in this latitude, which, I think, will be equally applicable to your region. I will now proceed to carry out this promise as succinctly as possible; premising that I do not profess to be a scientific pomologist, and simply give my mode of procedure, which has proved very successful.

In the first place select a location with an open exposure to the northwest (this being the point from which our coldest freezing winds come) with as broad a sheet of water as possible to the northwest of the site chosen. In passing over this sheet of water ice winds lose a portion of their cold, and are rendered less damaging to tender vegetation than where no water exists. This exposure also retards the flow of sap, rendering the trees less sensitive to the effect of sudden cold.

The land should be sufficiently high to drain itself; if it does not it must be drained artificially. It is by no means necessary that the soil should be very rich; a sandy loam, that in this region will yield twelve to fifteen bushels of corn per acre, will do. It should be well prepared by deep plowing and harrowing. The holes should be dug three feet deep, and, according to the size of the tree, two and a half to five feet in diameter; a hushel or two of swamp muck thrown into each hole, and well mixed with the surrounding soil. The holes should not be less than twenty-five feet from center to center. Trees fifteen to twenty years old will nearly or quite shade the whole space at twenty-five feet. This distance gives a free growth and makes a more shapely tree, allowing it to expand equally in every direction. A row of peach or guava may be placed intermediately between the rows of orange without any injury to them.

Second. As to the kind of trees, whether seedlings or the wild or sour orange stock. If the wild or sour orange is chosen, a trunk or stem from two and a half to four inches in diameter is the best. In fact a bearing stock of any size will do; with a sharp spade or ax make a circular cut around the tree three to four feet in diameter, cutting square or outwardly all the lateral roots; then with a hoe or shovel undermine on one side till you can reach the tap root, say two and a half feet below the surface; cut it off slanting downward; then if the lateral roots have been well out the tree may be heeled over to one side and easily taken out. It should then be sawed off sloping about four feet above the surface roots. The roots, especially those small fibrous ones, should not be allowed to get dry, which they do very easily; and when such is the case the tree, when planted, may live and grow, slowly or vigorously, according to the degree of injury received by these roots—they being the principal feeders of the orange tree. The tree should be set so as to bring the upper roots not more than two inches under the surface when the hole is filled up. The earth should be well worked in around the roots by hand, occasionally throwing in a quantity of water, say from two to four gallons. If this is well done, leaving no hollows about the roots, ninety of every hundred trees should be saved. The best time for transplanting is from the fifteenth of November to the first of March, the sap being more dormant and sluggish at that period than any other. The orange may be transplanted at almost any season if proper care and mulching is attended to. Too much watering in many instances is injurious, and frequently causes the decay of those fibrous roots, when they have become partially dry before being put in the ground. On account of their dormant condition, one thorough watering is sufficient in ordinary seasons.

As to the choice between the sour stock and the seedlings: The sweet seedling is the most hardy; will stand a greater degree of cold. It therefore sometimes happens that the cold is sufficient to kill the sour stock, and not seriously injure the sweet seedling. In this event, of course, the sweet bud on the sour stock must die, and the grower has to wait until the sour stock sprouts from the root and grows large enough to admit of being rebudded; whereas, when the seedling is killed, the new sprouts from the roots will be sweet, and will bear in three years. Again, I am convinced the seedling makes the most durable tree, and the most luscious fruit. It is true fruit may be had from the huddled tree in from two to four years, when it requires from four to six for the seedling to bear. I have had huddled trees to bear in twelve months from twenty to fifty oranges, but this is not usual; I have also gathered two hundred to two hundred and fifty ripe oranges from buds of two and three years' growth.

A grove or orchard of seedling trees, fifteen years old, should average one thousand five hundred to two thousand oranges to each tree, and these will sell readily at one and a half to two cents each, purchaser paying for picking and packing. This, in a grove of one hundred trees, would give from \$22.50 to \$40 per tree per annum, or \$2,250 to \$4,000 per acre—one hundred trees per acre. The orange tree, if properly cared for, will continue to grow and to bear *ad infinitum*. I have seen trees said to have been one hundred years old, that yielded annually from seven thousand to ten thousand marketable oranges. Can the same space of ground, planted in any other article, be made to give a greater return in money value for the same outlay of capital and labor?

Take a piece of wild land; say its original cost is \$10 per acre; to put it in proper condition for successfully growing the orange, say will cost (grubbing, ditching, plowing and fencing) \$100 per acre; say original cost of one hundred trees and putting them out, \$1 per tree, on an acre \$100, thus making one acre in an orange grove cost \$210. If put out in huddled trees it will give something for marketing the third year; if in seedlings about the fifth year, during which time the same land can be advantageously cultivated in corn, peas, potatoes and all kinds of melon and garden vegetables for family use. The labor necessary to cultivate these articles can give the orange trees all the attention they will require; and at the end of ten years there will be an income of \$1,000 to \$2,000 per acre; as secure as the best bank or railroad stock in the country. The orange tree requires the same attention as the apple tree North. It has but two enemies that I know of in this section of country—cold below twenty-two degrees Fahrenheit, and what is known as the "orange insect."

The first may be guarded against by a judicious selection of locations and using smoking log-heaps to the northwest on the few cold nights as may be required. The insects may be overcome by cultivation, and keeping the trees in a steady but vigorous state of growth; or by the use of a solution of guano, injected occasionally over the infected trees. My most beautiful trees have had the insect on them since they were six inches; they are now eighteen years old.

You ask about the varieties of orange among us: The principal are the round and oblong, Mandarin and Tangerine; the latter, in my opinion, is nothing more than the Mandarin, rather a small, flat orange, the pulp of which is inclined to be red, and the lobes part or separate from each other when the outside peel is removed.

A great diversity of opinion exists in regard to the orange. Some contend that the plant from the sweet orange seed will be a sour orange tree, and that a bud from the huddled tree on the sour stock will produce a sour orange. My experience is that, without exception, the seed from the sweet orange will produce a sweet orange; but that they may and do differ in flavor and sweetness from each other; and that the bud from a huddled tree will produce its like—the product from the bud partaking of the nature of the parent bud and not of the stock budded.

I have treated exclusively of the orange. The same treatment will answer equally well for the lime and lemon. These, however, are a shade less hardy than the sweet orange, the lime being a little more sensitive to cold than the lemon.

The guava, another tropical fruit, deserves particular notice, as I esteem it of equal importance to either of the above. But this communication is already too much extended, and I will therefore refrain for the present—simply remarking that during the winter of 1868-9 my guava trees were killed to the ground; that the sprouts from the old roots are now from six to eight feet high, and full of fruit, losing but one crop of fruit by the disaster.

Our orange crop will not be quite as heavy this season as last, owing to a severe drought in March and April, accompanied by strong heavy westerly winds, causing much of the young fruit to drop. We shall have a fair lemon and lime crop. Other crops—corn, cane and potatoes, sweet and Irish—are very promising but rather backward.—*F. L. Dancy, Orange Mills, East Florida, in Southland.*

Beware of impatience or contradiction. Do not condemn or think hardly of those who cannot see just as you see, or judge it their duty to contradict you.—*Wesley.*

Be not penny wise. Riches have wings, and sometimes they fly away of themselves; sometimes they must be set flying to bring in more.—*Lord Bacon.*

Do not the half of what you can, and you will be surprised at the result of your diligence.

God will never withhold from those who trust him the means to carry on his work.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,

SOUTHERN MUSIC HOUSE,

80 & 82.....BARONNE STREET.....80 & 82
New Orleans.

The house of WERLEIN is the oldest established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS and ORGANS that this country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS,

HARPS, MUSIC, BRASS AND GERMAN

SILVER INSTRUMENTS,

Saxophones, Violins, Guitars, Banjos, Flutes,

Accordions, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our factory.

Very respectfully,

PHILIP WERLEIN,

Southern Agent for Dunham & Sons, Mar-

schall & Mittern, and Hale, Piano Mani-

facturers, New York; and Needham & Son, manufacturers of the celebrated Silver

Tongue Organs and Melodeons.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE

is the most popular, being the best Cotton

Tie in use.

Planters and Cotton Pressmen everywhere

prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE

CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the cele-

brated ARROW TIE, J. J. McComb, formerly

of New Orleans, now residing in Liverpool,

having control of the best and most exten-

sive Rolling Mills in Europe, is constantly

importing large stocks of this popular Tie,

manufactured of the very best quality of

English Iron, to meet the increasing demand

for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE

of all dealers in Iron Ties, and of country

merchants generally, at the lowest market

price; and we respectfully solicit the patron-

age of Planters and Factors everywhere.

H. T. BARTLETTE AND

R. W. RAYNE,

General Agents for the Arrow Tie.

Jel 18 ly 124 Carondelet St., New Orleans.

BRACES AND TRUSSES.—DR. JOHN G.

ANGELL informs the medical profession

and others that he has constantly on hand

NINGS' TRUSSES, Spinal and Shoulder

Braces, and other appliances for the treat-

ment, relief and cure of general debility, to-

cal weakness and derangements of public

speakers and singers, palpitation of the heart,

bronchitis, indigestion, and other compli-

cations, and deformities of the lungs, spine

weakness and deformity, dyspepsia and ner-

vous affections, constipation and chronic di-

arrhea, female derangements and extreme di-

placements of the womb, Rupture, Piles,

prolapsed ani, and weakness of the male and

female system.

These light, cool and springy appliances

are the special favorites of the profession,

where necessary the professional aid of the

action; supply a missing link in treat-

ment; place the above affections in a new

and more hopeful light, and often complete

cure where medicine can only mitigate, and

more than can cure a hernia or dislocated

joint.

He specially desires an examination of

these appliances by the profession and suf-

fers, where necessary the professional aid of the

application of the above braces will be under

their supervision or that of the family phy-

sician.

These valuable appliances are

Scientific.

MAGNESIUM LIGHT.

Magnesium is a metal of silver whiteness, which is quite abundant in nature, but only to be extracted from its combinations with considerable difficulty. It is of very great lightness, speaking of weight; it also produces a very great light when burned. When rolled into thin strips, or drawn out into wire, it readily takes fire from a match or a taper, and the brilliancy of its white light is surpassed by nothing when burned. It has been used for military signals, for illuminating the path of the sea by ships, for looking down people's throats by the laryngoscope, and for lighting up caves and even the crypts of the Egyptian pyramids. The silk-mercers and milliners of Paris have discovered its value for enabling one to determine exact tints on dark days or in the night time. It has the singular property of bringing out all colors with the utmost definition. Thus the green of shrubbery and the tints of flowers in a garden become as brilliant by night as by day. For photographic purposes it is equal to the sun itself, and in the magic lantern it supplies a convenience long desired. The great drawback to its practical use has been in the cost of production. For, be it known, it burns up very fast, and is hard to extract. The cost has been recently diminished by new processes, and it is produced as a regular article of trade by the American Magnesium Company at Boston; though still its use is limited to occasional photographing, and for fancy purposes, such as lighting up tableaux, magic lanterns, etc. It is also put up in convenient form to be used by ladies at their toilet when they are anxious to determine the harmony of colors which they propose to wear. As a toy a spiral ribbon is very interesting and harmless. To carry in the pocket something which will flash out an illumination equal to daylight, and which can be seen twenty-eight miles, may well interest a lad, and is far safer than rockets or gunpowder, as it will not take fire unless deliberately lit, and will never explode. According to recent announcements an English company is hoping to reduce the price of sodium from \$4 to twenty cents. As sodium is used for extracting magnesium, we may hope that the price of this also will be proportionally reduced, and it will be a great blessing to humanity if it can be brought within the range of common use.—*Christian Union*.

HOUSEKEEPERS' DEPARTMENT.

TAPIoca PUDDING.—Six eggs, two quarts of milk, one cup of sugar, one cup of tapioca soaked in water overnight. Grate nutmeg on top. When partly done stir it, as otherwise the tapioca will sink to the bottom.

JUMBLES.—One and one-half cups of sugar, one-half of a cup of butter, two eggs, one teaspoonful of soda in one great spoonful of sour milk, flour to knead and roll like cookies. These will keep for months and are not so nice the first day.

STANDARD LEMON PIE.—Six eggs beaten, whites and yolks separately; two cups of milk, two cups of sugar, two cups of butter, juice and rind of two lemons. Beat the butter and sugar together, squeeze the juice and grate the rinds of the lemons, and the whites of the eggs lastly.

JELLY CAKE.—One cup of butter, two cups of sugar, three cups of flour, four eggs. Bake the cakes on jelly cake tins. The jelly to spread between the cakes is made with one apple grated, the grated rind and juice of one lemon and one cup of sugar, one egg. Boil until it jellies, stirring constantly. Cool before using. This jelly is preferred to any other.

TAPIoca ICE.—Soak over night four tablespoonfuls of tapioca in cold water, add a pint of peaches quartered (apples will be good also, the sweet preferred.) Place the fruit in the dish and pour the tapioca over it, add one quart of water and sprinkle sugar over it; bake slowly one hour. A simple and safe food for the sick, if any food is needed.

TAPIoca PUDDING.—A good pudding may be made in the following manner: Take three tablespoonfuls of tapioca and soak over night. Add one quart of milk and boil slowly half an hour, and then add the yolks of three eggs (beaten with sugar and a half teaspoonful of cinnamon and a little salt.) Then beat the whites of the eggs to a foam and pour it over the other, when ready to bake, and bake the whole slowly half an hour. May be eaten cold, and is a wholesome dish.

MOCK MINCE PIE.—A good substitute for the ordinary mince pie, so objectionable on the score of health, may be made in the following manner: Take two chopped apples, a teaspoonful of chopped raisins, four soda crackers, a coffee

cup of molasses, a teaspoonful of sugar, a tablespoonful of cloves, cinnamon and allspice, one quart of cider or one pint of vinegar; place the whole on the fire for ten minutes. This will make four pies, and will keep as long as the ordinary meat pies, and are more wholesome.

COCONUT CAKE.—Two cups of white sugar, one cup of sweet milk, whites of four eggs, two-thirds of a cup of butter, three cups of flour, one teaspoonful of baking powder. Bake in tins like jelly cake. Make a frosting of the whites of four eggs beaten stiff, and powdered sugar, using eight teaspoonfuls to each egg. When the cakes are a little warm, spread the icing on, and sprinkle prepared coconut on each layer, covering top and sides.—*The Household*.

OHOOSE WHOM YE WILL SERVE.

God in his mercy has valued the future from us; we know not what shall be. But this we do know—for our Lord, who is to be the Judge; has told us—that there will be a searching, awful judgment for every act, for every idle word, for every thought of the heart; and that they who are found then in willful, impenitent sin shall die the second death—cast away from the light of God's face into the "outer darkness, where shall be weeping and gnashing of teeth."

But will not God's mercy interpose to stay these fruits of sin? We are told that "death is the wages of sin." You know well that when work is done the Master cannot justly withhold the wages—just as when work is not done he cannot give it, without harm as well as injustice. This death of misery is the just wages which sin has earned. True it is that for a long time, throughout all the day of life, from the first to the eleventh hour, God is always calling men to shake off sin's service and sin's wages—is always ready to forgive the past, as he did in David's case, even while, for the sinner's own sake, that sin is scourged and punished. So is it with our men. God grant that we hear the call, through our Lord Jesus Christ! But there is a limit—there is a time beyond which, so far as we know, repentance cannot be granted. Sin cannot be forgiven, or death kept from men, without outraging the justice of God, and destroying all the conscience and responsibility of man. We are told, in the grand and touching words of the Bible's oldest book, that to know that it is so, "repents God, and grieves him at the heart;" we remember that our Lord himself wept over Jerusalem, because his people would not hear him, and because he could not save them if they did not hear. We remember how, in his suffering on the cross, he said to the women: "Weep not for me; weep for yourselves, and your children." Just so a father bleeds at heart when he punishes his own son; and a judge is moved to tears when he gives sentence of death. But the wages which are earned must be paid; else God would cease to be God, and man would cease to be man.

The only safety from sin lies in the positive attempt to serve God—to do his commandments—to yield to his will—to throw ourselves on his grace. In this present world there seems to be generally three classes of men—the true and good servants of God—the determinedly evil, devoted to the slavery of sin—and the great mass, who are indifferent, half persuaded, but not quite persuaded, ready, like the Jews (on our Lord's entry into Jerusalem), to say: "Hosanna" to-day, and "Crucify him" to-morrow. But as the eye of God looks down on this great mass he sees it always being drawn one way or the other; melting away, as it were, into the two opposite bands. And at the great day of judgment you know that it will have disappeared. There will be no middle party then; but only those who are on the right hand, and those who are on the left hand, of the great white throne.

But, thank God! this is not the whole truth. There is that other statement: "The gift of God is eternal life through Jesus Christ our Lord." But meanwhile, I pray you, ponder this—the sad and awful side of the great truth; ponder it in your own hearts, and at your own private prayers. So far as you feel you are gliding into sin, awake while it is yet time—pray to God for forgiveness, and struggle in his grace to break sin's chains. So far as God has kept you from sin, thank him, and take courage to go onward. It is still "the accepted time, and the day of salvation." Never, unless you choose it, need you die in sin's bondage, and find to your untimely sorrow that the "wages of sin is death"—even the death eternal.—*An English Preacher*.

A CLEVERMAN addressed his female auditors as follows: "Be not proud that our blessed Lord paid your sex the distinguished honor of appearing first to a female after the resurrection, for it was only that the tidings might be spread the sooner."

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY
CHARLES SCHUBERT & COMPANY,
651 BROADWAY, NEW YORK.

Gayot's Geographical Text-Books.

"Incomparably superior to anything published."—*Agassiz*.

Introduction to the Study of Geography.
Elementary Geography.
Intermediate Geography.
Common School Geography.

Gayot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools, Ohio, and hundreds of towns and cities in the other Western States; while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Gayot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exalted knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general trade of the city continues to improve. More country merchants have made their appearance, and have been busily engaged in laying in their winter supplies, but from some branches we have reiterated complaints of the demand being much less animated than usual at this time of the year, and trade being on the whole unsatisfactory. Sugar is supposed to have fallen to its lowest point, and has shown more steadiness and firmness, but the demand has been only moderate. Molasses also has been in less active request, and sold at a further decline for the particulars of which we refer to our regular report. Western produce has been inanimate, and with the exception of some demand for shipment to Gulf ports, the movement has been confined to the local trade.

Our accounts from the country present a marked contrast to those of last week. The late freeze is reported to have killed the cane in the northern range of sugar parishes, and, should the weather turn warm and muggy, it is apprehended that the result will be a material curtailment of the sugar crop, with perhaps some increase in the supply of poor molasses, but if it continue clear and cool the damage may not prove serious. From the southern parishes the intelligence is less unfavorable. As yet, however, we have no definite intelligence on this subject.

The river is eleven feet five inches below high water mark.

COTTON. The following are the arrivals since the eighteenth instant:

Louisiana and Mississippi	20,372
Florida	130
Lake	1,629
Mobile	46
Texas	27,078

On Saturday the movement commenced with a fair inquiry, at prices more in favor of factors, but without any marked advance, after which, notwithstanding a decline of $\frac{1}{4}$ to $\frac{1}{2}$ per cent in sterling exchange, the upward tendency was more decided, and the closing quotations showed a net improvement of $\frac{1}{4}$ to $\frac{1}{2}$ c, good ordinary ruling at 14 $\frac{1}{2}$ to 14 $\frac{3}{4}$ c, and low middling at 14 $\frac{1}{4}$ to 15 $\frac{1}{4}$ c. The sales at the same time were to a liberal extent, embracing 7,100 bales. On Monday it was extremely inelastic, dark and rainy. The demand, nevertheless, continued good, and although the supply was curtailed from sampling being prevented by the weather, yet 5,100 bales changed hands at a further improvement of $\frac{1}{4}$ c. On Tuesday the market opened with a fair inquiry at previous rates, the bulk of the sales showing no quotable improvement. At a later hour the advance seemed to be on the side of the buyers, but still later, under an improvement of $\frac{1}{4}$ c. at New York, prices again hardened, and toward the close were still more strengthened by an encouraging dispatch from Liverpool. The sales embraced 7,000 bales.

This makes an aggregate for the past three days of 19,200 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 239,938 bales; against 253,897 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 67,998 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 115,706 bales to Great Britain, and a decrease of 73,144 to France, and 6,043 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary 12 to 13 $\frac{1}{2}$
Good ordinary 14 to 14 $\frac{1}{2}$
Low middling 15 to 15 $\frac{1}{2}$
Middling 16 to 16 $\frac{1}{2}$
Strict middling 17 to 17 $\frac{1}{2}$

Special Notices.

ALABAMA CONFERENCE.

The members will call at the Methodist Episcopal Church South on their arrival in the city. Those who intend bringing their wives must give timely notice. J. H. MATTHEWS, MONTGOMERY, ALABAMA.

NOTICE.

The class of the first year, Alabama Conference, will meet the committee for examination on Monday, December 5, at ten o'clock A. M. Brother Cameron will examine the class on the Bible, historical and biographical parts; Wesley's Sermons, volume I, of the four-volume edition. Brother Brown will examine on Clarke's Preachers' Manual, Theological Compend and English grammar. I will examine on Watson's Institutes, part A, and Discipline and hymn book. We advise the class to study the new course also, if possible. D. M. HUDSON, Chairman.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, DECEMBER 3, 1870.

NO. 46.

NEWS OF THE WEEK.

DOMESTIC.

MONTGOMERY, Nov. 26.—To-day has been one of excitement here. At a late hour last night Governor Smith and Treasurer Bingham obtained from Supreme Court Judge Saffold and Circuit Court Judge Pelham injunctions restraining the presiding officer of the Senate from counting for Governor and treasurer, but would count for other officers. The result of the count was a majority of all the votes cast in the State for E. H. Moren, Lieutenant Governor, 4,377; J. J. Parker, Secretary of State, 4,459; J. W. A. Sanford, 3,423—all Democrats.

The president announced these gentlemen legally elected to their respective offices, and ordered the returns to be sent to the Secretary of State to await judicial proceedings.

Senator Mabry then offered a resolution that Hon. E. H. Moren be sworn in as Lieutenant Governor, and be invited to preside over the joint convention as legal presiding officer of the Senate. Mr. Barr, presiding officer of the Senate pro tem, announced the resolution out of order, and asked the Senate to retire to its chamber, which it did, and immediately adjourned. Mr. Moren, in the meantime, was sworn in as Lieutenant Governor by Judge Saffold, and was escorted to the speaker's chair. He did so, and announced that he was ready to proceed to business as presiding officer of the convention. Mr. Lowe offered a resolution that the Secretary of State, Mr. Miller—Mr. Parker not yet being sworn in—be asked to return to the Lieutenant Governor the returns of the votes cast at the late election. Mr. Phelan, the clerk of the House, waited on the Secretary of State and obtained the returns. Mr. Moren, a majority of the General Assembly being present, then counted the vote for Governor and treasurer. It resulted in 1,425 majority for Lindsay, Democrat, and about 2,500 majority for Grant, Democrat. Mr. Lindsay took the oath of office as Governor, and the State for a time will probably have two Governors. The Senate recognizes Smith and the House Lindsay. The matter will be in the courts soon.

WASHINGTON, Nov. 28.—On Saturday Judge Pascau delivered an argument before Secretary Delano and Assistant Secretary Otto, of the Interior Department, against the motion to set aside the survey made by the surveyor general of Louisiana, under the confirmation in favor of Daniel Clark, father of Myra Clark Gaines, for 1,920 toises of square land in and above the city of New Orleans, as it was in 1807.

The claim rests upon the confirmation by the commissioners of the old board of Louisiana, appointed under an act of 1807, and two acts of Congress—one in 1816 and the other in 1858—approving the confirmations by that board. The question seems to be one of identity, as Judge Pascau insisted that there was no power to go behind the confirmatory acts of Congress.

Those who are opposed to Mrs. Gaines insist that there was a mistake as to the quantity of land. They believe the commissioners intended 1,920 square toises, instead of 1,920 toises square. The quantity of land is 3,400 acres, which involves the right to several millions of dollars.

MONTGOMERY, ALA., Nov. 28.—The city is still excited, and the wheels of government entirely locked. Smith and Bingham still claim to be Governor and treasurer, and retain possession of their respective offices. Smith has obtained troops from the commanding officer here, and has them posted in front of the doors of the executive room and the treasurer's office.

This morning the Senate met, with Democratic Lieutenant Governor Moren presiding. There is but one other Democratic Senator, and all the Republicans having held over for two years.

The Senate immediately adjourned till to-morrow.

The House adopted the following resolution: WHEREAS, Article 1, section 14, of the Constitution of the United States guarantees to every State a republican form of government, which protects each of them against invasion, and on application of the Legislature, or of the executive when the Legislature cannot be convened, against domestic violence; AND WHEREAS, Peace and order now prevail throughout the borders of the State of Alabama; AND WHEREAS, Military forces belonging to the army of the United States have been

quartered within the capitol of the State during the present session of the General Assembly, without the knowledge or consent of the Assembly; therefore be it

Resolved, The Senate concurring, that a committee of six, consisting of three from the Senate and three from the House, be appointed to ascertain, without delay, upon whose application, or by whose order, and for what purpose the said military force was quartered in this capitol, and that the General Assembly do sit from all further proceedings until the report of the said committee be received and acted on.

Only two Republicans voted against this resolution.

The Board of Education has also suspended business for the present. Many Republicans denounce the action of Governor Smith as high-handed usurpation, and a grand indignation meeting, composed of all parties opposed to the revolutionary proceedings, will be held to-night, and will be addressed by many speakers who supported Smith in the late election.

CHARLOTTETOWN, Prince Edward's Island, November 28.—The fishing schooner Clara F. Friend, captured by the British and subsequently rescued, was recaptured on the twenty-fourth instant by the British steamer Plover. The captain and four others are held as prisoners.

PHILADELPHIA, Nov. 28.—The crew of the schooner Laura Hurlbut, from Nova Scotia for Washington, abandoned at sea November 12, have arrived here.

NEW YORK, Nov. 28.—The German steamer America arrived today from Bremen. She was not interrupted in her voyage.

SAN FRANCISCO, Nov. 28.—A Los Angeles telegram says: "The latest returns of the Arizona election give Bradley, Democrat, a majority for Congress of over eight hundred. Fraudulent votes for McCormick, Republican, were discovered."

FOREIGN.

LONDON, Nov. 28, 4 P. M.—The details of an engagement between the Prussians under Werder and the French under Garibaldi, near Pasques, in the department of Vosges, have been received, dated Dijon, yesterday afternoon. The Garibaldians, while on a march from Pasques late on Saturday evening, suddenly came upon the outposts of the Prussian rifles, which they attacked with great impetuosity. The Prussians were at first compelled to fall back, but reinforcements coming up, the Garibaldians were in turn repulsed in great disorder, the soldiers throwing away their arms and knapsacks in their flight.

The next day, Sunday, Werder took a circuit around Piombierres, and in this way overtook the French rear guard. Another engagement then occurred, in which the French lost three hundred and fifty killed and wounded, and the Prussians only seventy. It is said that Minotti Garibaldi had two thousand men under his command in this engagement.

By the capitulation of La Fere, seventy cannon of all sorts fell into the hands of the Prussians. In reconnoitering near Orleans yesterday the tenth Prussian corps encountered the twentieth French corps of Palladin's army. An engagement occurred, in which the French were driven from their strong position at Mazieres with serious loss. Subsequently several French companies attacked the Prussian tenth corps, but were repulsed with a loss of forty men, and a French general taken prisoner. The German loss was trifling.

LONDON, Nov. 30.—The following, dated Versailles, early this morning, was received via Berlin:

On Monday and Tuesday the forts around Paris—particularly those toward the south—maintained a furious cannonade to cover a sortie in force. On Tuesday the French came out toward Le Hoy, supported by gunboats on the Seine, and attacked fiercely the position held by the sixth Prussian corps.

Other sorties were made simultaneously in other directions, probably with a view of preventing reinforcements to the sixth corps. In all cases, however, the French were repulsed and driven behind their fortifications. The entire loss of the Prussians in these actions was seven officers and a few hundred men, while the French lost sixteen hundred in prisoners alone.

The French have been badly beaten near Amiens. Their army, totally routed, fled toward Arras. Four French guns were captured in this action.

On Monday the main body of the French attempted to force a passage

to Fontainebleau by a heavy and general attack. They encountered the tenth Prussian corps at Beaune, a little village in the department of Loiret, twenty-six miles north of Orleans. The Prussians, quickly reinforced with the fifth infantry and first cavalry divisions, repulsed the French onslaught with heavy loss in killed, wounded and prisoners. Failing in this attempt, the army of the Loire withdrew.

VERSAILLES, Nov. 30.—Immense quantities of provisions have been collected here by the Germans for the use of the Parisians when they surrender.

BRUSSELS, Nov. 30.—The Independence Belge announces that England has agreed to accept the proposed conference for a settlement of the Examine difficulty, provided Russia satisfactorily explains Gortschakoff's note.

ST. PETERSBURG, Nov. 30.—The government is in receipt of addresses from all parts of the empire, showing that the loyalty of the people makes Russia unassailable and fearless of any hostile alliance.

ANTWERP, Nov. 30.—The French prisoners here made an unsuccessful attempt to escape.

LONDON, Nov. 30, P. M.—The rumored capitulation of Paris causes buoyancy in the market here.

BERNE, Nov. 29.—Citizens of France are not permitted to pass through Switzerland to join the French armies.

BERLIN, Nov. 30.—The Queen received the following dispatch from King William:

Frederick Charles reports the complete defeat of the army of the Loire in the battle of yesterday, in which the French had the twentieth corps, probably the eighteenth and portions of the fifteenth and sixteenth corps. One thousand French were found dead on the field; two thousand were wounded, and sixteen hundred taken prisoners. General Aurelles is reported wounded. The German loss was one thousand, among them a few officers.

LONDON, Nov. 30.—The talk in the clubs favors the idea of a Tory administration to succeed the present ministry.

Queen Victoria has visited Engenie at Chesolhurst.

The Eastern question approaches a peaceful solution. It is confidently expected that the conference for the settlement will be held at London. London is in a pacific mood, and all parties feel sure of a peaceful result.

NEW YORK, Nov. 30.—The Tribune's correspondent at Tours telegraphs that Keraty has given in his resignation in the face of the enemy. He threatens Gambetta with a council of war, and accuses General Joverda of treason. Keraty is at Tours.

LONDON, Nov. 30.—About had a leading editorial in the *Soir*, which was a cry for peace. It has been ordered reprinted by Bismarck and distributed among the Prussian soldiers.

VERSAILLES, Nov. 30, noon.—It now appears that the greater part of the army of the Loire was engaged against the Prussian tenth corps at Beaune, on Monday. Reports of commanders coming in leave no doubt but that the French defeat was complete. One thousand killed were left on the field, and seventeen hundred wounded were captured. The captures were increased by the close pursuit of the Prussians.

THE SATURDAY REVIEW says, apropos of the successful voyage of the French minister of the interior in a balloon, that "if titles of honor were admissible in a republic, M. Gambetta would certainly be created Prince of the Power of the Air."

A good sort of a man was recently asked to subscribe for a chandelier for the church. "Now," said he, "what's the use of a chandelier? After you get it you can't get any one to play on it."

A MONSTER gun of thirty-five tons is being cast in Woolwich, England. It will be rifled with nine grooves, and the ordinary cartridge will contain eighty pounds of powder.

AMONG the stories from the diamond fields of South Africa is one about a homestead and kraal whose plastered walls were found studded with diamonds.

A CINCINNATI genius accounts for the anarchy by the upsetting of dyepots of glory, and the leaking of their gorgeous contents through the firmament.

THE children of God have much in hand and much more in hope.

MEMPHIS CONFERENCE.

The following items are taken from the Western Methodist of November 26:

The thirty-first session of the Memphis Conference of the Methodist Episcopal Church South began in the Baptist church, in the city of Brownsville, Tennessee, on Wednesday morning, November 16, 1870.

Bishop Daggett took the chair and conducted devotional exercises, which consisted of reading a lesson of Scripture, singing and prayer; after which the Bishop made a brief address, suited to the occasion.

The secretary of the last Conference called the roll of clerical members, who were mostly present. We do not give their names here, but in the appointments.

James A. Heard, from the Mobile Conference, and William D. Stayton, from the Louisiana Conference, were reported as transfers to the Memphis Conference, and their names are recorded.

Question first was taken up: "Who are admitted on trial?"

James W. Atkinson, Springdale and Bethel station, Memphis district; Junius P. Walker, Macon circuit, Somerville district; Thomas F. Sanders, Purdy circuit, Jackson district; David J. Austin, Purdy circuit, Jackson district; James C. Hooks, Cageville circuit, Trenton district, having been duly recommended by their several quarterly conferences, and having passed an approved examination upon the prescribed course of study, were admitted on trial.

Question second was taken up: "Who remain on trial?" B. M. Burrow, H. R. Caldwell and J. S. Glasgow. Their examination upon the prescribed course of study having been approved by the committee, their characters were passed, and they remain on trial.

The following resolutions were read, viz:

Resolved, 1. That the honor of the Methodist Episcopal Church South is involved in the payment of the old missionary debt.

2. That the Bishop be requested to appoint some member of this body to collect, receive and forward the amount assessed to the Memphis Conference, \$1,650.

3. That an effort be made at this Conference to aid in the liquidation of this old debt.

The above resolutions are recommended by the board.

S. Watson, Pres't.

J. H. Evans, Sec'y.

Thereupon the missionary secretary made a brief statement of the facts in connection with this debt, and of the plan now in course of execution for its payment. Then, in accordance with the plan, he appealed for contributions and pledges to the amount which the General Board expected from the Memphis Conference—stating that persons responding might obtain the aid of others, congregations or individuals, but must be responsible themselves for the amount pledged by them, and to be paid by the first of March next. The missionary secretary was unusually happy in his appeal, and his audience quite as happy in responding to it; so that in a short time the amount of \$1,700 was pledged, in sums of \$200, \$100 and \$50. Thus the Memphis Conference has repeated the example set by her sisters east and west of her, and would have doubled the amount if it had been necessary or proper. Surely no Conference can willingly fail to meet this call. Let us be done with the old debt, save the honor of the church, and open the way for the triumph of missions, so long hindered by this wretched barrier.

Saturday night, at the Methodist church, the missionary anniversary was attended by a great throng of people. The chair was occupied by the Rev. T. L. Boswell, vice president of the Conference Board, and at his request the opening religious devotions were conducted by the Rev. Thomas Joyner. An abstract of the annual report on missions was read by the secretary of the Conference Board, Rev. J. H. Evans. Then the Rev. Dr. McFerrin addressed the audience in his customary impressive manner, though on account of temporary illness during the day he was not able to protract his appeal for aid, as he would have done under better auspices. However, his hearers were highly entertained, and we trust all resolved to feel and show a deeper interest in the cause of missions. The money raised throughout the Conference for this cause during the year was \$1,529.50, and for the old debt \$470, in addition to the money pledged during this morning's session. In response to Dr. McFerrin's appeal at night, the collection amounted to \$406. The result we think quite favorable in view of the very heavy expenses incurred by the brethren of Brownsville in erecting their new, commodious and elegant church edifice.

The statistical secretary presented his report in tabular form, and embracing the number of members, etc., in the bounds of each circuit, station and mission. The summation gives in the Conference, as it is now limited to west Tennessee and southwestern Kentucky, 25,177 members, 261 local preachers; baptisms—infant, 596; adult, 1,604; and 3,628 conversions.

APPOINTMENTS. MEMPHIS DISTRICT.—A. H. Thomas, P. E. Memphis; Second street, E. C. Slater; Central, A. L. Pritchett; Hernando street, L. D. Mullins; Saffarans street, Greenwood and City mission, W. M. Patterson; Springdale and Bethel, D. R. S. Rosebrough; Bartlett, T. P. Davidson; Germantown, Thomas Joyner; Collierville, T. L. Beard; Macon, T. L. Boswell, James W. Atkinson; Shelby mission, W. M. McFerrin; Lagrange and Middleton, John A. File, James C. Hooks; State Female College, Charles Collins, president; W. C. Johnson, editor Western Methodist; Samuel Watson, editor Christian Index.

SOMERVILLE DISTRICT.—Jno. Moss, P. E. Somerville station, W. D. F. Hafford, J. T. Baskerville, supernumerary; Whitville, Warner Moore, to be transferred; Bolivar station, W. T. Bolling; Embury, M. D. Fly; Mount Zion, C. J. Mauldin; Covington and Tabernacle, G. B. Baskerville; Wesley, A. C. Smith; James Perry, sup.; Clopton and Concordia, M. H. Cullom; Dancyville, Ashley R. Wilson; Somerville Female Institute, W. T. Plummer.

JACKSON DISTRICT.—William T. Harris, P. E. Jackson station, James A. Heard; East Jackson, Edgar Orgain; Jackson circuit, W. B. Seward, T. F. Sanders; Humboldt and Milan, W. H. Leigh; Brownsville station, Guilford Jones; Denmark, George K. Brooks; Tabernacle, B. A. Hayes; Millin, Thomas Taylor; Pinson, R. G. Rainey; Rock Spring, Isaac N. Reeves; Purdy, John G. Glasgow; Adamsville, David J. Austin; Memphis Conference Female Institute, A. W. Jones, president; J. T. C. Collins, Sunday school agent.

TRENTON DISTRICT.—Samuel B. Sarratt, P. E. Trenton station, Smith W. Moore; Trenton circuit, M. A. Taylor, N. Sullivan, sup.; Cageville, B. M. Burrow; Friendship, John Randle; Dyersburg station, H. B. Avery, G. B. Allen, sup.; Dyersburg circuit, W. J. Mahon; Kenton, N. P. Ramsey; Brownsville circuit, James M. Scott, J. S. Renshaw; Gibson, John C. Reed, to be transferred; Ashport mission, to be supplied by Jonathan Richardson; Andrew College, S. W. Moore, president.

DRESDEN DISTRICT.—J. G. Acton, P. E. Dresden station, B. F. Blackmon; Dresden circuit, J. M. Spence; Hickman station, to be supplied; Hickman circuit, James G. Pirtle; Madrid Bend, E. B. Plummer; Troy, Wade H. Frost, M. D. Robinson, sup.; Union City station, John E. Beck; Richland, Simpson Weaver; Boydsville, W. T. C. Young; McKenzie circuit, H. B. Covington, J. C. Crews, sup.; Murray, D. C. McCutchen.

PADUCAH DISTRICT.—R. H. Mahon, P. E. Paducah station, Joseph H. Evans; Paducah circuit, W. W. Fancett; Blandville, to be supplied by J. A. Mason, B. H. Bishop, sup.; Columbus and Clinton station, Findley Bynnis; Clinton, James M. Platt; Milburn, F. A. Wilkerson; Mayfield station, Jasper V. Fly, A. L. Hunsaker, sup.; Benton, Wiley B. Quinn; Wadesborough, to be supplied; Birmingham, Thomas C. Ellis; Briensburg, to be supplied.

PARIS DISTRICT.—John H. Witt, P. E. Paris station, F. S. Petway, to be transferred; Paris circuit, W. A. Cook, D. M. K. Collins, sup.; McKenzie station, Samuel A. Massey; Coueyersville, Thomas R. Luter; Camden, to be supplied by Thomas E. Hall; Huntingdon, Junius P. Walker; Trezevant, R. A. Umstead; Salem, Benjamin P. Peoples; Lexington circuit, R. S. Swift; Morgans Creek, Benjamin Peoples; Decaturville, Reuben R. Nelson; Sattilo, J. R. Sykes.

TRANSFERRED.—Lorenzo Lea, sup., to Tennessee Conference; A. T. Scruggs, to St. Louis Conference; St. Paul's, St. Louis; William D. Stayton, to Louisiana Conference; A. B. Fly, Philip Taggle, S. R. Brewer, James I. Futrell, B. B.

tion to the money pledged during this morning's session. In response to Dr. McFerrin's appeal at night, the collection amounted to \$406. The result we think quite favorable in view of the very heavy expenses incurred by the brethren of Brownsville in erecting their new, commodious and elegant church edifice.

LOS ANGELES CONFERENCE.

FIRST SESSION.

The first session of the Los Angeles Conference was held in the Methodist church at San Bernardino, commencing on Wednesday, October 26, 1870.

Bishop Wightman called the Conference to order and opened the session by reading Romans x, singing and prayer; after which he delivered an earnest and appropriate address.

George E. Butler was requested to act as secretary pro tem.

A certificate from Bishop Pierce, transferring William Moores and George E. Butler from the Little Rock to this Conference, was presented, and they took their seats.

The Bishop announced also the transfer from the Northwest Texas Conference of William Monk.

The following brethren were then called and answered to their names, viz: Abram Adams, George E. Butler, Milton W. Glover, Alexander Groves, Robert A. Latimer, Joseph E. Miller, William Monk, William Moores, David M. Rice and William A. Spurlock.

A communication from Dr. A. H. Redford, book agent of the Publishing House at Nashville, was read and referred to the Committee on Books and Periodicals.

A communication from Dr. McFerrin, missionary secretary, was read and laid on the table for the present.

The Conference then proceeded to elect a Conference Board of Missions; whereupon the following were duly elected, viz: J. E. Miller, A. Adams, W. A. Spurlock, M. W. Glover, F. E. Adams, W. Moores, D. M. Rice, R. A. Latimer and G. E. Butler.

The constitution recommended by the Parent Board was then adopted.

On motion, it was resolved that the presiding Bishop be requested to lay before the General Mission Board at Nashville, at its next meeting, the necessities of this field, and request that the forty per cent. of the missionary collections be retained by the Mission Board of the Los Angeles Conference to meet the demands of its own missions.

The communication of Dr. McFerrin was taken up and referred to the Mission Board just elected.

The chair brought to the notice of the Conference an urgent appeal sent to him from the General Board for the immediate liquidation of the old debt; whereupon it was resolved that each preacher of the Los Angeles Conference assume his proportion of the assessment made on the Conference (\$100,) and collect and forward it as soon as possible to the treasurer of the board, Dr. A. H. Redford.

Question 6—"Who are admitted by transfer from other Conferences?" W. Moores, G. E. Butler and W. Monk.

The character of A. Groves was passed, and he was continued in the class of the third year.

In answer to Question 15, the Bishop stated that the ordination of H. McChristian would take place on Sunday.

The following is a summary of the statistical report: Number of local preachers 10; members, 475; infants baptized, 19; adults, 29; Sunday schools, 3; teachers, 16; scholars, 120. Contributed for missions, \$85.

El Monte was chosen as the place at which to hold the next session of the Conference.

The proviso resolution of the General Conference was presented by the chair and adopted by a unanimous vote.

Conference then adjourned, to meet at three P. M.—San Francisco Spectator.

THOMAS CARLYLE pays only \$125 rent for his house, and does not know who his landlord is. He is periodically directed by an attorney to pay rent at a certain place, and suspects that the cheapness of his tenement is brought about by the connivance of his friends.

The Christian Advocate.

SATURDAY, DECEMBER 3, 1870.

RAIN AFTER DROUGHT.

BY JOHN W. CHADWICK.

A few short hours ago, and all the land
Lay as in fever, faint, and parched with
drought;

And so had lain, while many a weary day
Dragged the long horror of the minutes out.

The juiceless fruits fell from the dusty trees;
The farmer doubted if the Lord was good.

As sad he watched the labor of his hands
Made useless by the day's dry mood.

The hot streets sickened in the burning glare;
The roadsides lost the glory of their green;

No second growth sprang up to glad the eye
Where once the mower with his scythe had
been.

A few short hours ago! And now, behold,
Freshness and beauty gleam on every side;

The earth has drunk its fill, and all about
The amber pools are stretching far and
wide.

A million drops are flashing in the sun;
The springs far down the upper wonder
know;

The farmer laughs, and little cares how fast
Through his torn hat the cooling stream-
lets flow.

And all the fields and pastures seem to say,
With joyous smiles that I shall ne'er for-
get—

And all the flowers and trees in chorus join—
"We knew 'twould come; He never failed
us yet."

God of my life, as God of all besides,
This lovely wonder which thy hand hath
wrought!

Quickens in thought the mercies manifold
Which thy great love into my soul hath
brought.

For I have lain, full oft, as hot and dry
As ever earth in summer's fiercest hour;
And the long days, slow creeping over me,
Brought me no tokens of thy gracious
power.

Then, at thy word, down fell thy Spirit-rain:
I felt its coolness all my being through;
Made fresh and clean and joyous every whit,
I heard the whisper: "I make all things
new."

But mine, alas! was not the holy faith
The parched earth felt through all her
thirsty hours;

I was in fear that never more again
Should I be quickened by the heavenly
powers.

So shall it be no more; but, though I lie
For many days as one thou dost forget,
Recalling this glad hour, my heart shall say:
"I know 'twill come; He never failed me
yet."

Old and New.

LETTER FROM CHINA.

SHANGHAI, CHINA, Oct. 10, 1870.

Mr. Editor: I have just returned from the country, having been as far as Soochow, some eighty-five miles from Shanghai. Shanghai has about five hundred thousand inhabitants, and not over six missionaries here to work among them.

On Sabbath last we had a monthly concert of prayer among all the native Christians, numbering some two hundred. It was a fine sight, and one which thrilled our hearts with joy, when we heard the lips of those who were once heathen sing the praises of our God. The minister, a native preacher, read some from Deuteronomy, and then from Ezekiel, in regard to the dry bones, and then passages in reference to the Lord sending out his disciples, two and two, to preach the gospel. After explaining these he spoke of the remarkable work of grace going on at Madagascar, and then spoke of the recent remarkable revival of the work near the city of Ningpo. This meeting of which I speak is a uniting of all the various branches of the church. They meet as Christians to worship one Lord. Their object is love to their fellow-men in saving them from eternal death, and they enter into it with a truly zealous spirit.

We have quite a number of villages around Shanghai, some with ten thousand, some five and some twenty thousand inhabitants. They have their temples, but they are in more or less a dilapidated condition. The eyes of some of the idols were punched out by the rebels eight years ago, and they remain the same. Some have no arms and no feet, and of some only a part of the head remains. I preached in one of these temples, being invited to do so by the priest No. 2, his superior being absent. But he told me he was sure his master would be pleased with the religion we professed, and would be glad to hear the doctrine when he returned. The priests and the people present were much pleased, and expressed a desire to hear me again when I returned that way. I had preaching, singing and prayer, which they had never witnessed before. It was a

miserable temple, and most dilapidated idols, and the priests had almost reached that point where they would cease to think, which is the height of their ambition. No animation, no life and no zeal in their own cause, they seemed more dead than alive. They seem to be in a state of stupor the whole time. I found the people ready to listen and eager to hear. You cannot preach too long for them, and they seem never to become weary. We have to preach to them on the street, where they have to stand. It is most difficult to do so, especially when the people are just coming into market. We ought to have houses in which to worship, for we cannot

worship properly on the street. We can only preach to them and tell them how to worship, but we cannot show them how to worship.

There are three walled cities before we get to Soochow, where there are tens of thousands of heathen worshippers. There are numerous villages besides. Now to reach these people we must have churches, where we can meet and teach them how to worship. These people do not know any more than a child how to worship aright. Two hundred and fifty dollars in gold would build a house and pay for the land. One thousand dollars would give us a house in four of those cities, where these heathen people could be taught to worship God in spirit and in truth. We feel the great need of it, and we know the missionary cannot do his work properly without such a house. I trust something will be done to help us in this matter. The work must go on, and Satan's kingdom must be overturned. The Lord will reign supremely in the hearts of these people, for he will cause all nations to bow before him and own him as Lord of all.

I beg an interest in the prayers of all Christians; and may the Lord hasten the glad day when all shall know him, from the least to the greatest! J. W. LAMBETH.

CLINTON DISTRICT CONFERENCE.

Mr. Editor: Although our District Conference was held on the twenty-ninth and thirtieth of September, I have seen no notice of it in the Advocate. Allow me, therefore, to furnish a few items.

The Clinton District Conference was held in the town of Jackson, Louisiana, on the twenty-ninth and thirtieth of September. The presiding elder, Rev. Joseph Nicholson, in the chair; Bro. Nettles secretary.

Members present: J. F. Forsyth, Rev. I. Wall, Rev. A. Gottschall, Prof. G. H. Wiley, Prof. A. R. Holcombe, L. S. Anstin and W. J. Pierce.

Reports were furnished from most of the stations and circuits, from which it appears that the spiritual condition of the church is good. The Sabbath schools in every circuit, with those in the stations, are in a prosperous state. The preachers and many of the people are taking a lively interest in them. The missions in our bounds are doing tolerably well. Finances are low, as yet. Hope they will improve when cotton is sold. No doubt they will. Our people are disposed to pay their preachers. There is but one parsonage in the district; another is being built in Clinton. Houses of worship are in a tolerably good state of preservation. An old debt of \$2,000 on the church in Jackson has been paid (all but a small fraction) this year, and a subscription is in hand for extensive repairs.

The brethren whose names I give below were duly elected delegates to the Mississippi Annual Conference: Judge John McVea, Josiah D. Nettles, William J. Pierce and Rev. Austin Gottschall. Alternates: Rev. Robert D. Norworthy, George H. Wiley and Lewis S. Austin.

The next meeting will be held at Clinton, Louisiana.

J. L. FORSYTH.
JACKSON, LA., Nov. 22, 1870.

To persons of ordinary modesty and common sense, just praise is at once a cordial, cheering them with a flash of warmth, and a tonic, bracing them for future good work. To sensitive and diffident natures it is almost a vital necessity.

THE OLD ALABAMA CONFERENCE.

Mr. Editor: The session for 1852 was held at Marion, Alabama, in November. The special prayers that had been offered during the year for an increase of laborers were abundantly answered. Thirty young men presented themselves for admission on trial. Of these not fewer than one-third had received a regular classical education, three of them being graduates of old Lagrange College, three of Emory, Georgia, and the others of different institutions. Of this remarkable class I will only speak of the dead. John W. Starr, son of the veteran minister of the same name who died last year, was the first to fall. He was stationed in one of the smaller charges in the city of Mobile, and fell in the dreadful epidemic of 1853. His colleagues there, Powell and Hughes, had preceded him but a few days—all of them nobly laying down their lives for Jesus. A monument was subsequently erected to their memory, which I regret never to have seen.

The second member of the class who died was John S. Belton, who went as a missionary to China directly after his admission into Conference. After a few years of faithful labor among the heathen he returned in prostrate health, but, after lingering a few weeks, died in the city of New York—I think at the home of Bishop Jones.

The third of our class who fell, and the last, so far as I have been informed, was the Rev. Walter C. Harris. And how shall I speak of one whose soul was as dear to me as the soul of Jonathan was to David? Educated in the same college, converted at the same altar, and joining the church on the same day, we met, after a few years' separation, and were admitted at the same Conference. O noble little

Wat! In that diminutive form, so delicately framed that it was almost feminine, there dwelt a soul as large in its range of sympathies as the whole universe around it; a mind whose grasp was equal to the vexed problems of all philosophy; an imagination, too, that rose to the highest heaven of invention, and a style that was never surpassed in the use of the English language. This was a scholar and a student such as we might seek in vain outside the walls of cloistered learning. Yet he carried it on so silently and unostentatiously that few ever knew of his real attainments. Entire days and weeks were often devoted to reading without interruption, for his mind became thoroughly absorbed in every book that he opened. As he expressed it, his mind took the thought of the author as if it were the smallpox; and he always believed in the book which he was then reading. Without methodical habits of any kind, he made books his companions, perused them while walking, while riding in haggies, or even on horseback—for which he once got a tremendous fall—and especially when lying in bed, which his feeble health caused him to do most of his time. While but a boy in college, in the lower classes, he was remarkable for selecting the most learned and difficult works to be found in the libraries, and he mastered them. He was the only man I ever knew who had read Kant and the German philosophers understandingly. He kept up with all new books, having a regular supply from an importer of foreign works at the North. I need hardly say that his library was the most valuable that I ever saw in the possession of a Methodist preacher, although he gave away and lost books as freely as if he cared nothing for them. His list of appointments was as follows: 1853, Cedar Creek; 1854, Nowbern and Oak Grove; 1855, Black's Bend; 1857-8, Mariana; 1859-60, Eutaw; 1861-2, Macon; 1863-4, Marion; 1865, Macon. On the eleventh of February, 1866, his noble spirit burst its frail casement and went to God. His obituary has never been written. Many, however, will remember an afternoon during the Conference at Enterprise, in the autumn of that year, when the deep, rich voice of Philip P. Neely might have been heard reading, as chairman of the Com-

mittee on Memoirs, the tribute of the Conference to the lamented Edwin Baldwin and the beloved Walter C. Harris, the latter of which was written by Neely himself. In the mellow light of that autumnal evening that voice shed its rich tones upon the audience like the sighing of the winds in the deep-toned forest of pines that waved around us. And he read, too, the tribute of the Conference to the venerable Andrew Jackson Crawford, who was gathered home as a shock of corn in its season, fully-ripe. Alas! that voice is heard no more. And when shall we hear its like again? What made that voice so sweet, so musical, so melancholy? Was it not tuned to the inner harmonies of the soul—the love of beauty and of goodness?

F. M. GRACE.

WHO IMMERSED JOHN CLARKE?

Mr. Editor: I have just read an article in the Advocate with the above caption, and sit down to say a few words about it. My good Brother Upton says many things about the aforesaid John Clarke, Roger Williams, Ezekiel Holinder, etc.—all well said, and true, no doubt, for Bro. Upton is a good and truthful writer and preacher. After asking several times, in this well-written article, "Who immersed John Clarke?" he finally asks twice, and the last time with emphasis: "When, where and by whom was John Clarke immersed?"

Now, sir, I ask: What does it matter "when, where or by whom?" What have we to do with John Clarke or poor Roger, or any other poor soul who has gone to his reward? To his own Master he standeth or falleth; and this is no truer of those gone than of those who remain. If John Clarke had been immersed a thousand times, no matter by whom, and had not the spirit of Christ, he is none of his; and so will it be with all the rest of us. I think Christ has been "wounded in the house of his friends" long enough, and the work ought to be "cut short in righteousness." Here we have the Baptist preacher saying: "We are the church, having the ministry and the ordinances in a direct line of succession from the apostles." The Episcopalian preacher sings the same threadbare song to his little band of followers; while the great bull of Rome roars out: "We are the people, and wisdom will do with us; aye, and religion too." Now why should an evangelist turn aside from his great work of preaching the gospel to a perishing world to pitch into this fight? Would it not be better to set these arrogant rivals over against each other and let them fight it out? Then, if we have a moment to spare from our high and holy work, we might spend it in praying that, so far as the hurtful and arrogant spirit which prompts these absurd claims is concerned, the fight may be after the style of a certain "Kilkenny" fight of which we read.

I repeat, it is a shame and a reproach to Christianity to make these vain assumptions, utterly unsupported by history, and of no importance or significance if they could be substantiated. What if all of these parties could produce the history for their assumption—which neither can possibly do—what then? Where does Christ or an apostle say that will constitute them the church? Nowhere, and nothing like it; and where on earth, or "in the water under the earth," these people found this image, to which they bow down themselves, is more than history tells or the Bible reveals. I know that men differ honestly on various points of doctrine, and I profoundly respect every man's opinion; but I do not think these exclusive assumptions, which a man by reading in history or Scripture, are of the sort to command respect; and I have no respect for them, and I might as well finish the sentence—I have very little for those who leave sinners to perish for the word of life while they advocate such follies.

If a Baptist will tell me that immersion is absolutely essential to salvation, or an Episcopalian will say

the same of the laying on of episcopal hands, or a Roman Catholic of the mass and the confessional, then I will treat his views with as much respect as I ask for my own, while I try to show him that I have not "so learned Christ." I will then not have to preach Christ from the unwritten history of the "dark ages," nor from the written but conflicting "History of the Baptists in New England," nor yet from the "Trials and Sufferings for Religious Liberty," by one Graves, but can go directly to the Bible. Oh, how refreshing to get out of all this fog into the clear light of truth! Here I can modestly repeat the plain words of the Holy Spirit: "If any man have not the Spirit of Christ, he is none of his"—no matter how, or how many times baptized with water, or how many hands have been laid on him. "For in Christ Jesus neither circumcision availeth anything, nor uncircumcision, but a new creature." Surely the Holy Spirit here simply says: "Neither this rite or ceremony, nor any other, is essential to salvation"—"a new creature" is the *sine qua non*, and the only one. It can form no decisive mark of a man's Christianity that he recognizes the peculiar opinions of the Baptists, the Episcopalians, the Roman Catholics or the Methodists; but it is a mark of the highest grade, and a matter of the first moment both to the person himself and to Christian society, that, in his temper and affections and conduct, he should display that love which is the "fulfilling of the law." I cannot resist the painful conviction that it is owing more to the absence of love than to the speculative opinions they severally maintain that Christian communions stand aloof from each other. If Christians of every communion would spend the time they consume in debating "foolish and unlearned questions," that "engender strifes," in the cultivation of love, it would lead them to view the peculiar opinions of each other with candor, and to set a higher value on moral qualifications and the manifestation of benevolent affections than upon those circumstantial opinions which do not enter into the essence of the Christian's scheme. If the spirit of love were allowed to expand the soul and govern the affections, it would lead us to be more anxious to correct our own mental and moral aberrations than to magnify the errors and the faults of others—to make every allowance for the effects which education, habit, temper, circumstances and particular association may have produced on the opinions of our supposed erring brethren, and especially to consider that we ourselves, had we been placed in the same circumstances, might have inhaled the same sentiments.

"Thus will the church below
Resemble that above,
Where streams of endless pleasure flow,
And every heart is love."
"Let nothing be done through strife or vain glory; but in lowliness of mind let each esteem others better than themselves."
A. E. GOODWYN.
NEW IBERIA, LA., Nov. 15, 1870.

CAMP MEETING.

Mr. Editor: A camp meeting was held at Pilgrims' Rest camp ground, on the Philadelphia circuit, Brandon district, Mississippi Conference, embracing the third Sabbath in October, attended with blessed fruits. I have delayed an account of this meeting, hoping to furnish the final result. Up to this time, however, I have had no communication from the preacher in charge, nor seen any person who was present at the close of the meeting. The exercises commenced on Thursday night before the third Sabbath in October, and continued till the following Thursday morning. Official engagements elsewhere compelled me to leave on Wednesday. Previous to this, and during the meeting, forty-one had joined the church, and more than fifty persons, I am confident, were happily converted. Indirectly I have learned since that the good work continued till the camp meeting closed. Our people entered heartily into the work, and were wonderfully blessed. The camp

meeting was amply supported, and was distinguished for the good order that prevailed. We had no regular traveling preachers save the preacher in charge and the presiding elder. Several local brethren of our church, together with Bros. McCullough and Boydston, of the Cumberland Presbyterian Church, and Bro. D. G. W. Ellis, supply on the De Kalb circuit, constituted our ministerial force. But God was with us. It was a time of great power. We realized God's blessing. This was enough. We can have camp meetings. Let us try to have one in every circuit next year. The moral effect of our camp meeting will be greater than the whole year's work beside. Bro. Holland, the preacher in charge of Philadelphia circuit, has labored faithfully, and very early in the year he agitated the camp meeting—was, perhaps, the first man to strike a blow with his own hands to clear the campus. God has rewarded his efforts. To God be all the glory. H. J. HARRIS, P. E.

CHURCH SLEEPERS.

BY PAUL MORPHEUS.

As "the pen is mightier than the sword," I take it up in defense of that large and respectable, yet much-abused class, called "church sleepers."

Firstly: They are always in their places on Sabbath morning. Who ever knew them to be absent, and thereby miss a nap! Others may come by "spells," but the pastor can always depend on the sleepers being present. Now this is no uncommon merit.

Secondly: They are such quiet bodies—except when they snore. Who ever saw one of them leave the house during service, or make any other disturbance—I don't care if Deacon T—did let his hymn book fall, he wasn't asleep! Surely quietness will be appreciated by any one who desires to hear.

Thirdly: They are so grave. Where does the preacher see such solemn faces as your sleepers present! Did ever a smile play over that elongated face? Did ever a merry twinkle linger in those eyes, in which now only the white can be seen? I tro not. Talk of standing in a graveyard amid tombstones! It is nothing compared to the surroundings of the pulpit. Gravity is nowhere so becoming as in the sanctuary.

Fourthly: They never stare at any one—not even the minister. How ill-breeding shows itself in persons who sit and stare at this one and that one during the entire service! One would think that sight was the only sense they possessed. But your church-sleepers effectually prevent this by closing up the organ of vision.

Fifthly: They never think of their personal appearance, as we often see persons who, vulgarly overdressed or undressed, never for a moment, from the time they enter the house of God, take their blessed thoughts from off their sweet selves. But how perfectly unconscious the sleeper is of person or apparel!

Sixthly: They never find fault with the sermon, he it dry or humid, dull or sprightly, long or short. They cannot comprehend your restless, nervous hearer under a long sermon. All sermons are of the same length to them, and they never begin to yawn when the forty minutes have expired. They invariably pronounce the sermon "excellent," "good!" But how could they do otherwise when they have nodded absent every proposition in it? It is evident they do not come to church to criticize.

Seventhly: They never engage church quarrels; quarreling so disturbs peace, the forerunner of sleep.

Eighthly: No one would for moment think of accusing them, being afraid or ashamed of the gospel, when they will sleep under it.

Ninthly: If Satan is busiest—has been said—in the house of God, surely here he finds the door shut, his face, and locked. And it is best for him to see how our church sleepers draw in their wandering thoughts in obedience to the injunction.

Tenthly and lastly: How, at close of worship, will they join singing.

"A wake, my soul, in joyful lays,
Who can so well enter into the spirit of this grand old hymn as to sing

But we rest the case here, as a critic's eye. I know that Bro. B. or says it is the preacher that is asleep; but is he greater than Brother Paul, who when preached at Tross, one of his great sermons had at least one sleeper in the house—Entyehus? And no doubt Mars hill some of the most respectable Athenians were found nodding.

I hope that no mercenary one will be attributed to me in applying for the aforesaid parties, they hear no part of the expense.

The Christian Advocate.

SATURDAY, DECEMBER 3, 1870.

HUMILITY.

The bird that soars on highest wing
Builds on the ground her lowly nest;
And she that doth most sweetly sing,
Sings in the shade when all things rest.
In dark and nightingale we see
What honor hath humility.

The saint that wears heaven's brightest crown
To lowest adoration bends;
The weight of glory bows him down
The more when most his soul ascends.
Nearest the throne itself must be
The footstool of humility.

Montgomery.

SUNDAY SCHOOL ORGANIZATION.

BASIS OF ORGANIZATION.

The first question to be settled is, What is the true basis of the Sunday school? Is it an independent, self-organizing institution, or a temporary society, or a society for preventing cruelty to animals, or is it an offspring of the church? A part of the machinery and working of the church? The answer given to this question will determine many others—most others, indeed, relating to the management of the school, and therefore it should take precedence of other questions. There is a tendency in many quarters to feel and act, if not distinctly to say, that the Sunday school is something distinct and apart—an institution by itself. This notion, I am happy to believe, is not as prevalent as it was ten years ago. It still exists, however, and wherever it does exist it exerts a controlling influence in shaping affairs.

For myself, I have no sort of sympathy with any such feeling or notion. The Sunday school, according to my theory, is a part of the working of the church, as much so as the prayer meeting, or the weekly lecture, or even the Sunday sermon is. It is one of the ways in which the church shows its life. The religious training of the young is an imperative duty of the church, which it can neither ignore nor delegate. The instruction of youth in the principles of the gospel is one of the leading means by which God's people are to fulfill their great mission of Christianizing the world. It is therefore the duty and the interest of every Christian church first to diffuse and foster among its households a disposition to train their children in the knowledge of the Scriptures, and secondly to supplement this family training by organizing and supporting a school wherein the Scriptures and the symbols of the church may be studied in some systematic and orderly manner. The school, according to this idea, is not something outside, springing up of itself, and coming in as a co-ordinate and collateral influence. It is rather, or at least it should be, the direct offspring and child of the church.

Holding this view of the subject, I am at no loss to determine what shall be the fountain of authority in the school. If a school is in a healthy condition, its teachers filled with zeal for the regeneration and conversion of their scholars, questions of authority and power and precedence will rarely arise. Still, in every organization where human beings work together there must be a recognized center and a recognized source of authority and control. The superintendent is the center of control and authority in the Sunday school. That is agreed on all hands. But who clothes him with this authority? Whence does it spring as its source? Who appoint him and remove him?

APPOINTMENT OF SUPERINTENDENT.

"Why, the superintendent is elected by the teachers," says the reader; "how else should he be elected?"

That is just where we differ. The school, according to my notion, is not a little republic, or a ward meeting, or an arena for exercising the suffrage, but a place for work under the direction of the constituted authorities of the church. The church has a work to do, and they appoint a man to manage it for them, just as a railroad corporation appoint an engineer or a conductor. The teachers of a public school do not elect their principal; why should the teachers of a Sunday school do so?

The opinions of nearly all Sunday school teachers, and the customs of nearly all Sunday schools, I know, are against me in this matter; and yet I am persuaded the common mode of proceeding has grown up by chance and through indifference, rather than from any well-considered theory on the subject, and I have good reason to believe that the method which I advocate is steadily and surely gaining ground. It needs but a sober and unprejudiced consideration to become general.

There are two ways of killing all life out of a school. One is to load it down with a complex machinery of laws and by-laws—to "constitution" it to death. The other is to make its offices a bone of electioneering contention. When this sort

of feeling creeps into a school it might as well close its doors; and how can this feeling be excluded when the position of superintendent is held up as a prize to be scrambled for, and the aspirant feels that he must cater for votes?

The simplest, the safest, the most effective way of organizing a school is for the session, or the vestry, or whatever body constitutes the government of the church, to select their man and say to him: Here is a work which we want you to manage for us and for the Master. Look through the congregation and select your instruments. Invite one to teach, another to be secretary, another to be librarian, and so on. We wish the school conducted on certain principles, but we leave the details of administration and the selection of the instruments to yourself. When you have your corps of teachers and assistants selected, you will, of course, as every wise administrator does, confer with them freely and kindly, and be thankful for advice and suggestion; but remember that you are the overseer of the flock, and to you we look for results.

In other words, the superintendent represents the session, or whatever body, according to the usage of the particular church, constitutes its governing authority. The superintendent is appointed by the church to do a work for the church, under instructions from the church. Instead of being elected by the teachers, he invites the teachers to be his helpers in the work assigned him.

As I said before, where a school is already well established and in successful operation, and has been organized on the other plan, I would not break up the existing arrangements for the mere sake of theory. But where a new school is to be established, or an old one is to be revived or reconstructed, I would ask those interested to consider seriously and candidly the position which I have taken.

The character, almost the life, of the school depends on the superintendent. This is admitted on all hands. Are there not grave reasons why he should not be subject to an annual election by the teachers, or to an election by them at all? Suppose the superintendent, through some infirmity of temper, or want of tact, or lack of executive ability, is not succeeding, is it not likely that a change of administration can be effected with more discretion and with less friction, with greater quietness and at the same time with greater firmness, in the manner which I have indicated, than by the exasperating publicity of a popular vote? Many a school drags out a feeble and sickly existence for years just because the teachers wish to avoid a scene. They feel naturally timid about turning out an incompetent superintendent. Surely such things can be managed better by a few wise heads, having competent authority, than by electioneering intrigues.

This, then, is the first point in the organization of a Sunday school, namely, the appointment of the superintendent. But suppose a superintendent appointed, what officers or assistants does he need in carrying on the work?

OTHER OFFICERS.

1. A Secretary.—Many superintendents perform the duty of secretary themselves. If the school is very small, and no suitable person can be obtained for the purpose, the superintendent may have to do this work. But I am not now speaking of such schools, or of such extreme cases. In the great majority of cases, where there is no secretary to keep the records of the school, it is because the superintendent is an immemorial man, with loose habits of business, and does not see the importance of a systematic and careful record of what is done in the school. Clear and correct minutes of attendance and of proceedings add greatly to the efficiency of the school, and are as important to it as to other kinds of business. Such minutes, if full and accurate, help not only to measure progress, but to guide in deciding practical questions. But to be of any use they ought to be made with care and neatness, and from actual observation on the spot. If the school is a large one, collecting the facts which ought to be registered and reducing them to record is work enough to occupy the time of one person during the whole session of the school. The superintendent's time in school is too valuable, and is too much needed for other purposes, to be occupied with these details. In almost every congregation there is some young man of quiet, gentlemanly habits, accustomed to business, perhaps a clerk or accountant in a mercantile firm, who, though not a member of church, and not willing or perhaps not suited to act as a teacher, yet feels an interest in the school, and would take a pleasure in thus making his good penmanship and his business habits contribute to the promotion of the cause. One of the special benefits of the Sunday school work is that it gives employment to much

precious talent that would otherwise go to waste. Every young man that can be utilized by occupations like these is so much positive gain. The superintendent, in selecting his secretary, ought to have an eye to this, so as not only to secure a valuable assistant, but to bring into the field of usefulness one who would otherwise be standing idle.

2. A Librarian.—The qualities needed in the librarian are very similar to those required in the secretary. One is needed who is a good penman and a good accountant, trained to method and to habits of business; one who is quiet, patient, considerate and careful; one who is not a mere routine, but who has some fertility of invention, so as to find out ways of collecting and distributing books without distracting the teachers in the work of teaching, and so as to secure the books from being destroyed and lost. The librarian, in a school of any size, needs at least two assistants, one for the boys' classes and one for the girls' classes. A third assistant is needed for the infant class. In very large schools as many as four or five assistants are needed. There is rarely any effort in employing too much assistance in the work of the library. The common error is in the other direction. The library gives an opportunity of retaining in the school many of the young men of the church, and turning to good account their talents for business.

3. A Chorister.—This office is not an indispensable one, like the two others which have been named. But wherever it is practicable, it adds much to the effectiveness of the music in the school to have some competent person whose recognized business it is to lead the children in the singing. Often the church chorister performs this office for the school. More commonly it is one of the teachers. The office is not incompatible with that of teacher, as the office of librarian or of secretary is. It is important, however, that the singing should not be left at loose ends, as it often is, but that some one of good judgment and competent musical talent should be charged with the duty of attending to the music. It needs some one not merely to raise the tune when the time for singing comes, but to study the matter and devise the ways and means of improving the music. Sunday school music has become a great power. But in order to the full development and the wise exercise of this power, there is needed a competent knowledge of the subject, invention, tact, sound judgment, and no small amount of labor and thought outside of the school. The superintendent who is able to summon to his aid an assistant of this kind adds thereby largely to the effectiveness of all his other operations. Good music in the Sunday school operates like the breath of the south wind in spring time upon a bank of flowers—sending a pleasant warmth and glow to all the genial forces of nature.

4. Teachers.—I shall have occasion, farther on in this volume, to go into a good deal of detail in regard to the duties and qualifications of teachers. The only point now to be considered is the relation of the teachers to the superintendent.

The general idea which, according to my view, lies at the basis of the whole Sunday school organization, must be our guide here. The pastor, the rector, the session, the vestry—whatever man or men constitute the ordinary authority of the church—appoint the superintendent, or invite him to carry out their views in organizing and conducting a Sunday school. The superintendent in like manner invites such persons in the congregation as he deems fit to be his helpers in this work. The teachers are assistants to the superintendent, acting in co-operation with him, under his advice and direction, by his invitation.

In other words, so far as there is an election, the superintendent elects the teachers, not the teachers the superintendent. I do not like this word election, anyhow, as applied to such matters. I would as soon speak of the minister's electing some one to pray at the Friday night prayer meeting. As the minister conducts the prayer meeting, so the superintendent conducts the school, calling to his assistance, and at his discretion, such members of the congregation as he needs and as are willing to co-operate with him in the work.

Such, I believe, is the ordinary and actual mode of doing things, whatever theory to the contrary people may have. I never yet knew a school that was thoroughly alive and efficient that was not conducted virtually on this plan, and I have known scores of good schools killed by attempting to carry the other plan into practice. If, whenever a teacher leaves the school, or a new class is organized, or a teacher becomes remiss or shows signs of hopelessness incompetency, a teachers' meeting is to be called, and the matter of personal merits and demerits is to be discussed and a vote to be taken, how can it be possible to avoid heart-burnings, wranglings

and alienations? The selection and the displacement of teachers in a work so purely voluntary as that of the Sunday school are matters requiring the utmost delicacy and tact, and any attempt to manage them by means of public discussion and popular vote must end in disaster. Patriarchal government, not democracy, is the want of the Sunday school.

It will be objected, perhaps, that I make the superintendent an autocrat, and that the plan takes away all self-respect and freedom of action from the teacher. But let it be remembered that the superintendent holds a similar relation to a power above him, from which he receives his own appointment and authority, and to which, in turn, he is amenable, and that in case of delinquency or incompetency of any kind he too may be dealt with, just as the incompetent or delinquent teacher is dealt with by him. Let it be remembered, too, by those who fear that our theory will lead to superciliousness, arrogance, or abuse of any kind, on the part of the superintendent, that the service is a purely voluntary one on the part of the teacher, and thus the teachers have it most effectually in their power to check any arbitrary or undue exercise of authority on the part of the superintendent.

My readers will excuse me for having dwelt a little on this matter. I feel persuaded that the efficiency of our Sunday school operations has been much impaired by the vague, ill-defined notions prevalent on this subject. Practically, superintendents and teachers have acted on the plan which I recommend, while their theory of action has been all the other way, and this difference between what, according to their theory, they ought to do, and what, by the sheer necessities of the case, they are compelled to do, has produced a state of hesitation and uncertainty entirely incompatible with the highest efficiency. No correctness of theory, indeed, will give to an incompetent superintendent common sense, tact, discretion or executive ability. But supposing him to have these qualities, it certainly does add greatly to the ease and efficiency with which he can work the complicated machinery, to have his relations to its several parts clearly understood and recognized, not only by the church authorities, but also by the teachers.

It does not follow from the view which I have taken of the superintendent's relations to the teachers that, on taking charge of an established school, he will feel called upon to displace the existing teachers merely to reappoint them or to appoint others. It is to be taken for granted that he has some few grains of common sense, and that he will be only too glad to retain in the service the faithful workers that he finds there. But when on full trial it is plain that any particular teacher is out of place, and the good of the school requires a change, or when the methods of any teacher are capable of being improved by wise and kindly suggestions, or when a teacher is wanted for a newly-formed class, I cannot doubt that such changes and choices are purely administrative, and come within the functions of the superintendent, rather than those of the teachers' meeting. I can see little doubt that this putting into the superintendent's hands, distinctly and avowedly, the duty of calling teachers to his aid where needed, and of displacing or changing teachers when necessary, contributes as much to the harmony and good feeling of all concerned as it does to unity and efficiency of effort.

To sum up in a few words my whole theory of Sunday school organization:

The church selects the superintendent; the superintendent selects his secretary, librarian, chorister and teachers.

The secretary, librarian, chorister and teachers are responsible to the superintendent; the superintendent is responsible to the church.—The Sunday School Idea, by John S. Hart, LL. D.

GOING TO JESUS.—Nearly three years ago a noble steamship was sinking with hundreds of people on board. Only one boat load was saved. As a man was leaping into the tossing boat, a girl who could not be taken into the boat, and who knew that she would soon be swallowed up in the deep, deep sea, handed him a note, saying:

"Give this to my mother!" The girl, with hundreds of other persons, was drowned. The mother received the note. What do you think the little girl had written in it? Here are her words:

"Dear mother, you must not grieve for me. I am going to Jesus." What faith and courage she must have had to write that note! She was going to Jesus through the stormy waves of the angry sea, yet she was not afraid. That's the kind of faith you need, my reader. And Jesus will give it to you if you ask him.

RELIGIOUS INTELLIGENCE.

The Southern Baptists have lately appointed three new missionaries. Their missions are in Shanghai and Tung-chai, China, and in Italy. They propose to reorganize their African mission.

The Berlin Missionary Society received last year 67,751 thalers, of which 46,230 thalers went to the South African mission, where they have 31 stations, 50 laborers, and 1,949 communing members.

Among the receipts of the American Board during September we notice \$10,000 from W. E. Dodge, Esq., of New York—not the last, we hope, of his annual subscriptions; also \$1,000 from S. B. Chittenden, of Brooklyn.

The Northwestern Seminary of Chicago (Presbyterian) has an endowment of \$390,000, though at present it yields an income of only \$3,000. They are seeking an additional endowment of \$200,000. They have now but thirty-five students.

Iowa.—Benton county is, perhaps, the banner county in Iowa, as it has some fourteen Presbyterian churches. Some of them are quite above the average of Iowa churches, and all doing quite well. This includes two United Presbyterian churches.

The Pennsylvania Young Men's Christian Associations held their third annual meeting November 8, 9 and 10, in Scranton. They report sixty-nine associations in the State, of which forty-one have been organized during the year. They have a membership of about nine thousand.

PASTORS' SALARIES.—The Philadelphia Presbyterian says that there were eleven hundred churches of its denomination last year which failed to raise \$500 each for pastor's salary and incidental church expenses. It also computes that as many more churches did not go above \$1,000 for the same object.

The Greek Church seems to be moving in various directions for the opening of chapels or missions in various parts of Christendom. Dr. Overbeck is to open a chapel in London, Mr. Bjerring, in New York, and another priest in New Orleans, while San Francisco has become the seat of a Greek archbishop.

The Baptists of Georgia appear to be at work with unusual zeal and energy. We see it reported that their Board of Domestic Missions nearly wiped out a debt of \$17,500 last year, besides supporting a force of sixty-four missionaries; that there are in the State 1,213 churches, with 115,198 members, of whom 39,270 are colored.

The Pope is said to be waiting for some indication of God's will whether or not to remain in Rome. It will be remembered that when undecided as to his course in 1843, his departure for Gaeta was decided by one of his prelates bringing him as a present the pyx of Pius the Seventh, which that pontiff had borne with him in exile.

An old agricultural laborer in England tried a muscular method of evangelizing his family. Being remonstrated with by the pastor for not "bringing up" his children as he should, he replied: "I dunno how it is, sir. I order 'em down to pray night and mornin', and when they won't go down I knocks 'em down; and yet they ain't good."

It looks very much as if the ecclesiastical properties in Rome would very soon be confiscated, as has been the case throughout the rest of Italy. There are converts, especially those of the Jesuits and of the nuns of Sacre Cœur, which have large landed estates in Rome, and the complaint is made that their gardens and orchards occupy too much room.

WOMAN'S FOREIGN MISSIONARY SOCIETY.—Five young ladies—Miss Britton, Miss Lathrop, Miss Butler, Miss Ward and Miss Chase—sailed in the steamer Queen, for Calcutta, under the auspices of "The Woman's Union Missionary Society of America," a Congregational organization. Recently a young lady in the East, Miss Holland, left a legacy to the society of \$15,000 cash.

There has been established in Moscow the Orthodox Society in behalf of missions, under the presidency of Innocent, Metropolitan of that city, and heretofore known as "the Apostle of Kamtschatka." Its object will be the conversion of the non-Christian tribes of the Russian empire, with the exception of the Caucasian provinces, which are attended to by a previously-existing society.

The anniversary meeting of the Baptists of Massachusetts, held in Fitchburg, October 25, developed a remarkable fact. The body consists of three hundred and seven ordained clergymen, and there are but two hundred and sixty-six churches in the commonwealth. This is only another instance of the excess of supply over demand in the old State—an excess specially to be observed in all the learned professions.

The Vermont Baptist Board, at

their recent convention at Hydeville, recommend in their report the appointment of a special committee on the subject of pastoral changes, which shall report next year. Forty changes in pastorates took place last year, and the board greatly laments the frequency of such cases. The Committee on Ministerial Education reported that \$3,000 should be raised this year to aid those in preparation for the ministry.

SOUTH AMERICA.—An agent of the American Bible Society at Montevideo, South America, says: "In Buenos Ayres steps have already been taken toward the separation of the church from the state. The measure has met with approval, and will probably be carried." The same gentleman reports that a hopeful beginning has been made toward the use of the Bible as a school book in Paraguay.

There is in Pesth, Hungary, a Jew named Dr. Hasenfeld, whose fidelity to the Jewish law excites great surprise. He is having a fine mansion built, at an expense of \$100,000, and forbids that any work shall be done on the Jewish Sabbath. As the workmen are thus compelled to rest on a day when they would be willing to work, he pays them their regular wages for that day, at a total additional expense of \$2,000, which he pays for the luxury of a good conscience.

WE LEARN from Christian Work that Senor Carrasco has organized the church in Madrid, to which he ministers in a Presbyterian form and creed, though without the Presbyterian name. The members of the congregation, who considerably exceed one thousand in number, were invited to meet the pastor and committee, with a view to organizing a church, and one hundred persons were accepted for admission. In Valladolid the services have been suspended by the difficulty in securing rooms.—Independent.

SUPERVISION OF THE FOREIGN MISSION WORK.—The Bishops of the Methodist Episcopal Church have made the following apportionment of the missions under their charge for the ensuing year: Bishop James is to have supervision of the missions in India and China, Bishop Scott those of Liberia, Bishop Simpson those of Bulgaria, Bishop Ames those of Utah and Arizona, and Bishop Clark those of South America and Montana. The home missions connected with the Annual Conferences will be severally under the supervision of the Bishop presiding in those Conferences.

The mission in the Dutch colony of Surinam is one of the most interesting of all those conducted by the Moravian brethren. About two-thirds of the whole negro population of the colony has been gathered into the congregations. Last year there were twenty-four thousand three hundred and thirty souls in connection with the missions, of whom six thousand three hundred and fifty-two were in the city of Paramaribo. Vigorous attempts are now making to reach the unsubdued and heathen negro tribes in the interior of the colony, and teach them the *Gado tori*, as they call it—the God story, or Gospel.

ONE of the greatest losses which the Church of Rome has suffered in consequence of the proclamation of the doctrine of infallibility is the large secession from her communion of the Armenians in Turkey. By order of the Sultan, the Grand Vizier, Ali Pacha, sent, on September 20, to the court of Rome a dispatch, withdrawing from the Holy See the authority which the united Armenians attributed to it. Following this notification, the powers which the Archbishop Hassoun exercised at Constantinople, as primate of the Armenian Church, are annulled. The Oriental Armenians will have to choose a new patriarch, and will enter upon the possession of all the privileges which were denied them.

Though the Pope has postponed the meeting of the Vatican Council, because its deliberations could not be free under the Italian usurpation, the Italian government has protested that it is ready to guarantee perfect freedom of debate, and that it is not responsible for the postponement. Archbishop Manning has caused a paper to be read in the British Catholic churches, in which he says that "Christendom, herself has been robbed, and the capital of the Christian world is now reduced to the capital of a nation." In this country Archbishop Spaulding, of Baltimore, who has just returned, made a speech on the occasion of the welcome given him, in which he used the severest language toward the Italians.

A COLORED INEBRIATE was lying on a bench the other evening, in his cell at the Central Station, at Providence, when the officer made his rounds of inspection. Unable by the fitful gaslight to clearly discern the prisoner's features, the officer asked: "Are you colored?" "No," answered the enfranchised, drowsily; "I was born so."

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, DECEMBER 3, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. B. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. B. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WALKER, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

Death of the Rev. B. B. Whittington.

The following note informs us that another laborer has fallen. It behooves us all to be ready for the Master's summons. Bro. Whittington was an old member of the Mississippi Conference, and had labored and suffered much in the service of the church.

CRYSTAL SPRINGS, MISS., Nov. 28, 1870.
Rev. LINUS PARKER, D. D.—Dear Brother: We have just consigned to the silent grave the body of Rev. B. B. Whittington, of the Mississippi Conference, at old Crystal Springs, Mississippi, to await the voice of the resurrection trumpet. He is the fourth member of our Conference who has fallen this year. Bro. Whittington took a superannuated relation at the last session on account of feeble health, but has labored considerably this year on the Mississippi coast, and with improved health; but a recent fall from a horse renewed and aggravated his old illness, and thus terminated his life in a few weeks. He died in peaceful hope of a blessed immortality, and rests from his labors.

WILLIAM B. HINZ.

HISTORICAL CHURCH REGISTER.—In another column will be found the advertisement of this Register. It is published by the Southwestern Book and Publishing Company, of St. Louis. On examination the Register will be found very complete and desirable. It can be ordered from the publishers, St. Louis, Missouri. The universal use of these forms will insure a complete and valuable history of the churches and membership. We regard the publication as timely and of great value.

MISSISSIPPI CONFERENCE.

The Mississippi Conference will convene at Crystal Springs on the fourth of December. Brethren, on their arrival, will call at Barnes & Wilkinson's store—brick house west of the railroad—to find their homes.

WILLIAM B. HINZ.

NOTICE.

The under-graduates of the Mississippi Conference to be examined on the fourth year's course, and the committee to examine that class, will please meet at the Methodist church in Crystal Springs, on Tuesday morning, December 13, at nine o'clock.

H. H. MONTGOMERY, Chairman.
SOUTHERN UNIVERSITY, GREENSBORO, ALABAMA.

The trustees are requested to attend a called meeting in the city of Montgomery, on Monday, December 12.
Jos. W. TAYLOR,
President of Trustees.
E. WADSWORTH, Cor. Sec.

It is only by labor that thought can be made healthy, and only by thought that labor can be made happy.

RELIGIOUS ASSURANCE.

The blessing of assurance in reference to acceptance with God is the common privilege of believers. It is something distinct from the effect of evidence and argument upon the mind, and is of an inward and spiritual character. Its object is different from the usual purpose of evidence drawn from miracles, prophecy and the works of creation. A work on the evidences of Christianity may convince us of the divinity of the gospel, but something else is needed to impart the comfortable persuasion that we have a present and saving interest therein. Religious assurance is, then, entirely distinct from a conviction of the truth of the Christian system, and is that firm conviction of pardon and adoption which dispels uncertainty. Many have this personal and inward comfort who have given the subject of evidence little or no thought, and who are entirely satisfied with an experimental knowledge of the doctrine. A genuine and clear experience seems often, if not generally, to spring from humble prayer, and an honest purpose to do the will of God, and the infidelity and latent atheism of the heart are dispersed by the spirit which cries Abba, Father.

This spiritual assurance, as the fruit of humble seeking, must be the privilege of all. It may be modified by circumstances, varying somewhat in degree, and sometimes becoming obscured and lost; but the Scriptures are plain in their deliverances upon the subject. It is true of all, in the usual range of religious experience, that "he that believeth on the Son of God hath the witness in himself," and it is also true of every class of converted people, in every age, that "the Spirit itself beareth witness with our spirit that we are the children of God." Paul declares most emphatically: "And because ye are sons, God hath sent forth the Spirit of his Son into your hearts, crying Abba, Father." The devotional utterances of the inspired record are mainly noted for the assurance which breathes in them. David and Paul, Job, Isaiah and John are in accord on this subject. Exceptional states of darkness and fierce inward conflicts, of severe temptation and deep depression, are exhibited; but we cannot resist the conclusion that they teach the doctrine, and that they usually enjoyed it.

Evangelical Christians are now generally agreed in reference to the fact of assurance, though they explain it differently. Some reject the direct witness of the Spirit, and resolve the whole matter into the witness of our own spirit, the testimony of conscience, or such evidence as may be gathered from the fruits of the Spirit as exhibited in the tempers and life. Thus Thomas Scott, in his commentary: "The Holy Spirit, by producing in believers the tempers and affections of children, as described in the Scriptures, most manifestly attests their adoption into God's family." Methodists generally hold that the testimony is twofold—the direct, as "an inward impression on the soul, whereby the Spirit of God witnesseth to my spirit that I am a child of God; that Christ hath loved me and given himself for me; that I, even I, am reconciled to God." The indirect testimony is described in its nature and office: "How am I assured that I do not mistake the voice of the Spirit? Even by the testimony of my own spirit, by the answer of a good conscience toward God; hereby you shall know that you are in no delusion, that you have not deceived your own soul. The immediate fruits of the Spirit ruling in the heart are love, joy, peace, bowels of mercies, humbleness of mind, meekness, gentleness, long suffering. And the outward fruits are the doing good to all men, and a uniform obedience to all the commands of God." This is Mr. Wesley's statement of the doctrine, and we believe that no better has ever been given.

The experience, however, does not depend upon metaphysical distinctions. Scott and Wesley, and those who receive their peculiar expositions of the subject, have the same

assurance. It is not too much to suppose that the witness of the Spirit is possessed by many who reject our doctrinal statements, and in terms deny his direct impression on the soul. Our brethren may call this experience by another name, and yet substantially enjoy the adoption of sons. The Spirit is in them, crying Abba, Father, although his direct operations are not recognized in their definitions. There are not a few devoted Christians who accept the statement of our doctrinal standards, and who profess themselves to be strangers to the assurance of pardon and adoption. In most instances of this kind we think there is a mistake. They have the witness of the Spirit, although unwilling to call their measure of comfort by this name. They have been led to expect something different, something like a "mighty rushing wind," something demonstrative and overwhelming, or something coinciding in circumstances and degree with what others have felt. They are not satisfied with the trembling confidence which ventures to breathe the filial utterance, and they cannot be persuaded of the fact, even while the cry of Abba, Father, is going up from their inmost souls. Bating exceptional states of peculiar trial, it is doubtful whether adoption exists without the Spirit of it. The soul may be in the bondage state, penitent, humble and earnest, but not yet justified. There is no assurance because the blessing of pardon has not yet been reached.

The value of assurance cannot be overestimated as a source of comfort and strength. It is the fountain of peace and joy, and of abiding satisfaction. It is also an element of stability, fortifying the believer against the assaults of a skeptical philosophy. This inward spiritual attestation stamps the Bible with the ineffaceable impress of truth. It is experimental proof that the gospel is of God, and that Christ is the divinely appointed Saviour of men. Whilst the testimony of the Spirit reveals our personal pardon, it assures the believer in reference to all that is essential in the entire scope of divine revelation. It attests and seals all truth to the converted soul, and secures it against the sophistries of infidelity. The testimony of the rocks, the paths and history of the stars, the discoveries of biology, the development notions of Darwin, or the protoplasms of Huxley, do not move the believer whose soul is anchored in this divine assurance. He knows that God has converted his soul, that his sins are forgiven, and that he is a child of God. No nervous anxiety is awakened in him by the sensational and vaunted discoveries of science, nor by the destructive criticisms of the rationalistic spirit. He knows whom he has believed. His heart is fixed and his confidence is unshaken.

Our Preachers and Temperance.

The temperance question elicited a spirited discussion. The Rev. Mr. Hartzell, of New Orleans, intimated that among Southern preachers the social glass was not uncommon. He was called upon to explain, and said that the colored people had all been taught that ardent spirits were necessary to keep off bilious disorders, and that the whole population was fearfully behind the times on the subject of temperance. The preachers sent down South by our church find themselves almost alone on the total abstinence question. Our Conferences are doing all they can in this direction.

The above paragraph is from the Western Christian Advocate, and occurs in the reported proceedings of the Illinois Methodist Convention, which met November 15. Mr. Hartzell is the pastor of Ames Chapel in this city, and we quote his language that his slanderous and pharisaical spirit may be duly appreciated. Is the record of his brethren in the South altogether clear on the total abstinence question? How much has this Mr. Hartzell associated with Southern preachers and how many of them does he know?

So far as our acquaintance with them goes we know that they are generally total abstinence men, and that they preach temperance and

practice it. A number of them are able lecturers on the subject, and are now in the field and doing good service. Many of our District Conferences have passed strong resolutions on the subject, and our Annual Conferences have usually committees appointed to consider and report on the temperance question. Our church papers publish a good deal in defense of temperance principles, and the testimony of the church has been clear and consistent.

Yet in the face of these facts this embodiment of all sanctity, this young and hopeful light of Northern Methodism, claims that he and his associates find themselves almost alone on the total abstinence question. They are the only ones who have not bowed the knee to Baal! The brother's devotion to total abstinence will hardly atone for the evident conceit and mendacity of his statements. As for whisky drinking amongst the negroes, all who know anything about the matter know that this vice has increased alarmingly since their emancipation, and that Northern politicians and Radical political associations have done more than anything else to effect this result. Before the war a drunken negro was a very rare sight indeed; and if it is now common it is because "evil communications corrupt good manners." The only extenuations for Mr. Hartzell's vile slanders are in his comparative inexperience and profound ignorance of the Southern people.

"CIRCUITS AND STATIONS."

The article thus headed, that appeared some weeks ago over my signature, it seems, has had one success—it has been read; but it has been unfortunate in making an impression different from that contemplated in the writing. As it is the policy of the paper not to publish serials, or any controversial articles that appear to have a personal bearing, it has not been deemed expedient to publish several articles, though well written, because they seemed to take rather a personal direction. "W." feels himself quite too unimportant to occupy so conspicuous a place in the Advocate, to the hindrance of things better adapted to the edification of its readers. Certainly nothing personal was intended as to "W." or any individual, but merely a general presentation of the points of comparison between circuits and stations.

It is due to those who have honored "W."s" piece with a reading to explain—which, it seems, the article was not clear enough to do—what his object was in writing the article. We hope the explanation will be satisfactory, and obviate the necessity of any further notice of "W."s" little piece.

Judging from the communications that have come to hand in relation to "W."s" article, it seems some readers have understood "W." to teach that certain men must be kept on circuits, and thus be hindered the supposed best opportunities of improvement; while a certain favored class must always monopolize the stations, with all their real or imaginary advantages. So understood, it is easy to see that the article would be odious, and obnoxious to severe criticism. I will not say anything about an apparent want of charity, or haste to criticize, in putting such an interpretation upon an article that was really written in the interest of peace and brotherly love.

From a ministerial experience of thirty-four years, without being local an hour, or being out of the pulpit one entire month at any one time; from having been a member of several Conferences; from having been on circuits and stations, and once on a district; and from not having accumulated a dollar by my ministry, I thought I might safely state some facts and make some suggestions that might be of value to some of our young men in the various Conferences in which our Advocate circulates. I have in many localities and for many years heard intimations that Conferences had certain favored classes, especially such as were appointed to the

stations; that station preachers had a comparatively easy time, while certain other estimable brethren were called upon to endure the hardships and make the sacrifices. These reflections, if just, would of course fall hardest and heaviest on our Bishops, who annually appoint every itinerant in our entire and widely extended connection to their several fields of labor. These wise, venerable and godly men, of course, do not imagine that they can please all. The responsibility is imposed upon them, and I doubt not they are amply able to take care of it. But knowing the prevalence of such opinions, and that some minds were soured and made unhappy by them, I thought I would try, for the benefit of young brethren who have not passed through the various fields, to show that there was hard work, sacrifices and disagreeable circumstances to be encountered in stations as well as on circuits—that towns and cities, as scenes of ministerial labor, were not quite so paradisaical and financially profitable as perhaps some supposed. Faithful ministerial life everywhere, in stations, circuits and districts, is laborious, self-denying and, as the world counts it, sacrificing. My simple wish was to break down, so far as my little experience and suggestions would contribute to such a result, this caste idea—this distinction between those whom the Bishops in their wisdom deem it best to appoint to circuits and stations. Certainly "W." has no wish nor interest in having any man kept on circuits, kept out of stations, or appointed to them. So far as he is concerned, he never asked but for one appointment—that for reasons of domestic affliction—and that was a circuit, and as a favor it was granted.

Dear brethren, as itinerants we must all be annually appointed by our Bishops, and always annually liable to removal. In this regard, as itinerants, we all stand upon the same level. The Bishops, I suppose, appoint us to churches mainly in view of our adaptation to the character and needs of the work. They not only represent and guard the interest of the preachers, but the people as well. If we can fill an appointment usefully, and develop at the same time, it is no doubt desirable; but I presume the Bishops never, when they can help it, appoint us to any work unless satisfied with our competency to fill the position usefully. They never, I suppose, willingly risk serious damage to any appointment with the hope that the preacher will develop. Our great preachers and Bishops, most of them, have begun on circuits, developed there, and were called thence to the positions for which they showed they were adapted. If there is light in a true minister of Christ it will shine—it will not be hid; it will be soon by the people and by the Bishops, and the man will be called forth, and heavier and heavier responsibilities will be imposed upon him. The Bishops can have no interest or desire to do any of us injustice. They rejoice in our gifts, graces and usefulness, and are happy to place us where we can most honor God and bless his church. They are our common friends, and seek only God's glory in the appointments. If this is not so, it is a pity we have any Bishops at all.

In conclusion, I have to ask our readers the charity to believe that "W." can write an article on a general subject without intending reflections on a class, or seeking any personal advantage.

In the host of bonds to all the readers of

W.
SUBSIDIARY.—The advertisement of E. H. Murfee will be found in the column of new advertisements. Deep plowing is the foundation of success in tillage, and our planting friends will do well to examine Mr. Murfee's stock. His place of business is No. 14 Union street, New Orleans.

ORGANS.—See advertisement, this week, of the Mason & Hamlin cabinet organs. It will be seen that new and desirable styles are offered at reduced prices.

VIRGINIA CONFERENCE.

LETTER FROM DR. J. C. GRANTHERY.

MR. EDITOR: The Virginia Conference met November 9, in the city of Lynchburg, and adjourned near midnight on the seventeenth. Lynchburg is a rugged city of hills. There is no level, but all is up, hill or down hill. I noticed a wooden railing to one of the stone sidewalks, especially in slippery weather. But the railing has become so slick with much handling that it is difficult to get a safe hold; the feet slide along the smooth, steep stones, and the hands along the smooth, steep baluster. Nevertheless, Lynchburg has been a flourishing town, and will be again with the revival of the Old Dominion. The inhabitants are intelligent and enterprising, and we had abundant evidence of their generous hospitality. Despite the recent ravages of the flood, which broke up for a time its connections with the rest of the world by railroad and canal, the large body of ministers, lay delegates and visitors in attendance on our Conference received a cordial welcome and a proper and elegant entertainment—never surpassed, I am persuaded, either there or elsewhere. In the abundance of the good cheer on these occasions I do not see any change from the old times, or sign of the general poverty and distress about which there is so loud a complaint. Turkey and roast beef, plum pudding and fruit-cake, jelly and cream, wheat and regale the appetite as before the war. The fact is that the kind people will provide these luxuries for their guests, though they can scarcely hear the expense. It would be a great mistake to infer that they retain the wealth of former days. Throughout our State families that once abounded in affluence are now in straitened circumstances.

The preachers seemed to be in good spirits, enjoying this reunion, and ready to go forth with energy and hope on another year of labor. There were some sad stories. One brother had received a little over \$200 for a year of hard and faithful toil, a part of that in provisions; and on this pittance he must support not only himself, but also his wife and children! We raised on the spot a special fund for his relief, and the same was done for a few others. I believe that there was an advance the past year in the average salaries of our ministers; the printed minutes will soon show us what was assessed, and what paid in every charge. These tables of statistics are of great value. They are circulated throughout the Conference, and are powerful appeals to deficient circuits and stations to do better. Our people certainly give far more, in proportion to their ability, than before the war, and I believe they steadily increase in liberality; but they are still below the proper standard. I felt grieved as I looked on some anxious faces. These brethren had learned, or at least were suspecting, that they would be sent to places from which they could not expect a comfortable maintenance. They were thinking of their dear wives and children, of the lack of suitable food and raiment and service for their wives, of the lack of opportunities of education for their children. Sometimes these brethren are reluctantly driven to locate. Yet this is in most cases a doubtful policy, even if we consider only their present comfort. How many industrious and intelligent men in our cities search for employment in vain, or secure it only by accepting very meager pay! How hard a time farmers have, especially if they are without land of their own, and without capital! It is best for our preachers to stick to their own work, enduring privations and afflictions for Christ's sake, and hoping for a better day.

We had a very pleasant and harmonious session. Men spoke out their views frankly and strongly, but with courtesy and love. I always hear the joke about our being the most talking Conference, but I doubt whether the accusation is just. From

my little knowledge of General Conferences I have concluded that some of our Western brethren are as great talkers as any of us in Virginia. Perhaps, however, they are emigrants from my own State, and have never lost the manner to which they were born. Bishop Pierce presided, and strengthened the tie of esteem and affection which bound us to him. We love all the Bishops, and Bishop Pierce is second to none in our hearts. Dr. Haygood was with us several days, and ably represented not only the Sabbath school department, but the Publishing House. The list of subscribers to the Visitor is rapidly increasing within our bounds. Our Conference, without dissent, indorsed it, and our other periodicals with great heartiness. Dr. Haygood also made an admirable address at the missionary meeting. It was not dry and common-place, nor, on the other hand, light and frivolous, but evangelical, practical and stirring. We adopted a new plan for raising missionary collections. Formerly appropriations were made for one year out of the receipts of the preceding year. But since the close of the war so little has been in the treasury, and so pressing have been the demands on us, that we have appropriated largely in excess of the amount in hand. Hence at this session we had scarcely anything left after paying the missionaries of the past twelve months. The Conference Board learned that we would need \$3,600 to be expended within our own limits. The Discipline requires that if this amount be expended among us, we send to the Parent Board \$2,400. Hence we assessed \$6,000 upon our districts, and requested the district stewards to reapportion the assessments among the stations and circuits according to their comparative ability. We now distribute by assessment among all our charges the burden of the Conference, Bishops', missionary and educational funds.

The educational fund is intended to supply the deficiency of Randolph Macon College in meeting its annual expenses. Dr. Duncan, the president, presented an able and deeply interesting report in writing of the condition and usefulness of this institution, and accompanied it with an eloquent address. The number of students this session is one hundred and twenty-six—a gratifying increase. Twenty-six are studying for the ministry. The standard of scholarship is high, the faculty men of first rate ability, the studious and moral habits of the young men worthy of all praise, and the religious influence powerful and wholesome. Our college is now located most advantageously. Six trains of cars daily passing its gates advertise it to hundreds of travelers. The buildings are commodious, the grounds ample and beautiful, and the health of the village excellent. I do not believe that the Methodist Episcopal Church South could furnish from the ranks of the laity or ministry a man better fitted to be its president than Rev. James A. Duncan, D. D.

I hope these items of information from the Virginia Conference will not be without interest to the readers of the NEW ORLEANS CHRISTIAN ADVOCATE. We are all one.

J. C. GRANBERRY.

P. S.—I forgot to mention that \$1,900 were reported to us as our portion of the missionary debt, and we pledged ourselves individually to raise and forward different sums, the aggregate of which will, I think, exceed the whole amount assessed us.

At the State Fair, New Orleans, 1870, Murfree's Subsoil, with attachments, received a gold medal for the best and most important invention relating to agriculture.

The census returns of Montana show a population of 20,580. There are 18,000 Indians in the Territory.

NEW PUBLICATIONS.

We have received from the publishers, Harper & Brothers: THE VIVIAN ROMANCE, by Mortimer Collins; and WHICH IS THE HEROINE?

EPISODES IN AN OBSCURE LIFE. Being experiences in the Tower Hamlets. By a Curate. With numerous illustrations. Philadelphia: J. B. Lippincott & Co. 1871.

This book is bound in paper, one hundred and fifty pages octavo, and we believe came out in numbers in Good Words. It depicts the sufferings, destitution, and in some degree the vices of the London poor, and the experiences of a pious curate in his intercourse amongst them, and his endeavors to carry to them the blessings and consolations of the gospel. The characters are well drawn, and scenes and incidents are depicted with much skill and power. For sale by J. A. Gresham, Camp street, New Orleans.

THE SUNDAY SCHOOL IDEA. An exposition of the principles which underlie the Sunday school cause, setting forth its objects, organization, methods and capabilities. By John S. Hart, LL. D., senior editor of the Sunday School Times, etc. Philadelphia: J. C. Garrigue & Co. 1870.

From what we have read of this work we are disposed to pronounce it the very best we have ever seen on the Sunday school question. It is sensible, judicious, comprehensive and exhaustive. All Sunday school workers should furnish themselves with it at once. Pastors, superintendents and teachers will find it of the greatest advantage to them in their efforts to organize and maintain good schools. The volume is a neat 12mo, of 406 pages, well arranged, and has a very convenient and copious index. We are indebted to the publishers for a copy of this valuable work.

THE OLD MISSIONARY DEBT.

Under this uninviting head the missionary secretary gives "an explanation," which it seems had been called for by certain parties. We thought all the explanation needed was simply liquidation—and that, too, as soon as possible. However, the explanation is given, and nobody can mistake it. We trust that the proper means for liquidating the debt have been adopted, and that it will be numbered with unpleasant things of the past, when on next New Year's day we recount our providential deliverances. Meanwhile, what is to be done for the support of missionaries now in the field? How are current expenses to be met? The General Conference made no adequate provision to meet the wants of the board during the present year. This is a trying crisis in our history. We wish Bishop Keener, who presided at the last session of the Indian Mission Conference, could find some field in which he could glean some \$5,000 or so, as did Bishop Marvin, for the relief of our red brethren. The treasurer has not a dime in his box to meet current expenses, and the board is resolved not to go in debt. The present debt must and shall be paid, and that speedily. "The burnt child dreads the fire." Depend upon it, our board will keep out of it in the future. For Christ's sake, we plead for greater zeal and liberality in this blessed cause. The church will be cursed with a curse if it does not come up to the help of the Lord in this time of need. Let us put forth extra exertions to meet the emergencies on which we have fallen; and we shall soon be through the straits; on an open sea, and our voyage will then be pleasant and safe. It seems to us that this is just one of those times when the church needs a Thomas Farnor or a Samuel Budgott to relieve it, by a princely contribution, of its financial embarrassment. Of what use is riches if it is not employed in just such a cause as this?—Nashville Christian Advocate.

Burning of a Steamer in Mobile Bay. FIFTEEN LIVES LOST.

The painful intelligence reached the city this morning that the steamer Arlington, engaged in the lighterage business, and owned by J. M. Hollingsworth and Captain James Alexander, was entirely destroyed by fire, just below the stake in the bay, about midnight last night.

There were known to be about twenty souls on board, and it is feared that all except James Thompson, stovedore, who was picked up by the New Orleans steamer Mary, and five others (names not known), who were picked up by the steam lighter Effort, are either burned or drowned. Those picked up by the Effort have not yet reached the city.

Captain Thompson and Mr. J. C. Babcock, both well known stovedores here, were the only passengers

on board of the Arlington, and from all the intelligence we have been able to obtain, little hope is entertained for Mr. Babcock's safety. The Arlington's crew consisted of the following: Captain William G. Lee, master; George Lee, mate and steersman; William Kinney, first engineer; James Joiner, second engineer; John Espalla, carpenter; unknown white man, watchman; Jesse, negro cook and stoward; a negro fireman, hoister, and ten deck hands. In all, crew and passengers, twenty-one persons.

The Mary sailed around among the floating cotton and saw only Captain Thompson, leaving the scene of disaster after daylight this morning.

The Arlington had on board 581 bales of cotton, destined as follows: Ship Resolute 209, ship E. C. Scanlon 172, ship Fleetford 109, steamer Australian 172 bales.

How the fire originated is not known. Captain Thompson, who was sleeping in the same stateroom with Mr. Babcock, was aroused from his sleep by the cry of "fire," and getting on deck found flames issuing from all parts of the boat. He saved himself by clinging to the small boat, which was either upset or swamped in the launching. The last he saw of Mr. Babcock was that he threw two bales of cotton overboard; at a later time he saw the two bales and Mr. Babcock was not with them. This circumstance increases the apprehension for Mr. Babcock's safety.

Of the others on board the ill-fated steamer we have no tidings, and must therefore hope for the best, while we fear for the worst.

The engines were not stopped after the fire broke out, the heat being so great that they could not be reached. For this reason the boat continued on her deadly course, and to this is attributed the difficulty in getting the small boat safely launched.

The boat was insured and valued at about \$10,000. The cotton was all protected, mostly in different offices.

Captain Thompson is very badly chafed by rubbing against the boat, the skin on some portions of his legs being torn off almost to the bone. Mobile Tribune, November 25.

Married.

By Rev. Angus Dowling, November 24, 1870, at the bride's residence, Geo. W. Steward and Mrs. Martha O. Carrs, both of Pike county, Alabama.

On the evening of November 26, at the residence of the bride's parents, by Rev. T. B. White, Captain Henry C. Rush, of ship Itasca, Bath, Maine, and Miss Sarah A. Jacobs, of New Orleans, Philadelpia and Bath papers will please copy.

Obituaries.

Our friend and sister in Christ, Mrs. Ann Cooper, was born in Frederick county, Missouri, February 22, 1828.

Her parents were Methodists, and she was trained in the fear of God. On the thirtieth of September, 1852, she was married to Captain L. W. Cooper. In 1855 she joined the Methodist Episcopal Church South at the Felicity street charge in this city, and in January, 1856, removed her membership to the Carondelet street charge, of which she continued a faithful member until called from the church militant to the church triumphant.

Sister Cooper was a woman of great prudence and firmness of character, always discreet and consistent. Her counsel and example were invaluable in her family.

Until eighteen months ago she was the picture of womanly health, grace and beauty. But colds, and some two or more attacks of pneumonia, diseased and shattered her lungs. All that skill, change of air and kindness could do were done to restore her fading health and failing strength, but were done in vain. While sitting in her chair before the fire, early on the morning of the twenty-third of November, 1870, after having passed a night of more than usual comfort, she suddenly ceased to breathe, and calmly fell asleep in Jesus. During her long and weary sickness she was ever patient, never complaining, and always meekly submissive. She leaves a disconsolate husband, two children and a large circle of friends to mourn her loss. The church militant has lost a soldier of the cross, but heaven has gained another angel and a blessed child of light.

Her pastor, J. B. Walker, New Orleans, La., Nov. 24, 1870.

Mrs. ELMIRA TACKETT, wife of O. H. P. Tackett, and daughter of William and Elizabeth Jobe, was born in Lincoln county, Tennessee, December 31, 1818. When she was quite young her parents moved to Alabama, where she was married to Bro. Tackett, February 26, 1839. Thence she moved to Holmes county, Mississippi, in 1853, and died in Richland, November 9, 1870. She was the mother of nine children, all of whom, with her husband, are still living.

Sister Tackett joined the Methodist Episcopal Church South in 1858, and remained a member till her death. She was not very active in the discharge of the public duties of Christianity in consequence of affliction, from which she suffered for about ten years. There were no demonstrations of piety and displays of religious zeal which placed her before the world as the zealous, useful Christian. Those who knew her most intimately recognized in her life the evidences of genuine piety, and in the private circle where she moved her influence as a Christian was felt.

She was ardently and devotedly attached to her family. With untiring energy and perseverance she labored for the happiness of her children. Her love and devotion to their welfare must ever remain to them a pleasing memorial of her maternal worth.

Her last sickness was short and decisive, and her death very unexpected. Even she herself had hardly time to realize her near approach to dissolution and give expression to her state of mind. When told that her end was near she expressed regrets at leaving her children, and died calling earnestly upon the name of Jesus.

Her pastor, R. J. JONES.

BRO. J. B. JENNINGS, the subject of this notice, was born in Notaway county, Virginia, January 21, 1820, and departed this life, in this city, November 20, 1870.

He was the son of pious Baptist parents, and was brought up in the nurture and admonition of the Lord. In his nineteenth year he sought and found a pardoning God, and connected himself with the Methodist Church, in which he continued, in various localities, to the day of his death. Almost from the first of his membership, wherever he resided he was an official member. Soon after his connection with the Carondelet street charge, in this city, I nominated him for the office of steward, to which the quarterly conference unanimously elected him, which place he held until God called him from labor to reward.

Bro. Jennings was married in May, 1846, and was most happy in his domestic relations, being a man of most gentle and kindly nature—never happier than when in the midst of the beloved domestic circle. He was most indulgent, kind and sympathizing toward his children, happy in all their innocent joys, and doing whatever he could to make the current of their young lives run with joyous flow. He leaves eight children to cherish his memory and mourn their irreparable loss; but it is a great consolation to know they are left in the gentle care of a pious and devoted mother, who will deeply feel the obligations which this sore bereavement has devolved upon her.

Much does this stricken wife and mother need the prayers and sympathies of the good, and the all-healing and all-healing grace of Him who is the God of the widow and the Father of the fatherless. But He will visit, in all the blessed ministrations of his grace, the fatherless and the widow in their affliction.

Bro. Jennings was sick only four short days. He said, when taken sick: "Wife, I have yellow fever. I shall never get well. But I am prepared." He calmly fell asleep on the Sabbath evening, and ascended to join the congregation of the blest in the rest and endless praises of the heavenly Sabbath. The memory of the just is blest.

His pastor, J. B. WALKER.

Mrs. ELIZABETH ALICE DUCKERY, second daughter of Z. W. and A. R. Barnes, was born June 23, 1845, and died October 12, 1870.

She was a native of Abbeville district, South Carolina; came to Louisiana in 1865, and was married to Mr. A. F. Duckery February 9, 1870. She professed religion at about ten years of age, and united herself with the Methodist Episcopal Church South, of which she remained a devoted and worthy member until death. Her religious life was consistent and uniform.

Whenever an opportunity offered she specially delighted to attend Sabbath schools, and always gave them all the assistance and encouragement in her power. But it was during her last illness, and in the last days and hours of life, that the Christian graces shone in her most conspicuously. She was permitted to enjoy a wonderful triumph at the last. She very much desired to die in her senses, that she might know her friends and be able to talk with them in the last moments of life; and to the fullest extent she had her wish gratified. Several days before the last trial came she gave her mother full directions about her burial as calmly as she would have directed the preparation she would have made for visiting a friend. Two days before her decease she said to me that she had been reading and had noticed this passage:—

"Casting all your care on him, for he careth for you." Then she added: "It

is enough. Don't you think it is enough?" The next day she said to me again: "I have been thinking of this Scripture, 'Whether we live, we live unto the Lord; and whether we die, we die unto the Lord.' Whether we live, therefore, or die, we are the Lord's." She then said: "What difference does it make, then, whether we live or die? We are the Lord's all the same."

A short time before the closing scene she expressed herself as very thankful that her mind was so clear—that she knew us all so well, and could talk with us so freely. After requesting all to meet her in heaven, she said: "Now all of you sing, and I will die so happy." Being asked what she would have us sing, she said: "O sing to me of heaven." Some stanzas of this hymn were sung by her mother and friends who were present, she joining in with them in a clear, sweet tone. A few moments after, feeling that she was almost gone, she repeated the Child's Prayer. The variation she gave to the words, to suit them to the occasion, was very striking.

"And now I lay me down to sleep,
I give the Lord my soul to keep;
I know I'll die before I wake,
I give the Lord my soul to take."

HER FATHER.

My Friend, Stop that Terrible Cough, and thus avoid a consumptive grave, by using Dr. Pierce's All-Ex- or Golden Medical Discovery. For curing all throat, bronchial and lung diseases it has never been equaled. Sold by druggists.

FIVE CENTS ADDITIONAL will buy shoes with Silver or Copper Tips, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. Sent 3mr

The Child's Corner.

STARS.

BY FRANCES RIDLEY HAYWARD.

The golden glow is paling between the cloudy bars;
I'm watching for the twilight, to see the little stars.
I wish that they would sing to-night their song of long ago;
If we were only nearer them, what might we hear and know!

Are they the eyes of angels, that always wake to keep
A loving watch above us while we are fast asleep?

Or are they lamps that God has lit from his own glorious light,
To guide the little children's souls whom he will call to-night?

We hardly see them twinkle in any summer night,
But in the winter evenings they sparkle clear and bright.

Is this to tell the little ones, hungry, cold and sad,
That there's a shining home for them, where all is warm and glad?

More beautiful and glorious, and never cold and far,
Is he who always loves them—the bright and Morning Star.

I wish those little children knew that holy, happy light!
Lord Jesus, shine on them, I pray, and make them glad to-night!

Sacred Songs for Little Singers.

OUR DAILY BREAD.

BY EMILIE GRAHAM.

"Will you go with me to little Willie's grave, mother? I think the violets must be in bloom," said Alice Gray as she was leaving church with her mother, one pure, bright morning, when all nature seemed in its stillness conscious that the seventh day of rest had come.

A sunny silence brooded over the fields, and the light wind passed without a sound among the trees, whose more slender branches, although green and rosy with new sap, had scarcely yet begun to put forth tufts of baby-leaves. The grass was green, though, as it always is in spring, and on the greenest of the hills, lifted up, with all its quiet, white stones, into the cheerful light, lay the burial ground of the village.

In a sunny corner was one little grave, so blue with wide-opened violets that it seemed as if a part of the very sky had fallen upon it, and thither Alice and her mother bent their steps. It was a tiny grave; for, although Willie had been an angel now four years, he only stayed here long enough to learn to leap, and laugh aloud, and clap his pretty, dimpled hands.

"Did you cry, mother, when Willie died?" asked Alice, after they had stood some moments by the little mound in silence.

"Yes," replied the lady; "I could not help feeling sad and lonely when my little boy was taken away, but I never wished him back—never for one moment."

"What a little, little grave it is!" said Alice thoughtfully. "Is he a baby now? and will he be a baby forever? Would he have remained a baby if he had stayed here?"

"No, certainly not. He would have grown large and strong; he would have been a man, after a while."

"And is it the only difference between a baby and a man, that one is small and weak and the other large and strong?"

"Oh, no! Babies do not know anything, and cannot do anything useful, except be so sweet and innocent that every one is obliged to love them, but men know and do all sorts of wonderful things."

"Then it is not the body only that grows?"

"No, I suppose the spirit must grow too. You know plants grow by the nourishment they draw from the earth and air and sunshine, the bodies of men and animals by the food they eat, and the spirit—what do you think nourishes the spirit?"

"Is it not hearing and seeing so much?"

"Horses and dogs hear and see; they see the stars every night, and the sun every day, and all nature spread out before them, just as we do, yet of these things they know nothing; far less do they know anything of the God that made them."

"It must be thinking of what we see and hear, then, that makes the spirit grow."

"And what is thinking?"

"Thinking—thinking is a sort of asking questions, and answering them ourselves."

"If this answer is not falsehood—which, in fact, would be no answer at all—what is it?"

"It is truth."

"From whom have we truth?"

"From God. You told me the other day that all truth is from him."

sun, so truth flows from God, forever, in infinite abundance; it is not and cannot be created by our minds nor in them, any more than the light of the sun can in or by our eyes. It is shed upon us from a source above us, and that source is God. Therefore, when we think any new truth, it is because some little ray of all that infinite light which has been shining on forever has just found its way into our minds, and I suppose what you wished to say is, that this questioning when we think is the effort of the understanding to open itself to the reception of truth, and the flowing in of truth is its reply."

"Yes, and its food too. Is it not truth which nourishes the spirit and makes it grow?"

"Not truth alone. Does not your spirit do something besides think?"

"Yes, it feels. It loves what it thinks about."

"If it did not love what it thought about, it would cease to think; and if it ceased to feel and think, it would cease to have life. Love is the very central core of life. It is life itself."

"You told me that love as well as truth comes from God, but I do not see so plainly how that is."

"Look at the sun. You see the light shining into your eyes, and know whence it comes, but you cannot see the heat, and yet every blade of grass, every insect, every creature that lives, is dependent on that very heat, and would utterly perish if it were for one moment withheld, although the light might be withdrawn for a season, and no great harm ensue."

"I cannot see the heat, but when I turn to the sun I feel it shine warm on my face, and therefore I know just as well where the heat comes from as if I saw it."

"That is quite true, and spiritually true too. Turn to God in a sweet and humble spirit, and you will feel his love shine warm into your heart, and will know that it is all from him, and that if he were for a moment to withdraw it your soul would wither and perish like a frozen plant. By the daily bread we are taught to pray for is signified those good affections of which God is ever ready to give us full measure, pressed down and running over."

You see now that true thoughts and good feelings are the food of the spirit, and nourish it into strength and beauty, and I think you can tell me whether it is likely your brother will remain forever a baby in heaven."

"Oh, no! Surely he will not! I should think he would grow up much faster in heaven than on earth; for the angels would love to teach him truth—would they not?—and help him to be good, so that soon he would become great and wise like themselves."

"Yes, doubtless angels teach our little ones who are gone to heaven much more wisely and tenderly than even we would have done; and that is one reason why we should not mourn their loss and wish them back on earth. Still it is God who teaches them, through the angels, and he alone who fills their hearts with love; and he will so teach and bless every little child on earth, too, who is willing to be guided by him."

"Willie has been four years learning from the angels. Are four years the same time in heaven as on earth?"

"There is no time in heaven—no time to spirits—and we can form no idea at all what relation, if any, four years may bear to spiritual growth. One thing only we can know—and that is that the better use we make of our earthly time now, the more we shall keep pace with the growth of our darling in heaven, and the more certain we shall be to join him at last in a world where there are no graves and no partings any more."—The Children's Hour.

HELPING THE MINISTER.—"There was one thing that helped me very much whilst I was preaching to-day," said a clergyman.

"What was that?" asked a friend.

"It was the attention of a little girl who kept her eyes fixed on me, and seemed to try to understand every word I said; she was a great help to me."

"What! can a little child be a great help to a minister? Yes! How?"

By paying attention. Think of that, my little ones, and when you go to church fix your eyes on the minister, and try to understand what he says, for he is speaking to you as well as to the grown-up people.

Prisms furnish 33 per cent. of American iron, 68 per cent. of our steel, and 46 per cent. of our glass. The latter industry embraces 60 factories of all descriptions, producing annually 70,000,000 bottles, 600,000 boxes of window glass, and 12,000 tons of glassware, worth in the aggregate \$7,000,000.

A narrative of the events which preceded Sedan is being prepared under the eye of Napoleon, and is soon to be published.

The Farm and Garden.

THE APPLE.

BY DR. J. H. HANAFORD.

The apple crop for the present season probably exceeds that of several years, and certainly is an important item in the domestic arrangement. The skillful housekeeper is able to use the fruit in very many dishes, and when abundant as at present, at least in New England, they may be used very extensively even as a matter of economy, if need be, taking the place of articles which constitute some of the more expensive items of culinary outlays.

For several years butter has been disproportionately expensive, almost or quite an article of luxury. And as it contains little or no actual nourishment, nothing to give strength and power of endurance—simply the fuel element, the source of fat and animal heat—its free use is inconsistent with a moderate income, while the scarcity of fruits for a few years past, and the absence of any satisfactory substitute, have rendered its use apparently necessary. But the present supply of apples will do much to afford a good substitute for butter.

The free use of apples in the thousand and one dishes which the good housekeeper will be able to invent, if not familiar with them already, cannot but be regarded as an improvement, even admitting that butter is a proper article of food. It will surprise some to know in how many ways good apples may be used, and how many palatable dishes may be made by simple combinations of the apple with other articles of food. But few persons understand what wholesome and agreeable dishes may be made by combining apples with such articles as contain much of the starch element, as the rice, sago, tapioca, arrow root, etc. These articles are quite nourishing, easy of digestion, and especially adapted to weak stomachs. Very palatable dishes may be made from any of these with a simple addition of apple and a small amount of sweetener.

The same remarks apply to articles rich in albumen, either animal, as the white of the egg, or vegetable, as found in the nuts, the almond, for example, from which the custard may be made as well as from the egg, the cabbage, the cauliflower or asparagus, as well as those foods containing gelatine and mangle.

There is a special propriety in their use with such articles as contain a large proportion of starch, as sago, tapioca and rice, since most of these afford too much fuel to increase feverish and inflammatory tendencies. The use of the apple, the sour more especially, counteracts these tendencies, and will really constitute, in a proper combination, a very wholesome and palatable food for all classes, of course not designed for constant use, since "bread is the staff of life."

Again, the free use of apples with our meals will do much to correct the torpid state of the stomach and bowels, removing that fearful constipation that so generally exists in New England, where so great a percentage of the food is too concentrated. It is unquestionably true that many if not most of the prevalent forms of disease have their origin in this torpid state of the bowels. It is a well known fact that fruits in general tend to correct this evil, and of the whole range of fruits the apple has not its superior not only in the amount of its nourishment, but in the wide range of its application and its beneficial effects.

And that it may be the most beneficial in this particular, especially in severe cases of costiveness, the peel may also be cooked and eaten with advantage. I well know that there is a prejudice against this custom, but it is not based on science. The most valuable part of the apple is found just beneath the peel, and indeed in it. It may prove too irritating in some instances, at least when not well cooked, and yet in the cases of constipation just such stimulation is demanded. It is an acknowledged principle in physiology that both unnutritious and indigestible food should be mingled with the finer elements to occupy the space and to serve as a stimulant, especially when the organs of digestion are somewhat torpid. Of course it is desirable that the peel should be cooked soft, and that it should be thoroughly masticated under all circumstances.

Apples also are a good purifier or renovator of the system. They contain the elements of purification in a very great degree, and as such are endorsed by Baron Liebig and others. If those, therefore, who are so anxious to obtain blood purifiers will consume less diseased pork, and use more fruits, especially in their season, they will have less occasion to patronize the quack nostrum vendors, most of whose articles are as worthless as their inventors are unprincipled.

The fact that when children use

fruits freely sores appear on the surface, particularly about the mouth, has led some to infer that apples make humors. This is a false inference. These sores are generally attributable to the fact that their improper use between meals, in an unripe or bad state, has produced an irritated condition of the stomach, the same condition extending itself to the outer surface. Their use also tends to drive the humors to the surface, producing none, but simply throwing them to the surface, the safest place for them.

Once more, briefly, fruits have been said to be "gold in the morning, silver at noon and lead at night." This must be simply a fanciful arrangement. If the apple is proper food and easy of digestion, it cannot produce these varying effects. If they are really wholesome, they are so at all meals. If unwholesome, they should be used at no time, or, if used, of course they will do the least harm when the stomach is in the best condition to receive food of all kinds—in the early part of the day.

Sweet, mellow apples digest in one hour and a half, while the hard and sour require less than three hours, less time than for the digestion of beef, bread and the usual articles of food. The mellow, sour apple will digest in still less time. The prejudice against the use of fruits at night must have arisen from their improper use between meals, when no food, not even fruit, should be eaten, particularly near bed time. That apples, or indeed any fruit or food, should prove lead when foolishly eaten at that time is by no means surprising. The stomach that does not rebel at such treatment is a strong one, fit for a brute.—The Householder.

GRAFTING THE TOMATO ON THE POTATO.—A correspondent states that he succeeded perfectly in grafting a scion of the tomato upon the potato vine. He cut about one-third of the potato shoot off, just above a leaf, taking care not to injure the bud at its base. The scion, being shielded from the sun, was every day sprinkled with a little water, and it took readily. In the full the tomato was loaded with ripe and unripe fruit, and had grown to a large size.

AT SEA.

By some happy fortune I was not sea-sick. That was a thing to be proud of. I had not always escaped before. If there is one thing in the world that will make a man insufferably and peculiarly self-conceited, it is to have his stomach behave itself the first day at sea, when nearly all his comrades are sea-sick. Soon a venerable fossil, shawled to the chin, and bandaged like a mummy, appeared at the door of the after-deck-house, and the next lurch of the ship shot him into my arms. I said:

"Good morning, sir. It's a fine day."

He put his hand on his stomach and said, "Oh, my!" and then staggered away and fell over the coop of a skylight.

Presently another old gentleman was projected from the same door with great violence. I said:

"Calm yourself, sir—there is no hurry. It is a fine day, sir."

He also put his hand on his stomach and said, "Oh, my," and reeled away.

In a little while another veteran was discharged abruptly from the same door, clawing at the air for a saving support. I said:

"Good morning, sir. It is a fine day for pleasuring. You were about to say—"

"Oh, my!"

I thought so. I had anticipated him, anyhow. I stayed there and bombarded with the old gentleman for an hour, perhaps, and all I got out of any of them was, "Oh, my!"

I went away, then, in a thoughtful mood. I said, this is a good pleasure excursion. I like it. The passengers are not garrulous, but still they are sociable. I like those old people, but somehow they all seem to have the "Oh, my!" rather bad.

I know what was the matter with them. They were sea-sick. And I was glad of it. We all like to see people sea-sick when we are not ourselves. Playing whist by the cabin lamps, when it is storming outside, is pleasant; walking the quarter-deck in the moonlight is pleasant; smoking in the breezy foretop is pleasant, when one is not afraid to go up there; but these are all feeble and common-places compared with the joy of seeing people suffering the miseries of sea-sickness.—Mark Twain's Pilgrim's Progress.

The rust velvet factory in the United States has been started by a French colony at Franklin, Kansas. The colony began operations last summer on the co-operative principle, and have already, besides their factory, dwelling houses, stores, shops and farms in an excellent state of cultivation.

A fiery volcano of large proportions has suddenly appeared in the interior of Mexico.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN.

SOUTHERN MUSIC HOUSE,

50 & 62.....BARONNE STREET.....50 & 62

New Orleans.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE

is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McCOMB, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE AND

R. W. WAYNE,

General Agents for the Arrow Tie,

1019 17 124 Carondelet St., New Orleans.

BRACES AND TRUSSES.—DR. JOHN C.

DANIELL informs the medical profession and others that he has constantly on hand and for sale a complete assortment of BAXXING'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, neural weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, dyspepsia, nervous affections, constipation and extreme rheumatism, female derangements and extreme displacements of the womb, Rupture, Prolapsus, and weakness of the male and female system.

These light, cool and springy auxiliaries are the special favorites of the profession, and are intensely common-sense and rational in their action; supply a missing link in treatment; place the above affections in a new and more hopeful light, and often complete cures where medicine only mitigates, any more than it can cure a hernia or a dislocated joint.

He specially desires an examination of these appliances by the profession and students. Where necessary the professional application of the above braces will be under his supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adopted by the United States government for the use of the army and navy. Terms cash. Consultations free. Send for their pamphlet; it is better to call.

Office and residence, 132 JULIA STREET, near Camp, New Orleans. Jell 17

NOTICE.....NOTICE

DR. IDAHOE'S

Rocky Mountain Indian Remedy,

FOR THE BLOOD.

This remedy will cure Rheumatism, Gout, and all kinds of disease of the skin, and every variety of Cutaneous Eruption, from the simplest Rash to the most inveterate Scrofula. It cures Blisters, Piles, Hemorrhoids, Discolorations, Scaly Rash, Tetter, Ringworms, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat and Croup, Sore, Ulcers, Scrofula and Cancers all yield to its influence in a few applications.

PRICE, \$1 PER BOTTLE.

Within two months this remedy has created a sensation among the people afflicted with the above diseases. It never fails to cure radically the very worst case; and the demand for the medicine is very great.

DR. IDAHOE'S

Rocky Mountain Indian Salve,

FOR CORNS, BUNIONS AND PILES.

This Indian Salve cures Corns, Bunions and Piles in a few applications, radically; the buyer will apply the Salve but two or three times, when the inflammation will be removed at once. It is never known to fail. Price, Five Cents a box.

For sale by all Druggists, and at FLEMING'S Patent Medicine Depot, corner of Natchez and Magazine streets.

General Depot, 25 ST. CHARLES STREET, at the office of A. Bouchard, New Orleans, La. For testimonials refer to our pamphlet. Country orders promptly attended to.</

The Christian Advocate.

SATURDAY, DECEMBER 3, 1870.

PULPIT PRAYER.

In most cases people attend church to hear, to be instructed when they ought to go up to worship. Public thanksgivings, confession and praise have come to be regarded as mere appendages to public services, while the sermon is all in all. This is wrong. The sermon is important, but not more so than prayer and praise. We need to have our spiritual strength renewed by worship, as well as instruction.

This state of things is largely attributed to the dull and pointless prayers which too often characterize the pulpit. The people are not enough included in them; they are not sufficiently the utterance of the desires, hopes, fears and longings of their souls, but speeches made to God about matters in general, in which no one present is personally interested. Such prayers are good to induce sleep and are patiently endured as a necessary pre-requisite to the sermon; but they do not refresh and strengthen the hearts of those who need the blessing.

There is but one way to make pulpit prayers interesting and profitable; make them local, personal and sympathetic, and they will take hold of all hearts. But to do this the minister must first take into his own heart the every-day life of his people. If he knows them well, and feels for them, as one should feel for his own soul, he can and will take them to God, in his arms, in the warm embrace of a fervid soul. When a minister brings the business cares, perils and successes, the home life, the little every-day trials of his people, the personal joys and sorrows of the aged, of the children, of the youth, of those who are strong and those who are weak, before God, and interprets and presses them for divine sympathy and help, in the light of a deep religious insight and powerful love and faith, no one will be indifferent and unprofitable. They will find his pleadings taking hold of their own souls, and they will begin to plead; the prayer will be their prayer, and the blessing will come to them like "cold water to a thirsty soul." And prayer will no longer be an indifferent part of public worship to them; they will look forward to it with the same interest that they do to the sermon, and recall its influence on their hearts after many days.

We have more men who are able preachers than able prayers. They are dull and indolent, or borbory and pointless, or cold and unsympathizing, in their prayers, while strong and instructive in their sermons. They excuse themselves with the plea that they are not "gifted in prayer." This is true; but why are they not gifted? Because they undervalue its importance, and do not study and strive to obtain the gift. The stiffness and formality which now fetter them can be broken up, and they can get power to lead the people to God as angels help their young to soar in mid-heaven.—*Morning Star.*

DOUBTING CHRIST.—"I am doing all I know to do," said a woman who was seeking the fullness of Christ's love. "I consecrate myself to God as well as I can, and yet I don't receive what I ask."

"I am afraid you doubt the Saviour."

"O no! I couldn't doubt him. I doubt myself, though. I'm afraid I hold something back."

"You mean to be honest, of course?"

"To be sure I do. I'm in deadly earnest."

"Is there anybody who knows when you give all to God?"

"Why, the Saviour does."

"Can he show you whether or not your consecration is complete?"

"He certainly can."

"Does he care to have you make sure work in this?"

"Of course he does."

"You ask him to show you if your consecration is up to the requirement; but you doubt—"

"I see!—not myself, but Christ."

"This is a most subtle temptation of Satan. He knows we can't reach for the cleansing of our hearts unless we have this bit of rock to stand on—'I do give all to God.' If we can keep this foothold uncertain we can defeat our efforts. He calls for caution, humility. You doubt yourself, not Jesus. The facts are, Christ only can show you about it. It is infinitely in earnest to have him make thorough work. You ask for help, yet you doubt."

"I see, I see! How wicked I've been to doubt him!"

The expenses of the war to Prussia are reckoned by Dr. G. Hirth as follows: Cost of the military action, \$250,000,000; direct losses, \$250,000,000; indirect losses, \$250,000,000; war compensation for the reconquered territory, Alsace and Lorraine, especially Strasburg, 200,000,000. Total, 4,930,000,000 francs.

Scientific.

Dr. LAPEYRE, supported by the principal members of the faculty in Paris, recommends the French government to order the bodies of the slain to be burnt on the battle fields, during the continuance of the war between Germany and France. The necessary rapidity of strategic movements will not leave time sufficient for the proper interment of the dead, consequently there is every reason to fear that, unless the ancient mode of burning be adopted, some fatal epidemic may sweep over Europe after the termination of the war.

M. SHREYER has invented an ingenious method for the separation of animal fiber from vegetable. The process does not alter the structure or color of the animal fiber, and permits the use of cotton and linen fiber separated from it for numerous purposes. It is sufficient to suspend the goods in an atmosphere of nitrogen or carbonic acid, and to cause the vapors of perfectly dry sulphuric, phosphoric or hydrochloric acid to enter the room. These fumes disintegrate the vegetable fiber, and leave intact the animal; the two fibers can thus be separated and appropriated to their respective uses.

This cork tree is a species of oak growing abundantly in Spain, Portugal and Italy. In Georgia the experiment of raising the tree from the acorn has been successfully tried. The barking is commenced when the tree is fifteen years old, and may be repeated every eight or ten years afterward with no injury to the oak, which, in spite of this periodical felling, lives to the age of a hundred and fifty years. In July and August incisions are made around the tree and down to the root; the pieces which detach easily are soaked in water, placed under heavy weights, dried before a fire, and stacked in bales for exportation.

The Journal of Applied Chemistry mentions that on November 22, 1866, Dr. Danzel administered chloroform for the removal of a cancer. After the operation the patient ceased to breathe, and opening the windows, artificial respiration and all other agencies proved of no avail, when recourse was had to electricity. One pole of the battery was applied to the neck, the other to the epigastric. There was soon a movement of the muscles, and by degrees respiration was restored. There is no doubt that death would have ensued without the application of electricity, and as this remedy has been applied with success in several other cases, it is worthy of note on the part of physicians generally.

MORNING LABORS.—It is the early bird that catches the worm. But how about the worm? There are two sides to the question of matutinal labors, and perhaps more. Spurgeon has recommended young ministers to rise two or three hours before breakfast and write their sermons. There are perhaps some persons so constituted that such a practice would be the best for themselves and for their sermons, but there are many to whom it would be pernicious in both regards. Literary labor has as many eccentricities as there are men, and it cannot all be due to badly formed habits. For many the early morning hours are the worst for literary labor, especially before the reception of food. Sleep depresses the nervous system, the eyes require some time to accustom themselves to light and strained work; and the longest interval between two meals is passed during the night. Moreover, the mind, to be in working order for the best results, requires a rapid flow of net blood, and a certain amount of stimulus. The stimulus of liquor is often used, but very foolishly, as it is only a make-shift, with a corresponding after-depression. The stimulus of intercourse with the world, its concerns and its fellow-creatures, is the most natural and all-sufficient, and after a few hours, or a half day of this, the mind reaches its best condition for the best work. Many find the still evening hours their richest time for thought, for this reason. If they have not unnecessarily wearied themselves, the advantage is a great one. And if the full amount of seven or eight hours' sound sleep is gained with regularity, there can scarcely anything be said validly against the practice of writing in the night time as many do. Surely the early morning is not the most favorable time for a large class of minds, and for such a live, spirited, persuasive style as ought to characterize preaching, however it may do for the calmer processes of logic.

There is a man living in Paris now who has seen all shades of political events with the cheerful indifference of Epicurus. This is Anber, the composer. Born under Louis the Sixteenth, he has successfully saluted the First Republic, the First Empire, Louis the Eighteenth, Charles the Tenth, Louis Philippe, the Republic of 1848, the Second Empire, the third Republic in 1870.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."—*Agassiz.*

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenny, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, DECEMBER 10, 1870.

NO. 47.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Dec. 2.—*Supreme Court.*—The decision in the New Orleans Slaughterhouse case to-day, upon a motion to give a writ of error the force of a supersedeas, was decided adversely to the butchers. The ground taken was that the Supreme Court here could only interfere, under any circumstances, with the Supreme Court of Louisiana, whereas the restraints asked applied to an inferior court of the State.

WASHINGTON, Dec. 5.—Senator Kellogg was escorted with the President to-day, discharging and discharging political affairs in Louisiana.

Kellogg gave notice, in his place, of his determination to press a general amnesty bill.

Numerous propositions are before the Senate to repeal the income tax law.

Ben. Butler says it is his intention to press his Alabama claims programme—*Picayune.*

WASHINGTON, Dec. 5.—The Radicals are greatly elated at the tone and sentiments of the message, but that portion of it which relates to San Domingo. The Democrats regard it as a demagogical document.

Efforts to remove Packard, United States marshal, will prove futile.

Postmaster General Croswell says he expects Lowell, postmaster at New Orleans, for inefficiency.

James E. Kennedy, a relative of Lieutenant Governor Dunn, was today appointed to a position in the Senate—*Picayune.*

WASHINGTON, Dec. 5.—*House.*—One hundred and seventy-three members answered the roll. R. W. T. Duke, of Virginia, was seated, taking the old oath. J. H. Sypher was seated from the first Louisiana district. After the reading of the President's message the House adjourned.

Senate.—A various routine of business was transacted, including the introduction of bills to constitute Shreveport, Louisiana, a port of delivery; for the removal of the political disabilities of citizens of Louisiana; and to abolish all income taxes.

After the reading of the President's message the Senate adjourned.

WASHINGTON, Dec. 5.—The President's message, of nine thousand and eighty-five words, was telegraphed home to New York in thirty-seven and three-quarter minutes. Ten wires were used.

The reading of the President's message caused no sensation. It was warmly applauded at the close. The money markets exhibit no material change.

The transmission of the President's message crowds the telegraph wires to-night.

WASHINGTON, Dec. 5.—Judge Bradley, in chambers, to-day granted an injunction restraining the sale of the Texas and New Orleans railroad under an advertisement of Receiver Crosby, but the parties were put upon short notice to settle their claims before the time of sale as advertised by Governor Davis.

WASHINGTON, Dec. 6.—*House.*—Bills were introduced remitting the duties on materials used in building vessels engaged in foreign trade; to enable American citizens to register foreign vessels; admitting certain iron and composite vessels to American registry; repealing the duty on sugar, tea and coffee; abolishing the franking privilege; abolishing the office of admiral and the admiral of the navy; the former at once and the latter when a vacancy occurs.

A resolution abolishing the Reconstruction Committee was introduced by Cox, but was objected to and went over. The House then adjourned.

Senate.—The Senate adjourned early to allow a rearrangement of the committees.

WASHINGTON, Dec. 6.—The French minister, M. Treillard, was presented to the President to-day. Treillard appeared in plain clothes.

Bills repealing the income tax were presented in both houses to-day.

WASHINGTON, Dec. 6.—Morey was today seated in the House.

Monday, Dec. 6.—Democratic municipal ticket was elected to-day by one thousand majority.

New York, Dec. 6.—At midnight, last night, the Champion, from Charleston, and Isaac Bell, for Norfolk, collided off Woodlands; both vessels were badly damaged. John Jones, of the Bell, was killed.

General Jordan was arrested and held in the sum of \$10,000, on a

charge of a violation of the neutrality laws.

NEW BEDFORD, Dec. 6.—A negro boy fifteen years old confesses to the murder of an old man sixty years of age, whom he robbed of \$60.

FORT SCOTT, KANSAS, Dec. 6.—The Missouri, Kansas and Texas railroad was completed to this place yesterday, and trains run regularly between Fort Scott and Sedalia on and after to-morrow. The opening of this important outlet, it is believed, will change the trade of southern Kansas and the Indian Territory, and make Fort Scott the chief distributing depot for the Southwest.

In consequence of the removal of the sanitary embargo Texas drovers have made a general stampede from Baxter Springs and are now driving cattle by various routes northwardly through Kansas and Missouri.

The flow of immigration continues without apparent abatement.

WASHINGTON, Dec. 7.—President Grant observed to-day that he hoped Radical members of the House would allow a vote to be taken on the resolution for the annexation of San Domingo.

Bontwell's proposition to issue \$300,000,000 five per cent. bonds, and make the interest payable quarterly, meets with the approval of the Committee on Ways and Means.

WASHINGTON, Dec. 7.—John H. Snratt has written an interesting letter confessing the plan for abducting President Lincoln, but denying that the Confederate government had any knowledge of the scheme. He did not credit the first reports of the assassination, which reached him at Elmira, and was amazed when he heard Booth's name connected with it, as assassination had formed no part of their plan, and was never spoken of.

FOREIGN.

LONDON, Dec. 2.—Later and more important dispatches from Tours, relative to the movements of the army of the Loire, have been received. The movement of the army began on Wednesday, and was directed by the minister of war. First operation favorable. General Chanzy left his position next day, and found the Prussians entrenched; he immediately gave them battle, which ended only with night. The Prussians were compelled to retire, and the French camped in the positions taken. The French artillery were well handled. German loss heavy, French loss very light. The positions captured by the French were at Gallonville, Fernaniers and Gomers.

LONDON, Dec. 2.—A telegram to the Times says that Prince Frederick Charles is retiring before the army of the Loire, which is in great force.

LONDON, Dec. 5.—It is rumored that M. Erlanger is storing vast quantities of provisions at Havre for Paris when the siege is over.

FLORENCE, Dec. 5.—Duke of Aosta, upon receiving the crown, congratulated Spain upon successfully reconciling order with liberty.

CONSTANTINOPLE, Dec. 5.—Russia's granting furloughs to her troops and her consent to a conference removes Turkish apprehensions.

St. PETERSBURG, Dec. 5.—The Moscow journals denounce the Russian press for silence in regard to the treaty of Paris.

Tours, Dec. 5.—The army of the Loire, after spiking guns and destroying ammunition, evacuated Orleans.

The Prussians re-entered Orleans at midnight.

The French retreated orderly.

VERSAILLES, Dec. 5.—The French have been driven from Chevilly, and have abandoned Company.

The French are massing at Creteil.

The troops are suffering from intense cold.

General Manteuffel is at Ronen.

LONDON, Dec. 5.—Earl Granville's reply to Prince Gortschakoff's last note is published. It is dated November 29. The British minister says there is nothing for him to add to his previous appeal to international law. He is aware that the suggestions for a congress of the powers to settle this and other questions have been made, but not adopted. He is also aware that in the contingency of the possession of the principalities by Austria, Prussia could not question the provisions of the treaty of 1865. He is, however, ignorant of such a purpose; therefore that question could not be introduced. He trusts that all obstacles to the continuance of peaceful relations will be removed. If Russia has formed an opinion as

to her rights, but does not intend to act without consulting the other powers, the controversy is already partially closed. Earl Granville concludes by accepting Russia's invitation to a conference, but without admitting a foreign conclusion as to the result.

Tours, Dec. 5.—Results of fighting before Orleans are unfavorable to the French. Orleans was evacuated on Saturday night, and the army of the Loire retreated to Blois. There was much desultory fighting, on Friday and Saturday, along the whole line from Onzore to Arthenay, and the left wing of the army of the Loire was doubled up. The Prussians reached the railroad between Orleans and Tours at La Chapelle, near Orleans, on Saturday afternoon, when a train which Gambetta was on was fired into.

The army of the Loire then concentrated in lines at Orleans, entrenched camp two hundred thousand strong, defended by five hundred from the navy, and determined to hold out there to the last moment, notwithstanding the line of retreat was threatened by the success of the Prussians' left wing, and it was rendered ineffective for defense. The Prussians threatened to bombard the city, but to prevent this General Patheux consented to evacuate the city at midnight, when heavy cannon were spiked and ammunition destroyed. The army then withdrew in good order, retreating to the left bank of the Loire.

BERLIN, Dec. 5.—The King sends the following dispatch to the Queen, dated at Versailles, Sunday night: "The Duke of Mecklenburg, after two days' fighting, captured St. Jean railroad station and the suburbs of Orleans. He captured thirty guns and one hundred prisoners. The Prussian loss was moderate. The Prussians found nine cannon and much ammunition on the field before Amiens."

Tours, Dec. 5.—The government has official balloon advices from Paris to the fourth. Thursday passed burying the dead and succoring the wounded. Friday the Prussians attacked impetuously at Champagne and Villiers. After seven hours' fighting the enemy failed to carry the positions, leaving their dead and wounded on the field. Prussian losses were between fifteen thousand and twenty thousand.

Saturday the French recrossed the Marne, the enemy making no opposition. Ducrot greatly distinguished himself. General La Chatrie was killed, and General Renault badly wounded. The attacking troops were Wurtembergers and Saxons. Their losses must have been extraordinary, because the next day they allowed the French to cross the river unopposed. The success of the French troops created the wildest enthusiasm in Paris.

Tours, Dec. 5.—Intense excitement prevails here; great crowds at the prefecture reading the unfavorable news. Paladines evacuated Orleans to avoid bombardment. They talk of trying him by court martial.

Gambetta has returned.

Tours, Dec. 5.—The direction the French army has taken is not known, but the impression prevails that they have gone toward Gen. In the fighting of the last three days the French covered themselves with glory, but fate was adverse to them. In an engagement on the third, at Patoy, twenty thousand French held their ground against sixty thousand of Frederick Charles' army, but they were cut to pieces by shells. The German artillery was served with fearful and overwhelming effect. The Papal Zouaves fought with superhuman bravery, and nearly all of them were killed.

LONDON, Dec. 6.—Odo Russell's mission hangs fire. Bismarck will discuss in a friendly tone with England, but makes no pledges.

Minister Motley had a farewell with the Queen to-day. Moran takes charge of the legation.

HAVRE, Dec. 6, P. M.—All communication with the interior of France is severed.

MUNICH, Dec. 6.—The King of Bavaria sent a note to King William inviting him to assume the title of Emperor of Germany. The consent of the other States will probably be given.

Tours, Dec. 6.—Official reports of battles near Orleans have been received. The Prussians attacked the French corps severally in great force, thus repulsing the left of the army of the Loire, uncovering Orleans, and rendering evacuation necessary.

LONDON, Dec. 7.—The English government has given a contract for

sixty batteries, eight guns each, of Gatlin's mitrailleuses, to be made in America.

The Russian government has in its employ a number of American workmen engaged in making mitrailleuses.

A Tours dispatch, of the fifteenth, says: The German force engaged in the battle of yesterday, north of Orleans, embraced the united armies of Frederick, the third, ninth and tenth corps, under the Duke of Mecklenburg, one Bavarian corps, and two infantry and two cavalry divisions, one hundred and fifty thousand men in all. The French force consisted of six corps, aggregating one hundred and sixty thousand men, but were deficient in cavalry. The combat ended with a repulse on Sunday. It commenced on Thursday, and continued with varying successes during Friday and Saturday, but on Sunday the successes of the Germans were great, though purchased at equally great cost.

CONTENTS OF THE MESSAGE.

The message fills seven of our solid columns. For the benefit of those who will not read it, we present a summary of its contents, reserving remarks.

His excellency begins with the customary congratulations on good crops, peace, and the restoration of comparative internal harmony, but regrets election disturbances.

He expects the readmission of Georgia in January, 1871, will complete the work of reconstruction, after acquiescence of the people in the payment of the national debt and in the changes made in the constitution.

He relates the acts of consuls and agents of the United States in protecting Americans and foreigners in France; notes his telegraphic recognition of the French republic, the requested pacific intervention of his government and its refusal because not desired by Germany, promises mediatory action whenever it can hasten peace, and restates the policy of neutrality as given in his proclamation.

He refers to Cuban affairs, notes his unavailing efforts to secure redress to American citizens for injuries suffered during the current disturbances, proposes a joint tribunal for arbitration of all claims arising, and notes the instances in which arbitration has been successful.

He anticipates an early settlement of all questions between Spain and Spanish-American countries.

San Domingo is spoken of at length, and its acquisition is urged for political, commercial and naval purposes, and as a great benefit to its inhabitants and to us. He enumerates the resources of the island and suggests a plan for its purchase.

He deprecates smuggling between the United States and Mexico, recommends treaties for the extradition of criminals, refers to the non-distribution of the Venezuela claims fund, and states what he has done in relation to the massacre of Frenchmen and Russians in China.

He notes the final abolition of the mixed courts established for the suppression of the slave trade, now limited to the east coast of Africa and Arabia; also the ratification of a convention with Great Britain on the matter of naturalization, and recommends a joint commission for fixing the boundary at Pembina, Canada.

He recommends a commission for adjusting the Alabama claims, and that they be paid and assumed by the United States government while awaiting their settlement by Great Britain at some future day on terms consistent with the dignity and honor of both countries.

The President enters at length upon our relations with Canada, Canadian abuse of the United States fishermen and the unfriendly stringency of Canadian laws. He advocates the right of our people to the free navigation of the whole of the St. Lawrence.

He notes the importance of increasing our commerce with China, Japan and Spanish America, and recommends a subsidy to shipbuilders.

Having referred to the expenses of the various departments, he recommends a resumption of specie payments or the reduction of currency to the par of gold.

He favors revenue reform, but opposes direct taxes, leaning toward protection and recommending economy.

He notes the gradual reduction of the army to the limit fixed by the act of July 15, 1870. The cost of the navy for the year ending December 1 was less than nineteen

millions. In view of our population of forty millions and of our extent of seacoast on two oceans, he recommends the construction of new ships and a maintenance of naval efficiency.

He anticipates that the Postal Department will become self-supporting.

He recommends radical reforms in the matter of appointments to minor offices, and notes the successful management of Indian affairs by the agency of members of the Society of Friends, by army officers, and by missionaries having authority as agents.

Of the public lands, 3,698,910 acres were taken under the homestead law, and 2,153,515 acres were sold for cash during the fiscal year. He recommends the continuance and extension of the plan of giving land to actual settlers, but opposes the granting of subsidies, profusely and indiscriminately, as heretofore, to railroads.

After allusion to patents, the census, pensions, and the Bureau of Education and Agriculture, he concludes with a brief summary of the policy of his administration—*Picayune.*

Nashville Christian Advocate.

At a meeting of the Book Committee of the Publishing House of the Methodist Episcopal Church South, November 29, 1870, the following preamble and resolution were adopted:

Whereas, the Book Committee was informed by the book agent, some months since, that the time had come when the price of the Advocate could be safely reduced—

which information we received with great pleasure, as we were desirous to put it at a price which would meet the demands of the church for a cheap paper, and advised him to reduce it as low as he could, so as not to endanger its financial interests, but that it might be self-sustaining; and whereas, we understand some have expressed the opinion that the price of the paper has been reduced too low, and that the interests of the church will be damaged thereby; after examining the Advocate account, which is kept separate, as are the accounts of all other departments of the Publishing House, we are satisfied that the paper can be safely published at its present price, and pay a profit; and believing that the design of the General Conference in establishing a general organ was to furnish the connection with such information as might be a blessing to the church and the world, we cannot therefore recommend the increase of the price, which would embarrass its circulation, and thereby disappoint the expectations of the General Conference.

We have no control over the size or price of any other papers, and therefore, unasked, cannot volunteer advice with respect to them; and to those who may suppose that the profits of the House in other departments have been drawn upon in order to enable us to publish the Advocate at so low a rate, we will just say they are entirely mistaken. We are trying to make all the departments of the business self-sustaining, and the paper at the present price will pay a due proportion with all the other departments; therefore,

Resolved, That we fully indorse the course of the agent in enlarging the Advocate and reducing the price.

A. L. P. GREEN.

D. WEAVER.

THOMPSON ANDERSON.

W. H. MORGAN.

THOMAS D. FITE.

MISSISSIPPI CONFERENCE.

The Mississippi Conference will convene at Crystal Springs on the fourteenth of December. Brethren, on their arrival, will call at Barnes & Wilkinson's store—brick house west of the railroad—to find their homes.

WILLIAM B. HINES.

NOTICE.

The under-graduates of the Mississippi Conference to be examined on the fourth year's course, and the committee to examine that class, will please meet at the Methodist church in Crystal Springs, on Tuesday morning, December 13, at nine o'clock.

H. H. MONTGOMERY, Chair'n.

AN ACRE of land has been sold in the city of London for \$3,600,000, and in nearly every portion of the city land is said to be increasing in value every year.

WHAT the sea-board must be made of—Beech.

From the Texas Christian Advocate.

LETTER FROM BISHOP MARVIN.

Mr. Editor: We had a delightful session of the East Texas Conference at Carthage. There was an excellent spirit among the preachers generally. We needed two or three more preachers to man the work fully, but the supply was better than I anticipated.

Altogether there is a hopeful state of things in the Conference. I was apprehensive beforehand that it was in a bad way, and feared developments to appear at the session. The division, four years ago, at which the Trinity Conference was organized out of the best part of the old East Texas Conference, I regarded injudicious, and was not at all confident as to the sufficiency of the resources remaining. I have now no doubt that there is sufficient vitality in the body for existence at least, and I trust also for a healthy growth. Yet I still feel that it would have been much better for this end of the work had the division been delayed for some years.

But with the spirit of unity maintained among themselves, and a just sentiment of affection for the old East Texas Conference, they will do well.

One thing troubled me: There was but one applicant for admission on trial. When vitality is at a high point the reproductive power will be apparent. The church reproduces itself chiefly through the ministry. When the spiritual life is full and robust, young men will be "called of God to preach the gospel" in sufficient numbers to meet the demand. May God, in mercy, fill the white fields of Texas with laborers!

Two things we must do: First, humble ourselves before God, and seek, by mighty prayer and unquenchable faith, to be made holy in heart, while, with a spirit of self-denial that will give up all for Christ, we steadily, each day, each hour, bear the cross and practice holiness of life! Secondly, pray for more laborers.

I send you below a full and authentic list of the appointments, including that of the appointee to the special work of raising money to pay the old missionary debt:

MARSHALL DISTRICT.—L. P. Lively, P. E. Marshall station, to be supplied; Marshall circuit, Thomas W. Rogers; Elysian Fields circuit, J. B. Middleton; Carthage circuit, N. W. Burks; New Concord mission, to be supplied; Henderson station, to be supplied; Belvoir circuit, J. R. Bellamy; Starville circuit, J. S. Mathes; Hallville mission, Daniel Moore; Knoxville circuit, David M. Stovall; Neil Brown, snp.

PALESTINE DISTRICT.—T. R. Dennis, P. E. Palestine station, John Adams; Palestine mission, E. P. Rogers; Kickapoo mission, D. P. Cullen; Rusk station, J. K. Street; Rusk circuit, L. C. Crouse; Larissa circuit, Samuel Morris; Tyler station, to be supplied; Athens circuit, E. F. Boone; Tyler mission, to be supplied.

SAN AUGUSTINE DISTRICT.—D. S. Watkins, P. E. San Augustine circuit, to be supplied; Jasper circuit, E. L. Armstrong; Burksville circuit, Martin Matthews; Newton circuit, to be supplied; Shelbyville circuit, J. W. Mills; Melrose circuit, A. D. Parks; Douglas circuit, M. Donegan; J. W. Overall, supply; Mount Enterprise circuit, J. C. A. Bridges; Milan mission, Sims K. Stovall.

CROCKET DISTRICT.—J. C. Woolam, P. E. Crocket circuit, W. C. Collins; Sumpter circuit, R. C. Wright; Homer circuit, F. M. Stovall; Moscow circuit, A. M. Box; Woodville circuit, Acton Young; Mount Hope mission, R. M. Kirby; Liberty station, W. F. Compton; Wallowville mission, Thomas A. Scirelock; Beaumont, Orange and Sabine Pass mission, to be supplied; J. B. Tullis, supernumerary; to raise assessment for old missionary debt, L. P. Lively. E. M. MARVIN.

NOVEMBER 14, 1870.

LITERARY REMAINS OF DR. LONG-STREET.—We learn that the manuscripts left by this eminent Christian jurist, and teacher, and minister are to be gathered and published, in one or more volumes. It will gratify more than his many personal friends to see his literary remains put into a permanent form. We are requested to say to any and all of his old friends who have interesting articles or letters from his pen, that they will confer a favor on his family by sending them to the Hon. L. Q. C. Lamar, Oxford, Mississippi, or to Edward Myers, Esq., Coffeeville, Mississippi, or to Dr. E. H. Myers, Macon, Georgia.

The Christian Advocate.

SATURDAY, DECEMBER 10, 1870.

NOTHING TO DO.

- "Nothing to do!" In this world of ours,
Where weeds spring up with fairest flowers,
Where smiles have only a fitful play,
Where hearts are breaking every day.
- "Nothing to do!" thou Christian soul,
Wrapping thee round in thy selfish stole;
Off with the garments of sigh and sin,
Christ thy Lord, hath a kingdom to win.
- "Nothing to do!" There are prayers to lay
On the altar of incense, day by day;
There are foes to meet within and without,
There is error to conquer, strong and stout.
- "Nothing to do!" There are minds to teach,
The simplest form of Christian speech;
There are hearts to lure with loving wile,
From the grimest haunts of Sin's defile.
- "Nothing to do!" There are lambs to feed,
The precious hope of the church's need;
Strength to be borne to the weak and faint,
Vigils to keep with the doubting saint.
- "Nothing to do!" and thy Saviour said,
"Follow thou me, in the path I tread."
Lord, lend thy help the journey through,
Lest faint, we cry, "So much to do."

The Nation.

THE OLD ALABAMA CONFERENCE.

Mr. Editor: The year 1853 was marked by great mortality among the preachers and great prosperity among the churches. The funeral sermon of ten preachers who had died during the year was preached at the Tuscaloosa Conference by the Rev. E. V. Le Vert. This included the three promising young men who died of yellow fever in Mobile, but the majority were superannuates or ineffective.

Great revivals prevailed in the Greensboro or, as it was then called, the Tuscaloosa district. The Rev. Thomas J. Koger was the presiding elder, and he was as remarkable for his zeal in the ministry as he was for prudence and common sense in everything. He literally left houses and lands for the sake of the gospel, being the only son of a wealthy planter in Mississippi; and he was to a great extent separated from his wife and children, for in addition to a large number of quarterly conferences, he held protracted meetings at almost every appointment. He was very popular, and did immense good by his pious and genial conversations around the fireside. On one of his pastoral visits at my father's house I had the happiness to see him baptize my mother and her younger children. Bro. Koger was a graduate of Randolph Macon College, and a good scholar. He kept up literary habits, and was an omnivorous reader. He literally read everything that came in his way, and apparently without any principle of selection. His usefulness continued unabated to the breaking out of the war, when he enlisted in the army, and while serving as a captain fell in the battle of Perryville, Kentucky, in September, 1863.

The church at Greensboro was served this year by the Rev. J. J. Hutchinson, whose more recent death was the occasion of the deepest sadness to his brethren in the ministry. Intimately associated, as he was, with Bro. Koger, they were essentially unlike in their characters, although a like fortune had attended them in early life. He was a graduate of Franklin College, Georgia—a man of letters, of rhetorical and oratorical power, skillful in debate, and had been a lawyer and a politician of note in the capital of the State before his conversion to Christ. This event in his life caused a mighty change in his conduct, and he soon entered the ministry and at once took the front rank in the Conference. For many years Koger and Hutchinson were like brothers, and it is to be hoped that a friendship which was never interrupted on earth has ere this been renewed in heaven. "That cruel war" was the death of the one no less than of the other.

Another preacher whose labors were abundantly blessed on the Greensboro district during this year was the Rev. James M. Wells. He was in charge of the Prairie Creek Colored mission near Newbern, but his zeal led him to visit all the protracted and camp meetings for many miles around. He was a man of moderate abilities as a preacher and of limited education, but as a laborer in the harvest few men will

bring more sheaves into the kingdom than Bro. Wells. He was especially useful as a singer, and as an exhorter of the church and of sinners, and a comforter of mourners. On occasions of revivals his deep, clear voice might be heard ringing around the altar, often at an hour of the night when others had ceased to watch or pray. At the camp meeting on Brush Creek, which was attended by thirty preachers, Wells was by far the most useful. While such men as Neely, Hutchinson, Koger and Le Vert slew hundreds from the pulpit, Wells made them alive again in the altar by the sweet songs of Zion and the precious promises of the gospel. This excellent brother, after serving the hardest circuits and missions in the Conference, was rapidly growing in popular estimation, when he was suddenly cut off by death in January, 1856 or 1857. His monument stands in the old graveyard at Tuscaloosa, but his record is on high, and his memorial is in the hearts of the people.

It may seem strange, but it is true, that this history of the Alabama Conference of 1853 is a history of men who are now dead. I held a meeting at Newbern, in which I was assisted by Koger, Hutchinson and Wells, and they have all gone to their reward. We have already alluded to the deaths of Neely and Harris, Hughes, Powell and Starr; and when to these are added those of Baldwin, Calloway, Dorman, Baker, Goodman and De Yampert, it would seem that the principal actors in the scenes of those days have already crossed the flood.

F. M. GRACE.

NEWS FROM THE CHURCHES.

PEARLINGTON, MISS., Nov. 28, 1870.

Mr. Editor: My presiding elder and I have just held a meeting here, of only a few days' duration, with fine success. We received fourteen persons into the church, and the work seems to be still going on in the hearts of the people. I have received a few more persons since.

I have just held a meeting of a few days' duration at Pearl church, in St. Tamary parish, Louisiana. I received nine persons into the church, and the feeling among the people for the cause of Zion is good. Thank God! My soul rejoices.

Your brother in Christ,

H. P. BOWEN.

GREENE CIRCUIT, MOBILE CONFERENCE.

EUTAW, ALA., Nov. 30, 1870.

Mr. Editor: In closing up the labors of the present year on the Greene circuit, Mobile Conference, we are glad to report fifty-three accessions to the church, forty-five of whom made a profession of religion on the work, besides many more who will join other communions. We held during the year as many as seven protracted meetings. Some of them were attended with very marked displays of divine power. At several churches we have class leaders and class meetings!

Three appointments on the work have been severed from us by the change in Annual Conference boundaries, and are within the North Alabama Conference territory. They desire to retain their connection with the Greene circuit, Alabama Conference, and have so indicated their desire to the Bishop. We lose also our beloved presiding elder, Rev. T. C. Wier. He goes to the North Mississippi Conference, and is president of Verona Female College.

Upon the whole, the year has passed pleasantly, and we trust profitably. To God be all the praise!

J. M. PATTON.

SUCCESSFUL TEACHING.—A man who commenced life as errand boy, rose rapidly, through his untiring industry and earnestness, to the head of an extensive business, which he conducted very successfully. Meeting an old friend one day, he spared a few moments to describe to him briefly the extent of his prosperity and of his prospects. His friend inquired the secret of his success. "I put my soul into it," replied the prosperous shop keeper. "It is only by throwing my soul into my business that I make it succeed." So must the teacher do.

HE who sins against man may fear discovery, but he who sins against God is sure of it.

HINDERANCES TO PIETY.

Mr. Editor: It is remarkably strange how ready Christian people are to suffer little trifling things to come in between them and their God, and by so doing allow every vestige of that pure, divine, spiritual enjoyment, that flows alone from a constant daily communion with him, to be banished from the heart, and thereby make it as barren as the desert, and as utterly fruitless as the barren fig tree. And yet there are thousands in the church to-day who are so thoroughly and completely immersed in business, and so entirely engaged with outward, earthly things, that though they profess to be spiritually employed, they have not the slightest glimmer of that heavenly light which is shedding its radiant beams all around upon the midnight darkness and gloom of depraved humanity everywhere. They dwell not in the holy city—not even in the circle of the most distant flashes of its light—all the while exposing themselves to the terrible lashings of a guilty conscience, and the more terrible searings of a justly insulted, angry God. But such is the case. We let a thousand little things creep in—little of themselves and little in their results—to hinder and destroy our enjoyment and happiness. Some lose that gracious and exalted privilege of communion with God all at once; but most lose it by slow degrees, by little and by little, until it is entirely gone.

That dangerous enemy to all spiritual, lively enjoyment, sloth, unobserved, it may be, creeps into the soul, with a long train of duties neglected, and destroys all that peace that flows from a consciousness of acceptance with God; and then unfaithfulness to the grace we have received, as well as the doing of a thousand things that we know that God has forbidden, and the willfully omitting what he requires of us. And just so sure as we fail to cultivate and develop the graces of the gospel, and add them to our faith, and lose sight of all earthly considerations, and regard all things as vanity but the love of Jesus, a dying insensibility will irresistibly steal in upon the soul, and we are almost ruined before we know it. We must keep near the cross. Away from it is dangerous and hurtful to us. We must resist everything that tends to hinder us from pressing forward toward the mark for the prize of our high calling. We must not be content to live at a distance from God. We must be constantly pressing nearer and nearer to him. Even though it be a cross, we will find that it will bring us safely up after awhile. Let us lay aside every weight, and the sin that doth so easily beset us, striving for the mastery over all barriers and hinderances.

Many times we are hindered by ceasing to watch. We must watch with ceaseless vigilance, lest we be found sleeping at our post of duty. We know not when the Master will come and demand a reckoning. And we must not forget to pray—pray that we enter not into temptation. That old saying which we have often heard, "That we must watch as well as pray," is not good theology. It may do for poetry, but it will not do for good orthodox theology. We must watch and pray, for we do not know when the time for our reckoning will come. A well organized and disciplined army may be surprised and destroyed with ease if they fail to have sentinels posted all around their camp, or if these sentinels fail to watch and guard with sleepless vigilance. So the Christian soldier, having a wily, subtle enemy, who is ever on the alert to destroy, to contend with, must watch, lest he be surprised and overcome in an evil hour. While we are watching against this great enemy we must also keep our eyes ever upon the consecrated cross. We must not lose sight of it for a moment, for in it is our strength and our support. And we must not fail, as the soldiers of the cross, to bring forth continually fruits meet for repentance. And if we at any time are defeated by the enemy, and fall, we must rise up instantly and fly with all haste to the cross of Christ,

and be reconciled to him at once, for he is our propitiation for sin. He also maketh intercession for us; and when we have done wrong, and we know that his wrath is kindled against us, then let us draw near to him, with broken and contrite hearts, and not stay away until our hearts are hardened.

We are often hindered by the love of the world. It is very evident that no man can serve two masters. And yet there are many, many who try to carry the world in one hand and religion in the other. All their energies are employed in the accumulation of this world's goods. Hence they indulge themselves in the common things of life, such as pleasure, food and dress. They do not consider that life is so short. They indulge themselves in all they desire or like, and only sacrifice the refuse to God. Can such as these retain that sweet, soul-animating joy that springs from direct communion with God? No; they are entire strangers to that blood-bought, comforting peace that flows alone from a free and untrammelled intercourse between the redeemed, sanctified soul and its God. They have no god but mammon. They hold no intercourse or communion with anything but that which brings them profit in dollars and cents. How few do we find in the world who are willing to be poor—to make themselves poor with Christ, and to share that poverty with his people! Who can we find that is willing to sell all that he has and distribute it to the poor? How many give even a tenth of their income to the cause of Christ? And how many are there in the church to-day who never give a cent to the support of the ministry, the poor, or anything else of the kind?

Such men "may last, but never live. Who much receive, but nothing give. Whom none can love, whom none can thank, Creation's blot, creation's blank."

We are often hindered by a want of humility. This is a commodity that is greatly needed, I fear, among professing Christians. We find very few who are willing to take a subordinate position, each one desiring to have the uppermost seats at all our feasts; not willing to take the lowest places, but must be honored above our fellows, or there is a want of appreciation of our standing or merit. But we forget that those who exalt themselves shall be abased. We must humble ourselves and become as little children. But we do not or will not see the use or benefit of this. We must study with all diligence to improve in this matter, that we may be exalted in due time. And we must show our humility by behaving ourselves toward those under us with becoming Christian mildness and humility, considering the greatest among us as the least of all. It is exceedingly hard for us to see the need or good of being of no reputation among men, and of being despised and rejected of them.

There is but one other hinderance to the enjoyment of religion that I will mention, and that is, we are not exactly temperate. Whisky-drinking in the church is, in my opinion, one of the greatest hinderances to the church and the enjoyment of religion with which our societies are cursed. Ministers of the gospel drink it—and to drunkenness. Official members of the church common to see them drunk. Brandy and whisky are now the great panacea for all the ills and aches that frail humanity is subject to in the church, as well as out of it.

Here is a preacher, so called, so utterly broken down and exhausted with the tremendous labor of preaching one short sermon that before he is able to undergo the additional fatigue of eating his dinner he must take several recuperating "swigs" from the whisky bottle. This is of our church.

Another was advised to procure some barks and make himself some bitters, and use it for general debility. But he could not wait to get the barks, and "just took a little dry, so," and being rather dry, I suppose, he took on a little too much, and the result of it was he was laid up about a week—drunk, "with an attack of rheuma-

tism." This one is of another church.

Well, then, some time ago an official member of another church was "troubled with rash of blood to the head, sir," and "lung fever, sir," and he had some "pine-top" tea made, and intended to put a little whisky in it—just a little; but by some turn or other he made a slight mistake and put a little "pine-top" tea—just a little—in a good deal of whisky, and the result of that was he was a "little excited about the head, sir." Oh! shame, shame, where is thy blush? How long will professing Christians continue to bring reproach upon the church in such a way? They are ruining themselves and injuring the cause they profess to love. No drunkard can inherit the kingdom of God. Therefore, oh man! make no excuse for a thing that is so ruinous both to soul and body. Though nature may be decaying by age and trials, don't try to repair the damage by drink. Let Christ be your cordial. Touch not, taste not, handle not the unclean thing. Abstain from the appearance of evil. Seek ye the Lord always.

These are some of the hinderances in the way of Christians. Let us endeavor to shun these and all others, and only love God. And let us continually hate everything that is evil. Let us follow after righteousness, that we may have constant daily communion with him. He calls upon us to follow him. Let us hear and heed his voice, so that when we are called to die we may have nothing to fear, and in the resurrection morn be enabled to arise and live with him forever.

J. T. C.

Brief Account of the Origin of the Present English Version of the Bible.

Mr. Editor: The undersigned has occasionally met with persons who utter disparaging statements in reference to the integrity of the text of the Bibles circulated by the Southwestern Bible Society. His special notice also has been called to the matter by one of the vice presidents of the society, with a request to furnish a refutation. The objections privately thrown out in disparagement of the integrity of the sacred Scriptures printed by the American Bible Society are utterly without foundation. No public writer or speaker, as such, dares register the language of disparagement; yet private misunderstandings and misrepresentations (historical) must be met by a correct recital, which shall vindicate the truth in regard to the history of the common version, and thereby arrest the under-current of unfounded convictions—convictions which derive their strength either from a failure to investigate the facts involved, or from some indefinite preference for an ecclesiastical printer.

The standard English version of the Bible is that known as King James' Bible, printed in 1611. The new translation was requested by the Hampton Court Conference, held before the King in 1604. It was prepared, by order of the King, by a "large number of scholars of both universities, and elsewhere" (47), with the addition of seven "overseers" of the work, "eminent and grave divines of each university." The Bishop's Bible, which was a revision of Crammer's, by Archbishop Parker and other bishops, was the basis, while reference was to be made to the other existing translations, viz: Tyndal's, Coverdale's, Matthews', Crammer's and the Geneva.

Several editions followed—one in 1604, with the "addition of marginal references"—several times reprinted down to 1766.

An edition, with "many parallel texts," was published at Cambridge in 1678. An Oxford edition followed in 1680, with "Usher's Chronology." Then came Dr. Lloyd's edition of 1701, with further "additions of parallel scriptures, and tables of weights and measures." This last edition was disfigured by typographical errors—repeated in subsequent copies till 1724, when George the First ordered the employment of "correctors of the press" by the "patentees of the right for printing," under the supervision of the Archbishop of Canterbury and the Bishop of London. The most complete revision of the English Bible was that undertaken by Dr. Blaney, at Oxford, about 1767, with instructions from proper authority to "collate the Oxford copies with the folio edition of 1611—that

of Dr. Lloyd in 1701—and two Cambridge editions of a later date. The work occupied three or four years, and was published, quarto and folio, in 1769, at the Clarendon Press.

The edition of the Bible by Dr. Blaney has been regarded ever since as the standard copy, to which all subsequent issues in England have been conformed. In carrying a copy through the press by Eyre and Strahan, printed by Woodfall—in 1806, and again in 1813, over a hundred errors were detected in Blaney's edition. Subsequently, as in 1830, the public mind in England and America became agitated by charge, openly made, that the English Bibles had been greatly corrupted from the original editions. To allay this charge the Clarendon Press (which had published Dr. Blaney's Bible) issued, in 1833, an exact reprint in Roman letter of the folio edition of 1611 in black letter. This publication satisfied all cavilers, or, as the historian expresses it, "tranquilized the public mind." Ocular demonstration was thus given of the integrity of the common text—manifest typographical errors and orthographical changes required by the progress of the language excepted.

The text of our Bibles (those published by the American Bible Society) has been preserved with like integrity, and remains unchanged, without variation from the original copy left by the translators, and conforms to the British standard edition, as we shall show below.

SOME ACCOUNT OF REVISIONS.

In the printing of different editions of the Bible, at various times by any publishers, experience shows that it may be considered beyond the power of human skill to prevent the occasional occurrence of errors and variation, minor ones especially arising from accident or from carelessness of proof readers; while slight oversights in the earlier and standard editions may still remain uncorrected in the editions intended to conform to them. It follows that a strict collation is always necessary upon occasion of issuing new editions. We are brought by this preparatory suggestion to consider the pretext which some persons are not ashamed to claim for suspecting the integrity of the standard American edition of the Bible.

Previously to 1847 many discrepancies were existing between different issues (editions) of the Bible, by the American Bible Society, and between such editions as those issued by the British and Foreign Bible Society. Special notice was taken of these by the superintendent of printing at the Bible House in New York. Mr. Brigham, secretary of the American Bible Society, brought the matter to the attention of the Committee on Versions, and they referred it to the Board of Managers. The managers ordered a collation; this was in 1848. The object of this collation was "to secure conformity with the approved English text."

The revision was made, but too large a scale; although the work of the committee was at first approved, and stereotype plates constructed according to the alterations and amendments recommended, and many copies placed on distribution. There arose a strong and just cry of opposition during several years, not so much against the philology of the changes, as against any changes, except to secure uniformity with the acknowledged standard. As well as the writer remembers, the opposition was headed by Rev. Dr. Cox (of Bishop) and Rev. Dr. R. L. Brainerd. The Christian community took the alarm; and so strong were the convictions of leading individuals, minds, and of auxiliary societies representing the views of the mass of believers, that this revision was set aside, and the plates reentered the original standard. To accomplish this result a new collation was ordered. It was made by a committee of revision, with the assistance of Secretary McNeil and others, in 1858 and 1859.

The restoration was made by collation of the original edition of 1611 King James' Bible, with the authorized British editions (London, Oxford, Cambridge and Edinburgh), and with the society's own editions. This last review having been undertaken with the jealous eyes of Christendom upon it, has resulted in the establishment, on this continent, of the same standard version as that of the British Bible Society—of English-speaking Christendom.

This is the volume which we hold to be the word of God, and which, as such, we offer to our fellow-men.

J. E. C. DORRIS,
Gen. Agent of S. W. B. S.

*College mate of the writer.

A Scottish nobleman one day visited a lawyer at his office, which at the time there was a burning fire, which led him to exclaim, "Mr. —, your office is as hot as an oven." "So it should be, my lord," replied the lawyer, "as it here I make my bread."

The Christian Advocate.

SATURDAY, DECEMBER 10, 1870.

WE'VE ALL OUR ANGEL SIDE.

Large rough stones from out the mine,
Lightly and unfairly,
Are piled up on the surface there.
Some they moss-plant clings,
And round the peaks so desolate
The sea bird sits and sings,
Where men, too, that rugged souls
Beneath their rudeness hide
Such that is beautiful and good—
We're all our angel side.

Up all there is an inner depth,
A secret way,
Through the windows of the soul
That sends the smiling ray.
In every human heart there is
A hidden sounding chord,
That may be struck, unknown to us,
By some sweet loving word.
The wayward man in vain may try
To other thoughts to hide;
Some unexpected tone reveals—
It has an angel side.

Deep and lone, and trodden down,
Dark with the shade of sin,
Deeper than those trifling lights
Which God has lit within;
They grope about in utmost night,
Poor poisoned souls they are,
Who guess not what life's meaning is,
Nor dream of heaven afar.

O that some gentle hand of love
Their stumbling steps would guide,
And show them that amidst it all
Life has its angel side.

Brother-like and mean, and dark enough,
God knows some natures are;
But the compassionate comes near,
And shall we stand afar?
Our course of will will not grow long
If shared with heavy hand;
For words of peace and looks of love
Few natures can withstand.

Love is the mighty conqueror,
Love is the beauteous guide;
Love with her beaming eye can see
We're all our angel side.

THE DEEP SEA.

BY ROBERT PATTERSON, D. D.

Since the publication of Lieutenant Maury's Geography of the Sea, and the distribution of the American Wind and Current Charts, which have so remarkably shortened oceanic voyages, European savans have been stimulated to keep up with American physical geographers in this department of science. The four years' war, absorbing all the energies of the nation in a struggle for life, necessarily suspended those scientific researches which have placed American naval officers in the very first rank of science. Great Britain, not suffering from any such interruption, and deeply interested in telegraphic communication with her colonies across the ocean, has been prosecuting researches in the deep sea, with remarkable industry and success.

During the process of the deep sea soundings, which have been carried on ever since a trans-Atlantic cable was proposed, quite a number of facts were incidentally observed, of such a character as to excite the most profound interest among scientific men, since they seemed to conflict with the accepted zoological and geological theories. It was desirable to collect more facts and to observe them more carefully. A dredging expedition was therefore fitted out under the charge of Messrs. Thompson and Carpenter, and H. B. M., the Porcupine, was placed at their disposal, with the most improved apparatus for reaching the bottom of the deep sea, and bringing up considerable quantities of whatever might be found on its bottom. This apparatus has been so successful as to bring up some hundred weight of mud at a single haul, from a very great depth. Registering thermometers, protected from pressure, were liberally furnished, and constantly and generally successfully used, and their results registered. The observations and experiments were detailed before the Royal Geographical Society, and the specimens of the tenacity of the sea bottom were exhibited. The facts were so inexplicable according to the current theory of geology, indeed so contrary to many of its assumptions, that it was deemed necessary to doubt the correctness of the observations, or at least to hold them in suspense until another expedition had either disproved or confirmed them. Philosophers, moreover, had taught that all life must cease at three hundred or four hundred fathoms, from the immense pressure; and experiments with the hydrostatic press had crushed the life out of all kinds of shell fish and crinacea submitted to a much lower pressure; but here were thousands of such beings, fat and flourishing, from a depth of two thousand fathoms.

The Council of the Royal Society therefore requested the Admiralty for the use of the Porcupine again, for another expedition, under charge of Captain Calver, R. N., and Mr. Gayn Jeffreys, and the ship was accordingly put in commission for this and other hydrographic service. She sailed westward on the eighteenth of May, 1868, carrying on explorations until she reached Porcupine Creek, so named in one of her former surveys. She went on sounding toward Rockall, a desolate rock in the North Atlantic, thence toward Donegal Bay.

In July she started on a second voyage under the scientific charge of Dr. Wyville Thompson, in a south-westerly course, for the purpose of deeper soundings at the northern extremity of the Bay of Biscay. Dr. Thompson was successful in making the dredge here at the extraordinary depth of two thousand four hundred and thirty-five fathoms, a depth nearly equal to the height of Mount Blanc, and the greatest depth from which any considerable specimen of sea-bottom has yet been elevated—being fourteen thousand six hundred and ten feet.

In August she started from Belfast for a third cruise, under the scientific charge of Dr. Carpenter, accompanied by Dr. Wyville Thompson, making a more detailed survey and re-examination of the ground previously examined by the Lightning, visiting the Faroe Isles and remaining out till September 15.

These three expeditions under the charge of Captain Calver, whose previous experience was invaluable, and of three scientific men of the greatest eminence, are accordingly regarded as decisive of the questions at issue. They confirm, and in many respects enlarge, the former observations.

These explorers record first, the temperature of the sea at great depths; second, bring up specimens of the animals found at the deep sea-bottom; third, and specimens of the sea-bottom itself—of the mud and sand scooped up in the dredge.

First. The record of temperature. Some previous explorers had reported temperatures of eight and ten degrees Fahrenheit off the coast of Florida; these, however, were regarded as erroneous registrations. But the former Admiralty soundings discovered at the deep sea-bottom in the tropics water below the freezing point; and the Porcupine soundings discovered that while the surface temperature was uniformly fifty-two degrees over a large extent, there would be below it, at the bottom, one tract of ice-cold water, and then, within ten miles, another tract of bottom-water at forty-seven degrees. It is discovered also that the sea-bottom, at the tropics, is always colder than in the North Atlantic.

Second. The inhabitants. These, contrary to the received opinions, are found to be various, well developed and numerous in the profound depths. Among them we may mention that Dr. E. P. Wright brought up sharks from three thousand feet. Dr. Walleh brought up thirteen star-fish, from two to five inches in diameter, to the tips of the rays, eight miles from land, from a depth of seven thousand five hundred feet, in latitude 59-27 north, longitude 26-41 west; and at the same time quantities of globigerina deposit, showing that the star-fish could find plenty of food down there. A Norwegian naturalist also has obtained live echinoderms, of a beautiful red color, from a depth of eight thousand four hundred feet, where the temperature was only above the freezing point.

But the most wonderful fact of all, is that in the greatest depths yet discovered the bottom teems with life of various kinds, and with animals having perfect eyes. At a depth of fifteen thousand feet of sea water it has been generally supposed no light could penetrate; but the presence of eyes attests the existence of light. The very mud of the deep sea bottom consists largely of organic matter, more or less decomposed, and quite sticky from the presence of minute pellets of jelly-like animalcules. Imbedded in this mud are multitudes of minute shells, and minute round bodies like watch glasses, called coelospheres. A single haul brought up twenty thousand specimens of a single form of echini. In short, the bottom of the deep sea is much more populous than the land; and the most fragile shells, and the most delicate mollusks are found beneath a water-pressure of a ton to the square inch.

Third. The bottom itself. This was found to vary very much in character, and apparently in consequence of the variation of temperature before referred to. Where the temperature was down to near freezing point the character of the deposits was quite different from that of the closely neighboring region of warmer water. Thus within a space of ten miles the explorers discovered a cold and comparatively barren tract of sand, and beside it a warm tract covered with chalk mud, and swarming with life. Abundant specimens of both have been raised and exhibited, and the fact is now universally admitted.

The ice-cold temperature of the earth's crust at a depth of fourteen thousand six hundred feet is a startling contradiction of the theory of geologists—that the interior of the earth is a lake of fire and molten minerals, and that the temperature increases as we sink toward it. One degree for every fifty feet. They alleged in support of this dogma some phenomena of mines, where

chemical action and atmospheric pressure combine to raise the temperature. But they scornfully ignored the undeniable contradictory facts of the artesian wells of the Mississippi valley, of which there are now some scores, and which send up water from great depths—that of Chicago seven hundred and eleven feet, temperature fifty-eight degrees Fahrenheit—colder than the average surface temperature.

But they cannot refuse to consider this series of authoritative observations, nor afford to ignore their bearing on the question of the earth's internal temperature. At the depth of these soundings, an excavation of fourteen thousand six hundred feet below the level of the ocean, according to geologists, the temperature of the earth's crust must be two hundred and ninety-two degrees Fahrenheit above the surface temperature, or three hundred and forty-four degrees Fahrenheit; and as they say the earth has always been warmer than at present, it could never have been lower than that. Now with such a bottom heat for even the six thousand years it has known it, or, as they put it, for six thousand millions of years, the ocean ought to have been long ago at the boiling point, and indeed should have been long ago evaporated. Instead, however, of any such temperature, we find ice-cold water at the bottom, and water at fifty-two degrees Fahrenheit at the top, proving conclusively the absence of any such internal sea of fire as geologists assume and describe.

The discovery of the contemporaneous formation of widely different geological strata is equally important for its destruction of the basis of geological chronology. We prefer to present this antagonism in the words of a competent and impartial literary journal. The Eclectic Magazine thus regards the discovery:

"Philosophers had imagined that all life would cease at an ocean depth of three hundred fathoms, and that the temperature of the deep sea was everywhere thirty-nine degrees. It was found, on the contrary, that abundant life existed at greater depths, and that the deep sea temperature varied within somewhat wide limits. More remarkable still, it was found that a difference in bottom temperature between thirty-two and forty-seven degrees existed at points only eight or ten miles from each other, beneath a uniform surface temperature of about fifty-two degrees; and that where this was the case, in the cold area the bottom was formed of barren sandstone, mingled with fragments of older rock, and inhabited by a comparatively scanty fauna, of arctic or boreal character, while in the adjacent warm area the bottom surface was corallaceous, and the more abundant fauna presented characteristics due to the more temperate climate. Hence an upheaval of a few miles of the sea bottom subject to these conditions would present to the geologists of the future two portions of surface totally different in their structure, the one exhibiting traces of a depressed, the other of an elevated temperature; and yet these formations would have been contemporaneous, and contemporaneous. Wherever similar conditions are found upon the dry land of the present day, it had been supposed that the high and low temperature, the formation of chalk and the formation of sandstone, must have been separated from each other by long periods; and the discovery that they may actually coexist upon adjacent surfaces has done no less than strike at the very root of many of the customary assumptions with regard to geological time."

We have, in a former article, seen Sir William Thompson, from the ascertained facts of astronomy, demonstrating the erroneous character of the geological chronology of the early period of our earth's history. Here we have the physical geographers demonstrating the equally erroneous character of the chronology of the very latest formations—of those on whose alleged antiquity we have seen such vast calculations based of the antiquity of man. First and last, geological chronology would seem to be a blundering business.

WATER-SPOUTS.

Many years of personal experience and observation, besides a frequent comparison of notes with others, have led me to the conclusion that water-spouts are more common near the land than in the open sea, and that, as a rule, they are restricted within certain limits. I do not remember ever to have seen one in the North Atlantic or Pacific oceans, while they are very common in the Gulf of Mexico, among the West India Islands, along the west coast of Africa, and in the Indian ocean. Their form and appearance are so well known that no detailed description of them is necessary; but I will remark that the first warning we have of their appearance is by the dependence of a slender, inverted cone from a dark cloud. Soon a lighter-colored cloud rises from the water a little to leeward of

it, and the two, soon joining together, go whirling on their way as a water-spout. But this junction is not always effected. It is no uncommon occurrence to see a half dozen or more embryo water-spouts descending from one cloud, with only a slight disturbance in the water underneath, and for them all to finally vanish without a single one being completed. This I have never heard accounted for, but should imagine it to be for the reason that the power of the wind contained in the cloud is so divided or scattered that in no one part of it is there sufficient force to draw the water up to it; for, where but one cone descends from a cloud, it generally finds its complement. Still I remember on one occasion to have seen five complete water-spouts formed under one cloud, which was not only a rare sight, but also one of the most magnificent that I ever witnessed. We were in the Indian ocean, running with a light, fair wind for Java Head, the highlands of the island being visible from aloft. A heavy thunder squall was coming up from the westward, its black cloud covering about a quadrant of the horizon, and forming an arch, the center of which was at an altitude of about thirty degrees. Above this bank, which was rendered "dark as Erebus" by the sun being low down behind it in the west, there rose a superincumbent mass of clouds nearly to the zenith, presenting, in their ever-varying forms and wonderful transmutations of color, a scene of rare and resplendent beauty, strangely at variance with the gloomy arch that formed their support, and from which now came faint gleams of lightning, and the ominous mutterings of distant thunder. As the storm-cloud rose higher, the water-spouts formed gradually one after the other, at nearly equal distances apart, giving one the idea of five great pillars supporting an archway that might be the portal to the infernal regions. This illusion was still more apparent when, just at sunset, there shone through between the pillars, for a few minutes, a faint but lurid glare of light, which as suddenly disappeared, leaving us to the brief twilight of the tropics, and the labors incumbent to a stormy night.

The danger to ships from water-spouts is much exaggerated, for a ship properly handled can keep out of the way, if there is any wind. There are but few well authenticated accounts of vessels coming in contact with them, and of such the only one that occurs to my memory at present is the case of the United States frigate Potomac, which occurred about thirty years ago. She was in the vortex of a hurricane at the time, and had not wind enough to fill her sails. Shot at guns, the traditional method of breaking a water-spout, were made use of, but failed in having the desired effect, either from bad gunnery, or from the inefficiency of the remedy. When the shock came it was terrible for a few seconds, the ship whirling around as if in a whirlpool, while the water poured down with a force that threatened to stave in the decks. This avalanche of water would probably have proved fatal to a merchant ship with her close bulwarks; but the frigate had her spar-deck ports open, so that she was soon relieved from the weight of water on her decks, and came out from this baptism with but little more damage than she had sustained in the ordeal of fire at Quallah Battoo. If proper statistics were at hand, it would be found that water-spouts have done less mischief afloat than they have ashore, especially in the Windward Islands of the West Indies.

I do not remember to have ever been in danger from them, personally, but once, and that was in the Gulf of Mexico. We had sailed from Mobile on the previous evening, but, owing to light winds and calms, were only thirty miles from the point when the wind set in from the northeast with heavy rain-squalls. In less than an hour there were twenty-three water-spouts in sight at one time, all moving in different directions. There was much doubt and hesitation about the course to be pursued, for it was impossible to know at what moment one of them might change its course and come for us. While holding a council of war, another one formed within a few hundred yards of us, and sailed away on our weather-quarter, rounding like an incipient Niagara. As no positive rule could be laid down for our guidance, we determined to keep straight on our course, unless compelled to turn out; and, after running the gauntlet among them for about three hours, came out into clear water, fully impressed with the truth of the sailor's maxim that fortune favors the lucky.—H. H. Dodge in Appleton's Journal.

SALVATION AT THE ELEVENTH HOUR. Those may hope to be saved at the eleventh hour, who, when called at that hour, can plead that it is their first call; who can say, when asked why they stand idle, "Because no man has hired us."

RELIGIOUS INTELLIGENCE.

There is already a Bible depository in Rome, and colporteurs are at work selling the Scriptures.

The "Relief and Extension Fund for Methodism in Scotland" has received from Mrs. Burton a bequest of \$75,000.

Many leading ministers of the different branches of the Lutheran Church in the United States are urging organic union.

The Lutheran Observer uses the new word "symbolotry" to signify the excessive reverence for creeds alleged to prevail in the Lutheran Church.

REV. JACOB LEST, of Pickaway county, Ohio, the oldest Lutheran minister in that State, died on the eighth ultimo. He was eighty-three years old.

The Jesuits have been expelled from Marseilles, and their newspaper suspended. In Rome the control of education has been taken away from the Jesuits.

GEORGE F. ULLINO, Esq., of Hampton, Middlesex, a prominent, generous and devoted Methodist layman, one of the founders of the Star Life Insurance Society, died recently.

The venerable John Sidley, a highly esteemed local preacher of the British Wesleyan Church, died at Oton, near Birkenhead, October 5, aged nearly ninety-seven years. His end was triumphant.

A GOOD PROVISION FOR A PASTOR.—The resignation of the Rev. Dr. Canfield, of the First Presbyterian church, Syracuse, New York, has been consented to by his people, and they have provided for him an annuity of \$1,200 a year for life.

The Baptists in Georgia claim about 118,000 communicants, being more than all other denominations put together. Of this total 11,000 are anti-missionary and 40,000 are colored, of whom 27,000 are in separate colored churches and associations.

LAST YEAR, says the Friend of India, the Baptist mission in Orissa received 104 members by baptism, and there are now 563 communicants and 1,437 nominal Christians. A large portion of the latter are orphans, toward whose support the government pays \$18 a year.

The Methodist Episcopal Church, which was commenced in Germany only a few years since, has now a Conference, 30 church edifices, 30 ministers, 37 local preachers, 7,250 members, and 8,378 scholars in its Sabbath schools. It is doing a good work in that country.

ON SATURDAY, the fifth ultimo, Rev. James P. McKee, wife and child, and Miss Theresia M. Campbell sailed in the steamship Ismailia from New York, under the care of the Board of Foreign Missions of the United Presbyterian Church, for the missionary work—the former to India, and the latter to Egypt.

AT THE LATE meeting of the Second United Presbyterian Synod, Rev. Thomas Beveridge, D. D., tendered his resignation of his office as professor in the Theological Seminary at Xenia, Ohio, "having entered upon the seventy-fifth year of his age." The synod voted him a salary of \$500 a year during his life. It also voted to transfer the seminary to the care of the General Assembly.

The government of Canada refuses to appoint an annual Thanksgiving day which shall be a legal holiday. An application to the Roman Catholics in the selection of such a day has in former years been met with the answer that they always attended to that matter themselves. This year the Episcopalians field their thanksgiving three weeks ago, the Wesleyans on the last Sabbath but one, and the Presbyterians and Congregationalists on last Thursday.

The American Moravians have been pressing for some time on their German brethren the planting of a mission in Bohemia, the original home of the Moravian Brethren. The last General Synod voted in favor of the idea; but the American brethren have rather complained that too little energy was shown in attending to it. At last a church of twenty members has been organized at Potenstein, Bohemia, under the labors of Herr Hartwig. It is believed that other societies will be formed in this ancient home of the Unitas Fratrum, where they were once so numerous, but have now been driven out and supplanted by the Romanists.

The Brotherhood of the Mission of St. John the Evangelist consists of nine persons connected with the Anglican Church. Four of the members are now in this country for the purpose of founding a branch of the order. They expect to have an establishment, consisting of a church and seminary, in Connecticut, and go forth to hold "missions" in connection with such parishes as shall invite them. It is reported that Father Benson, the superior of the order, has been invited to take charge for a time of the Church of the Advent, in Boston; and that his acceptance will depend on what action Bishop Eastburn may take in the premises. The discipline of the order is like that of Roman Catholic monks, as is their dress; and they are celibates and hold no personal property.

There is, in Southern India a small body of what are called Syrian Christians, a body very much of the Nestorian order. Sixty years ago an attempt was made by Dr. Buchanan and others to infuse them with Protestant principles; but the attempt was a failure, as have been nearly all attempts to regenerate, without overthrowing, a corrupt Christianity. We now learn that these Syrian Christians of Travancore are again seeking aid from the Church Missionary Society to establish schools in all their churches. The English missionaries are promised every help, and asked to preach and teach in the Syrian churches. There is among them a growing vigor of thought, but they are extremely quarrelsome. Those churches which have been under considerable Protestant influence are said to be much in advance of the others.—Independent.

METHODIST CHURCH EXTENSION IN LONDON.—Within a little more than eight years the Wesleyan Methodists of London have erected nearly thirty large church edifices, at a cost of about £150,000 (\$750,000). This is a great work, and challenges the admiration of the Christian public. The movement for church extension in the metropolitan district is just now awakening more than usual attention. We have already noted the appointment by the recent Wesleyan Conference of a prominent and influential minister (Rev. Gervase Smith) to a special secretaryship, charged with the work of securing an immediate enlargement of the "Metropolitan Wesleyan Chapel Fund." We have noted also the great offer of that noble Methodist layman, Sir Francis Lytton, to give toward the fund £250,000 within the next ten years, on condition that an equal sum should be contributed by other friends for the same purpose. The exact terms of the offer of Sir Francis are shown in the following: a paragraph from a letter written by him to Rev. Mr. Smith, and which we find in the last London Methodist Recorder.

"The offer I made in the letter sent to Mr. Arthur was to this effect, that if during this Conference year, 1870-71, ten new chapels should be erected, I would give £1,000 to each, provided a like amount was given by friends in the country. And, further, at the end of the year I would give within seven or eight years a further sum of £1,000 to assist in the erection of forty additional chapels, provided the same amount could be collected in the country. That is, within nine or ten years I am prepared to give £50,000 if fifty chapels are built, and also provided £50,000 are given by the friends in the provinces. So that you see I do not give it unless the chapels are built or commenced, nor unless there is the response challenged by our country Methodists."

Thus it will be seen, as Mr. Smith properly observes, that this offer is intended to supplement the gifts of London. Sir Francis feels that after the noble and self-denying efforts of the last nine years, which have resulted in the purchase of about thirty sites and the building of nearly as many large chapels, some additional inducement is desirable to urge on the work, which is absolutely more needed than ever. He says in effect: "The fund in the metropolis must be sustained and enlarged, so as to give to all fresh enterprises quite as much help, both by loans and grants, as in the past. But beyond this let every new chapel have the additional inducement of two thousand pounds offered." London must not slacken its energies for a moment, and if the wealthy country friends will sanction this vast effort for the evangelization of the metropolis by sending one of the two additional thousand pounds, he will give the other.—New York Christian Advocate.

RELIGIOUS VS. SECULAR EDUCATION IN THE PUBLIC SCHOOLS.—In a speech made in the British Parliament a few months ago, the Rev. Mr. Richards remarked that "two countries have tried national education, the one a religious, the other a secular system. In Prussia the teaching is dogmatically religious, and what is the result? The Prussians are the most irreligious people in Europe. On the other hand, the United States have secular education, and the people are the most religious in the world." Mr. Richards had no fear that secular education would have any other result in his own country, and recommended this proposal to the State: "Let the State give what the State only can give, literary and scientific education, leaving religious teaching to home influence and to the religious bodies of the country."

God forbid that the manly energy of Christian speech should sink into hypocritical cant.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, DECEMBER 10, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp street, New Orleans, La.
AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

NORTH ALABAMA CONFERENCE.

President J. G. Wilson, secretary of the North Alabama Conference, puts us under obligations by courtesies. He informs us the Committee on Periodicals in the North Alabama Conference "express a high sense of the value of our paper, and a hearty desire for its prosperity."

TO THE MISSISSIPPI CONFERENCE.

HALF FARE.

Mr. Editor: I have received letters from the authorities of the New Orleans and Jackson, and the Vicksburg and Meridian railroads, stating that they will pass the members of and business attendants upon the next session of the Mississippi Conference, to be held at Crystal Springs on the fourteenth of December next, at half fare.

Full fare will be required on going to Conference, and the return will be free upon presentation of certificate of attendance.

Preachers already having half fare tickets will expect no further reduction.
O. G. ANDREWS.
JACKSON, MISS., Dec. 1, 1870.

REV. HENRY T. LEWIS.

The following communication and resolutions contain the only announcement we have seen of the death of Bro. Lewis. We hope that some one who knew him well, and is acquainted with the circumstances of his death, will furnish us a suitable sketch for publication.

COLLEGE CHAPEL, HOMER, LA.,
November 17, 1870.

Mr. Editor: As chairman of the committee, I am requested to forward to you the following preambles and resolutions, offered by a committee appointed for the purpose, and unanimously adopted by the students of Homer College, at a meeting in the chapel.

Yours, etc., B. G. CHAVENS.
Whereas, the painful intelligence of the death of Rev. HENRY T. LEWIS, our former beloved president, has reached us; and whereas, we have a high appreciation of the able and satisfactory manner in which he presided over our college; therefore,

Resolved, That, while we bow in submission to the providence which has called him away, we deeply deplore the early death of one whose gifts and graces so well qualified him for usefulness in life.

Resolved, That we tender to his bereaved family our earnest sympathy in the heavy affliction which has fallen upon them.

Resolved, That copies of these preambles and resolutions be sent to the Claiborne Advocate and to the NEW ORLEANS CHRISTIAN ADVOCATE for publication.

B. G. CHAVENS, Chairman,
M. Y. LANGSTON, Sec'y.,
J. C. GRAY, Committee.

DRESSING FOR CHURCH.

In writing on dress we know that we are teneching on a subject at once delicate and difficult, and the more so as from the present conventionalities the ladies are most involved in its consideration. Some aspects of the subject, however, we think are sufficiently important to justify some ventilation.

So much is it a custom among us to dress especially for church, and to make it to no small extent a dress occasion, that the phrase "Sunday-go-to-meeting clothes" is one of the best established and most generally used in common speech. No doubt it would be most irreverent and reprehensible to pay no attention to neatness and orderliness in our attire when we go up to the house of the Lord. Let all things be done decently and in order. But there is a wide difference between the chastened taste of neatness and the putting on of fine apparel and gold—"the gay clothing" of which St. James speaks. Of course people will always dress according to means, taste and association; but the point we are considering is making church-going a dress occasion, where our richest, gayest and most stylish attire is to be worn and displayed. "But why object to dress display at church more than elsewhere?" For several reasons. When those whose means enable them to dress richly and splendidly visit and mingle in their own social circle, their costly and showy array does not mortify or embarrass others. All in these circles are able to appear in the same style. But this is not the case at church. The selectness of church society is its spirituality, its purity, and not its financial power or its esthetical culture. At church are gathered the representatives of all social circles, and so far as our branch of Zion is concerned, it has been our honor that we have gathered many of the poor. The majority of our congregations, we suppose, are persons of small means, who are not able, without serious inconvenience, to appear in costly array at church or elsewhere. Now we know it will be said by those accustomed to elegant attire: "What business is it of the poor, or anybody else, how we dress at church?" We suppose it is not a matter of "business" at all, but rather a matter of feeling. It is natural for us all to shrink from an exhibition of our inferiority. It is unpleasant to go where it is forced and obtruded upon us. Yet if half a congregation are richly dressed in "gay clothing" and costly array, the other half, not able thus to appear, will feel the contrast. We may say, and truly, perhaps, that they should not be mortified at their cheaper and plainer attire; but, nevertheless, some of them will be. This painful contrast keeps many, especially of the irreligious poor, away from our churches.

We have read of late that in many communities the churches are dying of respectability. A minister of a certain church, in a certain city, told the writer some years ago that there was not a poor person in his congregation. Why was there not? Not surely, because there were no poor people in that city. The writer knows there were tens of thousands there. Now we hold if the well-to-do classes so dress at church as to keep away the poor, they are doing, perhaps even without once thinking of it, a great evil. Our blessed Master appeared in the plainest style, so as to make himself accessible by the humblest classes. Had he appeared with pomp and majestic array he would have planted and reared an insurmountable hedge between himself and the great mass of the sinful and dying whom he came to save. Let this consideration lead those who are able to be fine appear in God's house, and in the assembly of his saints, in chaste but modest and subdued attire.

Again, dressing gorgeously and with elaborate care looks as though we wished and intended to attract attention. We suppose it is not uncharitable to say that this is the purpose of too many. But if any of these are professedly pious they surely must do this without reflection upon the character of what they are doing. Think of it! A poor, sinful human creature spending an hour or two of the Sabbath morning in an elaborate getting up of themselves. To do what? To attract to themselves the attention that ought to be devoutly given to God, his truth, and the soul's everlasting interest. Think of it! A poor mortal intending and trying to rival God in his holy house. When looked at in this light it is startling and almost blasphemous. If any of you who read this have been accustomed thus to do, we pray you to take it into consideration, and ask yourself next Sabbath morning: "Am I preparing myself to be a beautiful idol, to attract the admiration and homage that ought, especially in God's house, to be given to him who is 'glorious in holiness and fearful in praises?'"

Again, the effect on ourselves, we must think, is unfavorable to self-examination, to prayerfulness and heavenly-mindedness, and, if so, is a sufficient reason why we should attire ourselves so as not to be a source of distraction to ourselves or a spiritual hindrance to others. Whatever else we may object to in the Roman Church, we certainly most heartily approve of their plain and unostentatious costume in the house of prayer.

CHURCH FINANCES.

A NEW PLAN TO RAISE FUNDS.

Mr. Editor: Will you allow me a few lines of space to elucidate to my brethren of the Mississippi Annual Conference a plan for raising money for the support of the church and its institutions? I may be premature in calling it new; but one or two points I mean to suggest have never seen types, that I know of. Before I come to the point, I wish to remind my brethren that we have a great multitude of schemes for obtaining money of our congregations and members, and nearly all of them are gross departures from the plans of John Wesley and the New Testament. In a minute we shall see what those plans were and are.

Just now we wish to note the result of ignoring God's word and that modern apostle. Only one or two have we time to refer to. Our ordinary methods leave the people in moderate circumstances to pay little or nothing; consequently the burdens of the finances fall upon a small number. A few wealthy members are overtaxed and treated unjustly. Besides, the task of collecting the funds needed is imposed on the stewards, and is often perplexing and troublesome to the last degree. Is there no remedy for these and all the other unmentioned evils of our system?

What do the Scriptures teach? Listen! "Now concerning the collection for the saints: as I have given order to the churches of Galatia, even so do ye. Upon the first day of the week let every one of you lay by him in store, as God hath prospered him," etc.

What is this rule? "Every one; every week." Few persons feel like giving at one time one hundred dollars; but the same person will give you three hundred if you will take it once a week in V's or X's.

Many a one cannot give ten dollars at once to support the pastor, but they will give you twenty-five cents a week, which they laid by in store, for that end. It will come to \$12.50 in fifty weeks. St. Paul saw, know well, and "ordered" the raising of money weekly because of the feebleness of our selfish natures.

So the wise and wondrous Wesley. His plan was substantially St. Paul's. The early "Rules" read thus in respect to the weekly classes: "It is the duty of the leader * * * to meet the minister and stewards of the society once a week in order * * * to pay the stewards what they have received of their several classes in the week preceding."

The gist of all this disclosure is found in the contribution of small sums and often—"every one," "every week." I regard this plan as divinely ordained; and every departure from it is fraught with evil. All our church finances are difficult to manage simply because this rule of apostolic and divine authority has been trifled with or altogether ignored. I beg to add what I deem essential to the execution of the plan. Clearly we cannot rely on the classes and class leaders any longer. I simply propose a substitute, thus:

First. Take one hundred members and divide them into five parts, divisions or guilds.

Second. Provide a small, cheap book, ruled for forty or fifty names. Opposite each name let there be a place prepared to insert the figures expressive of any sums of money. At the top, in several perpendicular columns, print the names of the claimants to which the funds are to be appropriated. A Sabbath school record is nearly a model.

Third. Select five of the most discreet, prudent, polite, attentive members of the church, and let them take the hundred names and divide them among themselves—twenty to each. Now they have blanks in each book for say twenty more names—in all, forty. Let them still reserve ten more spaces, if they will—fifty in all; and if this is too large, let them take but twelve church members, and allow for new additions to the church from time to time, and hold as many blanks for the names of those who do not belong to the church.

Let us suppose A. B. C. collector of Guild No. 1. He calls on each of the church members to find out how much "every one" will pay him "every week" for: 1. The support of the pastor. 2. The support of missions. 3. Church extension. 4. Tracts. 5. Sunday schools. 6. Destitute and superannuated preachers, etc. Let us see what he has got on his list. He has ten cents a week on the first; that is \$5 for fifty weeks. Five cents on missions; that makes, for the same time, \$2.50. Church extension, two and a half cents per week; equal to \$1.25 for fifty weeks. Tracts, the same; equal to \$1.25. Sunday schools, two and a half cents; equal to \$1.25. Destitute, etc., two and a half cents; equal to \$1.25. The sum total makes twenty-five cents per week, or \$12.50 for fifty weeks. (I say fifty weeks to allow some loss.) In addition to these churchmen, let the collector add twelve or more persons outside of the church to his list, as he finds those who will cheerfully pay any sum regularly, however small. Should his list contain twenty-five names, and he were to collect \$12.50 on an average from each, he would have raised \$313.50, and the five guild collectors would have collected in the year \$1,607.50. Suppose, now, we have three hundred thousand members in the Methodist Episcopal Church South who can, on an average, pay \$12.50 per year (or say fifty weeks,) and three hundred thousand more outside the church who would pay the same, what would it all amount to in one year? The sum is amazing. For pastors it would count \$3,000,000; for missions, \$1,500,000; for church extension, \$750,000; tracts, \$750,000; Sunday schools, \$750,000; destitute and superannuated preachers, \$750,000; making the sum total of six millions of dollars.

Now, let me ask, who will reply? Is it unreasonable to believe that if the work of raising this sum were confided to the zeal and piety of our godly and active women, with such assistance as they might require from the co-operation of the efficient brethren in the church, the work could be easily done? Adopt the motto: "Every one, every week, as God hath prospered us."

Give the female members of the church something to do, worthy of their best powers, faith, zeal, love, and they will reinvigorate Methodism; will, in five years, develop its resources to the astonishment of the fathers, and open her path to a glorious future. I may at a future period write a little of the way to do this work with the least labor and trouble. What say the church women to this?

Yours, C. K. MARSHALL.
Vicksburg, Dec. 1, 1870.

Rush not after blessings; only walk in the commandments of God, and blessings shall run after you, pursue and overtake you.

NORTH MISSISSIPPI CONFERENCE.

Bro. Harp, our representative at the North Mississippi Conference, has just returned, and informs us that the session was harmonious and profitable, all the interests of the church receiving earnest and intelligent consideration.

He informs us that the Conference did not resolve to adopt any one paper as its organ, but to patronize all, as it might suit their taste and interest. At this result the Advocates should be content. They will be thrown upon their merits—a fair test. The following are the APPOINTMENTS.

HOLLY SPRINGS DISTRICT.—P. Tuggle, P. E. Holly Springs station, William Shepherd; Holly Springs circuit, H. Adams; Byhalia and Salem, W. H. Ford; Byhalia and Salem circuit, O. L. Bates; Marshall circuit, D. L. Cogdell; Early Grove circuit, J. G. Brooks; Lamar circuit, H. C. Morehead; Salem circuit, J. K. Morris; Hickory Flat circuit, P. M. Morman; Countersville circuit, T. G. Freeman; Marshall Female Institute, John Little, president; Byhalia Institute, P. J. Echols, president.

HERNANDO DISTRICT.—Joseph H. Brooks, P. E. Hernando and Coldwater, J. F. Truslow; Hernando circuit, A. P. Sage; Wesley circuit, T. P. Holeman; Harmony circuit, T. P. Ramsey; Sardis and Shiloh circuit, A. J. See; Como and Fredonia circuit, I. R. Hicks; Senatobia circuit, J. W. Luter; Cockrum circuit, T. W. Dye; Chulahoma circuit, R. A. Nehlet; Tyro circuit, S. W. Miller.

IUKA DISTRICT.—E. E. Hamilton, P. E. Iuka station, J. C. Lowe; Iuka circuit, J. L. Futrell; Corinth station, J. W. Honnell; Corinth circuit, to be supplied by J. W. Wells; Rienzi and Booneville, John Bancroft, William Elias, sup.; Kossuth circuit, H. D. Howell; Carolina circuit, S. C. Stone; Moses Martin, sup.; Jonesboro circuit, A. W. Langley; Ripley circuit, B. H. Bounds; Iuka Female Institute, J. E. Douglas, president.

VERONA DISTRICT.—J. B. Stone, P. E. Verona station, T. C. Wier; McDonald circuit, J. D. Bush; Lee circuit, M. M. Dunn; Pontotoc circuit, J. F. Markham; New Albany circuit, H. E. Smith; Baldwin circuit, E. H. Moore; Sallito circuit, B. W. Stubbs; Marietta circuit, W. J. Reeves, J. B. Price, sup.; Bay Springs mission, John McElhanna; Fulton circuit, B. F. Morris; Okla circuit, T. J. Lowry, A. J. Foster, sup.; R. W. Young, sup.; Verona Female College, T. C. Wier, president; Verona Female College, T. L. Duke, agent.

COLUMBUS DISTRICT.—T. Y. Ramsey, P. E. Columbus station, to be supplied; Columbus City mission, George Shaeffer; Columbus circuit, J. A. Peebles; Vinton circuit, T. F. Brewer; West Point station, W. T. J. Sullivan; Aberdeen circuit, L. H. Davis; Chickasaw circuit, J. P. Dancer, J. M. Dunn; Lime Creek circuit, W. R. Rainey; Athens circuit, N. Thomas; Houston circuit, W. A. Langley.

MACON DISTRICT.—A. C. Allen, P. E. Macon station, J. D. Cameron, to be transferred; Brookville circuit, O. P. Thomas, to be transferred; Crawford circuit, R. G. Porter; Macon circuit, L. M. Massingale; Starkville station, I. Ebbert; Plattsburg circuit, to be supplied by A. W. Murf; Starkville circuit, T. P. Crymes; Louisville circuit, J. O. Woodward.

GRENADEA DISTRICT.—A. Kendall, P. E. Water Valley station, W. L. Harrison; Water Valley circuit, B. Brown; Panama circuit, A. B. Fly; Coffeeville circuit, J. W. Poston; Charleston circuit, B. B. Risenhoover; Grenada station, J. W. Boswell; Coahoma circuit, to be supplied; J. Hampton, sup.; Oxford station, T. R. Brewer; Oxford circuit, W. A. Moore; Lafayette Springs circuit, H. H. Thacker; Carrollton circuit, G. D. Wade; J. J. Wheat, professor in State University.

YAZOO DISTRICT.—W. P. Barton, P. E. Blackhawk circuit, K. A. Jones; Lexington circuit, J. D. Newsom; Richland circuit, J. W. Brown; Greenwood circuit, H. Williamson; McNutt circuit, to be supplied by J. P. Briggs; Winona circuit, A. M. Barrington; Vaiden circuit, T. O. Parish; Kosciusko and Bethel circuit, P. A. Johnson; Attala circuit, G. W. Bachman; French Camps circuit, J. C. Carlisle; Bellofountain circuit, R. A. Roach; T. W. Castle, sup.; Lower Butchee mission, A. R. Hines.

GREENVILLE DISTRICT.—J. W. Knott, P. E. Greenville and Lake Lee, T. A. S. Adams, to be transferred; Deer Creek circuit, J. D. Murf; Indian Bayou circuit, J. M. Boone; Bolivar circuit, to be supplied by W. T. Ashford; Beulah and Concordia circuit, D. O. Hughes; Friar's Point and Clarksdale circuit, J. R. Peebles; Magnolia circuit, H. R. Caldwell; Austin and Trotter's Landing circuit, L. D. Worham, F. A. Owen, sup.; Cassity mission, to be supplied.

TRANSFERRED.—F. S. Petway, W.

Moore and E. B. Plummer, transferred to the Memphis Conference; Elias Jackson, transferred to Hattiesburg; White River Conference; C. Pearson and H. Townsend, transferred to Little Rock Conference; W. L. Kistler, transferred to Hattiesburg Conference; C. B. Gallows, transferred to Mississippi Conference.

NORTH ALABAMA CONFERENCE.

We are indebted to the Nashville Christian Advocate for the following items:

The North Alabama Conference met to hold its first session. Bishop Paine took the chair and conducted the opening services. The Rev. G. Wilson, D. D., was chosen secretary pro tem. The roll was called and fifty-seven clerical and seventy lay delegates were present. Rev. J. G. Wilson was then elected permanent secretary, and the Rev. Joseph T. Curry and D. S. McDaniel assistant secretaries. The presiding elders were, on motion, appointed to nominate the various standing committees.

Resolutions requiring thorough examinations of candidates for mission, and of four years' classes were adopted.

The following were reported to the Board of Finance:

Clerical: Rev. John B. Stevenson, Rev. John A. Thompson, Rev. H. Turner, Rev. B. F. Lea, Rev. R. T. Brudley, Rev. L. R. Bell, Rev. T. J. Brandon and Rev. William Cameron. Lay: W. B. Wood, B. Bickley, Dr. M. C. Baldrige, H. Grubbs, D. C. Turrentine, E. McNamoe, E. C. Turner and W. Wilson.

Rev. A. West, W. H. Thomas and S. Palmer were appointed, in connection with Hon. W. B. Wood and Captain John S. Kennedy, to ascertain the proper steps for having the Conference incorporated.

Question, Who remains on trial taken up. Rev. Leander P. Witten and G. R. Lynch, character passed and continued on trial. James Groce, character passed and discontinued at his own request. James D. Bush, gone to North Mississippi Conference, and name dropped. Question, Who are admitted in full connection? Wm. McQueen, character passed, admitted as elected to deacons' orders. Rev. W. Winkley, T. H. Deavenport and P. L. Anderson, transfers from Tennessee Conference, were introduced to the Conference. Conference adjourned.

Bishop Paine took the chair. Religious services by the Rev. John B. Stevenson. On motion of Rev. J. West, it was ordered that the presiding elders shall constitute the Conference Board of Missions. Reports from Florence Wesleyan University, Tuscaloosa Female College, Tennessee Conference Female Institute, at Athens, Alabama, and Huntsville Female College, were read and referred to the Committee on Education. The Hon. W. B. Wood made a report from the Committee on Incorporation of Conference, recommending the appointment of nine trustees for the Conference, to be recorded under the Alabama General Law for Corporations. Adopted, and Revs. Joel W. Whitten, J. G. Wilson, John B. Stevenson, Auson West, C. D. Oliver, F. T. J. Brandon, J. M. Boland, L. M. Wilson and W. H. Anderson were elected said trustees.

Hon. W. B. Wood was appointed to procure from the Legislature of Alabama an act incorporating the North Alabama Conference.

Rev. J. M. Boland, from the Conference Board of Missions, reported the following officers of said board: Rev. C. D. Oliver, D. D., president; Rev. W. H. Anderson, D. D., vice president; Hon. W. B. Wood, treasurer; Rev. James D. Anthony, secretary.

Rev. Bruce Harris offered a resolution to appoint a committee of laymen to report a financial plan for use throughout the Conference. Adopted, and the following were appointed said committee:

W. B. Wood, Thomas B. Bickley, Dr. M. C. Baldrige, James Williams, W. N. Covan, D. Wardlaw Simms, Bruce Harris, S. Palmer, Alfred Battle and B. F. Larrabee, being one lay delegate from each district.

Committee to report financial plan reported a plan upon the assessment principle, which was adopted.

Florence, Alabama, was chosen unanimously as the place for the next session of the Conference. Bishop Paine submitted the question of Bishop's veto to Conference, and the veto power of Bishops was sustained by seventy-nine affirmative votes; negative, none. Committee on Education made a report on Florence Wesleyan University.

On Sunday morning, after a sermon by Bishop Paine—which was not allowed to hear, as we were appointed to worship with our Presbyterian friends—Bishop McTear ordained the following deacons: W. McQueen, Reason T. Moore, De Witt M. Booth, Bruce Harris, local, William T. Padillo, local, Priestly E. Nicholson, local, James A. King,

local, Alvin T. Davidson, local—these two before elected at the Tennessee Conference—William G. H. Crump, local—elected at the Mobile Conference—George T. Hickman, local—elected at the Tennessee Conference—Thomas A. Kerr, local—elected at the Montgomery Conference. After the sermon by Bishop McTear, in the afternoon, Bishop Paine ordained the following elders: Perry K. Brindley, David C. Crook, Julius W. Linn, local, John C. Hunkapillar, local, Francis M. Tredaway, local, Bartley T. Bynum, local, James A. Murphee, local, David A. Hendricks, local—these two before elected at the Mobile Conference—James L. Gardner, local, Wm. T. Andrews, local—these two before elected at the Montgomery Conference.

REPORT OF COMMITTEE ON EDUCATION

ON FLORENCE WESLEYAN UNIVERSITY.

Whereas, by concurrent action of the Tennessee Conference, and of the Board of Trustees of Florence Wesleyan University, this Conference has been invited to become associated with said Conference in the superintendence and direction of said university; and whereas, this is the only male college within the limits of our Conference, and under the control of the Methodist Episcopal Church South; and whereas, we recognize the vital influence of such an institution upon the character, position and usefulness of our beloved church:

Resolved, 1. That we accept the offer made us by the Tennessee Conference and the Board of Trustees for Florence Wesleyan University.

2. That we hereby pledge ourselves to use our influence individually to secure the largest number of pupils for our university, and in every way in our power to enlarge its sphere of usefulness, and increase its facilities for diffusing the blessings of a liberal, thorough Christian education.

3. That we will, from our pulpits and in our pastoral work, endeavor to secure the hearty co-operation of the whole church in our Conference limits to build up the Florence Wesleyan University, that it may be in every sense worthy of the widest confidence and support as a university where elevated learning is consecrated upon the altar of true piety.

4. That the president of this Conference is hereby requested to reappoint Rev. Dr. Anderson president, and Rev. Hardie Brown professor in Florence, Wesleyan University.

5. That the presiding Bishop is requested to appoint a committee, composed of three clerical and three lay members of this body; to visit our university at its next annual examination and commencement exercises.

6. That we will announce from our pulpits the time of commencement of each session, and urge our members and friends to enter their sons as pupils promptly at the opening day of each term.

7. That as the university educates the sons of all traveling preachers, and young men preparing for the ministry, free of charge for tuition fees, we will each make an effort to send to the president of our university, as a token of our affectionate interest, a New Year's gift of at least \$10, to be used in such manner as he and the board may deem best to promote the interests of the university.

8. That we have learned with pleasure that the law department of Florence Wesleyan University is in operation under the direction of Chancellor Wade S. Keyes and Hon. W. B. Wood, and that the North Alabama Bar Association recently issued a circular highly commending this department to the patronage of young men preparing themselves for the legal profession.

9. That we will use our influence to secure as many pupils for the law department of our university as may be in our power.

JOHN S. DAVIS,

Chairman of Committee.

APPOINTMENTS.

FLORENCE DISTRICT.—J. W. Whitten, P. E. Florence station, Hardy Brown; Rodgersville and Driskill chapel station, D. M. Booth; Lexington circuit, to be supplied by J. G. Gibson; Cypress circuit, J. S. Marks; L. F. Whitten; Tusculum station, J. H. Anderson; Valley station, J. B. Stevenson; Chickasaw circuit, Benjamin J. Gaston; Frankfort mission, to be supplied by W. B. Blackburn; Russell's Valley circuit, J. C. Phelps; Moulton circuit, W. NeQueen; Courtland circuit, P. L. Henderson, G. T. Whitten; W. H. Anderson, president Florence Wesleyan University.

HUNTSVILLE DISTRICT.—J. M. Boland, P. E. Huntsville station, Anson West; Triana circuit, W. Weekly; Madison circuit, J. L. Coleman; Meridianville circuit, H. P. Turner; Mooresville circuit, W. T. Andrews; L. H. Grubb, sup.; Limestone circuit, T. F. Brown; Athens station, J. A. Thompson; Decatur station, J. S. Davis; Trinity station, F. P. Seruggs; Danville circuit, M. L. Whitten; J. A. Barbee, sup.; Winston mission, J. W. Harvey; Somerville circuit, R. Seales; J. G. Wil-

son, president Huntsville Female College.

TUSKALOOSA DISTRICT.—J. D. Anthony, P. E. Tuscaloosa station, W. E. Mabry; Tuscaloosa circuit, W. H. Armstrong; North Port circuit, E. Nicholson; Jasper circuit, W. E. Cameron; Fairview mission, J. H. Cameron; Pikeville mission, J. H. Tucker; Fayette circuit, J. W. Newman; Vernon circuit, V. O. Hawkins, W. R. Williams; Yorkville circuit, G. Hawkins; Carrollton circuit, W. L. Clifton; Gordo circuit, T. N. Shelton; Boxer mission, D. W. Ward; B. F. Larrabee, president Tuscaloosa Female College.

LARKINSVILLE DISTRICT.—A. F. Driskill, P. E. Larkinsville circuit, B. F. Lea; Maysville station, R. T. Blackwell, J. T. Barbee, sup.; New Market circuit, M. E. Johnson; Bell and Flint Factories, B. Vaughn, J. T. Barton, sup.; Vienna circuit, W. S. Harwell, J. M. Hamer, sup.; Marshall circuit, J. C. Hunkapillar, one to be supplied by Joseph Perkins; Coffeytown circuit, B. T. Moore; Sand Mount mission, W. C. McCoy; Stevenson circuit and Flat Rock mission, J. Cox, one to be supplied; Paint Rock mission, W. H. Anthony.

LAFAYETTE DISTRICT.—L. R. Bell, P. E. Lafayette circuit, J. T. Curry; Oak Bowery circuit, R. J. Sampler; Dadeville circuit, G. R. Lynch, J. N. Dupree, sup.; Socapato circuit, W. T. Patillo; Millersville mission, H. Young; Hanover circuit, W. C. Rowland; Pinkneyville circuit, W. D. Nicholson, C. W. Smith, sup.; Lineville mission, G. J. Mason; Freedonia circuit, C. M. Livingston; Wedowee mission, to be supplied; Arbocoochee mission, P. E. Nicholson.

GADSDEN DISTRICT.—C. D. Oliver, P. E. Gadsden station, R. A. Timmons; Gadsden circuit, J. G. Walker; Coloma mission, to be supplied; Cedar Bluff circuit, P. K. Brindley, J. A. Nealy, sup.; Van Buren circuit, E. F. S. Roberts; Little River mission, to be supplied by R. Price; Ashville mission, R. F. Mountain; Murphee's Valley circuit, R. W. Coons; Blountville circuit, J. E. Andrews; Elyton station, T. G. Slaughter; Elyton circuit, T. P. Roberts; Jonesboro circuit, J. G. Gurley; Warrior mission, to be supplied by W. Anthony.

TALLADEGA DISTRICT.—L. M. Wilson, P. E. Center circuit, E. A. West; Cross Plains circuit, T. H. Moody; Jacksonville station, T. H. Deavenport; White Plains circuit, E. B. Norton; Alexandria circuit, R. B. Ragan, E. B. McLellan, sup.; Coosa River mission, I. Q. Melton; Talladega circuit, W. R. Kirk; Blum Mountain mission, C. S. D. Lassiter; Talladega station, Daniel Duncan; Harkersville circuit, F. T. J. Brandon; Shelby Iron Works station, D. S. McDougal; Montevallo circuit, J. B. Powers; Cahaba River mission, M. G. Foust; Montevallo station, H. L. Booth; Fayetteville circuit, E. O. Odum.

SUPERANNUATED.—W. Rhodes, E. McMeans, J. N. Glover, J. M. Towles, C. N. McLeod and J. Williams.

LOCATED.—Rufus Nicholson. TRANSFERRED.—James M. Gann, to the Mississippi Conference; A. D. McVoy, R. E. Carey and D. C. Crook, to Alabama Conference; Thomas Cameron, to North Mississippi Conference; R. K. Brown, T. L. Moody, U. S. Bates, Jasper Nichols, B. G. Ferrell and J. H. Nichols, to Tennessee Conference; Joseph H. Ledbetter and Milton M. Hawkins, to Missouri Conference.

COURSE OF STUDY.

FOR ADMISSION ON TRIAL.—The Bible, in reference to doctrines generally; Wesley's Sermons on Justification by Faith, and on the Witness of the Spirit; Book of Discipline, with special reference to chap. 1, secs. 1 and 2; Manual of Discipline, chaps. 1 and 2; Wesley's Sermons, vol. 1; Ralston's Elements of Divinity; Watson's Institutes, part 4; written sermon on Repentance.

Books of Reference.—Watson's Biblical and Theological Dictionary; Theological Compend; Fletcher's Works; Watson's Life of Wesley.

SECOND YEAR.—The Bible, in reference to its prophetic parts; Wesley's Sermons, vol. 2; Watson's Institutes, part 3; Smith's Elements of Divinity; Book of Discipline, with special reference to chaps. 2, 3 and 4; Manual of Discipline, chaps. 3 and 4; Coppee's Rhetoric; written sermon on Justification by Faith.

Books of Reference.—Newton or Keith on the Prophecies; Angus Hand-Book of the Bible; Claude's Essay on the Composition of a Sermon; Watson's Sermons; Bickerstith on the Spirit of Life.

THIRD YEAR.—The Bible, in reference to the life of Christ; Wesley's Sermons, vol. 3; Watson's Institutes, part 2; Coppee's Logic; Upham's Mental Philosophy; Edgar's Vari-

tions of Popery; Book of Discipline, with special reference to chaps. 5 to the end; Manual of Discipline, chaps. 5, 6 and 7; written sermon on the Witness of the Spirit.

Books of Reference.—Young's Christ of History; Neander's Life of Christ; Hickok's Mental Science; Vinot's Pastoral Theology; Stevens' History of Methodism; Paine's Life of McKendree; D'Aubigne's History of the Reformation.

FOURTH YEAR.—The Bible, in reference to the Acts and Epistles, their analysis and design; Wesley's Sermons, vol. 4; Watson's Institutes, part 1; Powell on Apostolical Succession; Rivers' Moral Science; Mosheim's Church History; Summers on Baptism; Book of Discipline, review; Manual of Discipline, chaps. 8 and 9; written sermon on Regeneration.

Books of Reference.—Bentler's Analogy; Bingham's Antiquities; Hickok's Moral Philosophy; Hopkin's Homiletics; Wall on Infant Baptism; Litton's Church of Christ; Neander's Church History; Liddon on the Divinity of our Lord; Conybeare and Howson's Life and Epistles of St. Paul.

COMMENTARIES.—Clark's; Watson's Exposition; Wesley's Notes; Summers on the Gospels; Stier's Words of the Lord Jesus; Lange on the New Testament; Olshausen on the New Testament; Alford on the New Testament; Bloomfield on the New Testament; Macknight on the Epistles; Henry's Exposition; Whitby's Commentary.

Note.—The examination will be confined to the course of study. The books of reference are recommended to be read, and the commentaries to be consulted.

H. N. McTear,

Sec'y of College of Bishops.

PERIODICALS.

THE ATLANTIC MONTHLY, for December, opens with the Confessions of a Patent Medicine Man. Whittier has a poem, entitled "The Prayer Seeker." Mrs. Stowe continues her Old Town Fireside Stories. A Virginian in New England Thirty-five Years Ago is also continued. The number contains a tempting array of articles, and has not been excelled by any number of the year.

ARTHUR'S HOME MAGAZINE and the CHILDREN'S HOUR, for this month, are better than usual. They have a holiday finish, and will be exceedingly satisfactory to the ladies and children. The publishers promise that these periodicals, in 1871, shall outstrip everything of the sort in the family of periodicals.

THE RIVERSIDE MAGAZINE, FOR YOUNG PEOPLE.—We regret that this is the last number of this best of illustrated magazines for the young.

It will henceforth be merged into Scribner's Monthly. The publishers, however, promise to keep up in their monthly a good supply of choice literature for children.

SCRIBNER'S MONTHLY, for December, excels all the magazines in the number and merit of its illustrations. The articles are good, and some of them are of great value.

This monthly bids fair to soon stand at the head of the magazine literature of the country. The publishers are displaying great energy and judgment, and are deserving of ample success.

ANNUAL CONFERENCES.

CONFERENCE, PLACE, TIME, BISHOP. Alabama—Montgomery, Dec. 7, McTear. S. Carolina—Charleston, Dec. 7, Pierce. Mississippi—Crystal Springs, Dec. 14, Boggett. S. Georgia—Fort Valley, Dec. 14, Kavanaugh. Texas—Chapel Hill, Dec. 14, Marvin. Cal. and N. Oregon—San Francisco, Dec. 15, Colton. N. Orleans—Jan. 4, Douglass. Florida—Key West, Jan. 4, Kavanaugh. Ga. Colored—Savannah, Jan. 4, Pierce. Baltimore—Salem, Mar. 8, Pierce.

BISHOP KAVANAUGH.—The Nashville Christian Advocate says: "Bishop Kavanaugh is at his home in Lexington, confined to his house, having hurt his leg so as to prevent comfortable locomotion. It is hoped that it is not serious, and that he will recover its free use in time to meet his engagements with the Southern Conferences. It was sufficiently painful to prevent his preaching one Sabbath, and he will probably have to disappoint the Lexington congregation next (the twentieth) Sabbath."

SEE NOTICE OF Hiwassee College in our column of new advertisements. The school is a miracle of cheapness, and President Grace's connection with it is a sufficient assurance of its excellence.

WE RECOMMEND every planter to use, this fall, winter and spring, the celebrated Murfee's Subsoil.

A CHINESE newspaper has been established at Helena, Montana.

Married.

At the Methodist church in Beauregard, Mississippi, November 9, 1870, by Rev. Robert B. Downer, Mr. JOHN J. WILKES to Miss FLORENCE A. MILLER.

By Rev. John A. B. Jones, October 26, 1870, near Utica, Mississippi, Rev. J. B. ROBERTSON, of the Mississippi Conference, to Mrs. OCTAVIA SCOTT. In Gretna, Louisiana, on Tuesday, December 6, 1870, at the residence of the bride's parents, by the Rev. J. D. Parker, Mr. EDWARD TOWNER and Miss CLARA CARTY.

In Hale County, Alabama, on the twenty-fourth of November, by Rev. Dr. Wadsworth, Mr. WILLIAM T. CUNNEY to Miss MARY E. BORDEN, daughter of Mr. Benjamin Borden.

On the first of December, 1870, by Rev. George F. Thompson, at the residence of Mr. C. Toliver, in Hazlehurst, Mississippi, Colonel D. H. SESSIONS, of Arkansas, to Miss LUCIE B. ADAMS, daughter of the late Rev. Thomas A. Adams, of Copiah county, Mississippi. Western Christian Advocate please copy.

Obituaries.

MISS SARAH D. LEWIS.

The following statements, "not intended for publication," as the writer modestly intimates, sent with a request that, aided by them, an obituary notice of the Christian lady above named should be prepared for publication in the Advocate, sets forth so well the principal items and facts in regard to her life, last illness and death, that I am induced to have them published about as they came to me, with but slight alteration, and the addition of only an item or two further.

"Died, in Rapides parish, Louisiana, at the residence of her brother, Mr. C. F. Lewis, on the eleventh of November, 1870, Miss SARAH D. LEWIS. She was born December 27, 1800, at Kittery, Maine. In 1837 she came, with her sister and family, to the parish of Rapides, Louisiana, where the remainder of her life was spent. Always of a mild, lovely and self-sacrificing disposition, at an early age she gave her heart to God, and became in character like the Israelite in whom there was no guile. She lived for nearly fifty years an exemplary member of the Methodist Church."

As her pastor in years gone by, I will state here that she always impressed me as one who could truly say: "Lord, I have loved the habitation of thy house, and the place where thine honor dwelleth." While it was plainly to be seen that she had acquainted herself well with the great rule laid down to govern the race in which the Christian is running, it was also manifest, from her daily life and conversation, that the glorious prize held forth in the gospel, to animate and encourage the Christian, was ever kept in view by her. To contribute regularly, according to her means, to the support of the gospel, the cause of missions, and indeed toward the various objects and enterprises of the church, was a settled habit with her. And while she gave thus uniformly, both from principle and a sense of duty, it was evidently also a matter of religious pleasure with her to give.

"She was taken sick on the twenty-sixth of August, 1868. After some weeks of intense suffering, at a time when she and her friends thought death was drawing very near, she calmly made her last requests, bade her friends good by, and, partaking of the holy sacrament with her usual calmness, resigned her spirit to God. Soon after, however, she revived from this apparent sinking into death; and it was God's will to keep her lingering on a bed of pain and suffering more than two years longer. During all this time of trial she betrayed no signs of impatience, nor did any of those amiable and lovely traits of character which she possessed ever forsake her; and though she was so feeble toward the latter part of her sickness as to be utterly helpless, and most of the time was in actual pain, yet she never failed to think of others more than herself, and by word and look to express to those around the gratitude she felt for all that was done for her. Some hours before her death she assured her relatives who were around her bedside that, notwithstanding her bodily sufferings, she was happy in her mind. Her last audible words were, 'Up above,' where, indeed, her heart and her treasure had long been. She has gone there. Gently will she be missed in the household; but her sufferings are over, and she sleeps in Jesus."

"Peaceful rest,

Whose waking is supremely blest." Blessed be God for that religion that can make out of a mortal being a character so saintly. And now shall the devoted watchers who waited by the bedside of this sainted one, through so many wearisome days and nights, and others who are cherishing "holy and tender memories" of her, shall they all at last with joy run up that shining way, over which she hath passed, to the

realms "up above?" God grant, when the earthly life of each is ended, that such a blessed and glorious privilege as this may be both theirs and mine.

P. M. GOODWIN.

NEW ORLEANS, Nov. 20, 1870.

No Humbug.—We do not wish to inform you, reader, that Dr. Wonderful, or any other man, has discovered a remedy that cures all diseases of mind, body or estate, and is designed to make our sublimity sphere a blissful Paradise, to which Heaven itself shall be but a side show; but we do wish to inform you that Dr. Sage's Catarrh Remedy has cured thousands of cases of Catarrh in its worst forms and stages, and the proprietor will pay \$500 for a case of this loathsome disease which he cannot cure. It may be procured of druggists, or by mail for sixty cents, from R. V. Pierce, M. D., Buffalo, New York. A pamphlet sent free.

FIVE CENTS ADDITIONAL will buy shoes with Silver or Copper Tip, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. Sent 3mr.

NEW ADVERTISEMENTS.

HIWASSEE COLLEGE.

The next term will begin on the first Monday in JANUARY. The entire expense for board and tuition for twenty weeks will be

Seventy-five Dollars.

The school is now under the patronage of the Holston Conference, and will begin its next term with flattering auspices. Address F. M. GRACE, President, Madisonville, E. Tennessee.

VICK'S FLORAL GUIDE FOR 1871.

The first edition of One Hundred and Fifty Thousand copies of Vick's Illustrated Catalogue of Seeds and Floral Guide

is published and ready to be sent out—one hundred pages, and an Engraving of almost every desirable Flower and Vegetable. It is printed with Three Hundred fine Wood Engravings and Two beautiful

COLORING PLATES.

The most beautiful and the most instructive Floral Guide published.

A GERMAN EDITION

published, in all other respects similar to the English.

Sent free to all my customers of 1870, as rapidly as possible, without application. Sent to all others who order them for TEN CENTS, which is not half the cost.

The Child's Corner.

MY BOOTS.

BY A. H. FOR.

Now what's that you're lookin' at?
These ain't no new breeches,
Mamma made 'em more'n a month;
See! I broke the stitches,
My! but we had fun out there,
Where the rain-pipe's leakin'.
What you hear? I spect I know—
It's my boots-a-creakin'.

Tiddle, let my wagon 'lone,
While my horse 's waitin'!
That's my feet that I preach—
When we has big meetin'.
Ain't there somethin' smelly round here?
I can't say my spellin'!

Smells like leather, what you s'pose?
'Tis my boots-a-smellin'.

Just you see 'em—don't they shine?
Papa paid a dollar;
Four, five dollars; and a man
Gave my dog a collar.

Spect he wants some boots like these,
Wouldn't he hark funny?
Guess I'll buy him whole two pair,
When I gets my money.

See that fellow man up here,
On the painted leather!
"Clear the track," we holler out,
Him and me together.

Mamma she 's' looks right up,
Stops the time she's hummin';
Spect she 's' members by my boots
That her Johnnie's comin'.

Bright Side.

How do we know that the World is Round?

The Atlantic ocean is about three thousand miles wide. Upon its bosom, rocked by its waves and tossed by its tempests, ships are constantly sailing from port to port. Could you stand upon the shore and look out upon the waters to where the sky appears to come down to meet them, you might possibly be able to see a vessel which, having spent many days in crossing the broad Atlantic, is just nearing the port for which she sails. A mere speck she would seem to be—so small that without a telescope you would scarcely think it to be a vessel at all. With a telescope you would be able to see more clearly, but never, even with the best of glasses, could you at so great a distance see more than a very small part of the ship, and that small part, instead of being the body of the vessel, would be the upper part of her spars and rigging. The spars would seem to be standing in the sea and the sails without a hull. But, as by wind or steam she is driven landward, more and more of her rigging appears, until finally the body of the ship is lifted into view.

Now, suppose a round-topped hill between yourself and a man walking toward you; the hill, if high enough, would hide him from your view entirely; but as he traveled upward on the other side his head would be lifted above the hill-top, afterward his body would appear, and finally, when he had reached the summit, his whole person would be in sight. Or let a fly be creeping toward you on an apple. You may not see him on the other side, but when he has walked up over the rounded surface toward you he comes in sight, the top of his head first and his feet last.

As the hill would hide a man, or as the surface of an apple may hide a fly, so the surface of the ocean hides the vessel in the distance. The ocean, then, like the hill and like the apple, must have a rounded surface. But the surface of the ocean must have the same shape as the surface of the earth itself, and in this way we learn that the earth is round. The appearance of the topmost first, and the hull or body last, as a ship approaches from a distance, proves that the world is round.

But this is not the only proof. There are several others, one of which I will now explain.

A flood of light from the sun is falling upon the earth day and night alike. At times it falls upon the side on which we are; it lights our habitations and our sky, and we call it day. At times it falls upon the side opposite to us; and then the darkness lets the moon and stars be seen in our sky, and compels us to trust to our lamps to light our dwellings. We call it night because it is dark, and it is dark only because we are, at that time, in the shadow of the earth. Opposite the sun the shadow of the earth is reaching off into space, just as the shadow of a book reaches through the room, away from the evening lamp. This earth-shadow, like the earth which casts it, is very large; it is more than two hundred thousand miles in length. It sometimes reaches beyond the moon; and the moon is sometimes darkened by it, just as your hand may be darkened when placed in the shadow of a book or ball. When the moon is darkened by the shadow of the earth it is said to be eclipsed.

Now the outline of the earth's shadow on the moon is always circular. And the shape of the shadow tells us the shape of the body itself. In this case, for only a globe can, in all positions, cast a circular shadow. The shape of its shadow on the moon in an eclipse shows us that the world is round.—*Bright Side.*

ONE OF THE JEWELS.

"Why, Minnie," said I, "what a great girl you have become, to be sure! How old are you?"

"Six years old last March, ma'am," said Minnie.

"And where is little Alice? She was a baby in long clothes when I went away," I said.

"Oh, ma'am," replied Minnie earnestly, "she is 'one of the jewels'."

"One of the jewels?" I asked; "whose jewels?"

"When he cometh," said Minnie, looking steadfastly into the blue sky. "Don't you know, ma'am, when he cometh?"

"No," I answered wonderingly.

"I will sing it to you," said she, simply. And in her sweet child's voice she sang these words, to a wonderfully plaintive air:

"When he cometh, when he cometh,
All his jewels, precious jewels,
His loved and his own;
Like the stars of the morning,
His bright crown adorning,
They shall shine in their beauty,
Bright gems for his crown.

"Little children, little children,
Who love their Redeemer,
Are the jewels, precious jewels,
His loved and his own;

"Like the stars of the morning,
His bright crown adorning,
They shall shine in their beauty,
Bright gems for his crown."

"So you see, ma'am," continued Minnie, "Alice is 'one of the jewels'."—*Little Messenger.*

BEING PUSHED TO JESUS.—A Christian mother was showing her little girl a picture of Jesus holding an infant in his arms, while the mothers were crowding their children toward him. "There, Carrie," said her mother, "that is what I would have done with you if I had been there."

"Wouldn't be pushed to Jesus," said little Carrie with touching earnestness; "I'd go to him without pushing."

A CHILD'S PRAYER.—Clare is a little boy two and a half years old. During his papa's recent absence from home Clare would kneel down nightly by his little bed, and in the attitude of little Samuel, thus address his Father in heaven: "O God, take hold of papa's hand and lead him safely home."

CHILDREN IN HEAVEN.—Perhaps God does with his heavenly garden as we do with our own. He may chiefly stock it from nurseries, and select for transplanting what is yet in its young and tender age—flowers before they are bloomed, and trees ere they begin to bear.—*Guthrie.*

I LOVE for those who love me,
Whose hearts are kind and true,
For the heaven that smiles above me,
And waits my spirit, too;
For the human ties that bind me,
For the task by God assigned me,
For the bright hopes left behind me,
And the good that I can do.

PARDON FOR NOTHING.—A few days since, when visiting an old man who seemed anxious about salvation, I found great difficulty in making him understand that pardon is the free gift of God, through the precious blood of Christ.

At last I said to him: "Now, suppose I were to go to a shop and buy something for you, and pay for it, and tell you to go and fetch it, need you take any money with you?"

"No," said the old man, brightening up; "it would be paid for."

"Need you make any promise to pay at some future time?" I then asked.

"No," he replied; "I should have it for nothing."

"So," I continued, "it is with forgiveness of sins; the Lord Jesus has paid the full price for it. He has had the groans, the sighs, the tears, the wrath, the pains, the punishment; yea, all that sin deserves. He bore it all. He paid the whole. Yes, bought forgiveness with his precious blood, and now he gives it as a gift to all who bring their sins to him."

"Yes," said the old man, as his eyes filled with tears, "I see it now; it is pardon for nothing! Christ has bought it, and he will give it to me!"

Dear reader, may you also learn that Christ alone can save; that neither your tears, nor groans, nor prayers, nor works, can give you any right to heaven. No; you must come with nothing in your hand; and, as a helpless beggar, cast yourself upon his love and grace, and look to him alone to cleanse you from your sins, and make you fit to dwell with him above.

A CLERGYMAN, reading a chapter of the Bible for his congregation, found himself at the bottom of the page, with the words: "And the Lord gave Noah a wife;" then, turning over two pages instead of one, he continued, "and he pitched her within and without with pitch."

FAITH which works by fear only leads to a selfish repentance if to any, and leaves the soul at the gates of death.

The Farm and Garden.

THE TURKEY.

It is a curious and rather a painful thing that this magnificent Yowl should go by such an absurd name. He has half a dozen marked characteristics whereby he might be distinguished, and yet we abuse him by giving him the name of a country to which he is entirely foreign. However, it does him no harm, and we cannot help it. The only attempt we know of to right the wrong was made by the editor of the Encyclopedia Britannica, who spelt the name "turky." Few wild birds have proved so easy of domestication, and considering that they have been known and valued as farm-yard poultry for fully two hundred years in Europe, it is not a little remarkable that they retain so many of their wild habits, and that the species has broken up into so few varieties. We have, it is true, the domesticated wild, bronze, black, white, gray and buff varieties, besides those of dingy, intermediate shades of color, and the kinds named will, if pure, breed very true to feather; yet there has never been any essential modification of form. The plumage becomes more fluffy in the long-domesticated varieties, the legs apparently and really shorter, and, on the average, doubtless the birds fall off in weight considerably. The average weight of the adult wild gobbler of two or three years old is twenty-eight to thirty-two pounds, varying with the season and the supply of food, as also with the part of the country. It is not very uncommon to hear of wild gobblers being shot which weigh forty pounds. When snared or captured alive, or reared from eggs of the wild bird and fattened, still greater weights are occasionally reported. In point of size the bronze turkey, which is a direct cross of the wild with the buff, is fully equal to its progenitor of the forest, and systematic breeding for a few years will increase the weight of any of the breed. The white turkey is the most thoroughly domestic, the smallest and least hardy, yet very beautiful.

Crests have occasionally appeared upon turkey-gobblers, possibly also upon the hens; but in this country they have been isolated cases, and no tendency to form a crest has been observed in the offspring. In Europe, it is said, one or more flocks of crested turkeys existed many years ago. It would seem to be not a difficult task to establish peculiarities like those we have among barn-door fowls. The writer has a turkey hen which laid an egg nearly every day for more than one hundred days, and was very irregular in sitting, leaving her nest so often that it seemed really a wonder that any of the eggs hatched. Such a bird, one would suppose, might be used as the parent of a breed of non-sitters, but profuse layers. Very late turkey-chicks never attain the normal size, and we think it would be easy to establish a bantam breed which might have some points of great excellence, if not superiority. There is probably no fowl, and perhaps we may say no domestic animal, which increases in weight so fast as young turkeys during grasshopper time, which is in August and September, and the month or more immediately following. The per centage of gain during the next year is far less. The turkey-cock gets his growth at about four years old; the hens much earlier, probably by the end of the second season; but for market purposes, without a doubt, young gobblers are by far the most profitable, and they should be killed when prices are highest, between November and March—usually about Christmas, for the very best birds, and earlier or later for others.

When turkeys appear in the market, as they do in immense quantities in the autumn, continuing in more or less abundance through the winter, purchasers seek assurance that they are birds of the current year's hatch. The flesh of such chickens is the tenderest, perhaps, but it is not nearly so sweet or high flavored as that of more mature birds. We have never yet seen a turkey-cock whose flesh was tough if properly cooked. A friend goes so far as to say "a turkey is not fit to eat until it is three years old," and although we cannot indorse this sentiment, it is within bounds to say that turkey meat is never better than when the bird is quickly fattened and killed in the autumn after he is two years old. We aim, therefore, to keep a few gobblers not valuable for breeding purposes to be killed at that age to furnish our table at Thanksgiving, Christmas and New Year. They could not be sold at a profit unless at fully one-third above the market price.

Farmers prefer much to breed from old turkeys. Turkey hens are peculiarly liable to fatal accidents during the summer. They are taken by foxes; they over-eat, not leaving the nests for food, and thus become exhausted and die. Hence the number of old birds sent to market is comparatively small. The most successful turkey-raisers man-

age to have their hens come off with their clutches as late as the middle of June, and give them, with their young ones, the free range of the farm.—*Heath and Home.*

SIGNS OF FUTURE POVERTY.

DEFICIENCIES IN THE MISSIONARY TREASURY.

We speak of poverty apprehended in the church. The signs of it are not in the heavens, for God is there, and his resources are rich beyond our powers of conception or thought. And his tender mercies are over all his works. They are not in the earth, for though portions of it have been parched by drought the past summer, the labors of the husbandman have not been unrewarded. The year has been crowned with goodness. Nor are the signs of coming poverty in our wardrobes or on our tables. They seem to be about as well furnished as they ever were in seasons of great abundance.

Where, then, are the signs of the evil apprehended? They are in the church—in the pecuniary gifts—the small receipts in the Lord's treasury! God in his goodness and love has legislated for the welfare of the poor and for all in distress, and manifested his love and parental concern even for poor heathen idolaters. He has said to his church: "Ask of me and I will give thee the heathen for thine inheritance and the uttermost parts of the earth for thy possession."

Has not our church, offered this prayer? And what is she doing to get possession of "the uttermost parts of the earth" for Christ? Our Committee of Foreign Missions recently stated that there has been "an alarming decrease of funds for their treasury during the first nine months of the current year, the receipts being nearly \$4,000 less than they were in the corresponding months of the previous year." Has there not been a withholding from the Lord that which belongs to him and to his treasury, to sustain the ordinance which he appointed to secure the inheritance of the heathen? If so, "it tendeth to poverty."

It is written by the highest authority: "There is that scattereth, and yet increaseth; and there is that withholdeth more than he meet, but it tendeth to poverty." Such is the law of Providence. He who controls all the causes of wealth and poverty, and all things in the material and spiritual world, sustains and illustrates this law in the history of his church. If the members of our church are fearing that their offerings to its treasury will lessen their possessions, or reduce them to poverty, are not their apprehensions an evidence that they are "withholding more than is meet" or proper from the mission treasury?

There is occasion to say more, for we have reason to think that many in the church do not appreciate what God has taught in his word and by his Providence on this subject.—*Christian Observer and Commonwealth.*

"TO EVERY MAN HIS WORD."—My esteemed brother, who is a very apostle of Christ, Mr. Oneken, of Hamburg, in forming Baptist churches in Germany, lays down as one of the first questions to be asked of a person applying for membership: "What will you do in the service of Jesus Christ?" Perhaps the candidate says: "I can do nothing." And in that case the pastor replies: "I cannot receive you; we can have no drones in this hive." Or, perhaps, the candidate will reply: "What do you think I can do?" And the pastor will say: "Something you must do; you can only become a member of this church by engaging in some Christian service."

I would almost carry it so far as to say: "Unless you are laid aside by illness, you must continue to do something, or be excommunicated from the church by your doing nothing." That might be too extreme a rule, but the spirit of it is right: If it were a generally understood regulation that one of the conditions of church membership was service, we might see our churches rising to a far higher degree of zeal for God than they have ever yet attained. We know by experience that the idle part of the church is that in which sin has strongest hold.—*C. H. Spurgeon.*

THE TRUE MAGNET.—Here is a simple illustration practically applied, and worthy to be pondered by those who would "preach not themselves, but Christ Jesus the Lord." It is from that veteran minister, John Angell James.

"The power of the magnet gains nothing from the gilder's or the graver's art; its attraction lies in itself, and is diminished by foreign accretions. So it is with that greatest of all magnets, of which Christ spake when he said: 'And if I be lifted up, will draw all men unto me.' We may draw men to ourselves by genius, eloquence, eccentricity, but we can draw men to Christ only by the attraction of the cross."

MUSICAL INSTRUMENTS.

PHILIP WERLEIN.

SOUTHERN MUSIC HOUSE.

60 & 62... BARONNE STREET... 80 & 82
New Orleans.

The house of WERLEIN is the oldest established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS AND ORGANS that this country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS,
HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS.

Stringed Violins, Guitars, Banjos, Flutinas, Accordions, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE
OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our factory.

Very respectfully,

PHILIP WERLEIN.

Southern Agent for Dunham & Sons, Marshall & Miltner, and Hale Piano Manufacturers, New York; and Newham & Son, manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rose-wood case, carved legs, front round corners, serpentine moldings, possessing sweet, powerful and deep tone, with perfect touch. Price \$450 00

Style G Organ—Five stops, diapason, violin, octave, piccolo and tremolo, five octave, two sets reeds, with "on and off" tremolo and combination swell, oil-dipped black walnut case, paneled all around, with moldings, brackets and engraved ornaments, music desk and carpeted double blowing pedals. 150 00

Style 10—Six stops, two sets reeds. 165 00

Style 13—Eight stops. 185 00

Style 26—Eleven stops. 365 00

Please send for price lists of Pianos and Organs. 604 1/2

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS.

We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mounting.	Price.
28-inch Bell. 250 lbs.	400 lbs.	\$65 00
46-inch Bell. 650 lbs.	800 lbs.	135 00
48-inch Bell. 800 lbs.	1000 lbs.	175 00
48-inch Bell. 1200 lbs.	1500 lbs.	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BODLEY & CO.,

—AND—

Complete Assortment of Upholstery Goods.

105 1/2

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and thirty-seven south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches of English literature, in English, English literature, books, school-room stationery, washing, fuel, light, medicine and medical attendance, \$25 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pastors of churches. Number of pupils last term, 105. For catalogue address

H. F. JOHNSON,

President.

PAST ALABAMA COLLEGE,

AUBURN, ALABAMA.

The next annual session will open on the first Wednesday in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages afforded.

It is the place to train Methodist boys, and there is room for three hundred. If every preacher and layman will work for us, we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOTON,

President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE and

R. W. WAYNE,

General Agents for the Arrow Tie,

121 1/2

124 Carondelet St., New Orleans.

BRACES AND TRUSSES.—DR. JOHN G. BANGELL, informs the medical profession and others that he has constantly on hand and for sale a complete assortment of BANGELL'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, neuralgia, weakness and derangements of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and nervous affections, constipation and chronic diarrhoea, female derangements and extreme displacement of the womb, RHEUMATISM, PILES, prostatic and weakness of the male and female system.

These light, cool and springy auxiliaries are the special favorites of the profession and are intensely common-sense and rational in their action; supply a missing link in treatment; place the above affections in new and more hopeful light, and often complete cures where medicine can only mitigate, more than it can cure a hernia or dislocated joint.

He specially desires an examination of these appliances by the profession and suffers. Where necessary the professional application of the above braces will be under our supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adopted by the United States government for the use of the army and navy. Terms cash. Consultations free. Send for their pamphlet. It is better to call.

Office 251 residence, 152 JULIA STREET, near Camp, New Orleans. 101 1/2

NOTICE

DR. IDAHO'S

Rocky Mountain Indian Remedy,

FOR THE BLOOD.

This remedy will cure Rheumatism, Gout, and all kinds of disease of the skin, and every variety of Cutaneous Eruption, from the simplest form to the most inveterate scurfy Eczema, Pimples, Itches, Pimples, Brown Discolorations, Scaly Rash, Tetter, Ringworms, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat and Croup, Sore, Ulcers, Scrofula and Cancer, all yielded to its influence in a few applications.

PRICE, \$1 PER BOTTLE.

Within two months this remedy has created a sensation among the people afflicted with the above diseases. It never fails to cure radically the very worst cases; and the demand for the medicine is very great.

DR. IDAHO'S

Rocky Mountain Indian Salve,

FOR CORNS, BUNIONS AND PILES.

This Indian Salve cures Corns, Bunions and Piles in a few applications, radically; the buyer will apply the Salve two or three times, when the inflammation will be removed at once. It is never known to fail. Price, Fifty Cents a box.

For sale by all Druggists, and at FLEMING'S Pharmacy, 101 1/2, corner of Natchez and Magazine Streets.

General Depot, 25 ST. CHARLES STREET, at the office of A. Bonhard, New Orleans, La. For testimonials refer to our pamphlet. Country orders promptly attended to.

101 1/2

RUPTURE CURED.

With an experience of more than twelve years' practice in the treatment and cure of RUPTURE and HERNIA, I will guarantee more perfect relief, comfort and security, and a more rapid improvement than can be obtained by any other person or appliance in the South, without regard to the age of the patient or length of time afflicted.

Also instruments for the cure of every species of human deformity on hand or made to order.

Call on or address, with stamp for circular, Dr. T. S. C. FLEMING, office No. 16 St. Charles Street, up stairs. Hours from 10 A. M. to 4 P. M. 101 1/2

MADISON COLLEGE,

SHELTON, MISSISSIPPI.

The nineteenth annual session of this institution will open on MONDAY, the third day of October next.

Terms.—Tuition per session of ten months, \$30, \$40 and \$50. Contingent fees, \$5 per month, exclusive of washing.

For further information address Dr. M. J. McKie, president of the Board of Trustees, or myself.

I offer the tuition of young men preparing for the ministry, the sons of ministers in the regular pastorate, and the orphans of deceased ministers, on application, free of charge.

J. M. PUGH,

President.

THE BOTTOMS HORSE POWER GIN

GEAR.

This Power is now put up in three different forms—stationary, movable and mounted on wheels—all having the same action and capacity, differing only in peculiar movements and arrangements, all of which are covered by patents and copyrights. Models and Patents of the same may be seen by all interested by calling on me at the St. Charles Hotel; and to any one desiring to enter, with a small capital, a new business, which will yield a sure fortune, I will give unbounded and unparalleled inducements. If immediate application is made:

1

Scientific.

GUESSES IN SCIENCE.

The following information, which we find in an English paper, is suggestive:

"Some remarkable facts in confirmation of Sir Charles Lyell's theories of the myriad ages of geological evolution are supplied by the investigation of Prof. Kjerfve, of Christiania, who is making the survey of the Norwegian coast for the government. He has examined the raised beaches and terraces, and declares Sir C. Lyell's theory (which requires two hundred and forty thousand years for their present elevation) to be utterly baseless. In the first place, he says the uppermost limit of the sea action is only one-tenth as high as Lyell states, and consequently that this single correction would cut down his figures from two hundred and forty thousand to twenty-four thousand years. Secondly, he proves that the coast has not risen by a constant slow motion, but by a series of sudden elevations, separated by periods of perfect rest; and consequently that all calculations based on a supposed uniform rate are worthless, and the total time spent in the elevation may have been very short. Finally, he says the idea that the coast is now rising is entirely erroneous, this being a stationary period."

In the travels of Sir Charles Lyell in the United States there is a similar argument derived from the recession of the Falls of Niagara. At an early period Brydson attempted to prove a succession of indefinite ages for the earth from the strata of lava at the base of Vesuvius, and his conclusions were for a long time claimed with triumph by the infidels as against the truth of the Bible. But it was afterward discovered that the number of these strata were no more than those over Herculaneum, which was buried within a known and comparatively recent period. It is obviously a conjecture only that the Falls of Niagara have receded toward Lake Erie at a uniform rate, and unless such a rate be established the estimate of time to the beginning is an uncertainty. Convolutions in nature often do the work of a thousand years in a day.

All such arguments must wait for the developments of time, and we doubt not that many conclusions which geologists assume to be unquestionable, will be proved, like the theory of Sir Charles Lyell, to be without foundation. Many theories of the past have thus proved baseless, and many of the present will, like them, pass into oblivion.

If there had been no occasion to put Sir Charles Lyell's speculations to the test, if no one competent to examine his alleged facts had gone over the ground after him and proved the fallacy of his premises, his conclusions would have remained among the assured proofs of the geological eras. It is not improbable that other conclusions from like premises are equally unreliable. To produce the present condition of the earth in those respects which geology investigates, many causes must have concurred, of which we have and can have no knowledge. Geologists assume that known results are from causes which they fully understand, and on which they can base their calculations with as much certainty as on the axioms of mathematics. The science, however, as now received, is in its infancy, and must abide the test of time. *Multat in unum sunt in honore.*

DEEP SEA DREDGING?

Some misstatements of the press in regard to what has been done by what is called the Porcupine Expedition, have drawn out more definite replies from Dr. Carpenter. In regard to the inflow of a strong current, eastward, through the Straits of Gibraltar, and to the possibility, which has long been matter of theory, of an undercurrent outflowing, he says that, by aid of a new devised apparatus, results have been reached that go far to resolve a mystery which has long perplexed physical geographers and geologists. In relation to the statement supposed to come from him and his co-laborer, Prof. Wyville Thompson—that they had overthrown the foundations of previous geological science—he disavows entirely having given the remotest hint of impugning the great doctrines of stratigraphical paleontological succession which have been heretofore commonly accepted. He says their chief heresy was in saying "that we are still living in the cretaceous period," and meaning this: "There can be no question that a formation, corresponding with the chalk of the cretaceous epoch, alike in its material and in the general character of its fauna, is at present going on over a large part of the North Atlantic sea-board. The explorations carried on by the United States Coast Survey in the Gulf of Mexico have furnished results entirely coinciding with our own in many of these particulars." The cretaceous

period has been heretofore located in time far back of the commonly accepted era of man; and measuring on the scale thus established of the cretaceous and subsequent geological formations, the human relics, recently discovered, have been assigned a great antiquity. Prof. Dana, however, in his geology, remarked long since that these discoveries might lead to bringing the later times of geology nearer to us, instead of taking the date of man's origin backward. The results from deep sea dredging tend exactly in this direction. If the cretaceous period can be shown to be cotemporary with man, a great deal of wisdom in regard to the high antiquity of the human race will be found to have been wasted, and many brilliant theories wasted.

THE UPAS TREE.

We have received two letters inquiring whether the familiar account of the Upas tree (or the "Utopia tree," as we once heard it called in a sermon from a city pulpit) is true or not. The story is a more fable, which first gained credence in Europe through the narration of Forster, a surgeon in the Dutch East India Company's service, published about the middle of the last century. He described the tree as poisoning the air of the whole valley where it grew, so that neither animal nor vegetable could live there. But when Deschamps and Leschenault visited Java they found that this deadly tree flourished only where vegetation was most luxuriant, and that it was haunted by birds and insects. In another part of Java there is a narrow valley where neither animal nor vegetable life can exist, but this is owing to the exhalation of carbonic acid gas from an old volcanic crater. Upas is a Malay word meaning poison, and is applied to a variety of vegetable products. The proper name of the so-called Upas tree is the antjar or antier (the *Antiaris torquata* of Leschenault), which grows in many parts of the Sunda and Philippine islands. It is a very beautiful tree, and sometimes grows to the height of a hundred feet. From its milky juice, mixed with black pepper and the juices of certain roots, the Malays prepare a poison for their arrows which is very prompt and virulent in its action. Cloth is sometimes made from the fibrous bark of the antjar, but unless the fiber has been thoroughly cleansed it produces a painful itching when worn next to the skin.

Since writing the above we have met with an account of this tree in Pouchet's Universe. He states that the juice is not poisonous unless introduced beneath the skin. While Leschenault was examining one of those trees, which he had cut down, the exudation from the broken branches flowed over his face and his hands, but without injuring him. But eight drops of the juice, injected into the veins of a horse, killed it directly; and criminals have been known to die in five or six minutes after being pricked in the breast with a lancet dipped in the juice. *Journal of Chemistry.*

TROPICAL TREES.—One Ceiba, left standing in a cane-piece, was very grand, from the multitude and mass of its parasites—Rhipsalis, Anthurinus with their air-roots, Matapalos with their, and huge tresses of Bignonia, Ipomoea, and what not of other lianes—and grand also from its form. The prickly board-wall spurs were at least fifteen feet high, some of them, where they entered the trunk; and at the summit of the trunk, which could not have been less than seventy or eighty feet, one enormous limb (itself a tree) stuck out quite horizontal, and gave a marvelous notion of strength. It seemed as if its length must have snapped off, years since, where it joined the trunk; as if the leverage of its weight must have toppled the whole tree over. But the great vegetable had known its own business best, and built itself up right canily; and stood, and will stand for many a year, perhaps for many a century, if the Matapalos do not squeeze out its life. I found, by the by, in groping my way to that tree through cane twelve feet high, that one must be careful, at least with some varieties of cane, about getting cut. The leaf-edges are finely serrated; and more, the sheaths of the leaves are covered with prickly hairs, which give the coolies sore shins if they work bare-legged. The soil here, as everywhere, was exceedingly rich, and sown out into rolling mounds and steep gullies—sometimes almost too steep for cane cultivation—by the tropic rains. If (as cannot be doubted) denudation by rain has gone on here for thousands of years, at the same pace at which it goes on now, the amount of soil removed must be very great—so great that the Naparimas may have been, when they were first uplifted out of the gulf, hundreds of feet higher than they are now. *Good Words.*

WHAT is the great motive for traveling?—A locomotive.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY
CHARLES SCRIBNER & COMPANY,
651 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.
"Incomparably superior to anything published."—*Apparatus.*

Introduction to the Study of Geography.
Elementary Geography.
Intermediate Geography.
Common School Geography.

Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as in America.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that this is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

HAWESSEE COLLEGE,
MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to invite the attention of friends in the Cotton States to the excellent location, delightful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the gravel line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has boarding arrangements for about fifty students. The school supplies its table from its own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half Per Week.
Tuition is \$10 per annum. Students will be received at any time, and charged to the end of the term. For circular address

REV. F. M. GRACE,
Madisonville, Tenn.

CENTENARY MALE INSTITUTE,
SEMENTFIELD, ALABAMA.

opens on the FIRST MONDAY of next October.

The school is in good condition. It has had a steady increase every year since it has been in the hands of the present teachers.

The total expenses from October to July will be only \$231.50.

Books will run daily between Sementfield and Selma at the opening of the session.

JOHN MASSEY,
Principal.

MEMPHIS CONFERENCE FEMALE INSTITUTE, JACKSON, TENN.

This old and popular institution affords all the advantages of a first class Female College, and is steadily improving.

Charges are moderate. Fall session begins September 5, 1870.

For catalogues address the President, at 503 M. REV. A. W. JONES, D. D.

TO AGENTS.—A straight pencil mark in the above calendar indicates the date of a money-letter received, and a half circle the amount of cents.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY.

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known throughout the South, will begin its next session on Wednesday, September 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature, and Commercial Department. The advantages of this University are seen in its healthy and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Licentiate in the ministry and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES FOR SESSION OF FIVE MONTHS.
Tuition in the University classes.....\$30 00
Tuition in Grammar School.....25 00
Tuition in Law Department.....40 00
Incidental fees.....2 00
(Tuition and incidental fee required in advance.)
Chemical fee, paid once.....5 00

Boarding can be had in the best families at from \$15 to \$20 per month.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. H. Wood.

GEORGE W. FOSTER,
President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,
TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins September 15, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President.
REV. B. B. ROSS, M. A., Professor of Latin and Mathematics.

DR. S. M. BARTLETT, Director of Music, with Nine Assistants in the various departments of instruction and discipline.

The president calls particular attention to the fact that Rev. B. B. Ross, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the institution. Brother Ross is a graduate of Lagrange College, Alabama. He was professor of Mixed Mathematics in that institution for two years. Subsequently he was president of Talladega Female Institute. His classical education, his experience in the practical business of teaching, his acceptable career of itinerant service, his many excellent personal traits, all entitle him to the unqualified confidence of our people.

The College has just closed a most successful year. Its prospects were never more flattering. The present organization of the institution combines all the best features of our Southern colleges, instruction and efficient discipline of the pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service. The boarding arrangements are under the immediate control of the president, who resides in the building, and supervises the social recreations and the professional duties of the pupils. The health of the girls is in charge of an experienced matron. The table, kitchen and laundry are in charge of thoroughly trained housekeepers. Miss Shellenbarger is the governess, and brings to the office high social position, experience as a teacher, liberal education, and matured Christian character. The pupils are trained in gymnastic and calisthenic exercises, strengthening their physical powers, imparting grace and dignity to their movements. Religion is the basis of the system of education, and girls are taught that the truth as it is in Jesus is the highest attainable wisdom.

CHARGES FOR SCHOLASTIC YEAR OF FORTY WEEKS.
Tuition, according to grade, from \$25.....\$50 00
Tuition in music.....60 00
Tuition in art, from \$20 to.....40 00
Tuition in languages.....20 00
Board, washing and fuel.....20 00

Instruction in vocal music, free of charge.
Instruction in calisthenics, free of charge.
Use of models in art, free of charge.
Use of instruments for practice, free of charge.
Use of library of reference, free of charge.
No incidental charges of any kind.
Tuition for each term payable in advance.
REV. GEO. W. F. PRICE,
President.

WESLEYAN FEMALE INSTITUTE,
STANTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President.
With Thirteen Professors, Teachers, etc., etc.

Than this no College for Young Ladies ranks higher. System of teaching like that pursued in the University of Virginia. French is taught by a native master of the language. Professor of Department of Music has no superior in any school; among others, is assisted by the distinguished vocalist, Madam Bertha Ruhl. This is one of the healthiest climates in America, and young ladies who come from the South will feel comfortable and entirely restored to health. The grounds are large and beautiful; buildings stately and elegant, fanned by the purest breezes, overlooking the entire city, and commanding the most magnificent rural landscape scenery for thirty miles along the beautiful Valley of Virginia, making it one of the most delightful college homes in the Union.

(From Judge John N. Hendren, M. A., University of Virginia.)

I regard the Wesleyan Female Institute in this place, under the management of Rev. William A. Harris, as one of the very best and most attractive schools in the State.

(From Hon. John R. Baldwin.)

The Wesleyan Female Institute is situated by influences which make it an especially desirable place for the care and education of the daughters of Christian parents.

(From Prof. William E. Peters, LL. D., University of Virginia.)

Young ladies committed to the care of Prof. Harris will enjoy advantages of an intellectual and moral training rarely found.

(From Rev. William E. Munsey, D. D.)

From personal knowledge I believe that as the president of a female college, Rev. William A. Harris has no superior; indeed within the purview of my acquaintance he has no equal.

(From Bishop E. M. Marvin, D. D.)

The Wesleyan Female Institute is an honor to the church. Instruction is thorough. All classes stand high. In music advantages are offered of a very high order. The most talented professors are employed, and nothing less nor more are spared to make this department eminent. The school is very prosperous, and deserves to be so.

TERMS FOR THE ENTIRE SCHOLASTIC YEAR.
Board and tuition in the Collegiate Course, \$225. Music and other extra studies moderate.

NEW ORLEANS MARKETS.

Most branches of the trade have exhibited but little animation since our last report, but an active business has been done in our leading staples, and a fair amount in sugar and molasses, with rather more movement in Western produce.

The weather has been clear and pleasant, and highly favorable to cotton picking. Of course the chances for an increase over last year's crop in proportion to the wider acreage are improving daily. The weather, however, auspicious, is not more so than last year, and if it will be protracted to the same extent as then, there will be nothing to prevent an increase of 13 per cent.—the outside estimate of the Agricultural Bureau for increased acreage—except the greater inefficiency of the laborers, which is generally admitted. This, however, may be partly offset by an increased number of hands from the border States and from abroad, and to the crop itself in many localities being more abundant to the acre than last year. Even under favorable auspices, however, we do not see how more than 2,500,000 bales, which is over 12 per cent. in excess of last year, can be figured, subject to the contingencies of the rest of the season. We have nothing new to report of the cane.

COTTON.—The following are the arrivals since the second instant:

Louisiana and Mississippi..... 24,495

Arkansas..... 1,091

Alabama..... 263

Florida..... 1,936

Texas..... 43

Florida..... 75

Total..... 27,903

On Saturday the movement commenced with considerable spirit, and although hardly as active later in the day, yet the sales embraced 7,700 bales, but at irregular and earlier prices, the closing quotations showing a falling off of 1/4c, in low middling (against 1/2c at New York), but a less decline in other grades. On Monday, with an ample supply and factors meeting the demand largely at quotations predicated on the decline at Liverpool and New York, the sales were on a still more liberal scale, amounting up 10,500 bales, which is equal to the heaviest previous day. This season, good ordinary closing at 13 1/4c to 14c, and low middling at 14 1/4c to 15c, showing a net decline of 1/4c. On Tuesday the market opened with a good inquiry, which continued fair throughout the day, but, with only a moderate supply, barely 5,700 bales changed hands, mostly at previous prices, but partly at figures showing a further advantage on the side of the buyer. Low middling sold freely at 14 1/4c, and strict commanded 14 1/2c to 15c, while on Monday there was little or none of the same description to be had under 14 1/4c, and a fair amount commanded 15c.

This makes an aggregate for the past three days of 23,950 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 324,308 bales, against 318,586 bales for the same date last year, and the increase in the receipts at all the ports, up to the latest date, as compared with last year, is 136,421 bales. In the exports from the United States to foreign countries, as compared with the same date last year, there is an increase of 180,533 bales to Great Britain, and a decrease of 88,157 to France, and 12,636 to other foreign ports.

Referring to our remarks above, we quote as follows:

NEWS OF THE WEEK.

DOMESTIC

WASHINGTON, Dec. 12.—Secretary Boutwell was before the Ways and Means Committee to-day, explaining his plans. The committee will hear the parties who are interested in sugar on Thursday.

Mr. Rainey's first vote was given for Banks' San Domingo resolution. The Senate confirmed Senator Drake as Chief Justice of the Court of Claims.

The committee reported favorably on Porter's nomination. An hour's discussion followed, but resulted in no action.

The Senate seems to favor the House bill, which some Senators thought would leave Porter vice admiral during life.

Mr. Butler, in the House, said Porter had disgraced the President and the navy.

WASHINGTON, Dec. 12.—The following is the revenue resolution alluded to in the early report:

Resolved, That the true principle of revenue reform points to the abolition of the internal revenue system, which was created as a war measure, to provide for extraordinary expenses, and the continuance of which involves the employment, at the cost of millions of dollars annually, of an army of assessors, collectors, supervisors, detectives, and other officers, previously unknown, and requires the repeal at the earliest day, consistent with the maintenance of the faith and credit of the government, of all stamps and other internal taxes, and that properly adjusted rates shall be retained on distilled spirits, tobacco and malt liquors, so long as the legitimate expenses of the government require the collection of any sum from internal taxes.

WASHINGTON, Dec. 12.—Senator Morton introduced a resolution appointing a San Domingo commission, and appropriating \$20,000 for its expenses.

Mr. McCreery, of Kentucky, introduced a joint resolution appointing a joint committee of two from the Senate and three from the House, to inquire whether the late General R. E. Lee had any right or title to the Arlington estate which made it liable to forfeiture by his participation in the rebellion; and whether it was not the property of Mrs. Lee and her children; and if so, to adopt such measures as will restore the estate to Mrs. Lee, with compensation for the damage done the property; and to inquire into the expediency of removing the remains of those who are buried on the estate; and also to consider the propriety of restoring the Washington relics to Mrs. Lee.

Mr. McCreery desired to make some remarks on the subject, but Mr. Edmunds objected until the resolution had been printed.

Mr. Schurz introduced a resolution looking to a general amnesty.

Mr. Saulsbury offered a resolution inquiring the President's reasons for sending troops into Delaware at the recent election.

Senate then went into executive session and adjourned.

House.—Mr. Rainey, negro (Republican), from South Carolina, was seated to-day.

The following are among the bills introduced and referred: Bill incorporating American and European Steamship Company, with a capital of \$5,000,000, which may be increased to \$20,000,000. It directs the Postmaster General to contract for mails from Portland, Boston, New York, Philadelphia and ports on the coast, with a compensation weekly of \$900,000, and a tri-weekly and daily service in proportion; bill appropriating \$250,000 for Louisville falls; bill preventing the purchase of persons as chattels, whether under the head of territorial or otherwise. (A hit at San Domingo.) Bill abolishing the income tax.

The bill repealing the tenure of office bill passed by a vote of 157 to 25.

WASHINGTON, Dec. 13.—House.—The franking privilege has been abolished, but the papers are allowed free exchanges, and the circulation of weekly and semi-weekly papers within the counties where they are published. The vote stood 103 to 65. The bill then passed.

The Ways and Means Committee have been directed to inquire into the expediency of taxing manufactured tobacco uniformly sixteen cents.

Mr. Butler presented a petition from two thousand New Englanders asking nonintercourse with Canada for the alleged fishery outrages.

Two Virginians were relieved of their political disabilities.

House adjourned.

The House caucuses to-night on the amnesty bill.

Senate.—A bill was introduced reviving the land grants to the Selma, Rome and Dalton railroad.

Mr. McCreery, of Kentucky, asked leave to introduce the resolution of which he gave notice yesterday, proposing an investigation with a view to the restoration of the Arlington estate to the widow of General Robert E. Lee, the removal of the grave yards on the premises, and a general restitution for any incumbrances placed there in interest of the government.

Mr. Edmunds, of Vermont, hoped the leave would not be granted. The proposition to dig up the bones of our dead soldiers, in order that certain property might be given back to its rebel owners, was to his mind perfectly monstrous. While entertaining the highest respect for his friend, Mr. McCreery, he hoped the Senate would never entertain the proposition.

Mr. McCreery then occupied twenty minutes in support of his resolution, and eulogizing Gen. Lee.

FOREIGN

LONDON, Dec. 10.—A report from General Chanzy, dated Thursday evening, says: Frederick Charles again attacked us to-day along the whole front. We held our positions throughout the day. All the corps were engaged from St. Laurent to Beaugency. We camped on our positions of the morning.

VERSAILLES, Dec. 10.—The Duke of Mecklenburg telegraphs from Mour to-day: The enemy violently attacked us yesterday, but were victoriously repulsed by the seventh and twenty-second divisions, notwithstanding the superior force of the attacking party. Beaugency was occupied on the eighth and Versen was occupied to-day.

LONDON, Dec. 10.—The Pall Mall Gazette, in an ably written leader, argues against the declaration of Paris, of 1856, because it may transfer the carrying trade almost entirely to the United States.

Three Russian vessels are building and are nearly completed in Sander's ship yards, on the Thames, said to be mercantile, not naval ships.

It is now considered impossible for Paris to receive assistance from the provinces. With the failure and retreat of the army of the Loire all hopes in that direction are lost. The Germans look upon the capitulation of the city as only a question of time, and it is announced that King William only awaits that event before returning to Berlin.

The garrison at Belfort continues a vigorous defense, and their heroism and endurance excite warm admiration.

LONDON, Dec. 10.—The German advance on Havre has turned aside to Dieppe, which was probably occupied to-day.

BORDEAUX, Dec. 10.—The people of this city are very patriotic, and are sending large numbers of recruits to the front, and are equipping and drilling more.

M. Gambetta, in a telegraphic circular to the prefects of departments, from the headquarters of General Chanzy, says: General Chanzy continues to resist the attacks of Prince Frederick Charles, taking many prisoners, and inflicting heavy losses on the enemy. From this you may judge how false are the German dispatches, which state that the army of the Loire is crushed. General Chanzy, with only half that army, still resists successfully the German advance.

LONDON, Dec. 10.—Bismarck declares he will not treat with the Tours government, because it is convinced at bad faith, and its officers broke their paroles.

The Paris government has just refused a summons to surrender. They will fight to the last man.

Wood writes from headquarters at Menin, ninth, that the Duke of Mecklenburg had three days' fighting with the sixteenth and seventeenth French corps. The fighting commenced on the seventh, near Menin. The French fought with wonderful obstinacy. The German loss was very great, but the French loss much greater. The French are now retreating toward Vieuxon, pursued by Prince William of Mecklenburg. More fighting expected to-morrow.

Macklean reports, on the tenth, the center of Frederick Charles' army at Orleans, left wing at Beaugency and the right wing near Gen. A cavalry division, followed by infantry, proceeded south from Orleans to Vieuxon.

Mahtenuff is operating to occupy Dieppe, Havre and Rouen.

BORDEAUX, Dec. 11.—The government is installed here. Vigorous measures have been decided upon. Large reinforcements are going forward from all points from the south perfectly armed and equipped.

DEATH OF REV. JOHN SNYDER.

It has become my painful duty to chronicle the death of Rev. John Snyder, of Kanawha county, West Virginia. Bro. Snyder lived in the bonds of Elk mission. He was born August 15, 1784, in Harrisburg, Pennsylvania, professed religion in his fifteenth year, and joined the Methodist Church. John was the first one of his father's family to make such a move. His father, mother and all the family were irreligious. As he returned from church he told his parents what the Lord had done for him, and also what he had done; he had joined the church and promised the Lord that he would serve him. He obtained the consent of his father to erect a family altar, and from that day to the day of his death he never failed to remember the Lord at the family altar, morning and evening; and the night before he died he gave out the song for the family to sing, and then called upon his daughter Elizabeth to lead in prayer. It can truly be said that he lived a life of praise; the result was a long life of usefulness on earth, and a blessed and happy hour in which to die. He was in his eighty-seventh year at his demise. Seventy-two years of that time he belonged to the Methodist Church, and was a minister in his beloved church sixty years. Shortly after the division in the church he adhered to the Methodist Episcopal Church South. In this church he lived in all good conscience until the ninth of November, 1870, and as the last rays of the sun were kissing the highest parts of the mountains, he received his transfer to join the church of the first-born in heaven. His fond children crowded around him to catch the last words that fell from his lips, and just a short time before he breathed his last he did not seem to be disposed to talk, but a sweet smile played over his wrinkled face. His son Daniel said to him: "Father, do you know that you are dying?" He said: "No; but, said he, 'I feel as I never felt before; I am perfect in love.' He then strengthened himself in his bed and crossed his hands on his breast, and closed his eyes as though he was going to take rest in sleep, and without a struggle or a groan he passed from time to eternity. 'Mark the perfect man, and behold the upright, for the end of that man is peace.'—Correspondent of Christian Observer.

A CHINESE SERMON.—The following discourse by a converted Chinese tailor, with reference to the merits of Confucianism, Buddhism, and Christianity, is worth preserving: A man had fallen into a deep, dark pit, and lay in its miry bottom groaning, and utterly unable to move. Confucius walked by, approaching the edge of the pit, and said: "Poor fellow! I am very sorry for you. Why were you such a fool as to get in there? Let me give you a piece of advice: If you get out don't get in again." A Buddhist priest next came by, and said: "Poor fellow! I am very much pained to see you there. I think if you could scramble up two-thirds of the way, or even half, I could reach you and lift you up the rest." But the man in the pit was entirely helpless, and unable to rise. Next the Saviour came by, and hearing the cries, went to the very brink of the pit, stretched down and laid hold of the poor man, brought him up, and said: "Go, and sin no more."

DEATH OF EX-PRESIDENT BURNETT. The venerable and widely revered David G. Burnett, first president of the Texas Republic, died in Galveston on the eighth instant, at the ripe age of eighty-three years. He was the last of those who held the position of president, and was probably the oldest of the original American settlers, having arrived in Texas in 1817. Though he held many trying positions, and saw much adversity, yet was his walk blameless, and he went down to the grave with an unblemished reputation in all the relations of life. His funeral fully testified the deep veneration in which he was held. It was attended by the city authorities, the various civic societies, the judiciary and members of the bar, as well as a large concourse of private citizens.—Pacifica.

North Mississippi Conference.

The appointments were given in our last week's paper. The following additional items are condensed from the Western Methodist:

White members, 21,757; colored members, 58; local preachers, 190; baptisms—adults, 1,491; infants, 746; Sunday schools, 200; superintendents and teachers, 1,112; scholars, 8,072; volumes in library, 17,067; requisites, 1,650; Visitors taken, 1,220; money expended, \$1,803.35; number of churches, 345; number of sittings, 82,925; value of churches, \$322,236.50; value of parsonages, 14; value of parsonages, \$16,690; value of other property, \$12,652; Bishops' fund collection, \$1,018.15; Conference collection, \$1,536.80; missions, \$1,454.82; tracts, \$3; ministerial education, \$99.83; the poor, \$391.05; other objects, \$8,310.65; amount books sold, \$1,589.35; periodicals taken, 1,635; salaries of presiding elders, \$9,012; receipts, \$6,790.52; deficiency, \$2,221.48; salaries of preachers in charge, \$48,899.75; receipts, \$38,474.52; deficiency, \$10,425.23; salaries of junior preachers, \$100.95; receipts, \$83.15; deficiency, \$17.80.

The following were admitted on trial: P. M. Marmon, Hickory Flat circuit, Holly Springs district; Thomas W. Dye, Hernando circuit, Hernando district; John McElhannon, Burnsville circuit, Inka district; Henry E. Smith, E. H. Moon, Benjamin F. Morris, Okolona circuit, Aberdeen district; A. W. Langley, Honston circuit, Aberdeen district; A. J. Foster, Chickasaw circuit, Aberdeen district; L. D. Worshum, Pontotoc circuit, Aberdeen district; John M. Dunn, Christenbury L. Bates, William A. Moore, Calhoun circuit, Water Valley district; J. M. Beon, Kosciusko circuit, Starkville district; S. C. Stone, Gainville and Scooba circuit, Macon district.

Remaining on trial: Irl R. Hicks, Ben. H. Bonds, Joseph Joyner Brooks, Samuel W. Miller, H. C. Morehead, T. A. S. Adams (who is a deacon), James D. Bush.

Admitted into full connection: Joshua K. Morris, Daniel L. Cogdell, John R. Peoples, Jacob D. Murff and Charles B. Galloway.

Traveling preachers elected deacons: Irl R. Hicks, Ben. H. Bonds, James D. Bush, Joshua K. Morris, Jacob D. Murff.

Deacons of one year: Thomas P. Ramsey and Pinkney A. Johnston.

Traveling preachers elected elders: D. L. Cogdell, J. R. Peoples, T. G. Freeman, T. F. Brewer, J. L. Futrell.

Local preachers elected deacons: Peter M. Marmon, Joseph T. Barton, John McElhannon, David Justice, John M. Wells, David O. Hughes.

Local preachers elected elders: William B. Beck, A. W. Murff, W. H. Holmes.

Readmitted: John Little and William L. Bonner were readmitted in elder's orders.

Received by transfer: Thomas Cameron, in deacon's orders, from the North Alabama Conference; Thomas L. Duke from the Illinois Conference.

Superannuated: C. B. Harris, J. I. E. Byrd, John Young, W. S. Jones, E. J. Williams, W. W. Pearson, W. L. Bonner, S. B. Carson.

The following resolutions were offered by the Conference Board of Missions, viz:

Resolved, 1. That the payment of the old debt of the Missionary Society involves the honor and reputation of the Methodist Episcopal Church South.

2. That the North Mississippi Conference approves the plan proposed for the payment of the remainder of that debt; and that the Bishop presiding be requested to appoint a member of the Conference as an agent to receive and forward the amount assessed to the North Mississippi Conference to the treasurer of the Board of Missions at Nashville, Tennessee.

3. That an effort be made at this Conference to aid in liquidating this old debt and in removing this pressure from the church.

Whereupon the missionary secretary, Dr. McFerrin, proceeded to address the Conference on the merits of the above resolutions, and to solicit contributions; and in response the amount of the old debt apportioned to the North Mississippi Conference was more than met in the sum of \$4,275, obtained in cash and subscriptions.

The Bishop announced the following persons ordained deacons by him at the Presbyterian church on Sunday morning, viz: Irl R.

Hicks, Ben. H. Bonds, James D. Bush, Joshua K. Morris, Jacob D. Murff, traveling; and Peter M. Marmon, Joseph T. Barton, John W. Wells, D. O. Hughes, local.

The Bishop announced the following persons ordained elders by him at the Presbyterian church on Sunday afternoon, viz: D. L. Cogdell, John R. Peoples, Thomas G. Freeman, T. F. Brewer, J. L. Futrell, traveling; and A. W. Murff, W. H. Holmes, local.

On motion of E. E. Hamilton it was resolved that, whereas the assessment to this Conference for the Bishops' fund is \$1,000, we do agree now to assume \$200 in addition; and that during the next year we raise \$1,200.

The Bishop appointed P. Tuggle to receive and forward the funds subscribed during this session for the payment of the old missionary debt.

The Committee on Books and Periodicals presented its report, which having been read, resolutions first, second and third were adopted.

The following amendment to the fourth resolution was moved and seconded, viz:

Resolved, That we adopt the Western Methodist, published at Memphis, as the official organ of the North Mississippi Conference.

A motion was made to amend the amendment so as to adopt both the Western Methodist and the New Orleans Christian Advocate as official organs of the North Mississippi Conference, and pending the discussion of which the hour of adjournment arrived.

The question on which yesterday's session adjourned was resumed, followed by remarks by the editor of the Western Methodist, who closed by suggesting that at present the Conference should not adopt an official organ. Thereupon a substitute for the fourth resolution of the report was adopted, which was ordered to be incorporated as a part of the original report, and the committee authorized to adapt the language of the preamble to this resolution. Resolutions fifth and sixth were adopted, and the report was then adopted as a whole.

The committee on the subject of lay representation in the district conferences presented its report, which, having been read, was adopted, as follows:

Resolved, That all the official members of the church, who are members of the quarterly conferences, shall be considered members of the district conference.

The commission appointed to confer with the commission of the Memphis Conference, to make a division of the relief fund of the two conferences, presented its report, which was adopted.

The committee on the communication of the Revs. R. Abbey and H. H. Montgomery presented its report, which, having been read, was adopted; and the substance of this report is that it is inexpedient to take any action looking to the formation of a third annual conference in Mississippi.

The Committee on Education presented its report, which, having been read, was adopted.

On motion, Isaac Ebbert and W. P. Barton were elected to fill the vacancy in the Board of Trustees of the Southern University at Greensboro, Alabama.

The report of the statistical secretary was taken from the table and adopted.

The Joint Board of Finance, having presented its report, and it having been read, a motion to recommit was lost, and the report adopted.

The constitutional question in reference to the veto power of the Bishops, sent down by the last General Conference, was unanimously concurred in, the vote numbering ninety-one.

Conference elected W. L. Lipscomb, W. P. Barton and Isaac Ebbert delegates to the Sunday school convention to meet at Nashville, next May. Reserves: J. C. Lowe and J. H. Marks.

Columbus, Grenada and Corinth respectively were put in nomination as the place for holding the next session of the Conference; when Columbus was chosen by a large majority.

The Board of Missions presented its report, which, having been read, was adopted.

The committee appointed to nominate the Committees of Examination to serve for four years, proposed nominees, who were elected, viz:

To examine candidates for admission on trial: W. T. J. Sullivan, E. E. Hamilton, B. B. Brown.

First year: Isaac Ebbert, J. W. Boswell, R. G. Porter.

Second year: A. J. See, K. A. Jones, A. C. Allen.

Third year: T. C. Weir, W. S. Harrison, M. H. Ford.

Fourth year: T. Y. Ramsey, J. H. Brooks, W. P. Barton.

The Committee on the Spiritual Interests of the Church presented its report, which, having been read, was adopted, and its publication in the Western Methodist and New Orleans Christian Advocate ordered by the Conference.

W. T. J. Sullivan was nominated and elected Conference Sunday school secretary, to correspond with the Sunday school secretary at Nashville.

John Barcroft, E. E. Hamilton and J. W. Knott were appointed a committee to publish the minutes of the session in pamphlet form, with the understanding that the members, clerical and lay, each pay to the committee \$1 upon receiving his quota of copies.

The following resolution was adopted, viz:

Resolved, That it is the sense of this Conference that on the demand of the delegation of any circuit or station attending a District Conference, the vote of said conference upon any matter coming within its deliberations shall be cast by circuits and stations, and not per capita, and the vote of any circuit or station shall be in the ratio of one for every twenty-five members.

The following resolution was adopted, viz:

Resolved, That all candidates for admission into this Conference, with these several classes of undergraduates and their respective committees, shall be required to commence their annual examinations on Monday, night preceding the session of the Conference.

The Committee on Memoirs presented its report, which, having been read, was adopted; and, by request, the secretary was ordered to furnish a copy of the memoir of Michael J. Blackwell to the secretary of the Memphis Conference, to be spread upon its records.

The Bishop announced the following visiting committees:

Verona Female College: E. E. Hamilton, A. C. Allen, J. B. Stone.

Inka Female Institute: John Barcroft, J. C. Lowe, J. W. Honnol.

Pyhalia Female Institute: Philip Tuggle, T. P. Holman.

Marshall Female Institute: William Shepherd, M. H. Ford.

The Bishop announced the following clerical members of the Board of Finance, viz: M. H. Ford, A. J. See, J. W. Honnol, B. W. Stabbs, T. F. Brewer, O. P. Thomas, W. S. Harrison, Kenneth A. Jones, J. R. Peoples—lay members to be added next session.

FROM REV. J. A. PAULY.

MR. EDITOR: No doubt many of your readers will be pleased to hear from Bro. Pauly. He writes us from Houston, Texas: "The God of Jacob is with us. On yesterday (December 4) we had a precious time. Even before the meeting of the Sabbath school a few brethren came to me with the request to unite with them in prayer for the outpouring of the Holy Ghost. Of course we prayed. And need I tell you what sweet times we had in Sabbath school and during the morning exercises? Our prayers were fully answered. At three o'clock in the evening we had a class meeting. Thank the Lord for class meetings! But few were able to speak; all were bathed in tears; all shouted: Glory, glory to the Lamb!"

"As saints of God we've found
Glory begun below."

"At nightfall we had another good meeting. After a brief sermon I invited penitents to the mourner's bench. Soon the altar was crowded, and several of the mourners were comforted.

"Oh! who would not be a child of God? Who would not be a minister of the blessed gospel? Come, brethren, come, let us work diligently for Jesus! Let us work diligently to save the poor unfortunate sinners from eternal burning! Well may our American brethren be proud of our German work. The God of Jacob is with us."

Visit your neighbors' fields and see the immense yields from the use of Murree's Subsoil.

The Christian Advocate.

SATURDAY, DECEMBER 17, 1870.

PRAYER.

JOHN GREENLEAF WHITE.
 O God, the Father of all,
 Thee we praise and glorify,
 For ever and aye.
 And pray for us and all
 Thy people, that we may
 Be ever in Thy love and grace,
 And ever in Thy peace.

And pray for us and all
 Thy people, that we may
 Be ever in Thy love and grace,
 And ever in Thy peace.

As we kneel on the sand,
 Their white locks bowing to the ground,
 The priestly of the sea.

They pour their glowing treasures forth,
 Their gifts of pearl they bring,
 And all the listening hills of earth
 Take up the song they sing.

The blue sky is the temple arch,
 Its transept earth and air;
 The music of the starry march,
 The chorus of a prayer.

So Nature keeps the reverent frame
 With which her years began,
 And all her sights and voices claim
 The prayerful heart of man.

To the Members of the M. E. Church
 South in Lake Providence Dist.

DEAR BRETHREN: The District
 Conference, held at Delhi, October
 26, instructed a committee to gather
 all items of interest in the history
 of the church in this district, and
 to put all in a book, properly
 arranged. This book is to be placed
 among the other documents of the
 conference, and preserved for future
 reference or additional records. I
 need not urge the importance of
 such a record and of its being made
 at once, for it is evident. Many are
 now living, from whom hundreds of
 valuable facts may be obtained, who
 will soon pass away. These facts
 in time to come, when the history
 of Methodism in Louisiana shall be
 written, will be like sands of gold.
 It will require but little effort to
 secure these treasures now. Let us
 make that effort, and thus aid him
 who will eventually write that history.

In order that you may begin at
 once, I address you thus through
 these columns. Let me beg you to
 pick up, record and forward to the
 committee all such items as may be
 in your reach.

1. The names of the itinerant
 preachers you have known in the
 district since your residence here.
 All items of interest connected with
 them—their labors, trials, general
 character, anecdotes of them, dates
 and lengths of their work in the
 district, etc.

2. The same as above of all the
 local preachers you have known.

3. Names and all items of inter-
 est concerning prominent lay mem-
 bers, male or female. In this re-
 port all you know of the fathers and
 mothers in Israel, who in past days
 upheld the honor of our Zion, and
 gave heart and life to the glorious
 cause.

4. Accounts of remarkable meet-
 ings, when and where held, by whom
 conducted, numbers in attendance,
 numbers converted, etc. In these
 accounts embody everything of inter-
 est, and do not fear to tax the com-
 mittee with too much. We want a
 great abundance, either to condense
 or select from.

5. Report all you can learn of
 church finances, the number and
 character of books and papers in
 circulation; character of the peo-
 ple—manners, intelligence, prop-
 erty, etc.; character of the coun-
 try—modes of conveyance, markets,
 products, etc.

6. Accounts of the beginning,
 progress, strength, etc., of sister
 churches; of Sunday schools and
 day schools—what and how taught.
 In a word, we ask you to furnish
 us all the information you can of
 the past of this section of Louisiana,
 that may, in connection with the
 work of our church, be of the least
 use to the future historian.

I have risked being tedious that
 you may be prompted to give us re-
 ports as full as possible. Let me
 urge you to begin at once. Recall
 your own observations, put all your
 gray-haired neighbors under tri-
 bute, and extend your record till
 you have caught the last fact on
 memory's page. If you will thus
 exert yourselves, and begin now, we
 shall be well able to perform to the
 satisfaction of the conference, the
 task imposed upon us.

Forward your manuscript either
 to Hon. F. H. Taylor, Newbury,
 Mass., or to W. S. M. L.,
 111 Broadway, New York, or
 to myself as below. You may
 more convenient, but I think to your
 pastor, or to the friends of the
 cause, will be more so.

F. T. R. S.,
 Oakley, Franklin Parish.

FIRST CHAPTER OF GENESIS.

MR. GRAVES. Having given the
 literal significance of the first verse,
 we hope to commence with the
 second: "And the earth was
 without form, and void, and
 darkness was on the face of the
 deep. And the Spirit of God moved
 on the face of the waters." The
 solid parts of our planet were then
 enveloped with water, and so re-
 mained till the third day. The
 whole are included in *ereth*, the sur-
 face of which is called the face of
 the deep. It was void—destitute of
 organic life; and it was without
 form—that is, the orderly form af-
 terward mentioned. An idea of
 solids and fluids, apart from some
 form, is inconceivable. All the state-
 ments of *Moses* are in harmony
 with reason, and are so understood
 by every correct expositor, though
 a special passage may be miscon-
 strued. "And the Spirit of God
 moved on the face of the waters." *Three*
alone were visible. The de-
 sign seems to have been to impart
 to them, prolific power, and thus
 prepare them to be the abode of
 abundance on the third day. *Three*
alone were visible. The de-
 sign seems to have been to impart
 to them, prolific power, and thus
 prepare them to be the abode of
 abundance on the third day. *Three*
alone were visible. The de-
 sign seems to have been to impart
 to them, prolific power, and thus
 prepare them to be the abode of
 abundance on the third day.

The *Mosaic* account of the ori-
 ginal process of the earth from chaos
 to order, under divine power, is
 truly wonderful. Its attributes are
 precision and harmony, character-
 ized by sound philosophy. In every
 line we behold the growth of *ereth*,
 and in every word the work of an
 infallible pen.

Verse 3: "And God said, Let
 there be light, and there was light."
 The rotation of our world, though
 incomplete, then commenced, and
 the sun instantly appeared in the
 east. Have we not shown in our
 comment on the first verse that the
 first act of God was the making of
 the substance of the solar system?
 The sun was therefore in existence
 when the command now under con-
 sideration was given, which simply
 indicates permanent duration, not
 origin. To illustrate: "Let the king
 be our only ruler." His anterior
 life is necessarily implied in the ex-
 pression. In "Let the waters bring
 forth abundantly" we have a dis-
 tinct idea from that embodied in
 "Let there be light." As this light
 is called day, and as there cannot
 be a day without the sun, the inter-
 pretation is indisputable.

Verse 4: "And God saw the light,
 that it was good, and God divided
 the light from the darkness." This
 was accomplished by the revolution
 of our planet, which in the course
 of a few hours ushered in darkness,
 styled night.

Verse 5: "And God called the
 light day, and the darkness he called
 night. And the evening (*ereb*) and
 the morning (*boker*) were the first
 day." There are six hours in *boker*
 and six in *ereb*. These constitute a
 natural, *Mosaic* day. This is thus
 referred to by the Redeemer: "Are
 there not twelve hours in the day?"
 John xi, 9. Time-honored, chronic
 error, however, will have a day with-
 out the sun. *Moses*, even amid
 Egyptian folly, never heard of such
 an event. How strangely his writ-
 ings are misunderstood! On the
 origin of the solar system they are
 strictly scientific.

The act of making its substance
 (*ereth*), the moving of the Spirit on
 the face of the waters, and the pro-
 nouncing of the light of the sun en-
 during, critically speaking, were not
 within the limit of the first day,
 though closely connected therewith;
 but the dividing of the light from
 the darkness by a permanent law,
 and the calling of the darkness
 night and the light day, were

RECORDS OF A BAPTIST CHURCH
DISINTERLED.

MR. GRAVES. A Baptist friend
 in a late issue of the *Advocate* has
 written me about the "records of the
 church," owing to the high claim they
 have arrogated to themselves of
 apostolic succession: for they have
 arrogantly asserted that no one has
 a right to claim membership in the
 church of "Jesus Christ" except
 he has been immersed, and that,
 too, by an administrator who him-
 self is in the line of successive im-
 mersions from the days of the apos-
 tles. And for one who is not of their
 faith and order, even to call in ques-
 tion their bold pretensions, is but
 to arouse their indignation.

Mr. Graves, editor of the *Bap-
 tist*, reviewing my article of the
 twenty-fourth of September, thin-
 ders his anathemas against me as
 an itinerant Methodist. Yes, I say,
 "thunders," for there is very little
 "lightning" in his article. He com-
 plains of my ignorance, malice and
 all that sort of thing.

We know it is an easy matter to
 find objections, to call a man igno-
 rant and to speak of him sneeringly;
 but as far as I can judge that has
 nothing to do with the question,
 "the records of the Baptist Church."
 My Methodist ignorance and malice
 have no tendency whatever to
 extricate him from the falsity of
 his assertion that he read upon the
 tombstone as a part of the inscrip-
 tion: Dr. John Clarke founded the
 first Baptist Church on the continent
 of America. "There is no such lan-
 guage in said inscription." But Mr.
 Graves and his coadjutors think it
 a terrible offense to arouse the lion
 from his lair, of dispute with him
 his pen.

I might have been more cautious,
 and held myself at a safe distance,
 had not Mr. Graves and others set
 the example. But when I heard
 him brand the peerless Lythier with
 the appellation of coward, and that
 he was but half converted; yea,
 moreover, when he would overturn
 every church in Christendom and
 extol the Baptist communion as the
 only people worthy to receive the
 oracles of grace, and that a line of
 such honorable distinction has been
 perpetuated in the United States of
 America through one John Clarke,
 I thought it not presumptuous in
 me to remind the gentleman and
 his church of the "hole of the pit
 from whence they were digged"—
 "Lest, being puffed up with pride
 and vain philosophy, they should
 fall into the snare of the devil." He
 thinks I would like to magnify my
 information. I frankly confess I
 would like to do so. Who would
 not, except he that is "wise in his
 own conceit?"

Well, like a faithful schoolmaster,
 he has set himself to give me and
 the public the history pertaining to
 the planting of the first Baptist
 Church on the continent of Amer-
 ica—that is, according to his way
 of thinking. I fear my stock of
 information will not be greatly mag-
 nified, as he has brought nothing
 new to light, except the manner of
 discovering this record, which, I sup-
 pose, is "quite recent, and indeed
 novel."

According to Mr. Graves this
 great act of John Clarke found-
 ing the first Baptist Church in
 America has been kept concealed
 beneath the rubbish, mold and
 dirt of accumulated years upon an
 antiquated tombstone erected, or
 "rather buried," to the memory
 of said Clarke. He told us in his
 convention sermon how this wonder-
 ful discovery of the nineteenth cen-
 tury was made. It was by scratch-
 ing. "He scratched and scratched"
 until said inscription was brought
 fully to light.

Another Baptist preacher in these
 parts contends said tombstone has
 been exhumed. Exhumed means
 disinterred.—Webster's Unabridged
 Dictionary. "Very remarkable, in-
 deed." I wonder how Baptists came
 to bury the records of "the church."
 Strange that their own historians,
 and everybody else, groped in dark-
 ness, profoundly ignorant of its ori-
 gin and history, for more than two
 hundred years, in the United States;
 and then all at once go and "scratch

or disinter of resurrect a tomb-
 stone," in order to "project upon
 the world a true history of the
 church."

Reader, did you ever before hear
 of a church burying its records, or
 digging them in some remote man-
 ner? But we are told that Clarke
 and his Baptist associates were *Bap-
 tists* before they came to America.
 But where is the proof of that? I
 suppose he might as well have said:
 "Noah and his family were *Bap-
 tists* before they crossed the flood;"
 for Mr. Adams, upon whom Graves
 has mainly relied concerning Clarke,
 gives us the following information:

First, he supposes if Clarke were
 not a preacher in England, he must
 have been acquainted with the
 brethren to whom Obadiah Holmes
 addressed an epistle after he had been
 whipped by the old Puritans in
 New England. * * * Secondly, he
 supposes that for Clarke to have been
 acquainted with those *Bap-
 tists* in England, under those extra-
 ordinary circumstances, was nearly
 equal to being ecclesiastically con-
 nected with them. So much for
 Clarke having been a *Baptist* in
 England. Graves says Clarke went
 to Newport in 1638. "Is that really
 true?" Mr. Backus and Mr. Bened-
 ict say he came from the
 Massachusetts to the country now
 known as Rhode Island in the
 spring of 1638. There and then
 Clarke and Roger Williams met each
 other. Williams assisted Clarke in
 obtaining a deed from the Indians
 for a portion of the country, after
 which Clarke, with some twelve or
 fifteen other persons, entered into a
 compact incorporating in their gov-
 ernment liberty of conscience. All
 this was done in 1638. And Mr.
 Benedict positively says the "next
 spring 1639 Clarke went to New-
 port."

Indeed all historians of note and
 standing, as far as I have observed,
 agree in saying that the Providence
 Roger Williams' church was
 founded in 1639, and the Newport
 John Clarke's, church in 1644. I
 refer the reader to the following au-
 thors: Elder Haynes, Baptist his-
 torian, Baptist denomination: "Roger
 Williams was baptized (im-
 mersed) in 1638-9, and was honored
 with being the apostle of the Baptists
 in America—Providence church,
 1639; Newport church, 1644."—
 Pages 51, 52 and 309.

Goodrich's Church History, page
 265: "The first Baptist Church in
 America was formed about the year
 1639, at Providence, Rhode Island,
 by the famous Roger Williams."

Preceding authors quoted from:
 Rev. J. A. Clement's work, "Baptist
 Pretensions to Antiquity."

Mr. Benedict, in his history of
 the Baptists, gives us a minute ac-
 count of the first Baptist Church on
 the American continent. It was or-
 ganized at Providence, Rhode Island,
 by Roger Williams & Co. Some of
 our writers, says Benedict, have
 taken no little pains to apologize for
 this "unusual transaction." Yet he
 justifies Williams and his associates
 on the ground that there was no
 legal administrator in all the infant
 settlements. Poor Clarke! Pity
 that he was not there. If he were,
 and a Baptist preacher too, I wonder
 why he did not immerse them?

Mr. Backus gives us the same in-
 formation with respect to the origin
 and dates of the two churches—
 Providence (Williams') church, 1639;
 Newport (Clarke's) church, 1644.
 Even Mr. Comer himself, that most
 accurate writer, does not pretend to
 deny 1644 as the date of the New-
 port church.

From the above it will be seen
 that for Mr. Graves to vanquish a
 Methodist itinerant is but to over-
 turn the history of his own denom-
 ination. But he and his followers
 would have everybody believe that
 the church planted by Roger Wil-
 liams fell into oblivion in about
 four months. And here he quotes
 Cotton Mather to prove that it was
 only a thing like a church. Let it
 be remembered, Cotton Mather was
 a high churchman. The civil and ec-
 clesiastical government under which
 he lived did not allow him to recog-
 nize anything outside of Episcopali-
 anism as a church. Of course he
 renounced Baptists as heretics, as
 high church Episcopals do at the

present day. But did the Roger
 Williams' church become extinct
 when he resigned the pastorship of
 it? By no means. Backus, Bened-
 ict and other historians tell us the
 church lived on under Olney and
 others. Mr. Backus, in his history,
 speaks of its existence and prosper-
 ity a hundred and sixty-five years
 after its origin. And Benedict traces
 it on to the nineteenth century—that
 it was a flourishing church in 1805-6.
 He says it would be difficult, at this
 day, to make a list of all the *Bap-
 tist* communities which have sprung
 from this ancient and prolific
 mother, the church at Providence,
 Rhode Island.

Graves and others appeal to
 Calender's century sermon to prove
 a point directly contrary to the
 plain teaching of history—that the
 church at Newport was planted in
 1638. How they would like to
 "squeeze it in one year, older than
 the Roger Williams church." But
 there is no use twisting and shamling
 here to get out of this lay baptism
 affair. Better own up to the truth,
 and throw themselves upon the
 mercy of the people, and not try to
 guilt them any further. But they
 tell us the century sermon was
 preached in 1638; therefore the
 church at Newport must have been
 a hundred years old at that time.
 Again, it was delivered, says the
 church at Newport must have been
 a hundred years old at that time.
 It was delivered, says the
 church at Newport must have been
 a hundred years old at that time.
 It was delivered, says the
 church at Newport must have been
 a hundred years old at that time.

So I think it a case clearly not
 out from Baptist history, that Roger
 Williams planted the first Baptist
 Church in America, Mr. Graves'
 effort to prove the contrary not with-
 standing. "But who interred
 John Clarke?" See Rev. T. J. Up-
 ton's article in the *Advocate* of a
 recent date.

N. M. SKIRWATER.

CHARITY.

When the apostle defines charity
 as the bond of perfectness, he surely
 does not mean an indiscriminating
 affection which is ready to throw its
 arms about everything that bears a
 false name or wears a mask of
 friendship for Christ. The charity
 which he commends is the fruit of
 the spirit of holiness. It is such
 love in kind as that which binds the
 angels of God in solemn league
 against the powers of hell. It is
 the charity that rejoices never in
 iniquity, but always in the truth.
 What earnest Christian in these
 days can forbear feeling and lament-
 ing that the blessed name of charity
 should be employed to cloak the
 vilest hatred of all truth and god-
 liness, and that men should use that
 claim when pleading for errors which
 dishonor Christ and change the
 gospel into a fable? This liberal
 Christianity is not the faith once
 delivered to the saints. Divers
 perversions, for example, of the
 great doctrine which is the dogma
 of the standing or the falling church
 are rife in our day, as they were in
 the time of an apostle whose soul
 has all nerve and sinew, and who
 cried out, when those elders fell
 upon his neck and kissed him.
 "What mean ye to weep and break
 my heart?" We say those perva-
 sions of justification are as preva-
 lent now as they were then; but
 who can repeat the honest words of
 that great apostle without peril of
 attitudinizing on the charge of bigotry?
 Hear him:

"But though we, or an angel
 from heaven, preach any other
 gospel unto you than that which we
 have preached unto you, let him be
 accursed." As we have said before,
 so say I now again, if any man
 preach any other gospel unto you
 than that ye have received, let him
 be accursed.

There are men in our day who
 pervert that gospel far more grossly
 than those Galatian troublemakers
 ever dared pervert it; and, so far from
 being anathema in the judgment of
 some who are called Christians,
 they are welcomed as dear brethren.
 But, some one may say, Paul is
 speaking of the whole gospel, and
 not merely of a single doctrine. To
 this it might be enough to say that
 the whole gospel can be changed by
 the corruption of a single dogma;
 but, if further illustration were
 needed, take those words of St.
 John, the disciple whom Jesus
 loved, the burden of whose teaching
 is, "Little children, love one an-
 other," and who is represented as
 repeating these words in the church
 assemblies, when he had become so
 old and feeble to say anything more,
 "and hear him:
 "If there come any unto you and

bring not this doctrine, receive him
 not into your house, neither bid
 him God-speed; for he that biddeth
 him God-speed is partaker of his
 evil deeds."

What *do you*? The words im-
 mediately preceding show that he
 speaking of the "doctrine of Christ."
 The heart of the apostle is stirred,
 and it is not within him for "many
 deivers are entered into the world
 who confess not that Jesus Christ
 is come in the flesh. This is a de-
 ceiver and an anti-Christ."

Self-say man denied that Jesus
 is the Son of God, denied that the
 word was in the beginning, that he
 was with God, that *he was God*,
 denied that the word was made
 flesh and dwelt among us, St. John
 would not give him house room, or
 bid him God-speed.

St. John was right. What kind
 of love is this that can hold fellow-
 ship with works of darkness and
 with lies?

We are not called to any such
 charity as this. What communion
 hath light with darkness? What
 fellowship hath Christ with Belial?
 What part hath he that believeth
 with an infidel?

One of the direct of all modern
 heresies is this propensity to give
 the right hand to Satan when he
 comes in the guise of an angel of
 light, and to deal with him as
 though he were a very respectable
 angel, though somewhat fallen.

Yes, when men hold Christ the
 living Head, and hold him as their
 Saviour, lovingly and truly, although
 they may differ in the circumstan-
 ces of their order, it is the nearest
 of all history to turn away and deny
 to them the name and the franchise
 of disciples of Christ; but the
 charity which is formed with its
 words of rebuke in the name of
 Christ, and the essentials of
 faith, for how can the two walk to-
 gether? The essentials of faith, may
 seem to need further definition,
 but we are not going to give it just
 the name which the Apostle John
 gives to it in his three epistles.
 There is a greater misapprehen-
 sion of character than that which
 they make who represent St. John
 as an effeminate youth, with flowing
 locks and southern dress. He was
 a man of thunder. With him
 there is no middle point between
 light and darkness, truth and false-
 hood. He knows no other alterna-
 tive. It is either for or against.

To them who are for Christ and his
 gospel he has a heart full to over-
 flowing of childlike love and tender-
 ness; but to others he has not even
 a God-speed on the highway.
 In his proof of charity he is equally
 radical. The cherishing of hatred
 against a brother on the ground of
 envy, prejudice or ill-will is the
 plague-spot which in his estimate
 marks the children of the wicked
 one.—*Advocate*.

SPASM OF EXERCISE.—In this age
 of the world, when the body is car-
 ried a mile a minute, and thought
 transmitted with lightning speed,
 people think that everything, how-
 ever hard, and soul-winning is in-
 eluded, must be done in a moment
 or not at all. They forget that to
 evangelize a community or the world
 requires something more than par-
 oxysms of labor. Moral and civil
 reforms are not produced in a day.
 A large practice is not built up in
 an hour. Why, then, expect to
 produce religious reforms in a day
 or week? The sun does not dart
 into his meridian splendor. He
 toils from early morn till noon. The
 scholar, the artist, the mechanic, do
 not leap into eminence. The just
 man does not vault into excellence.
 The path of these is as the shining
 light which shineth more and more.

The reason why the lives of so
 many are barren is, that they trust
 too much to spasmodic action, and
 too little to persistent work. They
 lack that superior quality called the
 power of application. So if you
 wish to see a work of grace going on
 this year in your community, and
 the church to which you belong re-
 vived, you must settle down to
 steady work for Jesus. Duty must
 prompt you when inclination is
 wanting. You promised to serve
 Christ. You are under obligation
 to work for him. You should have
 a religious as well as business sense
 of honor. You must work in dark-
 ness, and amidst doubt—bear re-
 proach, endure trial. Why need
 you fear, grasping as you profess to
 do, the hand of the Master?

THE MEANING.—What did the
 Master mean when he saw the tax-
 gatherer and said, "Come, follow
 me;" and when the other said,
 "Let me go and bury my father,"
 "Come, follow me?" It didn't mat-
 ter, the necessity nor the exactness
 of the demand—it was "Come, fol-
 low me." Running through the
 studio and study, through office and
 mart, through legislative hall and
 the streets, is still that cry: "Come,
 follow me." I want not your
 "amen," I want not your substitute.
 I don't want your ten per cent. I
 want you.

The hardest thing to hold in this
 world is an unruly tongue.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, DECEMBER 17, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. E. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

TO SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

AT CONFERENCE.

We give the proceedings of the Alabama Conference up to the fourth day, Saturday evening, when we were compelled to leave for our duties at home. While in Montgomery we were so fortunate as to be the guest of our worthy brother, Colonel J. Thornton. From him, and from all the members of his family, we received many kindnesses. Our impressions of the Conference were gratifying and pleasant in the highest degree, and we gratefully acknowledge the heartiness and courtesy of our reception by the Conference. For a long time familiar with the names of the members, the most of which have been as household words in the office of the ADVOCATE, to see them face to face was a continuous and delightful feast. It was with deepest regret that we were constrained to leave Montgomery before the adjournment. The attendance of laymen was very good, and they participated pretty thoroughly in the business. We doubt whether any Conference can present a finer body of lay representatives, many of whom are amongst the most distinguished citizens of the State. The proceedings of the Conference, after Saturday, will be furnished by another hand. What may not be in time for this issue will appear next week.

BISHOP KEENER reached home on Tuesday, after an absence of nearly three months. The Bishop's last Conference was the Little Rock, of which he furnishes us an account in this week's ADVOCATE. We hope to hear still more from his pen of the state of the church and of the country in Arkansas. His impressions of that region are altogether most favorable. The prospects of Methodism are very flattering, and our church is there spreading over a magnificent territory.

MISSISSIPPI CONFERENCE.—This body met on Wednesday morning last at Crystal Springs, Mississippi. Dr. Walker represents the interests of the ADVOCATE. We are sorry, exceedingly, that we could not accompany him, and share in his agreeable mission. Other engagements have compelled us to forego the pleasure of mingling with our brethren in their annual convocation. Of course they will devise liberal things for the paper, and we shall be glad to co-operate with them in all measures looking to the extension of our circulation, and an increased measure of usefulness.

PROCEEDINGS OF THE ALABAMA CONFERENCE.

FIRST DAY.

The Alabama Conference of the Methodist Episcopal Church South was organized in the year 1832, and held its first session in Tuscaloosa. In the year 1865, at the session held in Columbus, Mississippi, the Conference was divided into the Mobile and Montgomery Conferences, which held their first sessions respectively in Tuscaloosa and Tuskegee. By the General Conference of May, 1870, the northern portions of the two Conferences were thrown into the North Alabama Conference, then organized, and that portion of the old Alabama Conference formerly lying within the State of Mississippi was thrown into the North Mississippi Conference, and the Mississippi Conferences. The remainder of the territory of the Mobile and Montgomery Conferences was renominated under the title of the Alabama Conference, the first session of which was held in Montgomery, December 7, 1870, according to the minutes following; this being called the thirty-eighth session since the first forming of the Alabama Conference.

Conference was called to order at nine o'clock A. M. by Bishop McTyeire, and was opened with religious services. The roll was called by the secretaries of the late Montgomery and Mobile Conferences. J. M. Brown was elected secretary, E. M. Bounds assistant secretary, and A. V. Lee statistical secretary. A special committee was appointed to nominate the members of the Conference Board of Missions. The presiding elders were constituted a committee to nominate the members of the standing committees. A special committee on temperance was ordered.

The standing committees were appointed as follows:

Education.—A. S. Andrews, chairman; W. Otis, A. W. Cottrell, J. R. John, S. P. Richardson, G. F. Ellis, T. F. Mangham, W. Shapard, W. Lowther, R. S. Woodward, C. M. Howard, A. G. Briggs, T. A. Johnson, W. A. Sampey, L. M. Edwards, G. A. Pace, W. M. Shockly, Neil Gillis, M. Padgett, J. B. Cottrell and W. C. Menefee.

Sunday Schools.—E. D. Pitts, chairman; W. L. Baker, S. F. Pilley, J. R. Rogers and J. W. Patton.

Books and Periodicals.—P. G. Wood, chairman; R. B. Crawford, M. J. Law, R. M. Powers and T. M. Williams.

Memoirs.—E. L. Loveless, chairman; A. Dowling, J. Bancroft, J. S. Moore and W. A. Edwards.

Bible Cause.—W. M. Motley, chairman; L. Patterson and C. G. Ellis.

Temperance.—J. Hamilton, chairman; W. H. Ellison, B. B. Ross, J. L. Duncan, R. E. Jones, J. W. Solomon, S. M. Thames and S. P. Richardson.

The Conference, as organized, is composed of one hundred and forty preachers, of whom about one hundred were present at the calling of the roll. Forty-two lay members were reported, of whom about one-half were present. Bishop McTyeire is a fine organizer, and the Conference was completely in working order by the hour of adjournment. The Conference is an exceedingly fine body of men, many young and middle-aged, and a pretty considerable sprinkling of venerable men, whose white locks are conspicuous in the assembly. Bishop Andrew was present, occupying a seat near the secretary's table. He appears "in age and feebleness extreme," much broken and wasted since we last saw him four years ago, but still the beloved and heroic, and invested with the majesty of a character and life which will ever adorn the history of our church.

SECOND DAY.

Conference met at the usual hour. Bishop McTyeire gave out the hymn, and Bishop Andrew led in one of his peculiarly unctious and comprehensive prayers.

Question sixth was taken up, and the following brethren were announced as transfers to the Conference: J. Barker and A. J. Coleman, from the Mississippi Conference; H. Urquhart and E. V. Levert, from North Mississippi Conference; O. R. Blue, R. E. Carey and D. C. Crook, from North Alabama Conference.

J. Hamilton, O. R. Blue, A. H. Mitchell, J. B. Cottrell, E. Wadsworth, P. G. Wood, T. M. Williams and J. R. John were appointed a committee to secure an act for the incorporation of the Conference. Dr. T. O. Summers addressed the Conference in relation to the interests of the Publishing House at Nashville, and of the church periodicals.

Dr. J. B. McFerrin, the missionary secretary, was introduced, and presented a communication and papers on the subject of missions, which were referred.

The annual exhibit of the New Orleans Christian Advocate was presented by the editor, and it was referred to a special committee of five, composed of W. Shapard, J. B. Cottrell, M. S. Andrews, E. Wadsworth and A. S. Andrews. The editor then addressed the Conference on the condition and claims of the New Orleans Christian Advocate. J. B. Cottrell was appointed a committee to receive subscriptions to the Southern Review and the Baltimore Episcopal Methodist.

Reports from the East Alabama Male College and the Southern University were presented and referred.

Conference resolved to sit with open doors on the examination of character.

Question twentieth was taken up; and the examination of characters was proceeded with. Each preacher, as his name was called, was required to read the full statistics of his work—a tedious but a most thorough and instructive process. A committee was appointed to report in reference to the membership of the district conferences.

THIRD DAY.

After the usual opening exercises Dr. Mitchell presented a report from Centenary Institute, of Sumnerfield, which was read and referred.

The motioned interests of the Conference were referred to the Preachers' Aid Society and Legal Conference of the late Mobile and Montgomery Conferences.

The exhibit of the Publishing House at Nashville was read and referred.

At the request of E. D. Pitts, Conference determined to hold a meeting in behalf of the interests of Sunday schools on Monday night.

The greater part of the morning session was taken up in the examination of character. The reports, as read by the preachers when their names were called, exhibit a healthful and prosperous state, financially and spiritually. The collections appear to be nearly up to the amounts apportioned to the several charges, and the deficiencies in the preachers' salaries are not great. The preachers generally have been pretty well supported. We were agreeably impressed with the general fullness and accuracy of the reports. During the morning a lively discussion was elicited on the subject of class meetings. The Bishop inquired particularly about them, and also in reference to the administration of the Lord's Supper at all the appointments, and the baptism of children.

The following constitution of the Conference Missionary Society was reported and adopted:

CONSTITUTION.

Article 1. This board shall be denominated and known as the Board of Missions of the Alabama Annual Conference, auxiliary to the Board of Missions of the Methodist Episcopal Church South.

Art. 2. The officers of the board shall consist of a president, vice president, secretary and treasurer, and five managers, who shall be chosen quadrennially by the Conference. In case of vacancy by death, resignation or otherwise, the board shall fill the vacancy, subject to confirmation by the Conference.

Art. 3. The president, and in his absence the vice president, shall preside at all meetings of the board.

Art. 4. Five members shall constitute a quorum.

Art. 5. The treasurer shall take charge of all the funds and property of the board, subject to the order of the board, and shall make an accurate and full report, annually, of all the receipts and disbursements of the board.

Art. 6. The secretary shall keep

a full and complete record of the proceedings of the board, and make the annual report of the board.

Art. 7. Forty per cent. of the collections made for missions in the bounds of the Conference shall be transmitted to the treasurer of the Board of Missions of the Methodist Episcopal Church South, at Nashville, Tennessee. Should any surplus accrue, after defraying the expense of missions in this Conference, it shall be also forwarded to the treasurer of the Board of Missions of the Methodist Episcopal Church South.

Art. 8. There shall be a public anniversary of this board at the time and place of the meeting of the Annual Conference. At said anniversary a report, or an abstract of the report, of the secretary and treasurer shall be made, and the interests of the missionary cause promoted in such manner as the board shall deem expedient.

Board of Managers.—W. M. Motley, J. I. Moore, F. L. B. Shaver, A. J. Briggs and Josiah Barker.

FOURTH DAY.

This morning, Saturday, the rain was pouring down, and the atmosphere was raw and penetrating. Conference opened, however, with a full attendance of members, but without the usual number of visitors.

The following local preachers were elected deacons: Borryman Hawkins, Levi Smith, Christopher H. Kelly, James E. L. Connerly, David C. Stanley, Madison Potter (colored), Archibald M. L. Douglas, Franklin Jeter, Joseph C. Avent, James E. D. Braswell and Norman A. Gillis.

The following local preachers were elected elders: John Knight Ward, James F. Dowdell, L. Alpheus Jones and Philemon O. Harper.

The following traveling preachers were elected deacons: William H. Morris, William M. Winn and David J. Wright.

The following traveling preachers were elected elders: Thomas A. S. Adams, Reuben M. Powers and Thomas S. Armistead.

According to previous announcement Dr. McFerrin, at twelve o'clock M., addressed the Conference on the subject of the missionary debt. The missionary secretary's talk was characteristic and effective, and the amount apportioned to the Alabama Conference, \$1,000, was all pledged in a few minutes. When this was done the fact came out in some way that the Western Conference, which Bishop McTyeire organized in the past autumn, had not been able to pay any part of the \$250 which had been assigned as its share of the old debt.

The opportunity for so handsome an act of generous and fraternal courtesy could not be allowed to pass unimproved, and in twenty minutes the amount was made up. Thus Alabama sends her greetings to the Western Conference. Altogether the pledges and money paid must have nearly reached the sum of \$2,000.

Before the adjournment of the morning session Rev. Joshua T. Heard, one of the old and honored members of the Conference, announced his retirement from the Conference, and took an affecting leave of his brethren, with whom he has labored from his youth, and by whom he is universally beloved. Words of regret were uttered by several, and the Bishop, after commending his exemplary course as a church officer and presiding elder, commended him to the divine guidance and peace. By the change of Conference boundaries Bro. Heard's lot falls within the Mississippi Conference, of which he now becomes a member.

FIFTH DAY.

(Proceedings furnished by Rev. C. J. Nugent.)

Conference met pursuant to adjournment. Bishop McTyeire in the chair. Divine service by M. C. Turrentine. The minutes of Saturday were read, amended and approved. On motion, the vote by which T. A. S. Adams was elected to elder's orders was reconsidered, because the Conference voted in error.

The following preachers were ordained on Sunday: Traveling deacons, William H. Morris, William M. Winn and D. J. Wright.

Local deacons: D. C. Stanley and McL. Douglas.

Traveling elders: R. M. Powers and Thomas S. Armistead.

A communication from Dr. Boring, on Orphans' Home, was read and referred to a committee of three, consisting of J. L. Cotton, C. M. Howard and M. S. Andrews.

Question 6. Who are received by transfer from other Conferences? A. D. McVoy, from North Alabama Conference, and William Murrah, from North Mississippi Conference.

Question 18. Who are superannuated? J. W. Jordan.

Edward Wadsworth presented the report from the committee appointed to nominate trustees for the Southern University, which was adopted, as follows: J. W. Taylor, president; Rev. J. Hamilton, vice president; J. J. Garrett, secretary; Rev. Bishop James O. Andrew, D. D., Rev. A. S. Andrews, D. D., Rev. A. H. Mitchell, D. D., Rev. T. O. Summers, D. D., Rev. J. Bancroft, Rev. S. P. Richardson, Rev. J. L. Cotton, Rev. J. S. Moore, Hon. W. M. Byrd, Hon. A. A. Coleman, F. M. Peterson, M. D., Gaston Drake, M. D., John H. Y. Webb, W. E. Kennedy, H. A. Stollenwerck, William Otis, Hon. P. G. Wood, Hon. David Clepton, Rev. John W. Rush, Benjamin Rush, General J. G. L. Huey, W. W. Powers, T. J. Seay, Rev. W. M. Motley and Rev. D. M. Hudson.

Conference resumed the examination of character.

The venerable Bishop Andrew addressed the Conference in a touching and impressive manner; whereupon Dr. T. O. Summers offered the following resolution, which was adopted by a rising vote:

Resolved, That we have heard with great interest and emotion the affecting and fatherly address of the venerable Bishop Andrew. We receive with filial regard his godly counsel, and the more so as he considers this, in all probability, his last visit to this Conference. We pray that his valuable life may be prolonged to the church which he has served so long and so well, that his last days may be serene and happy, and that his end may be triumphant: a fitting close to his long and useful life.

Rev. R. J. Harp, agent of the New Orleans Depository, was introduced.

Rev. F. Perdne, having been received into the Conference at a previous session of the Montgomery Conference, from the Methodist Protestant Church, came forward and took the ordination vows as required by the Discipline.

Question 4. Who are admitted into full connection? D. J. Wright and W. H. Morris.

The Bishop addressed the Conference with reference to the urgent need in the Western Conference of young men as preachers.

The Raleigh Christian Advocate. This paper, under its new name, Christian Advocate, comes out much enlarged and improved. It is published in the city of Raleigh, North Carolina, and is the organ of the North Carolina Conference. It is one of the best of our Advocates, and we congratulate the editor and publisher upon the evident success and prosperity which have attended his labors.

Southern Enterprise.—While at the Alabama Conference we received a package of hosiery at the hands of Bro. Wild, from Caunt & Co., of the Opelika Hosiery Factory. The goods are pronounced excellent by one who is a competent judge of such things. The enterprising manufacturers are deserving of all encouragement.

North Carolina Conference.—This Conference adjourned on the twenty-ninth of November. The following are the statistics as reported:

Local preachers, 212; white members, 45,816; colored members, 1,205; infants baptized, 1,320; adults baptized, 1,787; Sunday schools, 588; teachers, 3,646; scholars, 24,198.

Church Fair.—In another column will be found a notice of a fair, to be held in Algiers, for the benefit of our church in that place. The fair opens on the twenty-first, and continues until Christmas eve. The object is a worthy one, and we hope that the efforts of the pastor, Bro. Miller, and his people will be crowned with abundant success.

THE LITTLE ROCK CONFERENCE.

Mr. Ennon: Herewith please find the appointments of the Little Rock Conference. They were read out on Monday night after a sermon.

But preachers listen with bated interest to anything which immediately precedes the announcement of the cast of the year's work. Their minds are out in the hills and hollows; now glancing at the creeks swollen with the rains of winter, now at the long rocky ridges, and now at their dear ones—how much or how little they will be separated from them. All the possibilities of a good home or scarcely any, good circuits or poor ones, flit before the imagination. At the Conference one of the preachers had been joking and much joked about a certain nameless yet noted field as likely to be his fate, though really nothing was further from the expectation of his friends; when, wonderful to tell, at the reading out that was the circuit which fell to his lot! He rushed out of the house as if an alarm of fire had sounded.

The people of Washington were sitting in their new church, which had been dedicated during the session, and awaiting with great solicitude to know who was to be sent there. The station was on the last of the list, and as we had all night before us—no telegrams to read, and no stages or boats about to leave—they listened as if their time never would come. At length, judging by the applause, they were delighted with both the presiding elder and the preacher assigned them.

Usually one cannot tell whether the preachers are pleased or displeased with an appointment. The regulars have seen too much service to be daunted in advance by the more prospect of any work. They show the lines of a true heroism in the eye and lip. They do not know it, but oh! it is harder to give a hard appointment than it is to receive it. Those wives and children weigh upon some other heart besides their own. Indeed the wife is often decisive of a minister's fate, and helps out the fortunes of her husband mightily. These lists are not exactly as the laws of the Medes and Persians, for facts sometimes come to light, in twenty-four hours after the reading, which no pains can discover beforehand; but they are nearly so. So soon as a place is announced the preacher feels a property in it, and so the people do in the appointee; and change are liable to be looked upon by both parties as if made at their expense.

The Conference did a good deal of business well with dispatch—no speaking for effect or self-relief. It has a grand territory, and has the muscle and brain to cultivate it. Much needs to be done toward systematizing its energies so as to yield the highest result. Preachers must, here and elsewhere, feel responsibility at least to an extent which will prevent every man from showing his face at Conference who has neglected his work or the collections. The presiding elders are the main dependence for such an improved discipline, and we confidently expect a great advance in all departments of the service next year. Some of them have already keyed up their districts to a high tone.

The finances of the church received more than ordinary consideration from the Conference, because their widows and orphans' collection showed a lamentable deficit. The Louisiana plan was adopted for the future.

The missionary results were far better. The plan of taking up a collection against time, lately discovered in Tennessee and Kentucky, was successfully tried here. The amount of the old debt assessed to this Conference was \$900. The time consumed in realizing this sum it will scarcely do to tell. Brother Blew, of the Western Methodist, warns me to be careful what I write about Arkansas, and Sir Walter Scott advised Mungo Park not to tell that he saw them burning "black stones" in Japan, or all that he saw anywhere, if he wished the people to believe him; nevertheless, it is a fact that from the minute the matter was announced in the Confer-

RENO.

ence room until the minute when Dr. Winfield had finished the collection of \$1,040, time enough had not elapsed (by the *Carondelet* watch) to boil an egg hard: \$140 over the sum required. Nor is this all: on the night of the same day, the missionary meeting was held; two speeches made, one by the same successful collector, and \$1,545 were collected. There!—let Tennessee and Kentucky either give up their watches or their hats.

The Bishops' collection was up to the full claim.

There were received on trial Walter W. Weir, Josephus Loving, Jas. L. Nabors, F. D. Van Valkenburg and Robert H. Sanders.

Into full connection, Jas. A. Anderson, Ambrose D. Jenkins, Geo. Hare and Thomas H. Ware.

Numbers in society, 13,226.

The full minutes have been forwarded to the Nashville Advocate.

The next session of the Conference is to be held at Little Rock.

Among very noticeable items of this Conference is an old soldier, Rev. J. Sanford, eighty-one years old, taking an appointment, and riding as briskly into the fight as the old Duke of Brunswick at the battle of Crecy. Last year, he had a circuit of four appointments, which he increased to eighteen. He goes in for week-day preaching, and does not heed that Georgia cry for "Sabbath preaching," which has worked no little damage to our cause by furnishing those who wish it an excuse for neglecting thinly settled neighborhoods and for contracting circuit work to a few easy-going Sunday congregations. He is of the Georgia stock of preachers—the best I know of.

Among the resolutions passed are two excellent ones, with which I close this communication, expecting to write another, next week, upon the trip from the Indian Mission Conference to Washington, via an occasional "rise" and much very fine country.

RESOLUTIONS UPON THE SOUTHERN REVIEW.

Resolved, That we heartily endorse the action of the General Conference by which the Southern Review became the Review of the Methodist Episcopal Church South. We recognize in it a quarterly which justly takes rank with the Northern British, the London, the Edinburgh and other great periodicals in Europe, and as standing at the head of the quarterlies of this country.

Resolved, That we have received it not as upon trial, but fully; and that we will do all we can to extend its circulation among our people and the communities where we labor, believing that we shall thereby greatly advance the influence of our church, and elevate the standard of thought and morals throughout the country.

HOMER COLLEGE RESOLUTION.

Resolved, That this Conference reaffirms its hearty interest in Homer College, and recommends it especially to the patronage of the church and people of south Arkansas as eminently convenient and competent for the education of their sons. Its healthy location, and the refinement and intelligence of the community around it, as well as its accessibility to the people of south Arkansas, are strong inducements for our hearty and continued cooperation with the brethren of Louisiana in its patronage.

APPOINTMENTS.

LITTLE ROCK DISTRICT.—R. S. Hunter, P. E. Little Rock: First charge, Henry B. Frazier; Rutledge chapel, J. Loving; Argenta mission, to be supplied; Little Rock circuit, J. M. Cline; Bayou Metre, Isaac N. Pace; Loneoke, R. W. Massey; Duvall's Bluff, S. G. Coleman; Richwood's mission, W. W. Weir; Austin circuit, N. S. Burnett; Thomas H. Ware; Mill Creek, Calvin M. Slover; White River, Burton Williams; De Witt circuit, George W. Primrose.

PRIZE BLUFF DISTRICT.—Cadesman Pope, P. E. Pine Bluff, W. C. Hearn; Plum Bayou, John H. Riggins; Swan Lake, George Har; Red Fork, Franklin M. Monk; Sulphur Springs, T. B. Attebury; Benton circuit, to be supplied (by Alfred H. Ferguson); Collegeville circuit, James A. Anderson; Perryville circuit, John M. G. Douglass; Lehi circuit, William J. Davis; Branchville circuit, to be supplied (by J. C. Ligon); Selma, J. H. Blakeley.

MONTICELLO DISTRICT.—M. H. Wells, P. E. Monticello, James R. Harvey; Mount Pleasant, W. J. Scott; Green Hill, H. Townsend; Hamburg, Henry B. McKimmon; Line circuit, Enoch L. Cudde; Bartholomew circuit, Alexander B. Winfield; Endora circuit, Leonard M. Chandler; Ennis mission, J. Fryor.

ARKADELPHIA DISTRICT.—A. R. Winfield, P. E. Arkadelphia, John F. Carr; Clark circuit, W. R. J. Husbands; Nutreesboro mission, Thomas Hunt;

Caddo mission, Hezekiah W. Bales; Hot Springs mission, F. D. Van Valkenburg; Rockport circuit, to be supplied (by Finch Winburn); Tulip circuit, John P. Holmes; Moro mission, to be supplied (by J. W. Lahnus); Princeton circuit, Brittain G. Johnson; Hampton circuit, Harvey H. Watson; Warren circuit, George W. Matthews, B. C. Weir, sup.; Talestene circuit, James Stineall; American Bible Society agent, James E. Caldwell.

CAMDEN DISTRICT.—Horace Jewell, P. E. Camden, P. W. Archer; Buena Vista, J. Sanford; Wachita, M. H. Fielding; Falcon station, D. T. Holmes; Falcon circuit, Jos. Turrentine; Magnolia circuit, E. N. Watson; Pleasant Grove, J. P. Hulise; El Dorado, J. A. Parker, R. P. Davies; Lapeal, J. W. Johnson; Lewisville circuit, Fletcher Pierson; Olive Branch, J. L. Nabors; agent for Sabbath schools, William H. Browning.

WASHINGTON DISTRICT.—And. Hunter, P. E. Washington station, C. O. Steele; Moscow circuit, Arthur W. Simmons; Columbus circuit, Thomas W. Hayes; Center Point circuit, W. R. Gardiner; Paracelita circuit, to be supplied (by J. W. Mads); Richmond circuit, Robert H. Sanders; Polk mission, Ambrose D. Jenkins; Rondo circuit, B. O. Davis; Bascomb Ward.

Superannuated: Alex. Avery, Joseph G. Ward, Thomas Hunt and Richard F. Culburn.

Located at their own request: Lewis Julian, J. M. Pirtle and P. H. Barcus. Transferred: G. W. Evans transferred to the Western Conference; W. Moores and G. E. Butler transferred to the Los Angeles Conference; J. F. Hall transferred to Arkansas Conference, and stationed at Dardanelles; Jonathan A. Chawer transferred to Trinity Conference; James E. Cobb and R. P. Parvin transferred to the Louisiana Conference.

BISHOP WIGHTMAN.

Bishop Wightman, accompanied by his wife, reached our city on Saturday evening, December 7, en route for their home at Charleston, South Carolina, on the return from the episcopal visitation of the conferences on the Pacific coast, and were guests during their stay at the hospitable house of Bro. Monroe R. Collins. They are both in fine health, and speak in terms of high gratification with their sojourn on the other side of the mountains. Sister Wightman did us the honor to call at our office, in company with the Bishop and her hostess, for a tour of observation through the Publishing House, and if she was favorably impressed with it we shall esteem it a high compliment. Notwithstanding the fatigue of a week's travel, the Bishop answered the demand for two sermons, in the morning at the First Church and at night at the Centenary. We regret not to have had an opportunity to hear them, but heard of them on all sides as sermons of the finest finish and of great power. He resumed his journey on Tuesday afternoon for home, going via Nashville. May a good providence attend him and his estimable lady in their travels, and spare their lives to each other and to the church for a long time and much happiness and usefulness.—*St. Louis Christian Advocate.*

A FAIR IN ALGIERS.

A fair for the benefit of the Methodist church of Algiers will be held in the Masonic Hall, at that place, on Wednesday, Thursday, Friday and Saturday evenings, December 21, 22, 23 and 24, 1870. The doors will be open each day at noon, except Wednesday, for lunch.

It is hoped that by means of this fair a sufficient amount will be realized to support the pastor whom the Bishop may station at Algiers for the coming Conference year. The ladies of the Algiers Methodist church, who are the prime movers in this enterprise, deserve to be encouraged by a liberal patronage, and all, especially Methodists and the friends of Methodism, are solicited to bestow it. The Algiers church, being far from strong, numerically or financially, is dependent for the support of a pastor upon these and similar efforts, and a failure of these might be fatal to the cause of Methodism here. Surrounded, as we are, by many bitterly opposing elements, we appeal to our friends for help.

But it must not be supposed that no inducements are offered to those who may come to the fair expecting to get their money back. Its full value will be returned in whatever may be desired. All the delicacies of the season will be provided for those who may come with reference to the wants of the inner man; while to persons of aesthetic tastes, whatever the art of our ladies could produce in the line of the beautiful, to say nothing of articles of practical utility, too numerous to mention, will be offered for disposal upon reasonable terms. It is a fact, which no one of general information was ever known to deny, that the ladies of the Algiers Methodist church cannot be excelled in self-sacrificing devotedness, persevering industry, administrative ability, a correct and delicate taste, and whatever other qualities are essential in getting up an entertainment to give universal satisfaction.

EDUCATION IN THE SOUTH.

The Methodist, a Northern Methodist journal, thus speaks of public education in the South:

"We have just completed a pretty thorough examination of the leading Southern newspapers, representing nearly every considerable city and town from Baltimore to Galveston, with special reference to this question of popular education. The result is not at all encouraging. Education—that is to say, public education—was never a matter very dear to the Southern heart. It does not appear to be so now.

In turning over our files of Northern papers we find items not at all complimentary to the Christian civilization of some of its great States. Take this as a sample:

In Pennsylvania there are 78,800 run sellers, and 13,870 school teachers. Cost of supporting schools, \$5,863,729; cost of liquors consumed, \$831,477,000.

Now might not these dear people, who are spending millions, and compassing sea and land to make proselytes in the South, judiciously expend their surplus gold and zeal in efforts to improve the mental and moral condition of some of their greatest and most enlightened States? We think so. W.

Methodist Church North in the South.

A correspondent of the Western Christian Advocate, Cincinnati, seems to rest his hopes of Northern Methodism in the South on an increased fondness for "the old flag." He says:

Just as rapidly as American patriotism, a hearty love for the old flag, possesses the South, will the Methodist Episcopal Church spread among the white people of the South. Wherever the eyes of white men dance to see the Star-Spangled Banner floating in the sky, there will be as many hearts to bid the Methodist Episcopal Church welcome.

From what some of us know of the memories of this "old flag" in these last days, and some of the scenes over which it waved and lent the sanction of its presence and authority, we are inclined to think that the triumph of Northern Methodism is a remote consummation if it must wait until "the eyes of Southern people dance" with joy to see it.

RELIGIOUS TOURNAMENTS.

Dr. Bond, in the Baltimore Advocate, says that some respected correspondent has written to him to know his opinion of holding tournaments for the purpose of assisting to build churches. The doctor says that the subject had never previously received his consideration, not having heard of tournaments as financial religious devices. He says: "We have heard of benevolent balls, and pious lotteries, and sanctified hazards, but not of consecrated tournaments," and concludes that all such compromising expedients take more from virtue than they return in coin. So say we. W.

JUVENILES will be delighted to learn that the castor bean crop of Illinois is immense.

PROF. A. T. BLEDSOE.

We find the following, announcing the reception of this gentleman into our church, in the Baltimore Sun of the fifth instant. With the services of Drs. Munsey and Bledsoe, the congregation at Central church in Baltimore will be blessed beyond the common lot of man in pulpit ministrations:

"CENTRAL M. E. CHURCH.—Admission of Dr. Bledsoe.—His Sermon.—Yesterday Dr. Albert T. Bledsoe, of the Southern Quarterly Review, who lately expressed publicly his dissent from certain tenets of the Protestant Episcopal Church, formally connected himself with the Methodist Episcopal Church South, and afterward preached from the pulpit of the Central church of that denomination, Lexington street, on predication. There was a good congregation present. Rev. Dr. Munsey, pastor of the church, conducted the services incidental to such occasions, which are simple and direct.

"Dr. Bledsoe appeared before the altar, and after answering the questions propounded him by Dr. Munsey, according to the requirements of the Church Discipline for receiving new members, promising to conform to all the usages of the Methodist Episcopal Church South, was duly admitted. After this ceremony Dr. Bledsoe ascended the pulpit with Dr. Munsey, and read his sermon.

A THRILLING SPECTACLE took place in Rome as it was being attacked by the Italian troops. The poor wretches in the papal prison, thinking their day of deliverance had come, crowded to the window bars of their prison to see what they could of the strife. The papal zonaves fired on them, and many fell back into their cells wounded. When the papal soldiers and prison-keepers were defeated, they hastily fled and left the poor wretches locked in without food or drink. In this condition they were for some time forgotten, until the people heard their cries and moved in a restless mass to burst open the prison doors. A touching scene then presented itself: friends and relatives fell on each others' necks; one wept in silence, another broke forth in the most violent ejaculations, while the third fell on the neck of a mother. Very few eyes remained dry. The one who received special sympathy was an advocate named Petroni, who had been pining for seventeen years in this prison for a political crime. His friends did not recognize him at first, in his changed condition.

Married.

On the seventh of December, by the Rev. F. White, Mr. JOSHUA B. KEMPER, of Garrard county, Kentucky, to Miss EUGENIA PEARCE, of Avozelles parish, Louisiana.

On the fifteenth of November, 1870, near the town of Lexington, by Joseph D. Newsom, Mr. JESSE FOSTER to Miss MAGGIE HOUSEN, all of Holmes county, Mississippi.

On the twenty-third of November, 1870, at the residence of the bride's father, Mr. R. A. Anderson; by Joseph D. Newsom, Mr. H. L. D. GRIFFIN to Miss EMMA A. ANDERSON, all of Holmes county, Mississippi.

Obituaries.

JAMES M. McLENN died October 17, 1870, at the residence of Bro. G. C. Marlers, seven miles south of Forest, Scott county, Mississippi.

Bro. McLenn was a native of Virginia, and came into the neighborhood of Bro. Marlers some twelve months before his death. A part of this time he was engaged in teaching school. His disease was consumption, but he bore it with much patience. About an hour before his death he asked the time of day, and said death would be a happy exchange.

He joined the Methodist Episcopal Church South September 1, 1870. His father was a Presbyterian minister for twenty-eight years, of which church Bro. McLenn was formerly a member. He has a brother living near Newmansville, Alachua county, Florida, and a sister in Georgia. May they meet their brother in the Christian's home in glory!

IN MEMORIAM.

Mrs. RAMECCA HINER, of Bolivar county, Mississippi, has fallen asleep in Christ, in the seventy-sixth year of her age, after fifty years of discipleship to the blessed Master.

Can I say more? Those five lines contain the best eulogium on the life of a human being that can be written. Of course our excellent sister had to meet and bear the reverses, disappointments and crosses incident to the lives of all God's people. But she followed Christ and died in his love. Hers would be an interesting biography. She had lived here under the Spanish flag, then under the French, then under the United States, afterward under the flag of the Confederacy, and finally fell

NEWS FROM THE CHURCHES.

OPELOUSAS, LA., Dec. 7, 1870.

MR. EDITOR: We closed a meeting last night at this place, which resulted in thirty-three accessions to the church. On last Sabbath twenty-nine persons were formally received into the church at the same time. Such a scene never happened in Opelousas before. We are under obligations to Bros. Adams, White, Frazier and Mullet for services rendered. Bro. B. F. White was with us all the time, and labored efficiently to the end.

NOT DEAD.—Rev. John D. Worrell, in a postscript to a letter on business, writes as follows, from Butler Springs, Alabama, under date of December 3, 1870:

MR. EDITOR: Bro. F. M. Grace, in the paper of the nineteenth of November, writes me dead. Please let him know I am yet alive, and oblige me and some friends.

JOHN D. WORMEIL.

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER has it FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medical virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup," having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

The Child's Corner.

THE ONLY FOUNDATION.
Children who have seen the sea
Rolling in its majesty.
Wave on wave, with deafening roar.
Still advancing on the shore.
Tell me, would you build your home
Where the billows rage and foam?
Could you hope, in foolish pride,
To resist the rolling tide?
Every one of you will say:
Soon I should be washed away:
None but fools would build their home
Where the mighty waters foam.
Dearest children, mark me well:
I have greater things to tell:
You and I alike must be
Builders for eternity.
If we seek our joy on earth,
Pleasant pleasure, passing mirth,
If by our own works is given
Hope of happiness in heaven—
Then we build with foolish hands
On the ever-shifting sands.
And our home will soon be gone,
For the tide is rolling on.
Christ, dear children, is the Rock
That can stand the tempest's shock;
Clouds will darken o'er the skies,
Winds will roar and waves will rise;
Seek ye now in Christ your rest:
Then you will be safe and blest—
Safe through all life's stormy sea,
Blest throughout eternity.

LIFE IN ICELAND.

"Monsieur Noel Nougaret, a Frenchman, while traveling in Iceland, a few years since, was obliged one evening to seek shelter in a poor fisherman's hut. This poor, as they call a hut in Iceland, had been put up but a very short time before. In it the traveler found a young woman, a man, and a little girl scarcely more than a babe. He was welcomed very kindly. Indeed, no people in the world are more hospitable, it is said, than the Icelanders. Rich and poor, high and low, are alike in giving the stranger a kindly welcome, and in doing everything they can for his comfort.

"Worn out and tired with his day's journey, Monsieur Nougaret was soon ready to go to bed. The young woman, taking a light in her hand, led the way to the room set apart for him. Setting down the light and going out, she presently came back with a bowl of warm tea, which she gave to her guest, and then left him to himself.

"While sipping his tea the traveler, tired as he was, began to look somewhat curiously about him. 'I noticed,' says he, 'that this poor hut, on the inside at least, was very strangely built. In fact, in all my wandering I had never seen anything like it before. Different from the other cabins I had been in in Iceland, the roof, instead of being held up by plain, straight beams laid across from wall to wall, had, on the contrary, the appearance of a kind of arched carpenter work. I got up to look at it more closely, and found, to my astonishment, that I was in reality about to go to bed in the belly of a whale! To make the framework of the cabin they had taken a portion of the skeleton of a great whale, and set it up so as to rest on the ends of the ribs, the backbone forming the center piece of the arched roof which had first attracted my attention.

"The furniture of this strange habitation," continues the Frenchman, 'was of a piece with the house itself. For instance, the stool upon which I sat was the old-fashioned chair of the Icelanders, made of the skull of a horse, upheld by three of the small bones of the leg of the same animal. The chest, in another part of the room, instead of resting flat upon the ground, had for feet the skull of seals, or of dogs, I am not sure which, painted red and green."

"Well! That was a queer kind of a place to live in," said Philip, when Aunt Kitty had finished reading. "And he was in a whale's belly and no mistake—this is Mr. Jonah number two."—Children's Hour.

COME DOWN CLOSE.

"Cousin Lucy," said Minnie May, "I do wish I could be your class."

"Why, Minnie, you have a very dear teacher; I am surprised that you would want to leave her even for me."

"My teacher never talks to us," said Minnie, lifting her eyes to her cousin's sweet face. "She hears our lessons and explains to us what they mean, but it seems as if it were all about somebody very far away, and we didn't have anything to do with it. Then she uses such big words. Lena Phelps says she's sure she picks them out of the dictionary on purpose to puzzle us."

"I'm really afraid, dear, that you and Lena are naughty girls, and don't try to understand Miss Paul. But tell me what your idea of talking is?"

"Why—why—I can hardly explain, cousin, but your girls all get close around you when you begin, and they keep pressing nearer and nearer, and sometimes they laugh, and sometimes they cry, and you keep telling them so sweetly about Jesus. Miss Paul is like a marble statue," said Minnie, getting confused and using the wrong word.

statute," said Minnie, getting confused and using the wrong word.

"Statue, you mean, little Minnie. Well, I can tell you two things you might do. Next Sunday, suppose you all talk to your teacher, not about herself, but about the dear Saviour, and in the meantime you might all pray as earnestly as possible that God may bring a change into your class. And, Minnie, if he don't seem to hear you right away, keep on praying."

Minnie's observations set me to thinking after she and Lucy were gone. I remember having heard of a teacher who used to draw a long breath when her daily school duties were over, saying: "Now I can let myself down," implying that she had been painfully standing on a pedestal all day. This is the way, alas! with some really conscientious teachers in the Sunday school. They never let themselves down. They explain, they lecture, they dictate, but they never talk. And the hungry spirits about them go home faint for lack of food. For bread the teacher has given them, a stone.—Sunday School Times.

The Farm and Garden.

IMPROVEMENT IN TOMATOES.

Do your readers recollect what the tomato was fifteen or twenty years ago? If they do not, let them cut open one of the half-ripened specimens that come from Bermuda in February, and they will see very nearly the natural form of the tomato. It is a three or four-celled berry. From the outer wall there run fleshy partitions toward the center, dividing the cavity into three or four cells. At the center is the placenta, a pulpy mass to which the seeds are attached, and through which they receive their nourishment. To the botanist this is the most interesting kind of tomato, as it presents regular structure, and is in accordance with botanical laws. But the tomato is better suited to our purposes as food if it does not strictly preserve its normal form. In all the many improved kinds of tomato the departure from the original type has been very marked. In many old sorts we had the regularity of the interior broken up, and the division walls and placenta much confused; but this was attended by a great irregularity of the outward forms, and wrinkles and foldings of the surface made an unsightly exterior. The old Feejee gave us great solidity, but with very irregular form, late ripening and a not altogether satisfactory flavor. One of the later improved varieties was the Tilden, which had the advantage of a fair exterior, a very firm outer wall, which gave it an advantage as a market fruit, and a fairly solid interior.

Other varieties show a greater degree of improvement, and there are several of great merit, but we have seen none in which so many good qualities have culminated as in the trophy. It is the result of over twenty years' careful selection and cultivation, with the direct object in view of inclosing the convoluted and confused interior which was found in some of the older varieties within a regular and smooth exterior. It will be seen here that the interior is filled up solid with a multiplicity of division walls, very small placenta, and these, together with the thick outer wall, make the whole interior thoroughly solid and meaty. Now, to a market man, these qualities may have but little importance, as he sells his fruit by the bushel, but to one who really likes tomatoes, and grows them for his own satisfaction, they are of great consequence.

"How did you like the trophy?" said the writer to a friend who had taken home some for trial.

"Like it," said he. "By George! I thought I was eating beefsteak."

This thing seems extravagant to those to whom one tomato is as good as another, but the connoisseurs in tomatoes will appreciate it. We talk about texture, juiciness and flavor in pears and other fruits; why should not the tomato, which is the fruit of the million, be subjected to the same discriminating judgment? There is surely as much difference in tomatoes as in pears, which our pomologists classify as "good" and "very good." Solidity of flesh, evenness of texture and excellence of flavor entitle the trophy above all others we have tested to be classed as "very good." One thing we can state from sad personal experience. The trophy is a product of high culture, and has been nursed and improved for years. It will not stand poor treatment. It is a popular error that tomatoes do best on poor soils. Poor tomatoes may do so, but the trophy demands the best treatment, the same as the cauliflower does. One cannot have the best products of the garden without giving them the best place and the best care.—Hearth and Home.

Min will wrangle for religion, write for it, fight for it, die for it; anything but—live for it.

Scientific.

TIME AND DISTANCE.

At the very bottom of all exact science lies a just conception of time and distance. It may be said that no such thing as an exact science could possibly exist without the ability to accurately measure these relations. In the science of mechanics and its application to practical work, in the shop and manufactory, they are both fundamental in importance. The terms speed, velocity, rate, etc., all express the relations of time and distance, and the measure of power to perform work is a definite number of foot-pounds raised per minute.

The unit of work is one pound raised one foot without regard to the time employed in the elevation. The term work, then, does not include the idea of definite time, while the term power does.

This distinction is of primary importance to the correct conception of the laws of applied mechanics. Work is the overcoming of any resistance, whether the time occupied in its accomplishment be long or short. Mechanical power is that which can perform work to overcome resistance in definite time, whether the power be strength of men or horses, the fall of water or the expansion of steam.

When we attempt, however, to conceive of time and distance we can set no limit to either; they expand to an illimitable extent. We are obliged to conceive of time only as the relation of the succession of events, and of distance as the relation of position. In the measurement of time we adopt as the unit the interval between the two events which succeed each other at uniform intervals. The oscillations of pendulums of uniform length, in the same position upon the surface of the earth, are found by experiment, and may be mathematically demonstrated, to succeed each other with perfect uniformity of interval. The rotations of the earth upon its axis also practically succeed each other at uniform intervals. Thus, we have both an artificial and a natural standard of time.

From natural standards of distance may be derived artificial ones, and standards of time—as the length of a pendulum oscillating seconds—may be made to correct standards of distance or length. From these two standards may be derived all other measures, whatever they may be.

Few have anything like an appreciation of the vast importance of accurate measurement in the natural sciences. But such measurements are all based on time and distance. All weights are primarily derived from measurements of distance, and it follows that all estimation of magnitude, density, hardness, or any other physical property measured by pressure or weight, may be referred back to measurement of distance.

It is therefore in and through the consideration of these relations that we gauge all our sensations of external things. For size, intensity of color and light, form, weight and temperature, all are estimated and conceived only through some application of these relations. Deprive the mind of any means whereby it may estimate or imagine the distance of a body from the eye, and it can form no conception of magnitude, and it is only by comparison of relative distances of parts from each other that it can conceive form. It is true that form also depends upon direction of outline, but direction is not apparent without extent or distance, and hence this consideration does not invalidate the foregoing proposition.

Even our knowledge—in so far as we have any—of the molecular constitution of masses is obtained in great part through the application of these relations. The definite weights in which chemical combination takes place is only an expression of definite bulks, or volumes, established by measure.

These relations are types of that in which all human knowledge consists. We perceive nothing and conceive nothing but relations, and the combination of relations of which the mind takes cognizance are to it the embodiment of all external things. The idea of relation, however, involves the existence of something to be related, and thus the idea of material existence is inferred; but as we cannot go beyond relations in mental operations, the existence of matter can never be made the subject of actual demonstration.

The existence of force is also inferred from change in the relation of distance, and is perhaps as just an inference as that of matter, though in our opinion not so essential to thought. Neither force nor matter can be estimated as entire entities; we can only conceive of them through relations of mass and movement, which are, as we have seen, only measured by the relations of time and distance.

In considering the ideas of matter and force we stand on the very border line which circumscribes thought; but even here, the moment

we attempt to relinquish our ideas of time and distance, we become lost in a maze from which we may return, but through which we find no pathway for the human intellect to transverse.—Scientific American.

NERVE TELEGRAPHS.—Within the flesh or muscular part of the body are two distinct sets of nerves, namely, the motor and the sensory nerves. By the sensory nerves the brain receives intelligence of all outward actions, and the mind becomes conscious of external things, such as light, scent, sound, taste and touch, of pain or pleasure. The motor nerves, on the other hand, convey the intelligence or will of the mind from the brain to the outward world, by directing the muscular motion. If the brain desires the hand to strike the strings of a harp, it does so by the motor nerves; but the sound which is returned is conveyed to the brain by the sensory nerves. Intelligence from the brain to any part of the body, and conversely, is conveyed by the nerves at a velocity of one hundred feet per second—that is, at a speed of one mile in forty-seven seconds. Quick as this may appear, the time between a wound given and the pain felt is appreciated. By what means the mind or will acts over the nerves we are unable to say. Persons who have what is figuratively termed "an iron will" can endure pain with almost stoic indifference. Neither tears nor laughter seem to move them. Others there are who have so little command over their nerves that trivial things affect them greatly. To train the mind to exercise its will over the nervous system is highly beneficial.—S. Pesse.

PROF. GOULD has found that the velocity of the electric waves through the Atlantic cables is from seven to eight thousand miles per second, and depends somewhat upon whether the circuit is formed by the two cables or by one cable and the earth. Telegraph wires upon poles in the air conduct the electric waves with a velocity a little more than double this; and it is remarked, as a curious fact, that the rapidity of the transmission increases with the distance between the wire and the earth, or the height of the support. Wires buried in the earth likewise transmit slowly, like submarine cables. Wires placed upon poles but slightly elevated transmit signals with a velocity of twelve thousand miles per second, while those at a considerable height give a velocity of sixteen or twenty thousand miles.

GIVE US STRENGTH.
Father, when the soul is struggling
Mid the surging seas of life,
And the heart lies crushed and bleeding,
Weary of this fearful strife—
Then, oh give each struggling spirit
Strength to breast the fearful tide,
Strength to mount the surging billows
That arise on every side.

THE Church Advocate, of Lancaster, Pennsylvania, in an earnest article against the Baptists making immersion a ground for fencing the Lord's table, says:

"If the rite of baptism must precede membership in the mystical body of Christ, then close communion is right, since no one can have access to the Lord's table who is not a member of his body. But do Baptists teach this doctrine? Not directly, at any rate. But if this position is given up there is very little to fall back upon. For then we shall have the peculiar anomaly of a member of the body deprived of the privilege of deriving the life-blood from the body; a member of the body denied access to the family table; a good, pious, holy soul shut out from a participation of the outward elements, which merely represent the inward realities which he constantly enjoys. Does the Bible indorse such a position? Baptists say the argument for their position is brief, viz: 'Baptism and church membership are prerequisite conditions to participation in the Lord's Supper. Immersion is essential to baptism. Therefore, etc.' We have simply to inquire where the Bible authority is for this first proposition. Membership in the mystical body of Christ is a prerequisite condition, we know, but not membership in a Baptist or any other similar church body. Baptism may be necessary to membership in these human church organizations, but it is not a prerequisite to membership in the true church of God. And it can nowhere be found in the New Testament that when a man is born again he must first be baptized before he can come to the Lord's table. We do not plead for a delay in attending to this expressive rite, much less do we believe in dispensing with it altogether; but we have simply its relation to the communion in view."

THE Baraboo (Wisconsin) Republic tells of an old book in the shape of a volume of Sermons of Minister John Calvin, printed in 1550, comparing well with modern typography, and in binding surpassing all but the most costly books of our time.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN.

The House of WERLEIN is the oldest established Music House in the South. Its reputation shall be sustained and increased by every effort.

The best PIANOS and ORGANS that the country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS.

HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS.

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

P.S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our Factory.

Very respectfully,
PHILIP WERLEIN.

Southern Agent for Lutheran & Sons, Marshall & Mittner, and H. H. Piano Manufacturers, New York and Needham & Sons, manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rosewood case, curved legs, front round corners, separate moldings, possessing sweet, powerful and deep tone, with perfect touch. \$450.00

Style C Organ—Five stops, diapason, violin, octave, piano and in mod. five octave, two sets reeds, with "iron claff" tremolo combination swell, ornate black walnut case, padded with plush, with moldings, brackets and engraved ornaments, music desk and carpet of double blowing pedals. \$170.00

Style 10—Six stops, two sets reeds. \$165.00

Style 13—Eight stops. \$185.00

Style 25—Eleven stops. \$225.00

Please send for price lists of Pianos and Organs. 1041 ly

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS.

We are prepared to furnish Church Bells of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mountings.	Price.
35-inch Bell. 250 lbs.	400 lbs.	\$65 00
35-inch Bell. 250 lbs.	500 lbs.	135 00
40-inch Bell. 300 lbs.	1000 lbs.	175 00
45-inch Bell. 1200 lbs.	1500 lbs.	265 00

These Bells are warranted for one year against breakage in ordinary use.

WORTH FEMALE COLLEGE.

BRIDGEHAVEN, MASSACHUSETTS.

on the New Orleans, Jackson and Great Northern Railroad, one hour and twenty minutes north of New Orleans, and fifteen miles south of Jacksonville.

The 23rd of September, 1870.

Thorough instruction in all the branches given.

Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$23 for the term of forty weeks.

The languages and music, extra. A deduction of \$50 made for pupils of church.

Number of pupils not term, 15.

For catalogue address

H. F. JOHNSON, President.

1870 3m

PAST ALABAMA COLLEGE.

AUBURN, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments.

Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, and society, thorough discipline, the best religious privileges are the peculiar advantages afforded.

It is just the place to train the best men and there is room for three hundred.

Every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOPPY, President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Traders and Cotton Pressmen everywhere prefer it to all others.

THE ARROW TIE.

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, England, has control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE and R. W. BAYNE.

General Agents for the Arrow Tie, 121 Carondelet St., New Orleans.

DRUGS AND TRUENES.—DR. JOHN B. BANGELL, M.D., has the medical profession and others that he has constantly on hand and for sale a complete assortment of BANGELL'S TRUENES, a special and valuable remedy for the cure of all diseases of the lungs, throat, chest, and all other organs of the respiratory system, and for the cure of all diseases of the skin, and for the cure of all diseases of the blood, and for the cure of all diseases of the nervous system, and for the cure of all diseases of the digestive system, and for the cure of all diseases of the urinary system, and for the cure of all diseases of the reproductive system, and for the cure of all diseases of the female system, and for the cure of all diseases of the male system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all diseases of the inorganic system, and for the cure of all diseases of the organic system, and for the cure of all diseases of the human system, and for the cure of all diseases of the animal system, and for the cure of all diseases of the vegetable system, and for the cure of all diseases of the mineral system, and for the cure of all The Christian Advocate.

SATURDAY, DECEMBER 17, 1870.

ABOUT PINS.

Our pins, the oldest of them, come from the tombs. The Egyptians made them for us years ago. They were elaborate and costly in workmanship, the longest being eight inches. These pins are ornamented with large gold heads and hands. The ancient Mexicans used the thorns of the agave and the aloë for pins. Our English grandmothers of the sixteenth century exercised their patience and impatience in using the little pins, which were wooden shewers. I wonder how they dressed the babies of that century.

The first pins made in England were manufactured at Gloucester in 1628. Ten years later they were made in London, and afterward in Birmingham. We owe the business of pin-making in the United States to the war of 1812, which so interrupted our commerce that the value of a six-penny paper of pins rose to a dollar. Our first pins were made by Englishmen, at the old State prison in Greenwich village, which included within the limits of the city of New York. The effort was soon abandoned. Again, in 1830, the same tools were made to do daily in pin-making at Bellemeuse. The enterprise failed. Mr. Leonard Wright of Massachusetts invented a patent in England the first machines that made solid-headed pins. That effort failed to meet success, and in 1840 nine years before the first solid-headed pin was sold in London, the year earlier Mr. John I. Howe of New York obtained a patent on his wire or spun heads, and in 1841 the first machines in which the pin was completely by one process that proved successful. The same year patented in 1841 a process of making pins with gold heads. There are now in the United States eight or nine mills where pins are made, and I am sure that the pin business is almost exclusively his own, four of the mills being in the valley of Narragansett.

Application at one of the Connecticut factories to see a pin machine with the reply: "We will show you with pleasure plenty of them after they are made, and every one except the making of them." There is a secret, wonderful equipment in this mill, where the wire machines devour tons of wire, and send forth millions of pins, all from this department, and the wire is exhausted. A man named Perce invented the machines which were secretly hidden, and a story is told that in his last great period of work and agony, last, after all his work should fail of life, help him in the form of a dream, to his success. The capacity of these mills is seven million a day, or two billion one hundred and fifty-two million per year. The best English pins are put in a paper, which was started to be the quality of American pins; but now, alas, it is made to cover the poorest quality of iron pins as such as are sold at a fraction less than three cents a paper. The pins of the American and Howe companies are put up in the form of a book, and are called "book-pins." A book contains two hundred and sixty-four pins, including five sizes, and weighs one of which is black.

The pins, as first shown at the mill, are of brass and iron. The pins receive whitening from boiling in copper vessels with iron filings. The iron pins receive their whitening by a process which is secret.

After whitening, the pins are put in a machine which throws off the straight, well formed pins, carries away all the heat, and the machine sorts the pins, separating with precision each size, and directing it to its proper receptacle.

The most curious and interesting story is that of putting the pins in the papers. It requires possibly thirty seconds for the pins to pass from the mill into their places in the paper, the same machine holding them by the head, marking them in single file, delivering them over into companies, creating the paper, and fixing them in it. It is the iron pins that have done the best of English pins, and the poorer qualities and even the pins, consumers alone suffering, the merchant buys at the low valuation the cheapest article, and sells it at the price of the best of brass pins. A paper of ultra pins contains three hundred and sixty; the poorer quality, but two hundred and eighty; the cheapest quality of iron pins called Adamantine, between the ultra and the Adamantine, several grades—Hawth and

PLEASANT WORDS RECIPROCATED.

A late number of the Baltimore Christian Advocate contained an editorial which, after reporting the Christian unity and fraternal cordiality between the Methodists and Presbyterians of a certain locality visited by the editor, goes on to say: "We have more congeniality with the Presbyterians than with any other people. The difference of creed is entirely abstract, and belongs more to philosophy than religion. It does not mix with the worship and piety of the people, and we can mingle with them without being reminded of dogmatical differences, and irritated to squabbling by the inevitable red flag of sectarianism, as we are by the Episcopalians and the Baptists."

The Presbyterian of Philadelphia, one of the oldest and most influential organs of its denomination, responds: "It would, perhaps, be difficult to define the exact reasons why there is more congeniality between Methodists and Presbyterians than between any other tribes of Israel; but the fact is undoubted. Theologically they seem to be wide apart; in practical church work and real sympathy they stand side by side, recognizing one another heartily, and preaching in each other's pulpits without hesitation or embarrassment. One reason may be that the polemical age in both bodies is in a measure past, and that both bodies have found the things in which they agree are more numerous and more important than the things in which they disagree."

We agree with the Pittsburg Advocate, which, after noting these fraternal references, observes: "This spiritual union, not organic oneness, is a great need of the Protestant churches. May it grow and spread."

MENTAL TRAINING A CAUSE OF DYSPEPSIA.—Mental anxiety and pecuniary embarrassments, such as loss of property by fire, by failure in business, or by bad habits, and also losses, troubles, disappointed affections, and the loss or the treachery of friends, will frequently cause dyspepsia; too close and too active intellectual labor is also a frequent cause. Editors, authors, and literary persons often engender dyspepsia in this way.

Much brain labor requires much blood at the brain, and an ever-working intellect uses up so much of both blood and nervous force that there is not enough remaining to do the work of digestion.

On the other hand, deranged digestion is sometimes produced by too little exercise of the brain. Persons are frequently met with who have been in active business life, and having accumulated enough to satisfy their ambition, have retired from business. Now, although the brains and bodies retire from active life, yet the poor stomachs very often have their tasks increased. If a man has been for a long time accustomed to eating heartily and working hard, either with body or brain, he had better not relax his working habits without at the same time having a corresponding relaxation in his habits of eating. "He who will not work neither shall he eat," is not only a Bible injunction, but a law of the human constitution, the disobedience of which is often attended with such derangements of digestion, and other bodily infirmities, as to render either property or life of but little value.—*Dr. Miller on Dyspepsia.*

NOT REMEMBERED, YET NOT LOST.—Bishop Haskins of old time thus encourages those readers and hearers of the word who, though earnest in their desires, yet sometimes fail in their efforts to remember the lively oracles: "I have heard of one who, returning from an affecting sermon, highly commended it to some; and, being demanded what he remembered of it, answered: 'Truly, I remember nothing at all; but only while I heard it it made me resolve to live better, and so, by God's grace, I will.' There is a story to the same purpose of one who complained to a holy aged man that he was discouraged from reading the Scriptures because he could fasten nothing upon his memory. The old hermit bade him take an earthen pitcher and fill it with water. He then bade him empty it again, and wipe it clean, that nothing should remain in it. This being done: 'Now,' said he, 'though there be nothing of the water remaining in it, yet the pitcher is cleaner than it was before; so, though thy memory retain nothing of the word thou readest, yet thy heart is cleaner for its very passage through.' To the above may be added the following of later date: 'What a sermon we had last Sunday!' said a poor woman who kept a small shop to a neighbor. 'What was it about?' asked her friend. 'I don't remember,' she replied. 'What was the text?' she then asked. 'I cannot quite think,' was the reply. 'But I know that when I got home I took and burned up my bad bushel.'

The fetters of rhyme are no more than a bracelet to the true poet.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.
PUBLISHED BY
CHARLES SCRIBNER & COMPANY,
64 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.
A comprehensive and popular text-book, published by the Society of Geography. Elementary Geography. Intermediate Geography. Common School Geography. Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Froess, Agassiz, Dana, Ferry, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that over million (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

PELLET'S POPULAR SCHOOL ARITHMETIC.
First Lessons, Illustrated. Primary Arithmetic, Illustrated. Intermediate Arithmetic. Intermediate Arithmetic. Grammar School Arithmetic. Practical Arithmetic.

PROF. GUYOT'S WORKS ON NATURAL SCIENCE.
A Text-book of Geography. A Text-book of Natural Philosophy. PROF. SANBORN TENNEY'S NATURAL HISTORIES. Nat. History of Animals for the Young. A Manual of Zoology. Natural History Tables.

PROF. HENRY N. DAVIS' WORKS.
Introduction to the Study of English Literature. Art of Composition. Art of Disposition. Elements of Logic. American Speech.

PROF. SHELDON'S WORKS ON ORAL TEACHING.
Manual of Elementary Instruction. Lessons on Objects. First Reading Book. First Reading Charts.

GRAMMAR AND COMPOSITION.
Danzel's Grammar and Analysis. Harper's Practical Composition.

PROF. GUYOT'S WALL MAPS FOR SCHOOLS.
Large Series.—Wholesale list price, per set, \$71. Intermediate Series.—Wholesale list price, per set, \$35.90. Common School Series.—Wholesale list price, per set, \$18.50. Primary Series.—Wholesale list price, per set, \$10.

PERCE'S MAGNETIC OBJECTS.
One dozen Magnetic Objects, representing men of different races, ships, steamers, light-houses, and various animals, accompanying each globe, without additional cost. Lesson on the Globe, Illustrated by Perce's Magnetic Globes and Magnetic Objects. By Mrs. Maria Howe Smith. Extra Magnetic Objects for Perce's Globes. 1. Animals of all Climates. 11. National Flags. Descriptive catalogues and manuscript circulars sent free of charge. Most favorable terms offered to school boards or teachers desirous of introducing the above Text-books.

HAWESSEE COLLEGE,
MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to call the attention of students in the Cotton States to the excellent location, the healthful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has bearing arrangements for about fifty students. The steward supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half per Week.
Tuition is \$40 per annum. Students will be received at any time, and charged to the end of the term.

REV. P. M. GRACE,
Madsenville, Tenn.

CENTENARY MALE INSTITUTE,
SUMMERFIELD, ALABAMA.

reopens on the FIRST MONDAY of next October.

The school is in good condition. It has had a steady increase every year since it has been in the hands of the present teachers. The total expenses from October to July will be only \$231.50.

Hacks will run daily between Summerfield and Selma at the option of the season.

JOHN MASSEY, Principal.

MEMPHIS CONFERENCE FEMALE INSTITUTE, JACKSON, TENN.

This old and popular institution affords all the advantages of a first class Female College, and is steadily improving.

Charges are moderate. Fall session begins SEPTEMBER 5, 1870.

For catalogue address the President, 405 3d
REV. A. W. JONES, D. D.

SCHOOLS AND COLLEGES.

WESLEYAN UNIVERSITY,
FLORENCE, ALA.

This school, which was founded in 1828, is now in the hands of the Wesleyan University. The Faculty is composed of the most distinguished scholars and ablest teachers. The course of study is liberal and comprehensive, embracing all the branches of literature, science, and art. The students are prepared for the ministry, for the law, for the medical profession, and for the various branches of civil and military service. The school is well equipped with all the necessary apparatus and books. The charges are moderate, and the students are well cared for.

TERMS PER SESSION OF FIVE MONTHS.
Tuition in the University, per session, \$30.00
Tuition in the Grammar School, 25.00
Tuition in the Law Department, 40.00
Incidental fees, 2.00
Tuition and incidental fees required at admission, 5.00
Boarding can be had in the best families at from \$10 to \$20 per month.

For particulars see circular, or apply to the President, Rev. Dr. Anderson, or to Hon. W. H. SUTTON, J. B. ROW, JR., & CO., 156 Common St., New Orleans, La.

TUSKEGEE FEMALE COLLEGE,
TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins SEPTEMBER 15, 1870, and continues forty weeks, divided into two equal terms.

REV. GEORGE W. PRITCHARD, M. A., President.
REV. B. B. ROSS, M. A., Professor of Latin and Mathematics.
DR. S. M. BARTLETT, Director of Music.

The President calls particular attention to the fact that Rev. B. B. Ross of the Alabama Conference has accepted the professorship of Latin and Mathematics in the institution. Dr. Ross is a graduate of Harvard University, and has been professor of Mixed Mathematics in that institution for two years. His speciality is in the practical study of mechanics, his acquaintance with the practical sciences being of the highest order. The President also calls attention to the fact that the college has a most spacious and comfortable building, and that the faculty is composed of the most distinguished scholars and ablest teachers. The course of study is liberal and comprehensive, embracing all the branches of literature, science, and art. The students are prepared for the ministry, for the law, for the medical profession, and for the various branches of civil and military service. The school is well equipped with all the necessary apparatus and books. The charges are moderate, and the students are well cared for.

TERMS PER SESSION OF FIVE MONTHS.
Tuition in the University, per session, \$30.00
Tuition in the Grammar School, 25.00
Tuition in the Law Department, 40.00
Incidental fees, 2.00
Tuition and incidental fees required at admission, 5.00
Boarding can be had in the best families at from \$10 to \$20 per month.

For particulars see circular, or apply to the President, Rev. Dr. Anderson, or to Hon. W. H. SUTTON, J. B. ROW, JR., & CO., 156 Common St., New Orleans, La.

WESLEYAN FEMALE INSTITUTE,
STANTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President.
With Thirteen Professors, Teachers, etc., etc.

Than this no College for Young Ladies has a larger number of students. It is the only college in the South where French is taught by a native master of the language. Professor in Department of Music has no superior in any school; and others, in the same department, are of the highest order. The college is in the hands of the most distinguished scholars and ablest teachers. The course of study is liberal and comprehensive, embracing all the branches of literature, science, and art. The students are prepared for the ministry, for the law, for the medical profession, and for the various branches of civil and military service. The school is well equipped with all the necessary apparatus and books. The charges are moderate, and the students are well cared for.

WESLEYAN FEMALE INSTITUTE,
STANTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President.
With Thirteen Professors, Teachers, etc., etc.

Than this no College for Young Ladies has a larger number of students. It is the only college in the South where French is taught by a native master of the language. Professor in Department of Music has no superior in any school; and others, in the same department, are of the highest order. The college is in the hands of the most distinguished scholars and ablest teachers. The course of study is liberal and comprehensive, embracing all the branches of literature, science, and art. The students are prepared for the ministry, for the law, for the medical profession, and for the various branches of civil and military service. The school is well equipped with all the necessary apparatus and books. The charges are moderate, and the students are well cared for.

TERMS PER SESSION OF FIVE MONTHS.
Tuition in the University, per session, \$30.00
Tuition in the Grammar School, 25.00
Tuition in the Law Department, 40.00
Incidental fees, 2.00
Tuition and incidental fees required at admission, 5.00
Boarding can be had in the best families at from \$10 to \$20 per month.

For particulars see circular, or apply to the President, Rev. Dr. Anderson, or to Hon. W. H. SUTTON, J. B. ROW, JR., & CO., 156 Common St., New Orleans, La.

SCHOOLS AND COLLEGES.

LOUISIANA STATE UNIVERSITY,
Baton Rouge, Louisiana.

Founded and supported by the State of Louisiana.

The Faculty, which is now in progress, will close at the end of the year. The next session will begin on the first Monday in September next, and will continue ten months.

The University is a full corps of the instruction in all branches of literature and science, and is the best of the kind in the South.

The course of study embraces a Preparatory and an Academic Department, including a Literary, Scientific and Optional Course, a School of Civil Engineering and a Commercial School.

Library, Apparatus and Cabinets are well selected and valuable. The theological and Mineralogical Cabinets, etc., the largest and most complete in the South, embracing the extensive collections of the late Col. Wallace, of Mississippi, and the Cabinets of the Topographical, Geological and Botanical Survey of Louisiana.

Admission granted to students not under fifteen years of age, who know arithmetic, English, grammar and geography.

Expenses of every kind, except clothing, for ten months, \$50; \$200 payable in advance, balance February 1; or by accepted draft, at eight percent, for ninety days. Payments may be made through the Canal or Citizens Bank.

Students received at any time during the session and charged from date of entrance.

Discipline, military, with daily drill. A battery of four guns will add facilities for instruction in military. Uniform of cadet: Gray cloth, to be had at the Institution at a cost of \$25 per suit.

For further information address
—P. BOYD, Superintendent,
Baton Rouge, La.
Office of the University in New Orleans, at St. Charles & Canal, 29 Camp Street.

VIRGINIA FEMALE INSTITUTE,
STANTON, VIRGINIA.

REV. R. H. PHILLIPS, M. A., Principal.
With American Assistants.

The Twenty-fifth Annual Session will open SEPTEMBER 15, 1870.

From over a thousand testimonials from Southern patrons we select the following: from General Robert E. Lee, President of Washington College; General Francis H. Smith, President of the Virginia Military Institute; and General W. N. Pendleton, Lexington, Virginia.

"We, the undersigned, have had daughters educated at the Virginia Female Institute, in Stanton, under the care of Rev. R. H. Phillips. They therefore know it to be a thoroughly excellent and superior institution for young ladies, and they cordially recommend it to be so, even beyond its past extended patronage."

R. E. LEE.
FRANCIS H. SMITH.
WM. N. PENDLETON.

LEXINGTON, VA., March 14, 1870.

For circulars, with full information, address Rev. R. H. PHILLIPS, Principal, or Rev. J. C. WHEAT, Vice Principal, Stanton, Virginia.

HOMER COLLEGE,
HOMER, LOUISIANA.

The scholastic exercises of the Full Session of this College, located at Homer, Louisiana, under the care of the Methodist Episcopal Church, South, will begin on the FIRST TUESDAY of September next.

PAULLEY.
Rev. J. E. Combs, President and Professor of Mental and Moral Science, Greek Language and Literature.
J. W. Nicholson, Professor of Pure and Mixed Mathematics, and Natural Science.
A. C. Canby, M. A., Adjunct Professor of Languages and English Literature.

The Preparatory Department is under the care of all the Faculty.

TERMS PER SESSION OF FIVE MONTHS.
Tuition in College Department, \$25.00
Preparatory studies, \$15.00 and 20.00
Contingent fee, 1.00

Board in private families, per month, \$14. Board with room furnished, \$16.

Total expenses for board and tuition will range from \$85 to \$105 per session, while the course of studies is as full and thorough as that of any college in the land.

Active measures have been taken for a full and permanent endowment.

For health and association it is believed that the location cannot be surpassed.

It is the aim of the Trustees to place Homer College in the front rank.

For further particulars address
m20 1y
—W. F. MORELAND.

STONEWALL INSTITUTE,
Thirteen Miles North of Selma, Ala.

This School for Boys opens its sixth annual session on OCTOBER 3, 1870.

D. C. B. GANNETT, Principal, and Teacher of Languages.
JOHN P. BEAMMOOK, Teacher of Mathematics.

But few schools accomplish as much for its pupils as this one.

It is in the quiet country. Its teachers give instruction nine hours per day, including two nights.

The Institute belongs entirely to the Principal.

Two Hundred and Sixty Dollars will cover nine months' board, tuition and washing. Transportation from Selma to the Institute on every Wednesday and Saturday in October to the twenty-second, free of charge.

Refer to Bishop J. C. Kewer and John M. Bonner, Esq., New Orleans, Louisiana.

For further particulars apply to the proprietor,
m27 6i
—D. C. B. GANNETT, Principal.

ROANOKE COLLEGE, SALEM, VA.
Next Session Begins September 5.

This Institution is a full corps of instructors, a thorough course of studies, and aims at the highest grade of scholarship. Its superior educational advantages, moderate expenses, healthy location, and excellent mail, traveling and telegraphic facilities, render it well worthy the attention and patronage of the South.

Expenses for session of ten months, about \$210.00.

This estimate includes board and tuition, embracing modern languages, and advance on the above for students boarding in private families.

For further particulars, catalogues, etc., address
REV. R. F. BUTTLE, D. D.,
1716 3m
—President of the College.

TENNESSEE FEMALE COLLEGE,
FRANKLIN, TENNESSEE.

Fall Session for 1870 Begins Monday September 5.

The claims of this Institution rest on the state, extent and thoroughness of the culture it bestows. The climate is favorable for study, the only one that makes scholars.

It refers to its numerous, including distinguished educators and gentlemen eminent in the world and in the professions.

Catalogues sent on application.
E. K. HARRIS, President.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

We have no material change to notice in the general market since our last report. Only a moderate business has been done in most branches of the wholesale trade, although stocks are still ample and well assorted, and offered at reasonable prices. Sugar and molasses have been in fair request at steady prices. The movement in Western produce has been on a limited scale, but double extra and the lower grades of flour have been wanted for shipment, with only a scant supply.

A cold rain storm, with heavy winds, commenced on Friday evening, and continued with little or no intermission until late on Saturday night. Some apprehension has been excited of the effect of the storm on the unpicked cotton fields, but as yet we have no specific intelligence on the subject. Nothing of especial interest has transpired with regard to the cane.

Corrected.—The following are the arrivals since the ninth instant:

Louisiana and Mississippi.....	21,402
Arkansas.....	1,643
Lake.....	1,483
Mexico.....	131
Florida.....	146

Total..... 24,945

On Saturday operations were restricted by dark and rainy weather, but the demand was nevertheless fair, and 7,100 bales changed hands at irregular prices, without any notable variation. On Monday, with fine weather and a more copious supply, and the demand being moreover stimulated by the simultaneous receipt of several orders by cable, buyers came forward with increased spirit, and, although factors were more stringent in their pretensions, refusing to accept the inside figures of Saturday, yet the sales summed up 13,250 bales, which was 2,750 bales in excess of the largest previous business this season, low middling closing at 14 to 14½c, and middling at 14½ to 14¾c. On Tuesday the market opened with a good inquiry, and as factors met the demand freely, occasionally making some concessions, claimed on the tendency of prices at New York, the business comprised 10,150 bales, partly at previous rates, and partly at figures which had been previously refused.

This makes an aggregate for the past three days of 30,500 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 380,810 bales, against 345,435 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 217,931 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 214,392 bales to Great Britain, and a decrease of 90,468 to France, and 5,651 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.....	12½ to 13
Good ordinary.....	13 to 13½
Low middling.....	13½ to 14
Middling.....	14 to 14½
Strict middling.....	14½ to 15

COTTON STATEMENT.

Stock on hand Sept. 1, 1870, bales.....	20,696
Arrived past three days.....	24,945
Arrived previously.....	388,235-413,180

Exported past three days..... 12,637

Exported previously..... 276,146-288,803

Stock on hand and on shipboard..... 145,073

SUGAR.—A good demand and firm market have prevailed. The sales on Saturday and Monday embraced 1,200 hogsheds at 6 to 6½c per pound for inferior, 6½ to 7½c for common, 7½ to 8c for fair, 8½ to 9c for good fair, 9½ to 9¾c for fully fair, 10 to 10½c for prime, 11 to 11½c for choice, 8½ to 10½c for seconds, 11 to 11½c for yellow clarified, and 11½ to 12½c for white.

MOLASSES.—The demand has been fair, but prices have ruled a little easier for buyers, and 3,500 barrels were sold on Saturday and Monday at 25 to 35c per gallon for inferior, 40 to 46c for common, 49 to 51c for fair, 53 to 56c for prime, and 57 to 58c for choice.

CORN.—This article has been in moderate supply.

MONETARY.—Gold, 110½ to 110¾.

American silver half dollars, 107 to 108, and Mexican dollars at 1 to 1½ per cent. premium in gold.

The sales of bonds include \$7,000 new City Seven per cents, ex-coupons, on Saturday at 70½; \$700 on Monday at 69½, and \$3,000 at 70; and \$26,000 Railroad City Sixes on Tuesday at 69½ to 70, and \$2,000 new City Sixes at 70.

City Treasury notes are quoted at 23 to 25 per cent. discount.

CATTLE MARKET.

NEW ORLEANS, Dec. 13, 1870.

Texas cattle, choice, per head.....	\$ 10 to 15
Texas cattle, second quality, per head.....	22 to 35

NEW STYLES

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES.

VOL. XVI.

NEW ORLEANS, SATURDAY, DECEMBER 24, 1870.

NO. 49.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Dec. 20.—House.—After some unimportant business the amnesty bill was resumed.

Mr. Dugger, of Texas, spoke in favor of general amnesty, but it had been buried last week under Arlington Cemetery. Himself and colleagues therefore had concluded that the interests of the national Republican party required them to vote for Bingham's amendment; that failing, for Beck's.

Mr. Manning favored general amnesty.

Mr. Bingham said that the question touched the honor, and, in some sense, the prosperity of the American people. The first vote would be upon his amendment, which excluded only officers of the United States in 1860 and 1861, and those who, since the first of June last, had held offices to which they were ineligible. They should vote against Mr. Farnsworth's bill for general amnesty. The country was not prepared to take that step. Bingham's bill only excepted some two hundred.

These relieved could not by any possibility harm the republic. There were about twenty thousand among those suffering disabilities who were about as guilty of the blood of this country as the members of this house. If his own amendment was rejected, he would vote for Mr. Beck's, but under no circumstances for the bill reported by Mr. Butler.

Mr. Fitch favored universal amnesty. He believed that General Breckinridge might safely be allowed to defend the principles of secession in the Senate.

Mr. Sheldon, of Louisiana, spoke in favor of universal amnesty, and remarked that his State had twenty-five thousand Republican majority, and had abrogated every vestige of disability by a vote of one hundred and three thousand in the affirmative to less than one thousand in the negative. Believing with the people of his State, he was in favor of universal amnesty, and he warned his political friends that the time was coming when every one of them would take the same position.

Mr. Connor, of Texas, spoke in favor of universal amnesty, and denounced the corrupt Southern State governments, especially that of Texas.

Mr. Hamilton, of Florida, protested solemnly against universal amnesty.

Mr. Butler moved the previous question upon the pending amendments.

Mr. Bingham asked Mr. Butler to keep faith with the House.

The previous question was seconded—91 to 84—when Mr. Butler yielded to the motion to adjourn.

Butler's programme appears to be to have the amendments defeated, then have the bill recommitted, which will defeat amnesty of any kind this session. The vote on the amendments occurs to-morrow.

Senate.—A struggle occurred between the friends of a change in the sugar tariff and San Domingo. Mr. Sherman waives the sugar bill, saying it is only to clear an ambiguity, and ought to pass.

Mr. Edmunds asked for a reading of the San Domingo resolutions. He saw no objections to them, as they only called for information. He was opposed to the acquisition of San Domingo, and probably should remain so, but would be glad to get information which the resolutions would elicit.

Messrs. Sumner and Morton came into sharp collision, and business was much clogged by the struggle for precedence of various bills in which Senators seemed to have a personal interest.

A motion to refer the sugar question to the Finance Committee was lost.

The San Domingo bill was then resumed and discussed to adjournment.

WASHINGTON, Dec. 20.—The House Committee on Commerce heard arguments to-day in favor of a European line of steamers.

The President nominated Mr. Farnell United States marshal for the western district of Texas.

There was no executive session of the Senate to-day.

WASHINGTON, Dec. 20.—The Senate refused to refer the question of changing the sugar tariff to the Finance Committee, which would have postponed action until after recess, by a vote of 27 to 13. The San Domingo question was then taken by yeas and nays. Unless Mr. Vickers talks sugar to adjournment, the sugar change will pass before adjournment on Thursday, when the bill will go to the President.

dent. There is no doubt of the President's approval. The bill excludes the terms raw and Muscovado, and rates sugars exclusively by the color or the Dutch standard.

FOREIGN.

VERSAILLES, Dec. 18.—The tenth Prussian corps, on occupying Vendôme on Friday, captured six guns and one mitrailleuse. Next day Von der Tann took Epinay, with two hundred and thirty prisoners. A German detachment from Chartres defeated six French battalions at Bron; the loss of the latter was one hundred, and that of the Germans thirty-six killed and wounded.

MADRID, Dec. 18.—At a caucus of deputies of the majority in the Cortes last night they adopted a resolution in favor of the dissolution of the Cortes as soon as the new King has taken the oath of office.

BORDEAUX, Dec. 19.—Brittany is greatly excited, and the people are all taking up arms. Troops going forward nearly close the roads to the public.

LONDON, Dec. 19.—News has been received from Paris that provisions are plentiful and will last three months. Great confidence felt in future successes.

A large open air meeting was held in Trafalgar Square last night. Speeches were made, and resolutions sympathizing with France passed. The Germans have invested Longres.

Sorties from Paris are numerous, but all have been repulsed at Versailles.

The Baden chambers has created a further credit for the prosecution of the war.

The King of Bavaria announces the concurrence of all German princes and free towns in bestowing the imperial crown upon the King of Prussia.

ST. PETERSBURG, Dec. 19.—The Czar has severely reprimanded the corporation of Moscow for petitioning in behalf of free press, religious toleration and other reforms.

BORDEAUX, Dec. 19.—Some of the journals assert that there has been trouble in Paris; but semi-official advices state that Paris was quiet and animated with one sentiment—that of common defense.

Reports from the forces in the north and east are good.

There is some excitement here over the promulgation of false news over the forged signature of Gambetta, the purpose being apparently the cause of reaction by the dissemination of news unfavorable to France.

Dispatches of this sort, purporting to come from Havre, appeared simultaneously in all parts of France. It was soon discovered, however, it was a Prussian device. It is noticeable that the opposition of the journals is more violent toward Prussia than ever.

ROME, Dec. 20.—The ministerial project, guaranteeing the independence of the Holy See, covers twenty points, viz:

The Pope's personal inviolability; retention of the palace guards; three-quarters of a million lives annually for the guard and civil list; the papal residences of the Vatican, Santa Maria and Maggiore, in Rome, and Castle Gondolfo, in the country, to be free from taxation and ordinary jurisdiction of the State; the locality occupied by the general council of the church to enjoy the same immunities.

Criminals taking refuge shall not be arrested without the consent of the conclaves. Such residences shall be free from the exportation laws. No searches or sequestration of books or documents of sacred congregations shall be made. The Pope shall be free in publishing the acts of his ministry. Cardinals and ecclesiastics participating in such acts shall be free from molestation. Free correspondence between the Pope and the Catholic world, and pontifical jurisdiction shall be exercised free of contest by the State. Ecclesiastical meetings without government permission. The nomination of all benefices, dignities and officers of the church shall be made without government interference. Episcopal oaths of allegiance to the King are abolished, and institutions for the education of priests shall be under the direction of the Pope.

BERLIN, Dec. 21.—The Kreuz Zeitung says, regarding the neutrality of Luxemburg, that diplomatic negotiations are impossible in time of war. The German armies would thereby be compromised, while an abrogation of treaties will secure their safety. Prussia is ready to submit her claims to arbitration, without affecting the position of Luxemburg as an independent State.

The Diet of Hesse Darmstadt has approved the Federal treaties, and voted further war credit.

LONDON, Dec. 21.—There has been no recent communication between King William and the Pope.

LIVERPOOL, Dec. 21.—The bark John Tyler, from Charleston, was partially burned, and scuttled to save the hull and cargo.

CONSTANTINOPLE, Dec. 21.—It is untrue that Turkey is determined to act independently of the other powers.

LONDON, Dec. 21.—Prussia, in accepting a conference, stipulates that only matters connected with the treaty of 1856 will be considered. The adherence of France to the conference is still wanted.

MADRID, Dec. 21.—The Cortes voted its own dissolution amid great excitement. The opposition immediately left the chamber.

LIVERPOOL, Dec. 21.—The brigantine Buck, from New York for Liverpool, was wrecked off the Welsh coast; two lives lost.

approved the Federal treaties, and voted further war credit.

SOUTH CAROLINA CONFERENCE.

This body convened in Charleston on the seventh of December—Bishop Pierce presiding, a little fatigued, no doubt, from the labors of the North Carolina and North Georgia Conferences, without any intervening rest. Most of the preachers were present at roll-call, and nearly all came in during the day.

Rev. F. M. Kennedy was elected secretary, and Rev. W. C. Power, Rev. O. A. Darby and T. S. Moorman assistant secretaries.

The following candidates were received as probationers for the itinerancy: J. Sidney Beasley, G. M. Boyd, E. Toland Hodges, Robert N. Wells and Welborn D. Kirkland.

Continued on trial: Jesse A. Clifton, George T. Harmon, J. M. Boyd, Joseph F. England and A. A. Gantt. Received into full connection: T. E. Wannamaker, L. C. Loyal and William Thomas.

The following, from the territory transferred by the last General Conference to the North Carolina Conference, were reported by the Bishop as retransferred to this Conference: R. R. Dagnal, R. P. Franks, John Finger, A. P. Avant, E. J. Meynard and R. R. Pegues.

Passed to the fourth year: S. P. H. Elwell and R. L. Duffie.

The following were continued supernumerary: R. B. Tarrant, C. Betts, A. McCornodale, F. M. Morgan, R. C. Oliver, W. Smith and S. B. Jones.

The following were continued on the list of supernumeraries: N. Talley, J. W. Townsend, W. C. Patterson, M. L. Banks, Lewis Scarborough and A. L. Smith.

Rev. Dr. Bachman, of the Lutheran Church, was introduced and addressed the body in pleasant fraternal salutations.

Dr. Poisel, of the Baltimore Conference, being introduced, presented the claims of the Southern Quarterly Review. He claims that it has no peer in America—no superior in the world.

At eleven o'clock, minute business was suspended to listen to a sermon from the venerable Dr. Pierce, to the undergraduates, from Second Tim. ii, 15.

Business being resumed, Rev. Dr. Harrison, of the North Georgia Conference, was introduced and represented the interests of the Publishing House at Nashville, and its various publications.

Rev. H. A. C. Walker presented resolutions in approbation of the sermon of Dr. Pierce, and thanks for his visit to this body.

July Harris, a colored man, and licensed preacher, was elected to deacon's orders.

The credentials of C. H. Spears and Wesley Boyd, on recommendation from their respective quarterly conferences, were ordered to be restored.

Rev. Dr. Bond, of Baltimore, and Rev. Mr. Hubert, of Warrenton, Georgia, were introduced.

On motion of Dr. Smith, G. W. Williams, Francis J. Pelzer and Samuel H. Nelson were confirmed as trustees of the Bishops' House in the city of Charleston. And the trustees of said property were instructed to convey the same by legal process to the South Carolina Conference.

On motion of R. C. Oliver, a committee of five was ordered to consider the expediency of establishing an Orphan Home in the bounds of this Conference, viz: R. C. Oliver, J. W. Hubbard, W. R. Mood, Aug. W. Walker and G. F. Round.

G. J. Griffiths, a member of Spurgeon's church, London, was, on motion of Rev. J. W. Kelly, received as a member of this body, and elected to deacon's orders.

J. W. Gattlin and B. D. Smart were received as probationers into the traveling connection.

Rev. A. B. Stephens, on account of severe affliction during the past year, was granted a supernumerary relation.

J. A. Wood and J. J. Carpenter were placed in a supernumerary relation by request.

J. W. Hodges was located at his own request.

The Legal Conference, Rev. Dr. Smith in the chair, held a brief session, the amount of funds in hand being scarcely sufficient to excite general interest.

Dr. A. E. Williams presented the draft of a constitution of a proposed "Tithing Society of the South Carolina Conference," the object of which is the relief of cases of special necessity, and to aid supernumerary preachers and the widows and orphans of deceased ministers.

Dr. A. E. Williams feelingly advocated the proposition, which was then referred to a committee, consisting of Rev. H. M. Mood, T. Mitchell, T. J. Clyde, A. E. Williams, S. Bobo and H. J. Sheridan.

L. A. Johnson and R. B. Alston were continued supernumerary.

The Bishop announced the missionary debt due by this Conference, after all former payments, and in addition to money now in hand, as about \$900, and proposed that the amount be paid or pledged to-day.

The secretary called the roll and members responded to about a few dollars in excess of the specified amount.

Alexander Owens, William A. Ferrell, A. J. Joy and W. J. Wilson, licensed local preachers, were elected to deacon's orders.

Jonathan Sweet and H. N. Sweet, local deacons, were elected to elder's orders.

George J. Griffiths, yesterday elected to deacon's orders, was elected to elder's orders.

Claudius Miller, a member of the Baltimore Conference of the Protestant Methodist Church, was, on application, received as a member of this body.

The Committee on Education submitted a report, hereafter to be published. An agent is recommended in behalf of Wofford College.

The Committee on Books and Periodicals submitted their report, which was adopted. It will be published hereafter.—*South Christian Advocate.*

CHRISTIAN CARD-PLAYING.—A missionary of the New York Port Society, going into a sailor boarding-house, found eight young seamen playing cards. He tried for some time to gain their attention without avail, and at length saying, "I will play cards also," laid down on the table the tracts "Little Sins" and "Too good to be true." First one dropped his cards, then another, until all had stopped playing. The missionary then addressed them as follows: "Perhaps most of you, if not all, have praying mothers. How would you like to have that mother see you play cards, and take the name of her Saviour and your Saviour in vain? Remember that though your mother does not see you, yet God does, and all your sins are noted by the recording angel against you, and unless you repent they will meet you at the judgment."

As he arose to leave one of the young men followed him to the door and said: "You touched a tender chord in my heart, and I would be glad to have you pray for me."

They retired to the sailor's room and knelt in prayer, and while thus engaged the other card-players came in and joined the praying circle. Tears were shed and promises made in that little attic which we may hope were the germs of a new and everlasting life. They at once commenced a life of prayer, which was continued while they remained in port, and their last words before going to sea were: "By the help of God we will do our duty to God and our shipmates."—*N. Y. Evangelist.*

NOT THAT WAY.—"I say, captain," exclaimed an impatient traveler on board a steamboat going to in a fog, "are you not going to start soon?" "As soon as the fog clears up," replied the captain.

"Well, it's starlight now overhead," said the man. "O yes; but we are not going that way."

NEVER enter a sick-room in a state of perspiration, as the moment you become cool your pores absorb. Do not approach contagious diseases with an empty stomach, nor sit between the sick and the fire, because the heat attracts the vapor. Preventives are preferable to a pill or powder.

NEW PUBLICATIONS.

OUR NEW SUNDAY SCHOOL PUBLICATIONS.—We are indebted to the Publishing House at Nashville for early copies:

1. *Our Little People*, designed for the youngest children, the infant classes of the Sunday schools, is a single leaf containing two pages of reading matter and illustrations, adapted to the comprehension of "the lambs of the fold." There is a number for each week in the month, and each number contains questions on the uniform lesson of the day. We think the little people and the big people will all be pleased with this paper.

2. *Sunday School Visitor*.—This comes out with a new head, rather better than the old, very beautiful and expressive. We will not attempt to describe this tasteful vignette, as our readers, old and young, must take the Visitor and see it for themselves. The copies of the Visitor before us are for weekly distribution—the four numbers for January—and each number contains four pages. The pages are the same in size as heretofore. We very much like the idea of a weekly distribution, and are glad to see the adoption of it by the agent and editor. There is an edition issued for semi-monthly distribution, to meet the wishes of those who prefer it. The contents of the January numbers are varied and admirably suited to the tastes and wants of the young. It is no easy matter to make an interesting child's paper, but Dr. Haygood has succeeded in it.

3. *Questions on the Lessons*.—This is a slip of four pages, containing questions and notes on the uniform lessons for each Sunday in the month of January, designed for the use of teachers and for distribution to the scholars. This plan, has come into general operation in the schools of other churches, and will prove itself of great advantage wherever it is fairly tried.

4. *Sunday School Magazine*.—This is the first of the kind in our church. No. 1 of volume I is at hand, and without partiality we must pronounce it excellent. In looking through it we have had an eye to the qualities of old and long established periodicals of the same sort in other churches, and this gains by the comparison. It in many respects suits us better than any other, and is a capital magazine for the Sunday school and for the entire church. The first article, on "Punctuality in Sunday School Teachers," by Bishop McIntyre, is like the flaming sword of the cherubim, "which turned every way." The magazine contains the Question on the Lessons, a feature of importance to parents and teachers. We have here a periodical of thirty-two pages, neatly printed on good paper, and for which both editor and publisher have merited the commendation of the church. We append the terms of all of our Sunday school papers, and would advise families and schools to order them promptly. They are all put at very low rates, and the cheapest plan is to get enough of them. By the increased interest which their circulation will excite in the Sunday school cause, they will pay well.

Sunday School Magazine and Uniform Lessons.—Our plan contemplates a two years' course upon the gospels; furnishing, for each year, forty-eight graded weekly lessons, and four lessons for quarterly review. About twelve pages of the January number of the Sunday School Magazine are taken up with notes for teachers upon the five lessons for the month, and with graded questions for the use of scholars. These lessons may be used for all the classes. It costs only \$1 per annum. Each pastor, superintendent, teacher, Bible student and parent should take it.

Our Little People.—This is for the infant classes, and contains, besides appropriate reading matter, such as easy questions and answers, upon

each Sunday's lesson, as are adapted to the little ones. In this way we give the infant classes the benefit of the uniform lessons. Our Little People is printed on the best paper, and well illustrated. Its form provides for the distribution of two pages weekly, and at the low price of \$10 per hundred per annum. Begin with the first Sunday in January.

What it Costs to Furnish a School with our Uniform Lessons.—We suppose one hundred scholars, of whom thirty belong to the infant classes, with fifteen teachers for all. Each teacher ought to have the Magazine, which is worth the dollar, whether the lessons be used or not. These cost \$15, entitling the school to ninety Lesson Papers gratis. Thirty copies of Our Little People, worth the money as a child's paper, outside of its lessons, cost \$3. Thus for \$18 the school gets fifteen copies of the Magazine and thirty copies of Our Little People, besides ninety Lesson Papers for each Sunday in the year.

To clubs of ten or more to one address, taking the Magazine, we send, as illustrated above, six Lesson Papers, gratis, to each subscriber monthly. Extra Lesson Papers at the rate of \$8 per hundred per annum. Lesson Papers, without the Magazine, at \$1 per hundred monthly.

The *Sunday School Visitor* is issued in three forms: The weekly, at the rate of \$50 per hundred per annum; semi-monthly, at the rate of \$25 per hundred per annum; the monthly, at the rate of \$12.50 per hundred per annum.

Upon either form of the Visitor we give the benefit of the cheap rates to schools taking as many as ten copies.

Single copies: Of the weekly, 75 cents per annum; semi-monthly, 40 cents; monthly, 20 cents.

The agent has made large reductions upon the price of our Sunday school books. Catalogue sent to any address.

All business letters should be addressed to the agent, A. H. Redford; literary communications to Atticus G. Haygood, Sunday school secretary.

THE LITTLE CORPORAL, for December, closes the eleventh volume. The illustrations are beautiful and spirited, as usual, and the articles are characterized by their great variety and adaptation to the young. The Little Corporal contains nothing but original contributions, the most of which are of the highest order of literary merit.

THE NEW ECLECTIC MAGAZINE, for December, comes to hand with an attractive table of contents. This magazine—a Southern work—is well gotten up, and deserves a generous support.

MESSRS. MUNN & Co., New York, send us the United States Patent Laws—instructions how to obtain patents. This is a small and handsomely illustrated volume, useful for mechanics and inventors.

NEWS FROM THE CHURCHES.

MANSFIELD, LA., December, 1870.

MR. EDITOR: We have been visited with a religious stirring up among us. Between fifteen and twenty professed to have emerged from darkness into the marvelous liberty of the children of God, and twelve united with our church. The students of the Mansfield Female College shared liberally in the revival.

That we might secure to the church permanent advantage and utility, we introduced a young men's prayer meeting, in which all participated to their spiritual improvement. Thus we hope to remedy a defect that is generally suffered to mutilate the results of our revivals by rendering efficient the new accessions to our church.

M. C. MANLY.

The Japanese carpenters are ingenious workmen, and their work is done with marvelous neatness. A curious feature of their houses is that they do not contain a nail, all their joints and timbers being dovetailed together by many ingenious devices; and the whole work, even to the rafters, is as smooth as if it had been polished down with sand-paper.

The Christian Advocate.

SATURDAY, DECEMBER 24, 1870.

THE OLD HOMESTEAD.

Al! here it is, that dear old place,
Unchanged through all these years;
How like some sweet familiar face
My childhood's home appears.
The grand old trees beside the door
Still spread their branches wide;
The river wanders, as of yore,
With woody murmuring tide;
The distant hills look green and gay,
The flowers are blooming wild,
And everything looks glad to-day,
As when I was a child.

Regardless how the years have flown,
Half wondering I stand,
I catch no fond, endearing tone,
I clasp no friendly hand;
I think my mother's smile to meet,
I list my father's call,
I pause to hear my brother's feet
Come bounding through the hall;
But silence all around me reigns,
A chill creeps through my heart—
No trace of those I love remains,
And tears unbidden start.

What though the sunbeams fall as fair;
What though the budding flowers
Still shed their fragrance on the air,
Within life's golden hours;
The loving ones that cluster here
These walls may not restore;
Voices that filled my youthful ear
Will greet my soul no more;
And yet I quit the dear old place
With slow and lingering tread,
As when we kiss a clay-cold face
And leave it with the dead.

INTemperance.

MR. EDITOR: I am rejoiced to see that the subject of intemperance is eliciting some little interest now and then. I am fully satisfied that there never was a time in the history of this country, and especially of the church, when there was a greater need for a firm, outspoken expression on this subject than at the present time. And yet the evil has become so prevalently widespread and popular, even in the church, that the man who dares to give expression, from the pulpit or through the press, to his disapprobation of intemperance, runs the risk of being ridiculed by dram-drinking clergymen, or severely censured by drunken church members. It seems to me that every man who is without sin in this matter, and loves the church, and desires to see its purity and power perpetuated, should speak out, and give the weight of their influence to aid in the arrest of an evil that is so ruinous to the church. But what is the most astonishing thing in the world to me is that there is so little said and done where there is so much needed. It is acknowledged by all that intemperance is an evil the most fearful, the most terrible. The desolating tread of devouring armies, and famine's destroying angel, with death's loathsome, pestilential breath, sweeping off its millions with relentless, remorseless wrath, is not to be compared to the terrible evil of drunkenness. Like a boundless floodtide, it buries everything in its deadly course; and still how feeble the effort that is put forth to arrest the terrible disaster. As a foe to all the social interests of men and society, there is none other comparable to it. There can be no other that wars so ruthlessly and pitilessly upon home and happiness, and all the sacred ties that are so closely and intimately connected therewith. If we will take the trouble to look around us we will discover that in all the visible ravages of intemperance there lies a vast and boundless field of devastation and ruin, which perhaps has never yet been fully explored, and the extent of whose blighting, withering curse or effect will only be fully realized in the day of the retribution of all things.

In viewing the state of mankind, while intemperance holds universal sway over the reason and the passions, what do we behold? We see in this land of drunkards a wasted realm of social affection, and the violated sanctuary of domestic peace and happiness. And from the deep, dark undercurrent of suppressed and smuggled wretchedness there comes constantly welling up to the ear of human pity many heart-rending and soul-piercing cries from those who are writhing under the slow torments of a desolate heart and dying hope.

Within the sphere of this social desolation the curse of drink has a twofold operation—the unseen and

the seen. The first lies in the vast amount of untold, unseen wretchedness of families which the great destroyer has marked out for his own. As yet his victory is incomplete. The second are the visible results, as seen in the complete destruction of all the dearest and most sacred interests of mankind. Let us take a look out upon its accursed work, as it rushes on like a fiery tempest, written out in woe and desolation upon the face of society. Could we be permitted to intrude ourselves upon the sacred retreat of that once happy home, and be allowed to look down into those once happy, hopeful hearts, but which have long been bleeding over the ruin of their dearest hopes, and what will we see but broken vows, blighted prospects, blasted hopes, ruined health and wasted fortunes? And there are millions who bleed and sigh among the living, while there are many, many more who have long since buried their crushed and weary hearts in the grave.

There are thousands of once prosperous and happy families who are now wretched, ruined, beggared, the light of whose once sweet, joyous home is forever quenched in sad despair. And will any one ask the cause of these misfortunes, of all this untold wretchedness and ruin? Let him trace the end effects of the evils of intemperance, in its awful, terrible operation, as it pervades the social body, corrupting habits of virtue and thrift, destroying industry, and producing poverty, pauperism, vagabondage and crime. Here you have an answer. And after all these horrid and heart-sickening effects are seen and felt, how little is said and done to arrest it!

To-day the church is made to feel the terrible tread of this great enemy to all purity and holiness. She is cursed with dram-drinking preachers and drunken members; and the evil is growing and increasing to an alarming extent, threatening its overthrow and ruin. And it seems that the pulpit and the press have turned the thing over to the tender mercies of a few weak, feeble temperance societies to put it down. But instead of relying upon temperance organizations, or the people's sense of prudence and safety, let the pulpit and press thunder out notes of warning and alarm. The evil must be arrested, or the church is in imminent danger of being ruined. I do not think that I am unduly alarmed for the safety of the church. I think I can see very clearly that the evil is growing daily; it is gathering strength and power every day. Woes are clustering around her sacred precincts. The cloud seems to be growing darker and more portentous of destruction. The dark, foam-crested wave is rising higher, and the swelling tide is spreading and deepening in its destructive course. I think any one who has eyes to see and a heart to feel can see and feel all this. You may say I am unduly alarmed, and all this is an overdrawn picture. I tell you nay; but if I could do so, and I wish I could, I would invoke torrents of liquid fire from my pen to-night, and resurrect arguments from the drunkard's grave and the drunkard's hell, and I would spread them in burning flame upon steepled canyons, and command the evil spirits from the infernal regions to carry the red-hot scroll, hissing and burning, to every drunkard's heart, especially to the disgraceful, drunken church member and dram-drinking "parson," and warn them of their disgrace and danger, and alarm them if I could.

Ministers of God! I appeal to you to arouse yourselves and arm for the contest. There is no time to be lost. The foe is upon you. Will you not labor to drive him from the field, and save the horrid spectacle of a drunken church? Preach, write and lecture. Christian men and women, I appeal to you. Touch not, handle not the accursed thing. Drive the accursed thing from your own homes. Be yourselves an example of sobriety; then the church will soon be purged from a dire curse, and God will bless and heaven will smile upon you.

JACKSON, MISS., December, 1870.

THE TEACHER.

HOW TO QUESTION A CLASS.

Skill in the art of questioning is a qualification for the teacher's office of the very highest importance. In the long catalogue of things required there is hardly one that should be set higher. It cannot, therefore, be too much insisted on or too much discussed. I shall offer a few thoughts on the subject for the consideration of teachers.

1. In the first place, the teacher who expects to excel in this particular must make up his mind that the gift referred to is really a most valuable and important attainment. No other quality can supply its place in the peculiar power of awakening, guiding and molding the minds of others. Eloquence and learned discourse can do much in producing an impression, and of course are not to be underrated. But the peculiarity of the influence exerted by skill in the art of questioning is that it goes directly to the very roots of the soul, so to speak. It operates in the formation of opinion, in the growth of intellectual power, and in the increase of knowledge, in a way altogether peculiar to itself, with a directness and energy unattainable by other methods of instruction. The prodigious influence exerted by the late Dr. Archibald Alexander, of Princeton, upon the mind of the Presbyterian Church in the United States was not due so much to his lectures in the theological seminary, for he lectured comparatively little, nor to his published theological works, which are lamentably few, but to his wonderful power as a catechist. In the theological class room it seemed as if there was not a thought or a perplexity in the mind of any student which did not lie open to the penetrating ken of the professor, nor a power of thinking which the professor did not stimulate into lively action. He seemed to touch, as if with the wand of an enchanter, all the hidden springs of thought, and whatever of mental power was in a man came forth. It was thus he molded and developed all those great minds which have exerted, and which are now exerting, such a controlling influence upon the destinies of the Presbyterian Church in America. Dr. Alexander, like Socrates among the ancients, has written comparatively little. But his power as a teacher was second to none, not even to that of Socrates, and it will go on perpetuating and reproducing itself for ages to come.

It is not expected, of course, that every teacher will have the gifts of Dr. Alexander. But his example is worthy of study as showing the kind of excellence desired, and also the prodigious results of which it is capable. It is no ordinary matter, like some of the mechanical details of the teacher's work, but something of first class importance.

2. In the second place, the teacher, after having risen to a due sense of the importance of this gift and a corresponding desire for its attainment, should define clearly in his own mind the true object of the art of questioning as a teaching power. It is not uncommon to see teachers, in asking questions, proceed as if the sole object of the exercise was to find out and record how much the scholar had learned before coming to the class. Such a teacher unconsciously puts himself in the attitude of a public prosecutor or of a detective policeman. His questions are formed with a view to find out whether the pupil has exercised due diligence in learning the lesson, and to know exactly how much of merit or demerit to mete out to him in the roll book. Now this is to lower the whole affair—to mistake and ignore the true nature of the teacher's office. Of course, it is of prime importance that the scholars should prepare and study the lesson before coming to the class, and a proper record of faithfulness or unfaithfulness in this respect is among the legitimate means of stimulating scholars to study. I believe in recitation marks. Their influence, when rightly used, is pervasive and beneficent. But, after all, they are to be reckoned as the mint, anise and cummin, and not among the weightier matters.

The true object in questioning in class is not so much to ascertain the present amount of their knowledge as to increase it. It is to awaken thought, to bring up suggestive inquiries into their minds, to deepen impressions of truth already received, to bring into clear and sharp outline what is now seen but dimly and obscurely. It is a sifting process, by which the pupils are enabled to let go the chaff and to hold fast the pure wheat. Questioning, properly conducted, produces a sort of intellectual ferment in the minds of the class which is very favorable to the acquisition of new truths. Mind is a curious machine, working according to laws of its own; and one of those laws is, that a certain amount of excitement is necessary to the rapid and sure apprehension of knowledge. A truth, a sentence, a single word dropped into the mind just at the right moment, when its powers of eager inquiry and lively

apprehension are all in the highest state of activity, will produce a greater fruitifying effect than any conceivable amount of dull, plodding routine over-lessons.

Nor should the teacher make the mistake, which many make, of supposing that the mind of a child is merely a fountain, and the questioning process is a sort of pump, and that by a due working of the machine knowledge can be drawn out. Knowledge is never drawn out unless it has first been taken in. Mind is a power, and the business of the teacher is to stir up that power. When knowledge has once entered the mind, it is indeed important that it should be again given out. The reproduction of our knowledge in intelligible form is as important to us as is the first taking of it in. We get an idea, and then we give it out. In all true teaching the two processes go together. The one is the complement of the other. Direct, positive inculcation should always accompany questioning. Pour in as well as draw out. Draw out what you pour in.

The main end, then, of questioning a class is not to register progress, but to promote it—to stir up mental activity and add to the pupil's stock of knowledge. No matter how studious a scholar may be, or how faithful may have been his preparation, he will come away from the recitation, if it has been rightly conducted, knowing more than he did. One hour's recitation ought to be worth three hours of solitary study.

3. How shall a teacher question a class so as to bring about this result?

In the first place, he must not limit himself to the questions in the question book. To sit down before a class and read questions out of a book is about the dumbest and most stupid, as well as most stupefying, process ever attempted. Better that every question book in print were with Pharaoh's chariots at the bottom of the Red sea than that such a process of hearing lessons should fix itself upon our schools. The question book has its place, but that place is not in the school room or the class. The sole object of the question book is to help in preparing the lesson. Neither teacher nor scholar should be allowed to bring one to school; or if brought to school, they should be gathered up and carefully piled away before the lesson begins. What if the teacher in catechizing the class does forget to ask some of the questions, or asks them in a different order from that in the book, or asks them in different words? Ten questions springing up as the course of inquiry suggests, while teacher and scholars are engaged in earnest conversation, face to face, eye to eye, are worth fifty questions put and answered in the usual humdrum style.

In the second place, the teacher who would question his class with skill and effect must be thoroughly at home in the lesson. He must not only know the facts and truths which it involves, but he must be familiar with them. He must know them as he knows the road to school. It is on this point more than any other that teachers fail. They think if they go over a lesson and study out all its hard points, so as to understand them, they are prepared. It is a mistake. Study the hard points, of course. But what you chiefly want is familiarity with the easy points. In order to teach you must have your knowledge not safely laid away in some remote recess of the understanding—in some underground magazine of your intellectual fortress—but brought forward into the very outworks, ready for instant handling and use—on the tip of your tongue and the tip of your fingers, talking and chalking, asking and telling, just as the emergency of each successive moment calls for.

In the third place, get back from your scholars all you give them. It is implied in the very idea of teaching that you communicate to your scholars some new ideas—some facts or thoughts which they did not know before. Now this process is incomplete until you induce the class to reproduce and give back to you in some intelligible form what you have thus given them. The knowledge is really not theirs until they have reproduced it and given it expression. They may have some vague idea or transient impression in regard to it. But they do not grasp it with firm hold or with a clear and lasting apprehension until they have expressed it in language. This is one of the laws of mental action. We fix a thing in our minds by communicating it to another; we make it plain to ourselves by the very effort to give it explanation. Or, to state the matter still more paradoxically, we learn a thing by telling it to somebody, we keep it by giving it away. The only way to be sure that your scholars are learning from you is to get them to tell you back all you have told them. The teacher who does all the talking, or even the greater part of it, is making a mistake. You may talk very well, your scholars may

hang with rapt attention upon your lips, and yet you may be making a huge mistake. You are attempting to make a web that is all warp. Fill in the woof, if you would make a texture that will hang together. Let the long yarns of your discourse be constantly crossed and recrossed by the swift-flying shuttle of question and answer, if you would be a weaver worthy of the name.

In the fourth place, do not ask your questions regularly round the class, but skip about, taking first one scholar and then another, without following any regular order, only being sure to light down on any one that is inattentive, and being sure also to call on every one in the course of the lesson, the dull as well as the bright, the lazy as well as the diligent. Do not pride yourself upon puzzling your scholars and asking questions which none of them can answer. You may take this method sometimes, perhaps, to check a child that is forward or pert. But such cases are rare compared with those who are timid and who need encouragement. Be prepared, therefore, with easy questions as well as with hard ones, and have something to ask which any one in the class, even the dumbest and the most timid, can answer. The questioning power is not perfect which is not able to unlock every tongue in the class.—*The Sunday School Idea*, by John S. Hart, LL. D.

HOME CONVERSATION.

Children hunger perpetually for new ideas, and the most pleasant way of reception is by the voice and the ear, not the eye and the pointed page. The one mode is natural, the other artificial. Who would not rather listen than read? We not unfrequently pass by in the papers a full report of a lecture, and then go and pay our money to hear the self-same words uttered. An audience will listen closely from the beginning to the end of an address which not one in twenty of those present would read with the same attention. This is emphatically true of children. They will learn with pleasure from the lips of parents what they deem it drudgery to study in the books; and even if they have the misfortune to be deprived of the educational advantages which they desire, they cannot fail to grow up intelligent, if they enjoy in childhood and youth the privilege of listening daily to the conversation of intelligent people. Let parents, then, talk much and talk well at home. A father who is habitually silent in his own house, may be, in many respects, a wise man; but he is not wise in his silence. We sometimes see parents who are the life of every company when they enter, dull, silent, uninteresting at home among their children. If they have not mental activity and mental stores sufficient for both, let them first use them for their own household. Ireland exports beef and wheat, and lives on potatoes; and they fare as poorly who reserve their social charms for companies abroad, and keep their dullness for home consumption. It is better to instruct children, and make them happy at home, than it is to charm strangers or amuse friends. A silent house is a dull place for young people, a place from which they will escape if they can. They will talk or think of being "shut up" there; and the youth who does not love home is in danger. Make home, then, a cheerful and pleasant spot. Light it up with cheerful, instructive conversation. Father, mother, talk your best at home.

REVIVALS.

An exchange lying before us has this announcement:

"A ten days' revival meeting will be held in the First Methodist Episcopal church, in this city, commencing on Sunday next."

This kind of announcement, innocent enough in itself, is becoming common, and indicates the existence of a sentiment that deserves rebuke rather than encouragement. We have heard such questions proposed, before now, as the following: "When are you going to begin your revival?" "Why don't you get up a revival?" "What time will the revival close?" etc. Of course those who ask these questions do not think closely; they do not understand the nature of a revival, nor do they stop to consider whether the preacher has the power to begin and end it at his pleasure. And this ignorance is not confined to the uneducated. Many intelligent people are just this thoughtless on religious matters, and such are the hardest people in the world to move to religious duty. We hope to see the time when revivals will be better understood, and when they will not be restricted to the "revival meeting." All meetings ought to be for this purpose, and doubtless they are in an important sense; but still the impression is quite too prevalent that the "revival meeting" is the only time to expect conversions. We trust the revival meeting alluded to above will not be limited to ten days. *Western Christian Advocate*.

SEASONABLE SUGGESTIONS.

BY AGNES BALDWIN.

Now is the time when attention should be given to the change of clothing. The heat of the summer is passed, though there will, it is quite likely, be many warm days. But the nights and mornings will be chilly, if not positively cold. And as the stoves are not yet set up, and the rooms, with the exception of the kitchen, are without fire, there is as much, if not more, need of warm clothing now than later, when the winter fires are kindled.

Generally women do not clothe themselves warmly enough in cold weather. And as there is so little time when thin dresses can be worn, we are loth to lay them aside in the fall, and don the thicker ones, which, though more comfortable, are not half so becoming as the semi-transparent materials which half conceal and half reveal the graceful shoulders and finely rounded arms. But they will be all the fairer and rounder next summer for being protected from the shivering cold of early autumn.

I know some women who neglect to put on flannels till Thanksgiving. That's their time, no matter how cold it is. And others shiver along without them till Christmas. They might just as well dispense with them entirely, for by that time the blood has become so chilled that raising it to a healthy temperature is next to impossible.

Now, this very month, is when we need wool hosiery, flannel undershirts and all the rest of the woolen paraphernalia wherewith sensible women cover themselves. Perhaps they need not be quite as thick as we wear when "the days begin to lengthen" and "the cold begins to strengthen." The ones we left off last spring, partially worn, are about right. By and by we will have new ones and thicker.

Many a severe cold, which brought on a settled cough and finally terminated in consumption, had been prevented if the warm underclothing had been put on in season. Nothing so impoverishes and kills the blood as cold. So, if you wish to look hale and wrinkled go thinly clad.

The arms should be covered with flannel from shoulder to wrist. These under-vests with short sleeves are poor things. Do not purchase them.

I do not see why the arms and lower extremities require less covering than the trunk of the body. They are further from the heart, which is said to be the furnace of the system; and it looks reasonable that they should be furnished with a thicker covering.

One crisp, starlit evening, a little while ago, I met a pretty-faced girl walking with a young man. He wore an outside coat buttoned to the chin, and looked decidedly comfortable, not appearing to be at all overpowered by excessive warmth. But his companion of the "weaker sex"—I wonder what sentimental ninny invented that most distasteful coupling which is applied to woman—had on a white dress cut low at the throat, which was exposed almost to the bust. Over this dress was a scarlet sack of thin flannel, with the "sailor front," still lower, than her dress.

Now I should like to see a man tough enough to go with his throat and chest exposed in that manner. Their summer clothing is about as warm as we wear in the winter.

If woman had been in the beginning so much weaker, physically, than the "head," she would have been numbered among extinct species long ago. The truth is, though I don't like to own it, ever since I've known them they have been diligently seeking to render themselves weakly. And their unremitting efforts have been crowned with marvelous success.

Many women seem to think that a delicate constitution is an attraction, to be had at any cost. The delicacy of a perfect organization is desirable, and is as sure as beautiful. But disease is anything but delicate or attractive.

These low-throated dresses now in style are pretty; but they will cost many a woman her life. A round white throat is beautiful, and it requires considerable resolution to cover so much prettiness, particularly when fashion sanctions exposure.

Many a neck is fair at twenty that is uneconomically enough ten years later. And if women would preserve their beauty they must preserve their health. There is no other way. So, girls, be advised by age and experience, and cover your shapely necks till next June. I know you say you don't feel cold, and perhaps you don't, for youth and beauty are warmer over than their opposites. And it is this very youth that I wish you to rot by living and dressing properly.—*The Household*.

The American Tract Society has issued four thousand different publications, in one hundred and forty-three different languages. Every day the presses throw off five thousand books and fifty thousand tracts!

The Christian Advocate.

SATURDAY, DECEMBER 24, 1870.

THE VOICES AT THE THRONE.

A little child,
A little "meek-faced, quiet village child,
Singing, by her cottage door at eve,
A low, sweet Sabbath song. No human ear
Caught the plaintive melody. No human eye
Beheld the upturned aspect of the smile
That wreathed her innocent lips the while
They breathed
The oft-repeated burden of the hymn,
"Praise God! praise God!"

A seraph by the throne
In the full glory stood. With eager hands
He smote the golden harp-strings till a flood
Of harmony on the celestial air
Welled forth unceasing. Then, with a great
Voice,
He sang "Hallelujah, hallelujah, evermore,
Lord God almighty!" And the eternal court
Thrilled with the rapture, and the hierarchs,
Angel and wrapt archangel, thronged and
burned

With vehement adoration. Higher yet
Rose the majestic anthem without pause,
Higher, with rich magnificence of sound,
To its full strength; and still the infinite
Heaven

Bang with the "Hallelujah, evermore!"
Till, trembling with excess of awe and love,
Each reared spirit sank before the throne
With a mute hallelujah. But even then,
While the ecstatic song was at its height,
Solely in an alien voice—a voice that seemed
To float, float upward from some world afar,
A weak and child-like voice, faint, but how
sweet!

That blended with the seraph's rushing strain
Even as a fountain's music with the roar
Of the reverberate thunder. Loving smiles
Lit up the beauty of each angel's face
At the new utterance; smiles of joy that
glow

More joyous yet, as ever and anon
Was heard the simple burden of the hymn,
"Praise God! praise God!" And when the
seraph's song
Had reached its close, and o'er the golden
lyre

Silence hung brooding—when the eternal
court
Bang with but echoes of the chant sublime,
Still through the abyssal space that wander-
ing voice

Came floating upward from its world afar;
Still murmured sweet on the celestial air,
"Praise God! praise God!"

YOUTH'S MISSIONARY, T. BROWN.

TALKING RELIGION.

Christian believers are usually re-
luctant to speak of religion to their
fellows or urge them to religious ef-
fort. Many regret, yet see no way
to overcome this reticence. A few
take this silence to heart, and are
afflicted in their consciences.

This difficulty of speech does not
attend the offering of any other
good to their fellows. If a man
has a profitable venture, "a good
thing," in which he wishes his
friends to share, he finds no diffi-
culty in breaking the subject to them
whom he would benefit. A city
merchant that has knocked off his
dragging and gone to the country
to enjoy himself finds no difficulty
in expatiating upon his pleasures
when he visits his old-time brother
drudge. He can describe his own
experience, hen-coops, strawberries,
dwarf pears, new milk, fresh vege-
tables, plenty of yard and grass for
the children. He can talk an hour
about his new life, and don't care
who overhears him.

What is religion's experience but
a new mode of life? The reason
why a man finds it difficult to speak
of its joys and attractions is that
they are not sharp and clear in his
own consciousness. He has no reli-
gion to speak of. He has in mind
fragments of religious truth which
he believes or thinks he does, or at
least thinks he ought to. When he
allies out to talk to his brother he
is apt to retail fragments of ser-
mons, and, like many ministers, can
talk the better if he does not look
into the eyes of the man he is talk-
ing to. Because his own religion
on this very day has not been to
him a conscious inspiration or re-
straint, he has nothing sharp-lined
and positive wherewith to interest
or profit his brother.

The real trouble, then, about reli-
gious conversation is the want of a
definite, sharp-lined consciousness
in one's self of having a religious
experience. What do these men
more than others? But if conver-
sion be a positive revolution in one's
tastes and affections; a change in
one's aims and industries, like that
of Peter and John when they for-
sake their boats and nets and fol-
lowed the Master, then there is
something to speak about.

The blind man of whom John
tells us had very little to say, but
he kept saying it with wondrous
power: "Whereas I was blind, now
I see." And any simple-minded
Christian believer can take these
words as a formula: Whereas I was
blind, now I am

In taking account of stock, thus
to see what we have to exhibit to
our fellow-men, a man will in-
evitably gain simplicity, clearness
and strength in his own spiritual
consciousness. The problem of his
own soul's salvation will cease to be
a dim, vague and slightly painful
ache of desire, and hope and fear
commingling, and will become as
the voyage of a vigilant navigator
who, by daily observation of the
heavenly bodies, keeps his place on

the trackless sea, and is able with
hearty hail to exchange reckoning
with any ship he meets or over-
hauls.

If the morning Bible-reading have
been a piece of job work hastily
finished, in order to get at the busi-
ness of the day, then of course there
is nothing to talk about. If there
are no spontaneous thoughts reach-
ing out Christward; if there are no
echoing memories of holy words; if
there are no hopes laying hold on
invisible things; if there are no
fears, causing the hopes to be trem-
ulous by reason of their very pre-
ciousness; in a word, if there be no
spiritual experience, then there should
be no pious talking; for out of the
fullness of the heart the mouth
speaketh. On the other hand, a reli-
gious experience, however slender
and poverty-stricken, if allowed to
come out in words, will be found of
profit to him that speaks and to him
that hears. It will be received in-
variably with the respect which
men give to sincerity and truth.—
T. K. Beecher, in *Christian at Work*.

THE LANGUAGE OF INTERJECTIONS.—
A writer in *All the Year Round*
makes rather sharp comments on
the nature of certain expressions
which are supposed by many who
use them to be the very spice of
converse and salt of emotion.

"It will be noticed, as regards
quadrupeds, that the sounds (we
might be justified in calling them
words) which they severally express
are all in the nature of interjection.
And it is possible that in the rudest
ages of man upon the earth, inter-
jections were, as much for the man
as the brute, the only language in
use. The interjections, 'oh! ah!'
expressive of pain or wonder, or
'good heavens! 'dear me!' expres-
sive of surprise, and many others
which will at once occur to the
reader's mind, as well as the oh-
ingratory, minatory and denuncia-
tory words or phrases, which may
all be classified under the one head
of 'cursing and swearing; and by
which the feelings find a vent for
themselves without a real lan-
guage, are not, in point of fact, of
a higher order of language than the
interjection of the dog, the horse,
the bull or the sheep. When the
'swell' of our day ejaculates 'by
Jove!' on every occasion when other
words fail him, which is very fre-
quently, he stands, as regards lan-
guage, on no higher level than the
dog which says 'bow-wow,' or chan-
cleer that salutes the morn with his
'cock-a-doodle-do.' When a lady
says, 'O! la!' or 'dear me!' to ex-
press her wonder or her pleasure,
she places herself for the time be-
ing on the intellectual level of the
owl or the cuckoo."

I REMEMBER Harriet Martineau
tells how, when she had grown to
be quite a girl, a little one was born
into her home; and as she would
look and ponder, not knowing what
was to become of it, she got a great
terror into her heart that the babe
would never speak, or walk or do
anything that she could do, because,
she said, how can it, seeing that it
is entirely helpless now? But she
found, when the right time came,
that the feet found their footing and
the tongue its speech, and every-
thing came along in its own right
time; and then, instead of the babe,
she had a noble and beautiful
brother, who was able to take her
part and teach things to her, who
had taught him. So the babe be-
came an illustration, when it came to
manhood, of a very common latent
fear in the hearts, not of sisters so
much as of fathers and mothers, that
the life that has come to them,
and is their life over again, will not
scramble or grow or wrestle into its
own place, as theirs has done. They
have no adequate belief in the hid-
den manhood or womanhood that is
folded away within the small,
frail nature, and that the man will
walk among men and talk with men
as a man; and so they often spend
the better part of their time in try-
ing to order afresh what our wise
mother Nature has ordered already.
Robert Collyer.

For thee Christ suffered, as if
there were none beside! Only re-
member that, if in the passion is thy
forgiveness, in the thought of the
passion must be thy armor. It
must be a refuge not in, but from
sins; a home for thee when wearied
in the strife, not a mere cover for
thy littleness. Be this, then, thy
shield in temptation, so to think of
his passion, as also quickly to ask,
for his love's sake, his help, who
endured it for thee. No sin can
long harbor in that breast which so
looks to Christ crucified.

I would not give much for your
religion unless it can be seen.—
Lamps do not talk, but they do
shine. A lighthouse sounds no
drum, it beats no gong, and yet far
over the waters its friendly spark is
seen by the mariner. So let your
actions shine out your religion. Let
the main sermon of your life be
illustrated by your conduct, and it
shall not fail to be illustrious.

A GREEN GROCER—One who trusts.

THE EYE OF AN EAGLE.

The eyes of all birds have a pecu-
liarity of structure which enables
them to see near and distant objects
equally well, and this wonderful
power is carried to the greatest per-
fection in the bird of prey. When
we recollect that an eagle will ascend
more than a mile in perpendicular
height, and from that enormous ele-
vation will perceive its unsuspecting
prey, and pounce on it with unerring
certainty, and when we see the same
bird scrutinizing with almost micro-
scopic nicety an object close at hand,
we shall at once perceive that he pos-
sesses a power of accommodating his
sight to distance in a manner to
which our eye is unfitted, and of
which it is totally incapable.

If we take a printed page we
shall find that there is some particu-
lar distance, probably ten inches,
at which we can read the words and
see each letter with perfect distinct-
ness; but if we move the page to a
distance of forty inches, or bring it
within a distance of five inches,
we shall find it impossible to read it
all. A scientific man would, there-
fore, call ten inches the focus or
focal distance of our eyes. We cannot
alter this focus except by the aid
of spectacles.

But the eagle has the power of al-
tering the focus of his eye just as
he pleases; he has only to look at
an object at the distance of two feet
or two miles in order to see it with
perfect distinctness. Of course the
eagle knows nothing of the wonder-
ful contrivance which God has sup-
plied for his accommodation; he
employs it instinctively and because
he cannot help it. The hall of his
eye is surrounded by fifteen little
plates, called sclerotic bones; they
form a complete ring, and their
edges slightly overlap each other.

When he looks at a distant object
this little circle of bones expands;
and the hall of the eye being re-
lieved from the pressure, becomes
flatter; and when he looks at a very
near object the little bones press
together, and the ball of the eye is
thus squeezed into a rounder or
more convex form; the effect is very
familiar to everybody; a person with
very round eyes is near-sighted, and
only sees clearly an object that is
close to him; and a person with flat
eyes, as in old age, can see nothing
clearly except at a distance; the
eagle, by mere will, can make his
eyes round or flat, and see with
equal clearness at any distance.

A CHAPEL of the Greek Church
was recently consecrated in New
York city, by Bishop Paul, late of
Alaska, and opened on Thursday,
November 24, for divine service,
about twenty-five prominent Greek
merchants, with their wives, being
present by special invitation. The
official element was represented by
D. N. Botossi, consular general of
Greece, and M. Dawys, the secre-
tary of the Russian legation. The
services were conducted in the Rus-
sian language by Bishop Paul, as-
sisted by Father Bjerring and the
Rev. M. Smirnoff. Prayer was
offered for the imperial family of
Russia and the government of the
United States. A special prayer of
thanksgiving in commemoration of
the day was also made. No sermon
was preached, as but few present
understood the Russian language.
Bishop Paul sails on Saturday to
assume his duties in Siberia.—*Mel-
bournist*, December 3.

A FEW Sundays ago, as Mr.
Beecher was about commencing his
sermon, a stout, fatherly looking
man was endeavoring to make his
way through the crowd, to get
within a better hearing distance of
the distinguished orator.

At that moment Mr. Beecher's
voice rang out the words of the
text: "Who art thou?" "Who art
thou?" again cried the dramatic
preacher.

The stout party, thinking himself
in the wrong, perhaps, by pressing
forward, and believing himself to
be personally addressed, started
the brethren and nonplussed their
reverend chieftain by sedately re-
plying:

"I'm a pig merchant from Chicago,
sir. I hope you ain't mad. There
ain't nary chair, or else I'd sot down."

FIVE MINUTES IN HEAVEN.—Mc-
Cheyne tells of a little boy who for
years suffered excruciating pain.
When asked by his minister whether
he did not feel like murmuring
under the heavy hand of God, he
replied: "Oh! sir, five minutes in
heaven will repay me for it all."

We were reminded of this by a
teacher's speaking of his difficulties
and discouragements. To be a good
Sabbath school teacher, one must
"endure hardness as a good soldier."
But will not five minutes in
heaven with those saved through
your agency, each one a star in
your crown of rejoicing, repay you
for a life of toil in his service?—
Baptist Teacher.

Let it not be imagined that the
life of a good Christian must neces-
sarily be a life of melancholy and
gloominess; for he only resigns
some pleasures to enjoy others in-
finitely greater.—*Pascal*.

HOW WE HEAR AND SEE.

Helmholtz, the best living author-
ity on the subject of sound, says that
connected with the end of the acous-
tic nerve are three thousand strain-
ed microscopic fibers, called "Corti's
organ," and it is probable that every
sound that reaches the ear sets
those cords in vibration that are
sympathetically tuned to it, just as
a voice will set in vibration those
strings of a piano that are stretched
to produce the same tone. These
different vibrations are recognized by
the mind by its connection with
the nerve and brain.

A similar mechanism probably
exists in the eye. The retina of the
eye, which is the extremity of the
optic nerve, is covered with exceed-
ingly minute bodies, called "rods
and cones." These, it is very prob-
able, have the faculty of vibrating
under different influences. The red
light is produced by vibrations of
about four hundred and thirty quad-
rillions of waves per second. It may
set in vibration any "rods and cones"
that are tuned to such a vibration,
while those that are sympathetic to
the seven hundred and sixty quad-
rillions of waves of violet light will
be set in motion thereby.

This suggests that, just as ears differ
in their sensitiveness, some hearing
a shrill sound that is utterly in-
audible to others whose nerve-cords
are not attuned to them, so it may
be in light. The arrangement of
the "rods and cones" may differ in
different persons. And so it is. It
is a familiar fact that some persons
are "color blind." They cannot
distinguish red. That is, their
"rods and cones" have not the right
length or elasticity to vibrate sym-
pathetically with a wave-length as
large as those at the red end of the
spectrum. And it is a fact that some
others can see color in the ultra-vio-
let end of the spectrum to some dis-
tance beyond what is visible to most.

Now, if we were to extend this
variation a little, we may suppose
that some animals may be able to
distinguish as light, by their differ-
ently constructed eyes, a vibration
that is quite insensible to our eyes.
It would require as slight a change in
the eye to make the dark heat rays
visible as is the difference between
the eyes of a man who can see only
from the violet of the spectrum to
the orange, and the eyes of him who
can see also the red. In fact, the
prominent eyes of the mollusks, at
the utterly dark depths of mid ocean,
may be useful, for aught we know,
in seeing by means of rays of heat
of a low temperature. Even the
modified heat of the currents of
thirty-two degrees Fahrenheit may
give these animals abundant use for
their eyes.

THE BOW DRAWN AT A VENTURE.—
A person well known in Glasgow for
superior talent and scientific attain-
ments, but withal for a tinge of
skepticism in religion, was met by
an old companion hurrying to the
Tron Church, while the bells were
ringing for the afternoon service.
"Come," said the friend, "and hear
Chalmers." "I shall do so soon
thing," was the reply. "Do you
think I would trouble myself to
hear a madman?" "You had better
judge for yourself by coming for
once," and taking his arm, they
were speedily seated in the densely-
crowded church. What was the as-
tonishment of the skeptical gentle-
man when the doctor gave out for
his text: "I am not mad, most
noble Festus, but speak forth the
words of truth and soberness!" He
felt that his false judgment of the
preacher was rebuked, as it were, by
a voice from heaven; and the ser-
mon which he heard—the object of
which was to fix the charge of mad-
ness where it ought to be fixed, on
those who, believing in a future
world, continue to live without God
and without hope; while it was
shown that truth and soberness
were only with those who act ac-
cording to their belief and profes-
sion of the gospel—was admirably
fitted for deepening the impression
made by the text, and for removing
the flimsy arguments of "philosophy,
so called." From that day forth the
gentleman became a constant hearer
of Dr. Chalmers, a confirmed be-
liever in the doctrines and a steady
performer of the duties of the Chris-
tian faith.

AN EXCHANGE, probably afflicted
with quartette singing in some of
the Reformed churches, says: "Is
there no way of stopping the un-
derons style of singing which ex-
cites some of our best hymns, or
rather garbles them in the follow-
ing style: 'The ye-he-he-he-hear of
Jew Billy, of Jew Billy, of Jew-
ew-Billy-ey-ey, Jew-ew-Bille, he-
he is come!'"

DR. THOLUER has completed nearly
fifty years of academic labor, and
his friends propose to raise in his
honor a fund in aid of needy stu-
dents who are preparing for the
ministry. Those in this country
who have studied with him are in-
vited to contribute. Either Dr.
Schaff or Prof. H. B. Smith will re-
ceive the money.

A LOST ART—Family government.

RELIGIOUS INTELLIGENCE.

Rome has a population of 210,857
souls. Of these there are 1,609
priests, 882 seminarists, 3,023 monks,
2,039 nuns, and as many other
novices and other cloistered persons
of the two sexes.

There have about \$80,000 been
raised for the Congregational House
in Boston, and it is believed that
nearly the entire sum will be raised
before the Plymouth celebration,
which takes place on the twenty-
first of December.

While in the Rhenish provinces
the Catholic bishops are generally
yielding to the decree of infallibility,
in Hungary the congress of bishops
sitting in Pesth has been taking
into consideration such fundamental
questions as their separation from
Rome, the abrogation of the celibacy
of the clergy, the use of the vernac-
ular tongue in worship, the dimini-
tion of fast-days, and the examina-
tion of such other doctrines as seem
likely to degrade faith into super-
stition.

The Italian code of laws has not
yet been applied to Rome, and at
first difficulties were placed in the
way of colporteurs. Now they go
freely even unto the Ghetto, or the
Leonine City. The opening of a
hall for religious worship would
probably be forbidden by the gnos-
tor; but Rev. Mr. Prochet, of the
Waldensian Church in Genoa, has
twice preached to a small company
in his own apartments, but was
prevented by the action of the owner
of the house from holding a meeting
on a third day.

REV. CHARLES VOYSEY, whose case
has so long been before the English
Church, is at last to be tried for
heresy. His teaching is of the ex-
treme rationalistic order. He chal-
lenges the judges to decide just how
much latitude of belief is to be
allowed in the church—whether
that of Dean Stanley, who says that
"if strict adherence to the letter of
the articles is required, every man
of us must leave the church, from
the primate to the curate," or that
of Mr. Voysey, who holds that the
gospel of John represents our Lord
as a mean, despicable person, and
contains speeches made up for a
purpose and foisted upon him, and
that any worship paid to Christ is
idolatry.

WE OCCASIONALLY hear of Chinese
coolies who were converted in their
own land, and have become the
center of Christian influence among
their countrymen on this continent.
Mr. Arthur, of the Scotch Free
Church, writes from Belize, Honduras,
of a company of twenty-five
Chinamen whom he found on an
estate, among whom were six com-
municants. At their request he
baptized and admitted one other,
and expects that yet others will ask
for baptism. They hold regular
meetings for prayer and worship,
and seem quite intelligent. They
came from the region of Amoy,
where some of them were connected
with one of the churches of the
American Reformed (Dutch) Mis-
sion.

The Christian World says that
the Catholics of the United States
contributed last year more than
\$170,000 to the American Catholic
College in Rome, of which the city
of New York gave \$44,000, besides
other sums that were paid for the
expenses of bishops attending the
council and gifts for the Pope; while
all the Protestant Christians of
America contributed only about
\$15,000 for the work of evangeliza-
tion throughout all Italy. Two
evangelists from Milan, both na-
tives of Rome, have gone back to
that city since its occupation by the
Italian army, and are engaged in
evangelistic work; and, in addition,
a Waldensian preacher has been
sent to Rome, besides colporteurs
of the British and the Scottish Bible
societies and of the Italian Publi-
cation Society. It is proposed to re-
move the Protestant Theological
School from Milan to Rome.

WE HAVE to chronicle the fact
that China has sent to the United
States its first foreign missionary in
the person of Rev. H. S. Mi, of
the Methodist Conference at Fuh-
chan. He comes to labor among the
Chinese in California. American
Methodism had not one representa-
tive in China twenty-four years ago.
Now she has three mission districts
in three provinces of the empire—
namely, in Fuhchan, Kin Kiang
and Peking. In the Fuhchan mis-
sion alone there were baptized dur-
ing the past year two hundred and
thirty-eight adults and sixty-five
children—a total of three hundred
and three; and the church register
contains the names of six hundred
and fifty-eight members, seven
hundred and one hundred and eighty-
six baptized children—a total of
one thousand six hundred and six-
teen. The property held by the
Fuhchan mission is valued at \$52,-
190. Now Chinese Methodism sends
the first native missionary to America.

The Christian Advocate, of De-
cember 1, publishes a letter from
Rev. William Taylor, nearly five
columns long, on the subject of

Christian evangelization in Ceylon.
Most of the letter consists of tran-
scripts of religious experience of na-
tive converts, as given in a fellow-
ship or love-feast meeting. In a
private note to the Advocate, dated
Colombo, Ceylon, September 27, he
says:

"I have just closed a series of
services here in Colombo; between
ninety and one hundred reported
saved. Praise God! I have been
preaching in the streets for a week
daily to about four hundred—Budd-
hists, Hindoos, Siviets, Mohammed-
dians, and another notorious class of
heathens were called Christians; also
a band of the real disciples of
Jesus. I am able, on the Pauline
method, to command a respectful
hearing from all of them. No time
for further details now. My next
address will be care of Rev. J. M.
Thoburn, Lucknow, India."

There are several organizations
in Canada for evangelizing the
French Roman Catholics, of whom
there are nearly a million in the
province of Quebec. Of these the
French Canadian Missionary So-
ciety is undenominational in its
constitution, though mainly sup-
ported by the Presbyterians and
Congregationalists. It has educated
some two thousand children and
youth, giving them a sound secular
and thorough Scripture education.
It has eight schools, the chief of
which is at Pointe-aux-Trembles,
nearly ten miles east of Montreal.
In these schools upward of two
hundred and forty are being edu-
cated, of whom twenty-one joined
Protestant churches last year. It
has organized eight small French
Protestant churches, the largest of
which is in the city of Montreal.
Above thirty thousand copies of the
Scriptures and one hundred thou-
sand religious publications have
been circulated among the people
by colporteurs and missionaries. It
has eighteen preaching stations, six
ordained ministers, seven teachers,
and a dozen colporteurs and evan-
gelists. Its income is about \$20,-
000, and, since the American and
Foreign Christian Union has been
unable to aid it as it had done, Rev.
Mr. Byrne is now in this country
soliciting aid for it. The Baptists
have two organizations engaged in
the same work, of which one is the
excellent Grand Ligne Mission,
started by Madam Feller, which has
received considerable aid from this
country. The Episcopalians also
have the efficient Sabrevois Mis-
sion. The Wesleyans have mission-
aries, and the Scotch Presbyterians
two in the same work.—*Independent*

DR. MULLENS, foreign secretary of
the London Missionary Society,
gives in *Ecclesia* the following ab-
stract of missions throughout the
world:

"Within twenty years after Car-
vey's sermon at Kittering, in Eng-
land, and the enthusiastic meetings
at which the London Missionary
Society was founded, all the churches
of England and America had formed
their societies, had chosen their
fields, and were employing 450
missionaries in active work. The
fifty years which have since passed
have only extended and consolida-
ted these efforts. There is a full-
ness, a definiteness, a system about
the work in all these missions, and
there is a cordial union among the
workers of which opponents are lit-
tle aware. The extent to which the
labors of the missionaries have
spread, and the degree in which
their chosen fields have been occu-
pied, is to be seen in their success.
While Protestant churches are the
mainpring of enlightenment and
progress within the bounds of Chris-
tendom, beyond those bounds there
is scarcely a kingdom or empire of
importance in which their influence
is not felt. A hundred mission-
aries, chiefly American, are laboring
among the Copts of Egypt, the Jews
of Palestine, the Armenians of the
Turkish empire, and the Nestorians
of Persia; a hundred more, from all
countries, occupy the ports of China
and Siam; 500 labor in the pro-
vinces of India and Ceylon; in Mad-
agascar and South Africa there are
nearly 300; 130 occupy the slave
countries around the Gulf of Guinea;
and 220 work for the kindred peo-
ple in the West Indies. The Indian
tribes of North America have 105
missionaries; 200 more instruct the
tribes of Polynesia. Nevertheless,
compared with the attention which
they exercise, these missions occupy
a trifling space in the world. Their
chief actors are a handful of men;
their operations are limited; their
friends are few. Their agencies may
be set down as follows:

Number of societies in America and
Europe..... 99
Total number of European and
American missionaries..... 2,033
Total annual expenditure..... \$5,000,000

"Late returns make the present
number of communicants as fol-
lows: Churches or congregations,
2,500; church members or com-
municants, 273,000; nominal Chris-
tians, young and old, 1,350,000; and
by these the gospel is taught and
Christian work is carried on in
4,000 centers of usefulness outside
the bounds of Christendom."

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, DECEMBER 24, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 111 CAMP STREET, New Orleans, La.
AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. J. G. JONES.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, whenever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

POST OFFICES.

As changes are being made in the post offices of the preachers, they will greatly oblige us by furnishing their addresses as early as possible. Don't forget to give the post office from which your paper is to be changed, as well as that to which it is to be sent.

INDEBTED.—We are indebted to the courteous and patient secretary, Rev. C. G. Andrews, for the proceedings and also for the appointments of the Mississippi Conference.

MISSISSIPPI.—The sixth day's proceedings of the Alabama Conference have not reached us, and we have no means, before going to press, of supplying the hiatus. The sixth day's proceedings of the Mississippi Conference have also failed to come to hand.

PROVISIONS.—By reference to the card of S. K. Russ, which appears this week, our readers will learn where the best of pork, bacon, lard, hams and bulk meats can be obtained on the most reasonable terms. Bro. Russ is well known to us, and we cordially and unreservedly commend him to the patronage of our friends. Orders from the country cannot be placed in more reliable hands. Remember the address, S. K. Russ, No. 47 Tchoupitoulas street, New Orleans.

RESOLUTION OF THANKS.

Resolved, That our hearty thanks are due and are hereby rendered to our venerable and beloved president, Captain R. L. Robertson, for the pains he has taken in the completion of our church, and for the efficient and satisfactory manner in which he performed this self-imposed task.

H. TRENS, Secretary,
In behalf of the Board of Trustees of Craps street German Methodist Episcopal Church South.

As CHRISTIANS we are followers of Christ, and therefore bound to imitate him, and copy after that most excellent pattern he hath set us, who hath left us an example, that we should follow his steps. To see that the same holy temper be in us which was in him; and to discover it in the same manner that he did, and upon like occasions. To this he calls us, and no man is any further a Christian than as he is a follower of Christ: aiming at a more perfect conformity to that most perfect example which he hath set us of universal goodness.

YOUTH and age have too little sympathy with each other. If the young would remember that they may be old, and the old remember that they have been young, the world would be happier.

CHRISTMAS.

We have space this week for only a few words of Christmas greeting to the readers of the Advocate. We hope the bright holiday hours may glide pleasantly with all, and that joy and contentment may reign everywhere. Our religion is designed to make us glad and cheerful. "Her ways are ways of pleasantness, and all her paths are peace." "Sin has clothed the world in sackcloth, and hung it in mourning. The Saviour came to give beauty for ashes, and the oil of joy for mourning." He came to fill the world with all blessedness, to dispel the darkness and gloom of earth, and to inspire a boundless and an immortal joy. The song of the angelic multitude declares the purpose and benefits of the nativity: "Glory to God in the highest, and on earth peace, good will toward men." Our hearts should join in the heavenly refrain, and unite in a delighted response to the celestial melody. As we come with the wise men to the manger, let us also, with them, bring our offerings of gold, frankincense and myrrh. Under the spell of these sacred associations we should not only rejoice, but we should open our treasures and present gifts to our divine Lord. Guided by God's star to the infant Jesus, we are called to give ourselves in worshipful consecration, and to pour forth the expressions of our grateful love and faith in blessing the poor and in spreading the glad tidings of salvation to all mankind. In Scribner's Monthly for January we find the following beautiful lines, with which we conclude our brief Christmas salutations.

THE CHRISTMAS DOOR.

All the year long the moon gives light,
And makes a silver day of night;
But once a year
She seems more near—
Shows every night her steadfast face,
And fills the sky with tranquil grace.
'Tis hard to tell when day is done,
For day and night flow into one.

So Heaven shines downward all the while,
And lights us with its constant smile;
But once a year
It draws more near:
Wide open stands the shining door,
With gleams of light unseen before;
And all across flash glimpses fleet
Of upper joys and radiant feet.

'Tis ever so since love broke through,
And down the widening spaces flew;
That blessed year
Our Lord came near:
For him swung back the starry bound;
Deepened far up the great profound;
All Heaven swept outward at his birth,
And naught was narrow but the earth!

Now evermore He stands and waits
Some lifting of these lower gates;
But once a year
He waits more near:
Shall the plect door be thrown so wide,
And only we the entrance hide?
Unbar all hearts, make room within,
And let the holy Christmas in!

DEATH OF REV. WILLIAM FINLEY. We are pained to announce the death of this excellent brother. The intelligence reaches us through a letter of the fifth instant, from Rev. W. J. Snively, presiding elder of the Cairo district. May God be gracious unto the widow and child!

Bro. Snively says: "Permit me to announce through your paper that death has again invaded our ranks in Illinois. Bro. William Finley, who was appointed as supernumerary, with W. P. Nance, on the Marion circuit, Cairo district, was taken from labor to reward on Wednesday, the twenty-third ultimo. He died at his home after some twelve days' illness, in great peace. He leaves a widow and a young child to stem life's current alone. A more extended notice of his sickness and death will be forwarded to you in due time." St. Louis Christian Advocate, December 14.

BISHOP WIGHTMAN reached Charleston on last Saturday morning, in fine health. He was so constantly at work, while in California, that he found time to write only the one letter we published; but our readers may expect to hear from him again through our columns. By arrangement with Bishop Pierce, he will take Bishop Kavanaugh's place in the Florida Conference, while Bishop Pierce will attend the Conference of the colored people on the fourth of January, in Augusta. Southern Christian Advocate.

AN ARMY may as rationally leave the battle to be fought by the officers alone as the church leave the conversion of the world to the ministers of the gospel.

HEAVEN is your home, therefore often think about it; it is a place in which sin does not exist, therefore avoid sin.

MISSISSIPPI CONFERENCE.

FIRST DAY.

The fifty-fifth session of the Mississippi Annual Conference of the Methodist Episcopal Church South met, according to appointment, in the Methodist church at Crystal Springs, Mississippi, on December 14, 1870, at nine A. M.

Bishop David S. Doggett conducted the religious services by reading the second chapter of Second Timothy, singing the two hundred and seventy-second hymn:

"And are we yet alive,
And see each other's face?
Glory and praise to Jesus give
For his redeeming grace."

After opening remarks by the Bishop the roll was called by the secretary of last year, and there was an unusually large number who answered to their names, the preachers being generally well. Of lay members there was a respectable attendance. C. G. Andrews was elected secretary, J. A. B. Jones assistant, and John T. Cameron, layman, recording secretary.

A motion to constitute the presiding elders present a nominating committee was adopted.

It was resolved that the Conference sit with open doors in the examination of character.

Rev. Dr. McFerrin, secretary of missions, was introduced to the Conference, and announced his purposes and plans of operation. A communication from him was read, and reserved for proper reference.

The Committee of Presiding Elders announced the following, which were appointed the regular standing committees, viz:

On Education.—W. L. C. Hunnicutt, B. Jones, J. Nettles and R. D. Howe.

On Sunday Schools.—John McVea, J. H. Shelton, W. C. Dowd, F. M. Williams and J. T. Curtis.

On Bible Cause.—E. H. Moulton, A. Day, A. B. Stewart, J. E. Jagers and W. C. Dowd.

On Religious Literature.—H. H. Montgomery, W. H. Leith, W. B. Lewis, L. K. Barber and G. W. Harper.

On Missions.—J. A. Ellis, T. Reid, J. L. Forsyth, E. S. Drake and Irvin Miller.

On Memoirs.—John E. Jones, C. G. Andrews, W. H. Watkins, H. J. Harris, W. A. Moore and S. L. Gnice.

James M. Gann was announced as a transfer from the North Alabama Conference, Bascom T. Pearson from the Illinois, and Charles B. Galloway from the North Mississippi.

The annual exhibit of the Publishing House, furnished by Rev. Dr. Redford, agent, was read and referred to the Committee on Religious Literature.

A communication from the New Orleans District Conference, in relation to the care of the orphans of the Mississippi and Louisiana Conferences, was read, and permitted to lay on the table for future reference.

H. H. Montgomery was appointed on the Joint Board of Finance, in place of H. Brown, transferred. William Spillman and T. P. Bell were also made members of same.

A communication from Rev. J. W. Lambirth, in China, was read and referred to the Committee on Missions.

The twentieth question was called, and Conference continued on the examination of character until the hour of adjournment. Barnabas Pipkin was granted a supernumerary relation.

SECOND DAY.

Bishop Doggett called the Conference to order at nine A. M. Dr. McFerrin conducted religious services.

Bro. J. T. Heard, Dr. Walker, of the Louisiana, and Dr. Ebbert, of the North Mississippi Conference, were introduced.

Bro. Heard returned the parchments of Thomas S. Abernathy, which were received and ordered to be filed.

The twentieth question was resumed. D. A. J. Parker was granted a location. The names of W. W. Drake, R. H. Herbert and J. MacLennan were called, and it was announced that they had died during the year.

L. R. Redding was granted a supernumerary relation on account of ill health.

J. W. McNeill was granted a supernumerary relation.

J. K. Hamblan passed and granted a supernumerary relation.

Hardie Brown was announced as transferred to the North Alabama Conference.

THIRD DAY.

The Conference met at nine A. M. Bishop Doggett in the chair. Dr. Watkins led the devotions.

The financial report of the New Orleans Christian Advocate was read and referred to a committee, composed of J. G. Jones, W. E. M. Linfield, H. H. Montgomery, John McVea and J. T. Heard.

J. G. Jones was appointed on the Publishing Committee of the New Orleans Christian Advocate, in place of W. P. Barton, of the North Mississippi Conference.

The examination of character was resumed. J. B. Bowen was granted a supernumerary relation.

Revs. R. S. Clark and C. F. Gillespie, of the Mississippi Conference of the Methodist Protestant Church, were introduced to the Conference.

Thomas Clinton, G. T. Vickers, J. G. Deskin, J. B. Higginbotham, Levi Penney and Harvey Copeland were granted supernumerary relations. Burwell B. Whittington was announced to have died during the year, and his name was referred to the Committee on Memoirs.

Ransom J. Jones, Jr., fraternal messenger to the Mississippi Conference of the Methodist Protestant Church, made report that he had executed his commission, had been cordially received, and had received assurances of a desire for an organic union of their church with ours, and presented a communication on the subject, which was read.

Revs. R. J. Clark and C. F. Gillespie, of the Methodist Protestant Church, and appointed to consummate a union of our churches, addressed the Conference. The entire matters, with the papers, were referred to a special committee: W. H. Watkins, H. H. Montgomery, J. T. Heard, John McVea and James E. Watts.

The Committee on Missions made a report, submitting a printed constitution and the following board of managers, viz: James L. Forsyth, W. H. Watkins, W. L. C. Hunnicutt, John G. Jones, T. Reid, T. J. West and Irvin Miller; which report was adopted.

Question 1. Who are admitted on trial? William J. Seale, from Philadelphia circuit, John Wesley Sandell, Thomas B. Walden, David P. Bradford, Hiram Rivers Singleton, Peter Wilson Cram, John W. Hall, Alexander Trotter, Daniel G. W. Ellis, George M. Gillmore and J. J. Parker.

Rev. Mr. Trawick, pastor of the Presbyterian church, was introduced.

FOURTH DAY.

Bishop Doggett called the Conference to order at nine A. M. The religious services were conducted by J. G. Jones.

Bishop J. C. Keener was introduced to the Conference.

The second question was called: Who remain on trial? David A. Givens, James M. Weems, Lyman Carley, Jacob H. Holland, George W. Chatfield and Ulysses P. Phillips, were passed and continued. William K. Simmons was discontinued.

Henry P. Bowen and Lyman Carley were admitted into full connection, and elected to deacon's orders. John O. Carlyle passed and admitted to deacon's orders.

Question 7. Who are the deacons of one year? Levi P. Meador, E. W. Simmons and Alexander M. Campbell.

Question 12. What traveling preachers are elected elders? R. A. Davis and Parmenas Howard.

Question 10. What local preachers are elected deacons? Calvin C. Watkins from Natchez station, Benjamin D. Sellers from Burtonton circuit, and Miles Lynton from Marion circuit.

Question 14. What local preachers are elected elders? Samuel D. Terry from Forest Grove circuit, Noah F. Mitchell from Pearce's Spring circuit, Thomas S. West from Clarke and Shubuta, and Benjamin A. Bea-

son from Bogue Chitto circuit, were elected.

Bishop Keener addressed the Conference in behalf of Centenary College. Judge John McVea also set forth its claims upon the patronage of the people.

Bishop Keener took the chair.

The Board of Missions submitted a report, stating that moneys had been advanced by a gentleman in New York for the payment of the missionary drafts of our church, during the years 1860 and 1861, and that part of the debt still remained unpaid by our church; that the honor and reputation of the Methodist Episcopal Church South were involved in the payment of this debt, and recommending that an effort be made at this session of Conference to liquidate the amount of that debt which had been assessed to our Conference, viz: \$1,450.

Dr. McFerrin addressed the Conference on the subject, and obtained reliable pledges for \$1,600, to be paid by the first of April.

Thomas Reid set forth the claims of the Ministerial Educational Society.

FIFTH DAY.

The Conference met at nine A. M. Bishop Doggett presiding. Dr. Walker conducted the religious services.

Bishop Doggett presented the names of persons ordained on yesterday, as follows, viz:

Deacons.—Traveling: Henry P. Bowen and Lyman Carley. Local: Jephtha S. Collins, Benjamin D. Sellers and Thomas King.

Elders.—Traveling: Robert A. Davis and Parmenas Howard. Local: Noah T. Mitchell, Thomas O. West and Benjamin A. Beason.

Rev. R. J. Harp, agent of the New Orleans branch of the Publishing House, was introduced.

The communication from the New Orleans District Conference, in relation to the orphans of the Louisiana and Mississippi Conferences, was taken from the table and referred to a committee, composed of W. H. Watkins, J. L. Forsyth and C. K. Marshall.

A resolution recommending that members of Conference make their statistical report, as their names are called in the regular examination of character, was laid on the table.

C. R. Godfrey was granted a location at his own request.

Thomas M. Ward was granted a location at his own request.

C. K. Marshall was granted a location at his own request.

Daniel Watson, Thomas W. Linder, upon presentation of certificates of subscription to our doctrine, and Henry T. Jones, upon making such subscription before the Conference, were recognized as local elders in our church from the Congregational Methodist Church.

J. C. Carlyle was granted a location at his own request.

J. G. Jones, chairman of special committee on the New Orleans Christian Advocate, submitted a report recommending that every preacher devote himself heartily to increasing the list of subscribers. The report recommended to the Publishing Committee that no preacher should receive the paper as an agent unless he procured five renewals or new subscribers, or five of each combined; which report was adopted.

Dr. Walker, W. E. M. Linfield, Bishop Doggett and R. J. Harp urged the claims of the Advocate upon the patronage of the people.

H. H. Montgomery, from Committee on Religious Literature, submitted their report, which sets forth the necessity of a sound system of reading, urging the preachers, as they valued their own success and the salvation of the people, by all means to circulate good books, and particularly the periodical literature of the church.

The committee recommended the passage of resolutions, as follows, viz:

Resolved, 1. That we do heartily recommend to our people our Publishing House at Nashville, Tennessee, as worthy their patronage, and as an institution which every Southern Methodist ought to sustain.

2. That we do earnestly request all the preachers to engage in the circulation of our books as a very

valuable means of extending religious knowledge.

3. That as members of this Conference, lay and clerical, we will exert ourselves to have our periodicals put into every family in our charges, and thus give them the valuable information found in them.

Dr. McFerrin spoke in behalf of the new monthly and the Christian Advocate at Nashville.

W. H. Watkins offered as an amendment to report of Committee on Religious Literature the following, viz:

Resolved, 1. That the action of the General Conference, by which the Southern Review became identified with the periodical literature of the church, meets our full approval.

2. That the Southern Review deserves the liberal and hearty support of the ministers and members of the church, sustaining as it does a reputation for literary ability and general information not excelled by any periodical of its class, and being an invaluable auxiliary in explaining and defending the doctrine and polity of Methodism, and that we will do our utmost to obtain subscribers for it.

Which amendment was received, and the whole report, with the resolutions, was adopted.

C. G. Andrews was appointed by the Bishop to receive the subscriptions to the old debt and for missions, and forward same to Dr. Redford, agent.

Dr. McFerrin took leave of the Conference.

E. H. Moulton, chairman of the Committee on the Bible Cause, submitted their report, which says that the Bible is the charter of life; that sixteen per cent. of the families visited by Rev. Dr. Harmon, the agent of the Southwestern Bible Society, were destitute of the Bible; that this ought to be remedied; that Dr. Harmon had been diligent in endeavoring to supply this need, and that we ought all to help him in the great work; that the Board of Directors of the Southwestern Bible Society be respectfully requested to continue Dr. Harmon as their agent, and that these resolutions be passed, viz:

Resolved, 1. That the Southwestern Bible Society has our perfect confidence, and that we cordially approve of its efforts to disseminate the word of God.

2. That we will cheerfully cooperate in its plans, and aid its agents in carrying out its great work.

The report was adopted.

The fifth question, Who are readmitted? was called and answered: Horace M. Booth, Henry T. Jones and Seaborn R. Hyde. The vote in the case of the latter was reconsidered, and he was again readmitted.

W. H. Watkins, chairman of the Committee of Union with the Methodist Protestant Church, submitted a report, as follows, viz:

The committee to whom was referred the communication of the Mississippi Conference of the Methodist Protestant Church, through their representatives, Revs. Messrs. Gillespie and Clark, proposing a union of the Mississippi Conference of the Methodist Protestant Church and the Mississippi Conference of the Methodist Episcopal Church South, beg leave to report the following resolutions for adoption, viz:

Resolved, 1. That we recommend that the union be consummated by the brethren of the Protestant Church accepting the Discipline of the Methodist Episcopal Church South.

2. That their ministers be received in the same orders and relations they sustain in the Methodist Protestant Church, and sustain the same relations in the Methodist Episcopal Church South.

3. That their private members be received in full connection, and be entitled to the same rights and privileges as those already in our church.

4. That when a majority of the membership of the Mississippi Annual Conference of the Methodist Protestant Church shall so vote, this union shall be considered as perfected.

The session was prolonged for the disposition of the report, and it was adopted.

APPOINTMENTS.

WOODVILLE DISTRICT.—James L. Forsyth, P. E. Woodville station, Corydon Chamberlin; Wilkinson circuit, J. H. Shelton; Liberty, E. R. Strickland; Buffalo, P. S. Petty; Bayou Sara, R. D. Norsworthy; Jackson and Plains, J. A. Godfrey; East Feliciana, W. E. Ballard; Clinton station, W. G. Millspaugh; East Baton Rouge, E. W. Simmons; Meadville, C. W. Campbell.

SUMMIT DISTRICT.—J. Nicholson, P. E. Summit circuit, George Bright; Bogue Chitto, J. J. Clark; Holmesville, J. W. Sandell; St. Helena, J. D. Willis; Greensboro, D. P. Bradford; Aroola, T. Price; Covington, Hiram Singleton; Franklinton, E. P. Lewis; Livingston, J. A. Givens; Tangipahoa, S. R. Hyde; J. W. Harmon, agent Southwestern Bible Society.

SEASHORE DISTRICT.—W. W. Hurst, P. E. Mount Carmel, N. B. Young; Rankin, G. M. Liverman; Columbia mission, Henry T. Jones; Gainsville, to be supplied by John W. Williams; Handsboro, W. H. Leith; White Plains mission, D. Merchant; Enon, J. S. Parker; Pascagoula and Bay Shore, U. B. Phillips; West Pascagoula, to be supplied by Irvin Roberts; Green, to be supplied by J. M. Winbush.

BROOKHAVEN DISTRICT.—G. F. Thompson, P. E. Brookhaven station, H. F. Johnson; Scotland, H. M. Booth, J. B. Bowen, sup.; Brandywine, R. A. Sibley; Crystal Springs station, W. E. M. Linfield, J. W. McNeil, sup.; Hazlehurst, B. T. Pearson, L. R. Redding, sup.; Pleasant Valley and Rehoboth, E. A. Flowers; Burtonton, W. Wadsworth; Georgetown, R. B. Downer; Wesson and Beauregard, E. H. Moulton; Martinsville, P. W. Sharbrough; Jackson circuit, A. Day; H. F. Johnson, president Whitworth Female College.

JACKSON DISTRICT.—H. H. Montgomery, P. E. Jackson station, C. G. Andrews; Madison, A. B. Stewart; Clinton station, H. Harrington, J. K. Hamblen, sup.; Sharon, W. L. C. Hunnicutt; Sulphur Springs, to be supplied by J. S. Collins, J. W. Adams, sup.; Carthage, J. M. Weems; Camden, J. W. Hall; Yazoo City, J. T. Curtis; Yazoo circuit, T. W. Flowers; Mount Olivet, A. M. Campbell; Brownsville, John Lusk; Raymond, to be supplied by W. C. Black; W. L. C. Hunnicutt, president Sharon Female College; J. M. Pugh, president Madison College; J. W. Lambuth, missionary to China.

Nicholson; Thomas Nixon; Port Gibson, C. B. Galloway; J. G. Jones, sup.; Fayette, W. B. Lewis; Natchez station, W. H. Watkins; Kingston circuit, to be supplied by T. W. Brown; Lower Deer Creek, H. P. Bowen; Clover Hill circuit, Peter W. Cram; Milldale and Cape Ridge, James S. Harris; Benjamin Jones, president Port Gibson Collegiate Academy.

BRANDON DISTRICT.—F. M. Williams, P. E. Brandon circuit, G. W. Chatfield, George Jackson; Fanning, D. W. Dillohay; Forest, W. Finn; Trenton, S. P. Meador; Southland Chapel circuit, H. J. Harris; Sylvestra circuit, Lyman Carley; Garlandville, G. W. Boyles; Decatur mission, Thomas Y. Armstrong; Martin, L. Kendall; Philadelphia, J. H. Holland; Lake, J. A. Vance.

MERIDIAN DISTRICT.—W. B. Hines, P. E. Meridian station, John A. Ellis; Marion, John C. Brogan; Toombsba mission, to be supplied by George Bancroft; De Kalb, D. G. W. Ellis; Spring Hill circuit, J. M. Gann; Enterprise station, J. D. Hays; Enterprise mission, W. Spillman; Enterprise circuit, Alexander Trotter; Clarke circuit, W. J. Seale; Wayne circuit, James Shank; Paulding circuit, G. M. Gilmore, R. J. Jones, sup.; R. Abbey, Sunday school agent and secretary.

TRANSFERRED.—W. F. Glenn, to North Georgia Conference; J. C. C. Black, to West Texas Conference; Robert A. Davis, to Louisiana Conference; Josiah Barker and A. J. Coleman, to Alabama Conference.

"TWENTY-EIGHT GOOD DOLLAR BOOKS" for \$1.50.—We call particular attention to an advertisement under this head on our fifth page. Perhaps no finer or more valuable journals are anywhere to be found than *Hearth and Home* and the *American Agriculturist*. They are most beautifully illustrated, and are filled with choice, carefully prepared, reliable information, such as is needed and will be highly useful in every family, and by every person, young and old. The household and children's departments are exceedingly interesting and instructive. Orange Judd & Co. are veteran publishers, and their journals and books have long enjoyed an unsurpassed reputation for reliability and sterling value. In the advertisement referred to the publishers take occasion to show that a single volume of either of these journals contains illustrations and reading matter equivalent to what would be found in good books costing twenty times as much money.

ANNUAL CONFERENCES.
CONFERENCE, PLACE, TIME, BISHOP.
Louisiana, N. Orleans, Jan. 4, Doggett.
Florida, Key West, Jan. 4, Kavanagh.
Ga. Colored, Savannah, Jan. 4, Pierce.
Baltimore, Md., Mar. 8, Pierce.

Work is the weapon of honor, and he who lacks the weapon will never triumph.

ALABAMA CONFERENCE.

SEVENTH DAY, DEC. 14.

Conference met at the appointed hour. Bishop McVey in the chair. Devotional exercises led by Rev. E. E. Wiley.

Minutes of the afternoon session yesterday read and approved. The committee to nominate examining committees reported.—Adopted.

The Committee on Books and Periodicals reported, commending the Southern Methodist publications and periodicals, and urging to increased efforts in circulating the religious literature of the church. After some discussion the report was adopted.

The exhibit of the New Orleans Christian Advocate was read.

The Committee on Education reported two male and female high schools, one female and two male colleges, in successful operation, and commended them to the patronage of the church and the whole country. They recommended the Conference to request the presiding Bishop to appoint A. D. McVoy to the professorship which he now holds in the East Alabama Male College, Dr. J. Hamilton agent for the Southern University, and Rev. E. D. Pitts principal of the Opelika High School. Adopted.

Dr. Wiley, president of Emory and Henry, was invited to make some remarks on the subject of education, in which he stated the advantages of the institution under his care, and commended it to those who seek educational facilities out of their own State. He also highly commended the Martha Washington Female College at Abingdon, Virginia.

Dr. Cox made a few remarks in behalf of the institution under his care, and commended it on account of the locality, its cheapness and superior advantages.

Report of the Board of Finance was made and adopted.

The committee to nominate the Legal Conference reported. Adopted. The report of the Committee on Sunday Schools was read and adopted.

It was moved and carried that the presiding elder of the Union Springs district be allowed to employ Rev. J. W. Broxton, if necessary.

A location was granted to W. A. Montgomery.

The vote making W. H. McDaniel supernumerary was reconsidered. J. E. Newman was located.

A supernumerary relation was asked for M. C. Turrentine. Granted.

Rev. R. J. Harp called the attention of the Conference to the New Orleans Depository.

The committee to nominate delegates to the General Sunday School Convention, to be held in Nashville next year, reported. Adopted.

By vote of the Conference an appropriation from the missionary fund was made for the publication of the minutes.

Resolutions were passed commendatory of the eminent services rendered the church by Rev. M. C. Turrentine, and expressive of the love and sympathy of the Conference for him.

It was voted to be the sense of the Conference that Methodist ministers should not invite into their pulpits the ministers of other denominations who do not extend to them the same courtesies, nor recognize them as ministers of the gospel.

Committee on Memoirs reported. Short and touching memoirs of Rev. T. L. Densler, J. F. Dickinson, J. W. Starr and Elisha Calloway, who had died during the past year, were read. Report adopted. The Conference then sang:

"O may I triumph so,
"When all my warfare's past," etc.

Dr. Hamilton then led in prayer.

A resolution of thanks to the citizens of Montgomery for their hospitality, and also to the railroad and steamboat companies for passing ministers and laymen at half fare, were adopted. The appointments were read, and Conference adjourned to hold its next session in Mobile, time to be appointed hereafter.

APPOINTMENTS.

MOBILE DISTRICT.—H. Urquhart, P. E. St. Francis Street, A. S. Andrews; Franklin Street, John W. Rush; St. Paul's, J. E. Foust; City mission, to be supplied; Whistler, J. J. Grace; Citronelle, R. M. Powers; Cottage Hill, I. Z. T. Morris; St. Stephen's, A. M. Jones; J. G. Rash, sup.; Eastern Shore, J. A. Spence; Mount Pleasant, supplied by P. L. Martin; Pollard, E. M. Turner; Pensacola, J. A. Pace; Milton, W. B. Dennis; T. O. Summers, book editor and editor Nashville Advocate.

BOTH OF THE ABOVE for \$3.

122 GOOD DOLLAR BOOKS for \$4.
\$37,000 ENGRAVINGS for \$4.
BOTH OF THE ABOVE for \$4.

It will pay to read through the following
Explanation of the Above:

HEARTH AND HOME.
Issued every week, is
one of the most beautiful
Journals in the
world. It has twenty
large newspaper pages,
and contains a great
number of splendid en-
gravings, finely printed,
and of a highly pleasing
and instructive charac-
ter. A single volume of
Hearth and Home con-
tains about \$25,000
worth of such engrav-
ings. It has, also, a
vast amount of the
choicest reading, care-
fully prepared, interest-
ing, and packed full of
instruction. With a mod-
erate amount of rural in-
formation for the farm
and garden, it contains
excellent Editorials on
the various topics of the
day, which give the read-
er practical and useful in-
formation, and render him
intelligent. Nothing of a
sectarian or political bias
is introduced. *Hearth and
Home* has a most capital
HOUSEHOLD DEPARTMENT,
which will delight and
greatly aid every house-
keeper. This Department
is alone worth many Dol-
lars every year, often every
week. The *Children's
Department*, edited by Mrs.
M. E. DODGE, with many
Assistants, is of surpassing
interest to all the little
people. Indeed, every pa-
rent better pay \$100 a year
than not to have his
children supplied with this
paper. It is hardly equal-
led in the world. Then the
science, literature, descrip-
tions of how various
things are made, etc. The
News Department tells
in a clear condensed way,
what is going on in the
world, so as to make the
reader intelligent without
wading through a great
mass of material. The
Reliable News from the
Crops, the Markets, etc., is
of great value to all pro-
ducers and all who deal in
produce, etc. N. B.—A
careful estimate shows that
a single volume of *HEARTH
AND HOME* contains the
same amount of first rate
reading matter as 94
Books of the average size
of those sold at 25 cents each.
Yet, owing to the large cir-
culation of the Publishers
are able to supply at the
low price of 63 a year; or
four copies at \$2.50 each;
ten copies at \$2.50 each.
You should be convinced
of its real value, it is
the Cheapest Journal
in the World. It is
impossible for anyone
to read the journal a year
without getting useful
hints and suggestions that
will repay him scores of
Dollars. Try it.
It is issued monthly
of a similar character to
Hearth and Home, though
entirely different in its en-
gravings and ready mat-
ter, and has less current
news. It is full of useful in-
formation for every Man,
Woman and Child, in City,
Village and Country. Each
No. has 44 great pages,
and a careful estimate
shows that it contains as
much printed matter as
28 Books, costing \$1
each. Yet on account of
its immense circulation,
surpassing that of any
other similar journal in
the world, it is supplied
to regular subscribers
for only \$1.50 a year, or
four copies for \$5. More
than a Million People con-
stantly read this Journal
with profit and delight. It
is so reliable, full of
useful information, that it
is hardly possible for any
one to read the *American
Agriculturist* a year with-
out getting hints and sug-
gestions that will pay
back many Dollars. If you
have it not, try it a year.
It is just entering the
30th Annual Volume, and
now is the time to begin.

N. B.—N. B.—Hearth and Home and *American Agriculturist* are sent together, a year, for only \$2. The two papers contain during a single year about \$37,000 worth of excellent ENGRAVINGS, and a careful estimate shows that their contents are equal to 1300 Books of the average size of those sold at 25 cents each. If you get for \$4 as many as you could in spending \$1200 in Books!!! Every one is invited to examine these Journals—to give them a year's trial. The Publishers feel sure that every one who does so will not only greatly please, but greatly profit. Try them!

The Child's Corner.

MAMMA'S BAREFOOT BOY.

BY A. H. POE.

Long he listened to the story
Of the poet's "Barefoot Boy."
Lined and lined and lined,
Caring naught for ball nor toy;
And the eyes of brown grew brown,
And the cheeks of pink grew red,
And upon his hand he rested,
Thoughtfully, his curly head.

For awhile he seemed to ponder,
Then he slowly went away
To a dim, unadorned corner,
Where he sometimes hid in play.
There at tumbled shoe and stocking
Bravely taught with all his might;
Off they came at last, revealing
Dimpled balls of pink and white.

Softly, softly, o'er the carpet,
Strayed the little pearly feet,
Till he rested close to mamma,
Resting blushing and sweet;
Half asheathed and half emboldened,
Raised his eyes, so brown and coy;
"Mamma," and the lips were smiling,
"Isn't I our barefoot boy?"

Anne Hansel's Christmas Eve Under the Snow.

BY MRS. JULIA F. SNOW.

Anne Hansel was the oldest child, just thirteen, the age when most of my girl readers are mere children, with parents "keeping them back" from womanhood all they can, lest the world steal them from the parent nest before the dawn is gone from the tender fledgling. At this age, then, Anne was a stout, rosy, helpful little daughter, an intelligent, God-fearing child, and a loving, gentle sister. She could read and write in German (did I mention that they were a German family? no? well, they were, and lived in Pennsylvania,) could say her catechism, had read the "Life of Martin Luther" twice or thrice, could spin, sew, knit and do many other things. Besides, in the spring she was to be confirmed, and at Whitsunday she should take her first communion. So Anne felt that she was almost a woman, if she was but thirteen.

They lived upon a farm. John Hansel and Margaret, his wife, had purchased and cleared the land, and worked hard and lived plainly to pay off their mortgage. It was good land and yielded well, but it needed a great deal of hard work and patient culture to compel it to give its increase. It was cheap when John bought it, and he had the true German passion for land. So don't think they were what some call "poor," or draw any mental picture of suffering and privation, for I am not going to tell that kind of a story. They feared God, worked hard, lived substantially but plainly, and hoped for better days, when Anne and Hans and Peter and Michael and Meena should be grown men and women, and could help in the many and various kinds of work on the farm.

It was at the Christmas time, and many were the pleasant tales that Farmer John and Dame Margaret had found time to tell evenings, when John put his farm tools in order, and she and Anne were at their knitting. All had something to do. Even Meena, small as she was, could sew carpet rags, or reel yarn, or help in many ways. And as for the boys, Dame Margaret didn't let the grass grow under their feet, nor the birds roost in their brains either. They had heard many tales of Santa Claus, or the Christ Child, or the Kris Kingle, or whatever else they called him, of blazing and twinkling Christmas trees, and all the good cheer of the jolly, merry Christmastide, and their heads were full of the brightest anticipation for this special Christmas.

This had been a good year—the crops were heavy and plentiful, and had paid a good slice from off the mortgage. The poultry had prospered, the butter and cheese were all that Dame Margaret had dared to hope. They had a team of excellent horses—that heavy breed, with such magnificent muscles, so slow, so strong, so steady, for which that district is so justly famed. And they had a big wagon, too—a stout, capacious vehicle; a "mountain ship," as some have called it, and not inaptly, for the body of the wagon is not unlike a boat, with a huge cover, shaped wondrously like the good dame's sunbonnet, in which she was wont to array herself when milking, weeding or feeding the chickens.

Well, into this vehicle, in pursuance of the yearly custom, were duly packed the nicely-dressed poultry, the winter butter, the eggs and the cheese, the proceeds of which were to furnish coffee, spices, sugar (all Germans love sugar,) shoes and what other matters the thrifty dame should decide were needed by her family. Besides, the taxes become due at this season, and must be paid out of this fund. Poultry always brought a good price at this season, and Anne had her own little venture, too. Certain of the poultry, her own charge, were in the big wagon in a separate lot, from the profits of which she was to have a silver thimble and a pair of new shoes. She hoped for a new book,

but that could not be quite certainly promised; till it was seen what prices the stuff brought. But then, perhaps, Santa Claus might bring it; so Anne waited and hoped.

Certain hints had been dropped of "horses made of gingerbread, and sugar horses painted red," which were cherished, dwelt upon, lived on by all the younger children. Only Anne was outgrowing such little stories.

When everything was packed into the wagon, the luncheon box, well stored with brown bread, boiled ham, fried pretzels, some cheese and a jug of home-brewed beer, Dame Margaret, in her stout woolen dress, heavy cloak and warm hood, with a flat stone, well heated and wrapped up, under her feet; John, in his heavy coat (a relic of Fatherland,) and the children all kissed (Germans love their families intensely, and have an honest fashion of showing it, too, God bless them!) the big wagon set sail, down the long mountain road, toward the next town. Anne watched it out of sight, and then taking up her duties as quietly as her mother would have picked up a dropped stitch in her knitting, with her dextrous left forefinger (how do the Germans ever knit that way?) and drew out the wheel to spin her "stent."

Ere long it was noon by the little Dutch clock. But Anne was ready for it. She had heated up the broth her mother had made the day before, in a little iron pot; a good, wholesome soup it was, too, made of pork and beans and cabbage and milk, with a bit of salt beef; and out some stont slices, rather wedge shaped, to be sure, of brown bread. Then she poured the hot soup into the little pannikins, and gave to each a wedge of bread and a cup of milk, and while they ate it she told them that the day after to-morrow would be Christmas, and the fat turkey that hung in the attic should be cooked, and Santa Claus would be sure to come to-morrow night and bring them all presents.

It did not matter in the least to the flavor of the turkey, that a log had rolled on it when it was young and broken its backbone. It seemed to agree with it; and though it was badly deformed, it grew very big and fat, and was dedicated by Dame Margaret to their own uses at Christmas time, for its appearance would certainly spoil it, though not its taste. A pair of chickens and a few eggs had also been reserved; and there was to be a real Christmas dinner at the Hansel's that year, at all events.

Now Anne, notable little soul, had her hands full. She had Hans and Peter and Michael—the baby—and little Meena to look after, and keep out of mischief. She must get the meals, keep clean and tidy and shipshape. And the stent of spinning and knitting must be done, or she must meet Margaret's black looks!

When they had got all through dinner little Michael woke up, and had some soup, too, and said, "Yah! yah!" which was good baby German, and all he knew of any language. Then he had a dried gourd and three walnuts given to him to play with, and went back to his cradle, while Anne cleared up. The rest of the children she set to shelling corn for the fowls, and kept them busy till it began to grow dark. She thought of the cows and the fowls, and went out with Hans to take care of them. It was but little milk the cows gave, but Anne milked them, and fed them bountifully, too, and fed the fowls, besides putting a well filled corn box within their reach.

Warmly dressed as she was, in her heavy knit "wamuis" and hood, she felt the cold, and as she came in she picked up her pet bantams and brought them in doors in her apron, with a tender, motherly feeling for the "little ones," her special pets.

As she came out of the barn the wind was rising, and flakes of snow fell now and then, and there was the peculiar smell of a snow storm in the air. Snows were heavy in the mountains. Anne called the boys to help her, and bidding Meena to mind the baby, the children tugged and lugged the wood till the big corner was piled with all it would hold—enough, with care, for three days. Next, to fill the washtub with water, lest the well should be snowed up. It took a good many pailfuls—five or six—to fill it, and it was dark, and the wind blowing fiercely, and the air filled with flying flakes, when the children came in and bolted the kitchen door.

They could not see to the road now. Anne hoped that father and mother were either not far off or had not started. She wondered if she had better get supper or wait. But Peter and Hans and Meena and the baby settled that question; so she set out the bread and the cheese, and warmed the milk, and lit the candle, and they all had their supper. And the wind kept on blowing and the snow falling all the time.

So Anne, when she had cleared away, got out the fat little German Bible, and read to them, and the boys said their prayers and cuddled down in their trundlebed, and Anne

tucked little Michael up in the high bed in the corner between its two feather beds, and soon all were sleeping soundly in the little farmhouse on the mountain.

Meanwhile the wind rose higher, the snow kept falling, and the storm steadily increased. But the children slept as soundly as if nothing at all were happening. They feared God, and had excellent health, and so their sleep was sweet and dreamless. It seemed to Anne as if she had slept a week, but it was still dark, when she woke. She rubbed her eyes, but it was very dark, and yet, to her utter astonishment, the little Dutch clock tolled out eight o'clock! Such a thing had never happened to her in her whole life, and she sprang out of bed in the greatest haste. A look at the windows showed them blocked up with snow. Huddling on her clothes she hurried up stairs, and found that the snow reached half way up the attic window, and was still falling heavily, and the wind blowing, too.

Now the Hansel farmhouse was a low, story-and-a-half building, and fifteen feet would reach from ground to ridgepole. Drifts of twenty and thirty feet were not uncommon in those mountainous districts, so Anne knew that they were "snowed up," and made up her mind how to act. She decided that as there was a reasonable prospect of being snowed up over Christmas, it was best not to be too prodigal of wood; so she only put on a "backlog," a "forelog," two "cross sticks" and a "rider," and proceeded to get breakfast. First, she raked open the ashes and put in a good many potatoes to roast, five or six apiece. (Let me tell those who never eat potatoes roasted in the ashes that they have only half eaten them.) Then she made some milk hot, and cut some more wedges of the black German bread, and the Hansel family breakfasted. Then they washed up the dishes and swept up.

It was yet dark, except for the firelight, which was a good deal of an exception, for by it they could see well enough, except to sew; and as Anne had as soon knit she got out her knitting. The children did not like it much, but German children are not natural-born idlers, like Americans, who think their mothers are created on purpose to amuse and wait on them. So, when Anne set them to shelling corn, with two cobs into a tin pan, they all did it. Only Hans would give an occasional snuffle of rebellion, and console his eyes and nose with his coat sleeve; but he did not dare rebel. Anne had too many of her mother's ways to make it safe to do so.

Sometimes she went up stairs to report progress, but the storm kept on. Her heart ached for the cattle, but she remembered the great feed she had given them; and the bantams were as happy as lords, and did nothing but eat the grains the children scattered in shelling the corn.

They made their meals as long as they could. Anne cooked some fat ham, at noon, for them, and they ate as much as they could. They jumped about a good deal, but after all Anne was glad they were so quiet. As it grew toward night, and there was no sign of their liberation, their hearts began to sink. But Anne remembered and told all the stories of the merry Christmas time that she had ever heard, and the little one hoped and prayed that the snow would not cover them all up.

"Anne," cried Hans, "what if the snow should come so deep that the Santa Claus could not get the Christmas trees? or could not get down the chimney? What would we do? Does he ever pass by and not know that the little children are expecting him?"

Anne stopped to think. She called to mind what she had heard her mother say was sometimes done by poor folks in her country.

"Hans," she answered, "I don't know; but I'll tell you what we will do. We'll take a clean sheet, and make a 'bright corner' for Santa Claus."

So they got out a clean sheet of the heavy, homespun linen—Dame Margaret's spinning—and pinned it up in the corner nearest the fire, fitting it well to the corners. Then Anne cut some little stars out of some bits of red flannel that she found in a bundle of patches in the till of the old chest, and put one in each corner under the pine, and down the center and outside. Then she found some tiny bits of blue, German calico, "indigo-blue hand print," and made some more stars, and in the middle she fastened her own red, head ribbon, so that it looked as if the sheet were suspended from it.

When all was done she lighted a candle, and I can tell you that Santa Claus' "bright corner" looked fresh and pretty enough; and when Meena took her little cricket and carried it inside, and called it "her room," it made a very pretty picture. "Really and truly" (as the children say,) they do so in Wittenburg. It was not their custom to hang up stockings—that is low Dutch.

Then it was time to go to bed;

the Bible was read, the prayers said, and the children prepared for their second night. But it wasn't like the first night. They could not sleep. They wanted their parents. What had become of them? would they be home for Christmas? and, if not, could Anne cook the broken-backed felling of a turkey on stairs? So they tossed and tumbled, and, as they had no exercise that day, they took it now, scattering things around. They had eaten too much also, and that helped to make them wakeful. Anne had told her stories till she was very weary. The wind was howling, but still there were sounds of storm. The great trees creaked dimly now and then, and the "bright corner" gleamed spectrally in the flash of firelight from the uncovered end of a log in the chimney corner.

Anne had not much hope of being released on Christmas, and when the children were at last asleep, she had a good cry. She privately determined not to cook the turkey, lest they might need it worse; or, if she did cook it, not to eat it up at once. She fancied she had heard cries in the air, and when a snow ball fell down the chimney she started in fright, lest the chimney were choking up.

So came the morning—that could not dawn. Anne got a good breakfast, and the little ones laughed merrily when they found a fried cake and a red apple for each, and new red stockings for Meena in the "bright corner." They did not dream that Anne had got up in the night and "played" Santa Claus, that the little ones might not be so disappointed.

But it really seemed as if something was happening, after all. Snow balls fell on the fire, and a voice bellowed down the chimney in an awful tone, in good German: "Are you all alive down here?"

"All alive and well!" called back Anne.

"Gott in Himmelst gute!" called back her father's voice.

O dear, how the children capered and cried for pure joy!

Dig, dig, dig! Fifteen feet of snow is no light matter, even to German muskies.

By and by they reached the back door, and with beard frozen into icicles, and hoar frost in nose, eyebrows and hair, and mailed in snow from head to foot, John Hansel and half a dozen neighbors at last forced an entrance into the house. By that time Dame Margaret had come on, too, with the team. Only those who have seen a German family fairly let loose can get the least idea of it. It is a fearful thing!

"Mein Gott! mein kinder! Mein Gott! mein kinder!" was Dame Margaret's cry. Anne and her father could not speak at all.

But the next thing was the "bright corner," and, rough fellow as he was, John Hansel nearly cried, too, when he saw what the poor children had done.

When the wagon was unloaded, there were Anne's new shoes, her silver thimble and a red woolen shawl for Sundays; nice things for all the children, and a dog, a horse and a pig; and they all looked alike, and made exactly the same noise.

Dame Margaret cooked the broken-backed turkey, and made some seed cakes, too; and, after all, they never before or since had so merry a Christmas, for, best of all, John Hansel had brought home a fiddle—a real fiddle—and could play on it, too. He learned when he was in Germany, but could not afford a fiddle before—and wasn't he "a happy fader."

So you see some little girls of thirteen do amount to something, and so can you, if you will think so. And Anne?

O, she lived to be married, and wear a white cap, and tell her children and her grandchildren about her Christmas eve under the snow. We all know it by heart.—Little Corporal.

THE HEATHER AND THE SAINTS.—The "heathen Chinee" does up shoes in Massachusetts and linen in New Jersey, to the great grief and scandal of St. Crispin in the former State, and St. Patrick in the latter. What shall be done about it? He is a clean man, and we cannot indict him as a nuisance. He is an industrious man, and we cannot prosecute him for vagrancy. He does his work faithfully and well, and we cannot discharge him. He is sober and orderly, and we cannot get him into the lock-up. He minds his own business, and it does not seem to be quite the genteel thing to kick him. More than all, he is ingenious and we need him. It really seems to be one of the unhandiest cases to manage that has fallen into saintly hands since the land of the free and the home of the brave was discovered. When a heathen gets to be cleaner, more industrious, more faithful, more content, more courteous and inoffensive, and more ingenious than a saint, we should like to know what a free and highly civilized Christian people are going to do with him.—Dr. Holland, in Scribner's Monthly for December.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN.

SOUTHERN MUSIC HOUSE.

50 & 52.....BARONNE STREET.....50 & 52
New Orleans.

The house of WERLEIN is the oldest established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS AND ORGANS that this country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS.

HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS.

Strings, Violins, Guitars, Banjos, Flutinas, Accordions, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our factory.

Very respectfully,

PHILIP WERLEIN.

Southern Agent for Dunham & Sons' Marshall & Mittler, and Hale Piano Manufacturers, New York; and Needham & Son, Manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rosewood case, carved legs, front round corners, serpentine moldings, possessing sweet, powerful and deep tone, with perfect touch..... price \$450 00

Style 5 Organ—Five stops, diapason, violin, octave, piano and tremolo; five octave, two sets reeds, with "on and off" tremolo and combination swell, oil-finished black walnut case, paneled all around, with moldings, brackets and engraved ornaments, music desk and carpeted double blowing pedals..... 150 00

Style 10—Six stops, two sets reeds..... 165 00

Style 13—Eight stops..... 185 00

Style 26—Eleven stops..... 365 00

Please send for price lists of Pianos and Organs..... not 14

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS.

We are prepared to furnish Church Bells of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mountings.	Price.
28-inch Bell..... 250 lbs	400 lbs	\$65 00
36-inch Bell..... 650 lbs	800 lbs	135 00
40-inch Bell..... 800 lbs	1000 lbs	175 00
48-inch Bell..... 1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BODLEY & CO.

619 1/2 N. 9 Perdido St., N. Orleans.

CARPET AND OIL CLOTH WAREHOUSE

J. M. ELKIN. ELKIN & CO., F. STRICKER

163.....CANAL STREET.....165

Near Baronne, New Orleans.

IMPORTERS OF ALL VARIETIES OF

ENGLISH CARPETS, RUGS, ETC.

—ALSO—

Oil Cloths, Mattings, Curtain Damasks, Lace Curtains, Window Shades, etc.

—AND A—

Complete Assortment of Upholstery Goods.

See list

WINTHROP FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

on the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven miles south of Jackson, will open on

The 1st of September, 1870.

Thorough instruction in all the branches given.

Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$23 for the term of forty weeks. The language and music, extra. A deduction of \$50 made for pastors of churches.

Number of pupils last term, 165.

For catalogue address

Jy30 3m. H. F. JOHNSON, President.

EAST ALABAMA COLLEGE,

ACHURN, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments.

Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages afforded.

It is just the place to train Methodist boys, and there is room for three hundred.

Every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOPTON, President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR BAILING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Planters and Cotton Pressmen everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English Iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BAKKELITE and R. W. RAYNE.

General Agents for the Arrow Tie, 1214 Carondelet St., New Orleans.

DRACER AND TRUSSES.—DR. JOHN C. D'ARRELL, informs the medical profession and others that he has constantly on hand and for sale a complete assortment of DRACER'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, local weakness and derangements of public speakers and singers, palpitations of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and general affections, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, RHEUMATISM, PAIN, Sciatica, and weakness of the male and female system.

These light, cool and springy appliances are the special favorites of the profession, are intensely common-sense and rational in their action; supply a missing link in treatment, place the nervous system in a new and more hopeful light, and often effect cures where medicine can only mitigate, and more than it can cure a morbid and disordered joint.

He specially desires an examination of these appliances by the professional reader, and others that he has constantly on hand and for sale a complete assortment of DRACER'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, local weakness and derangements of public speakers and singers, palpitations of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and general affections, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, RHEUMATISM, PAIN, Sciatica, and weakness of the male and female system.

Scientific.

"FUSEE SATAN."

M. Lantour, the distinguished civil engineer and chemist of the Rue de Londres, Paris, has invented a rocket which will be a formidable engine of defense. He has christened it the fusée satan. To the end of an ordinary rocket is attached a very slight receptacle of tin, exactly the shape of a conical bullet. In this receptacle is arranged a chamber filled with a composition based, we believe, upon sulphur of carbon, which composition, once lighted, gives out considerable heat. A fusée communicates from this chamber with the top of the rocket. The tin bullet is filled, just before being used, with petroleum oil. The lighted rocket rises in the air and traverses the space necessary to arrive over a certain spot. Arrived above its object the rocket sets fire to the fusée, the composition in the chamber of the bullet takes light, bursts its envelope, and at the same time fires the petroleum, which falls like a sheet of flame and continues burning. This sheet of flame fills a space of sixteen to twenty-four square meters, according to the size of the rocket. No. 1 throws one liter of petroleum, No. 2 two liters, and No. 3 three liters. They can be thrown a distance of six kilometers, and aimed with great precision, being balanced by means of a long stick attached to each rocket, which maintains the elevation given to it at the time of discharge. Some interesting experiments were made recently with this weapon at St. Cloud. In less than ten minutes a considerable space of ground was covered with a sea of fire. A committee, composed of superior officers of artillery, presided over the experiments, and the general at their head was appalled by the terrible nature of this engine of destruction.

Just imagine this sea of fire falling upon the Prussian masses, burning everything, setting light to the cartridges in the soldiers' pouches and to the ammunition vases of the artillery. The committee, in its report, says the journal *La Franco*, has declared in its opinion no civilized nation could make use of these rockets except for reprisals; and it would be only in case of the Prussians firing upon us with petroleum bombs, such as they used at Strasburg, that we should be entitled to retaliate with the new rocket. However this may be, the Committee of National Defense has given the inventor a building on the Batignolle formerly a girls' school, and has ordered the immediate manufacture, on a large scale, of satan rockets. From day to day two hundred workmen will be actively employed, and within a few days they will have a sufficient stock to enable them to reply the Prussians in their own way, if, as at Strasburg, they make use of unlawful weapons.

The Bronze Age takes its name from the use of bronze by the men of that epoch for weapons and implements of various kinds. The trees which used it had not yet learned the use of iron, which was brought into Europe by the Aryan families, such as the Greek and Germanic. It has been quite a question whence this bronze had its origin. Its extensive use, even as far north as Denmark, proves that a considerable trade existed, for the materials for its manufacture are found in but very few places. Bronze is composed of copper and tin, and this is one of the most sparingly distributed of metals. At present almost the entire supply of tin is obtained from the mines of Cornwall, or from the island of Banca, off the Malay peninsula. The Edinburgh Review says that in ancient times tin was obtained mainly from Spain, where labyrinths of old mines are found in immense quantities all through the Iberian mountains, but where it is now unprofitable to work them. Here was Tarshish, the ancient Tarshish, and the great foreign mart of Phœnician commerce, one thousand two hundred years before Christ. There is reason to believe that much of the bronze of the Bronze Age was manufactured by the Phœnicians, either in Spain or Phœnicia. Still it is not probable that the Phœnicians can claim all the honor of this early commerce. The Etruscans were great workers in bronze and the Greeks. They probably obtained tin from the mines of Saxony and Bohemia, and the bronze remains found in ancient tombs in Denmark are very like what have been found in Etruscan tombs. The Greek colonies in Italy early learned the Etruscan arts, and continued their trade. The abundance of excellent bronze articles on the Baltic coast is probably due to the great trade in amber which was carried on in these regions.—*Independent*.

A funny thing happened at a Presbyterian church the other day. The new steam heating apparatus was in use for the first time; and, after service, one lady, meeting an older in the aisle, said: "That boiler ain't under our seat, is it?" "No," was the reply; "it is under the pulpit platform." "Well, if it blows up we shall have a good man to go ahead of us," was the reply.

THE IDEA of self-importance, which is so frequently exhibited by our brethren of the "colored persuasion" when they are engaged in any work, has seldom been better illustrated than by the exclamation of a colored mail carrier in Virginia, who had been well shaken by a man for kicking his dog: "Look-a-here, massa, you'd better be kearnful how you shakes dis chile! cos, when you shakes me, you shake de whole of de United States. I carries de mail!"

A FUNNY thing happened at a Presbyterian church the other day. The new steam heating apparatus was in use for the first time; and, after service, one lady, meeting an older in the aisle, said: "That boiler ain't under our seat, is it?" "No," was the reply; "it is under the pulpit platform." "Well, if it blows up we shall have a good man to go ahead of us," was the reply.

vinating, at times, the necessity for new articles of clothing. A favorite color is crimson, made by mixing three parts of fuchsin with water, so as to form a thick broth, and rubbing it in a mortar with twenty parts of glycerine. This is stirred up with one hundred and fifty parts of finely-powdered starch, and dried on unsized paper. It is used like common starch.

IN A TREATISE on "The Cavern of Bruniquet," lately published by Prof. Owen, he tells us that pictures there found on bones and reindeer horns prove that the horse, which was wild in Europe at this time, known as *Equus Spelæus*, had short pointed ears, and the stallions had beard-like hairs. Their tails were short, and covered through the entire length with long hairs. No satisfactory evidence has yet been found of the existence of our modern horse at the period of the cave-dwellers.

The Farm and Garden.

THE MANDARIN ORANGE.

We do not think that this delicate and unique variety of the *citrus* family is as well known or appreciated as it deserves. The character both of tree and fruit is striking and peculiar. The tree grows naturally in the form of a large shrub, with lanceolate leaves, and a peculiarly graceful habit. It is rather dwarfish in growth, comes into bearing early, and thrives remarkably well even in a dense shade.

The fruit is of small or medium size—flattened, oblate; with a thin and tender skin, which peels off readily, without the use of a knife, the lobes or sections separating easily, so that they may be eaten without soiling the fingers. Frequently the removal of the rind or peeling shows a small orifice through the center of the orange, and the lobes are enveloped in a thin, almost transparent membrane or pellicle, through which pulp and seeds show clearly.

The flavor of the Mandarin, when fully ripe, is unlike that of any other orange; and, we think, greatly superior to the ordinary Creole or China variety. The plant is vigorous and hardy—a profuse bearer—admits of close planting, and is worthy of extended and especial attention and careful cultivation.

Why have we so few orange trees? Why do not our Gulf and river coast residents plant and cultivate this beautiful, delicious and profitable fruit to a greater extent? There are still hundreds of acres on the lake shores of Louisiana and Mississippi, and a large tract of country on the Teche, and perhaps Atchafalaya, as well as on our lower coast, and along the Texas sea shore, admirably adapted to orange culture. And we do not lack the finer varieties of this noble fruit. We raise as large, as handsome and as sweet oranges as can be produced at St. Augustine or in Cuba. We have gathered from the trees this year, on the Mississippi coast, near Biloxi, as fine oranges as we have ever seen in Florida. The sweetest and finest kinds should be grafted or budded on strong stocks of the sour or wild variety, and transplanted at one or two years from the graft. If possible, plant on rich land, a little moist, and in the partial shade of trees or buildings. If the ground is not rich it must be made so and kept so, by annual or semi-annual manurings with a compost into which lime should enter largely. The partially decomposed and finely broken shells, so plentiful in some sea shore localities, form an excellent manure for the orange, if mingled with vegetable matter or swamp muck; but if these fertilizers cannot be obtained, stable manure may be freely used. Top dress the ground heavily during the latter part of winter and early spring, and water freely in long continued drouths. Mulch also with short grass, pine straw or other suitable and proper material, and success is almost certain. Transplant last of January or early in February.—*The Southland*.

THE IDEA of self-importance, which is so frequently exhibited by our brethren of the "colored persuasion" when they are engaged in any work, has seldom been better illustrated than by the exclamation of a colored mail carrier in Virginia, who had been well shaken by a man for kicking his dog: "Look-a-here, massa, you'd better be kearnful how you shakes dis chile! cos, when you shakes me, you shake de whole of de United States. I carries de mail!"

A FUNNY thing happened at a Presbyterian church the other day. The new steam heating apparatus was in use for the first time; and, after service, one lady, meeting an older in the aisle, said: "That boiler ain't under our seat, is it?" "No," was the reply; "it is under the pulpit platform." "Well, if it blows up we shall have a good man to go ahead of us," was the reply.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY
CHARLES SCRIBNER & COMPANY,
654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

Incomparably superior to anything published in America.

Introduction to the Study of Geography.
Elementary Geography.
Intermediate Geography.
Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Taine & Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

FLETCHER'S POPULAR SCHOOL ARITHMETICS.

First Lessons, (Illustrated.)
Primary Arithmetic, (Illustrated.)
Intellectual Arithmetic.
Intermediate Arithmetic.
Grammar School Arithmetic.
Practical Arithmetic.

PROF. COOLEY'S WORKS ON NATURAL SCIENCE.

A Text-book of Chemistry.
A Text-book of Natural Philosophy.

W. H. BRATTON, JOHN M. FAKES,

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The return of fine weather and the approach of the holidays have imparted more animation to the general market, which, nevertheless, shows much less activity than is usual at this season of the year. At the same time stocks of all descriptions of goods are ample, and offered at reasonable prices. Sugar and molasses have continued in fair request at previous rates. Operations in Western produce have been mostly confined to the local trade.

CORRIGENDUM.—The following are the arrivals since the sixteenth instant:

Louisiana and Mississippi	bales	19,435
Arkansas	do	874
Lake	do	31
Mobile	do	1,741
Texas	do	213
Total		22,397

On Saturday the movement commenced with some sales at rather easier prices, but after the receipt of the New York telegram, reporting an advance of $\frac{1}{8}$ ¢, the demand became more active, and factors were enabled to realize stiffer rates, very little low middling being found under 13 $\frac{1}{2}$ ¢, while during the morning there were considerable sales at 13 $\frac{1}{2}$ ¢, and some at even less. Operations were checked by rainy weather, but the sales, nevertheless, embraced 7,750 bales. On Monday, under the influence of encouraging dispatches from New York and Liverpool, buyers came forward with increased spirit, and the supply being better, the business summed up 9,750 bales, at prices showing an advance of fully $\frac{1}{8}$ ¢, good ordinary closing at 13 $\frac{1}{2}$ ¢ to 13 $\frac{3}{4}$ ¢, low middling at 14 $\frac{1}{4}$ ¢ to 14 $\frac{3}{4}$ ¢. On Tuesday the market opened firm at previous rates, but being subsequently stimulated by the favorable tenor of the New York dispatches, the demand soon became more animated, and although factors raised their pretensions, buyers took 8,600 bales, partly at Monday's figures, but mostly at an advance of $\frac{1}{8}$ ¢. The three P. M. telegram from New York reported that market easier, but it seemed to have no other influence than to make factors more ready sellers, and the movement continued active to the close.

This makes an aggregate for the past three days of 26,100 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 433,304 bales, against 386,771 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 257,179 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 245,825 bales to Great Britain, and a decrease of 107,678 to France, and 72 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	12 to 12 $\frac{1}{2}$
Good ordinary	13 to 13 $\frac{1}{2}$
Low middling	14 to 14 $\frac{1}{2}$
Middling	14 $\frac{1}{2}$ to 14 $\frac{3}{4}$
Strict middling	14 $\frac{3}{4}$ to 15

COTTON STATEMENT.

Stock on hand Sept. 1, 1870, bales... 20,696

Arrived past three days... 22,397

Arrived previously... 446,678—469,075

Exported past three days... 18,981

Exported previously... 304,161—323,143

Stock on hand and on shipboard... 108,626

SUGAR.—A fair demand has prevailed, and especially for the better descriptions, and the supplies were mostly sold at full prices. The sales on Saturday and Monday embraced 1,200 hogsheads at 6 $\frac{1}{2}$ ¢ to 6 $\frac{3}{4}$ ¢ per pound for inferior, 7 to 7 $\frac{1}{2}$ ¢ for common, 8 to 8 $\frac{1}{2}$ ¢ for fair to good fair, 9 to 9 $\frac{1}{2}$ ¢ for fully fair, 10 to 10 $\frac{1}{2}$ ¢ for prime, 10 $\frac{1}{2}$ ¢ to 10 $\frac{3}{4}$ ¢ for strictly prime, (there is no choice here,) 7 to 10 $\frac{1}{2}$ ¢ for seconds, 11 to 11 $\frac{1}{2}$ ¢ for yellow clarified, and 12 to 13¢ for white.

MOLASSES.—The demand has continued fair.

MONEY.—Gold, 110 $\frac{1}{4}$ to 110 $\frac{3}{4}$.

American silver half dollars, 109, and Mexican dollars at 1 to 1 $\frac{1}{2}$ per cent. premium in gold.

The sales of bonds include \$4,500 new City Seven per cents on Saturday at 69 $\frac{1}{2}$ ¢, and \$500 United States 5-20's of 1862 at 109 $\frac{1}{2}$ ¢; \$8,000 new City Seven per cents on Monday at 69 $\frac{1}{2}$ ¢, and \$1,000 and \$1,200 at 69 $\frac{1}{2}$ ¢; and \$10,000 same on Tuesday at 69 $\frac{1}{2}$ ¢.

The sales of warrants include \$1,400 new Metropolitan Police on Saturday at 98; \$700 and \$2,550 new State on Monday at 71, \$1,000 do. at 72, \$500 do. at 72 $\frac{1}{2}$ ¢, and \$600 do. (small) at 72 $\frac{1}{2}$ ¢; and \$1,500 on Tuesday at 72 to 72 $\frac{1}{2}$ ¢. Dealers have bought State at 71 to 71 $\frac{1}{2}$ ¢ for new, and sold at 72 to 72 $\frac{1}{2}$ ¢.

City Treasury notes are quoted at 25 to 26 per cent. discount.

CATTLE MARKET.

NEW ORLEANS, Dec. 20, 1870.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, DECEMBER 31, 1870.

NO. 50.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Dec. 22.—The President signed the sugar bill to-day.

The Senate, after seating Mr. Jewett, from Missouri, went into executive session.

In the House but twenty-five members were present. Mr. Jones, of Kentucky, spoke in favor, and Mr. Porter, of Virginia, against amnesty.

The sugar bill which passed the Senate yesterday was signed by the speaker and sent to the President. House then adjourned.

The rays on the San Domingo resolution were Messrs. Casserly, McCreery, Morrill, of Vermont, Patterson, Schurz, Stockton, Sumner, Thurman and Tipton.

The Senate, in executive session, passed a declaratory resolution, that under the tenure of office bill, where a new nominee is rejected, the old incumbent remains in statu quo without furnishing a new bond.

The Senate confirmed Mr. Schenck, minister to England; Adams, collector of customs at St. John's, Florida; Shaghtnessy, United States marshal for southern Mississippi; Minnes, United States district attorney for northern Alabama, and White, postmaster at Greensboro, North Carolina.

The Senate rejected Mr. Blanchard, nominated for the New Orleans post office.

This is regarded in political circles as a triumph for the Lieutenant Governor Dunn faction over the Governor Warmoth faction of Louisiana.

WASHINGTON, Dec. 22.—The President yesterday sent a message to the Senate, withdrawing Blanchard's nomination, but a question arising in the Senate as to the effect of Lowell's suspension under permission to withdraw the nomination, the Senate concluded to reject Blanchard; and as there were several similar cases pending, the Senate passed a resolution that where a nomination was rejected the incumbent should remain in statu quo without giving new bonds.

WASHINGTON, Dec. 22.—The Supreme Court adjourned to the fifth, and both houses of Congress to the fourth of January.

Vice President Colfax called at the White House before seven o'clock, this morning, to inform the President that the San Domingo resolution had passed by a vote of 38 to 9.

Many Senators and Representatives called during the day to congratulate the President. The President replying, said he believed the annexation policy wise and prudent, and thought it would gain strength as the facts became known.

St. Louis, Dec. 22.—A special from Vicksburg says that nine cabin and thirty deck passengers were lost on the steamer Nick Wall. Captain Poe released his wife from the cabin, which was full of water, by cutting a hole through the roof directly over her. She received a gash on the head by the ax used by her husband, and was brought out insensible, but was afterward restored. The body of Colonel E. W. Taylor, of the firm of Taylor & Graham, of Jefferson, Texas, was recovered and buried at Maryland Landing. No other names of the lost have been ascertained.

New York, Dec. 22.—Ex-Collector Calhoun refuses to leave prison under the President's pardon.

The Crispin strikers finally compelled one of the large shoe factories to suspend operations, and dismissed the non-society men whom they had employed.

It is stated that the Atlantic cable officials despair of repairing the broken cables until June, when the weather becomes permanently favorable. Robert Lowe, of the telegraph crew, was pulled overboard by a pitting cable and lost.

Richmond, Dec. 23.—Spottswood Hotel and all the buildings in the block, the finest in the city, burned at two o'clock this morning; Branch & Current's grocery store, Adams Express Co.'s office, Howe sewing machine store and other smaller stores. The weather was the coldest for thirteen years; the ground is covered with snow. The thermometer was five degrees above zero.

At quarter past two, as the porter was waking the passengers for the Southern train, fire was discovered in the basement. Efforts were immediately made to wake the guests. The scene was indescribable; men were rushing about trying to save their baggage; women half naked and barefooted rushed through the snow which covered the streets. The engines were promptly on the spot, but the water was

frozen and caused some delay. Before twenty minutes the flames prevented escape by the stairs, and the guests commenced jumping from the windows and lowering themselves down by blankets and ropes. P. P. Clarke, steward, was fatally injured by leaping from a third story window; Mrs. Cornelia, housekeeper, with two or three other ladies, appeared at a window of the fifth story screaming for help. The firemen's ladders failed to reach them by two stories, and while the firemen endeavored to lengthen them the women disappeared in the black smoke, and the room brightened up a few minutes later.

The following persons were known to be lost, up to noon to-day: Erasmus Ross, clerk at Libby Prison during the war; Mrs. Emily Cornelius, housekeeper; Samuel M. Robinson, clerk with Bakera & Bro., and Samuel Hines, clerk with Milkier & Co. The register of the hotel was destroyed, and it is impossible to say what strangers were lost. There are about a dozen unclaimed trunks of parties from New York and other Northern cities.

It is a noticeable fact that the fire left one building, on a corner, the same which checked the evacuation conflagration.

A. C. Shaffer, State printer, escaped from the fourth story by dropping from window cornice to window cornice, reaching the ground badly burned, but otherwise unhurt. A correspondent of the New York Herald narrowly escaped. Most of the guests lost all their clothing.

Additional names of persons known to be lost: H. A. Thomas, agent of Pilgrim's Progress panorama; W. H. Pace, United States mail agent, Danville, Virginia, and J. B. Farris, agent Southern Express Company.

The Spottswood House was valued at \$140,000, and was insured for \$30,000. Sublett, Luck & Co. had \$20,000 insurance on furniture and \$7,000 on wines and carpets. The National Insurance Company of Baltimore loses \$8,000. All the goods ready for delivery in the Southern Express office were burned. A man was seen at an upper window apparently paralyzed by fear, tearing paper into small pieces, which he threw in the streets, till he fell back into the flames. Among the narrow escapes were M. Maillfert, of New York, engineer of the James river obstructions; O. A. Pierce, of Columbia, South Carolina, private secretary to Senator Sprague; Mrs. Magill, proprietress of the theater, and R. H. Stowell, member of Congress. The Delave Troop lost their baggage. The hotel register only six strangers were found unaccounted for. The name of the housekeeper burned was Mrs. Kennedy. The following are the names of the missing strangers: J. S. Wilcox, Lynchburg; Nathan Bernstein, Washington; A. Lial, Tampa, Florida; E. George and E. H. Andrews, Syracuse, New York; Henry Krotle, New York, and John H. Holman, Jr., Jackson, Tennessee.

Atlanta, Dec. 23.—Jasper county gives Lawton 93 majority, Henry county gives Lawton 411 majority, Catosa county gives Young 366 majority. Democratic ticket elected in Gwynneth county. Democratic ticket elected by a large majority in Fayette county.

New York, Dec. 26.—Fanny Stockton, a well known American operatic artist, died suddenly on Saturday.

Business was wholly suspended to-day. Weather cold and blustering. Few people on the street. The city was unusually quiet all day.

Richmond, Va., Dec. 26.—Mr. Wilcox, of Lynchburg, and Mr. Vaiden, of Chesterfield, are safe. Mr. Holman, of Jackson, Tennessee, is known to be lost—making the eighth victim of the Spottswood disaster. Five are still missing, for whom there is but little hope.

The James river is frozen over.

Augusta, Ga., Dec. 27.—The election returns come in slowly, but confirm the election of Democrats to Congress from the first, third, fifth, sixth and seventh districts, with the chances in favor of Lawton, Democrat, in the fourth district. The vote is very close as far as heard from.

In the second district the returns are against the late Democratic incumbent, and in favor of Whiteley, Republican.

The Legislature will be largely Democratic, the returns indicating heavier gains than were expected.

Both the Republicans and Democrats charge frauds in the election.

Atlanta, Dec. 27.—The Radicals here concede that Georgia has gone Democratic by thirty-five to forty

thousand. Thus far only two Radical State Senators are known to be elected, and they are both colored. The Democrats have a majority in both the Senate and House.

It is rumored that Governor Bullock has leased the State road to the Central Georgia, Southwestern, Macon and Western, Brunswick, Nashville and Chattanooga railroads, A. H. Stephens, B. H. Hill, J. E. Brown, H. Peters, Columbus Delano, H. J. Kimball and others for twenty years for \$25,000 per month.

FOREIGN.

Bordeaux, Dec. 21.—Gambetta has gone to review the army at Lyons.

Several vessels have arrived at French ports with arms.

Well equipped troops continue to move to the front.

The government has determined to treat all reactionary journals with silent contempt.

Beauvais, Dec. 21.—A decree has been issued from the war office transferring the charge of guarding French prisoners to the battalions on garrison duty in Germany, and relieving the landwehr, who are to be sent to France to garrison places occupied by Germans.

The besiegers of Belfort have received reinforcements and heavy artillery from Bavaria.

London, Dec. 22.—Dispatches from Versailles state that there are no indications of a decisive battle until after the holidays.

Dispatches from Vienna report that the Turkish fleet are under immediate orders for service, and that extensive war preparations are being made at Kertch.

Bordeaux, Dec. 22.—The hopes of the Germans of revivifying their armies from Dieppe have been defeated by the vigilance of the French cruisers.

London, Dec. 22.—Troops are pouring into Cherbourg for the defense of that port.

At Havre an immediate attack is expected, as the Germans are approaching in increased force.

A Berlin dispatch threatens that unless Paris soon surrenders a regular attack will begin.

The English ship Squasquina, bound to Valparaiso, was run into and badly damaged by the French transport Harmonie, who mistook her for a Prussian vessel. Repairs will be made by the French government.

London, Dec. 23.—Austria, Prussia and England have offered an asylum to the Pope. He will probably accept Malta. Murder in the streets of Rome is of nightly occurrence. The life of the rector of the American College was attempted. The Prussians are fortifying their line of retreat between Versailles and Metz. Lord Dufferin has been appointed Under Secretary of State in place of Oliva. A member of Parliament from Durham has been appointed judge advocate.

The port of Honfleur has been opened again to commerce. Dieppe and Freecamp are still under strict blockade.

It is said the municipality of Lyons has expressed a wish that Garibaldi be made a member of the government of the national defense.

The nineteenth Prussian division refused to occupy Tours, though the mayor requested the general commanding to do so. The Prussians contented themselves with destroying the railroad running through the city, and encamped in the suburbs.

London, Dec. 25.—The French and Germans claim a victory in the battle of the twenty-third, near Amiens. The fight appears to have been indecisive, but the French, though they slept on the battlefield, withdrew the next day.

Advices from Paris to the twenty-second report no further fighting. The French lost eight hundred in the battle of the twenty-first.

Bordeaux, Dec. 25.—The Prussians, to the number of seventy-five thousand, passed through Nogent Le Rotrou, retiring on Paris.

London, Dec. 25.—The Fenian prisoners have been discharged from Portland jail.

The Pall Mall Gazette says England is heartily tired of the Alabama question, and is ready to satisfy any impartial money award if adjustment is final.

Telegraphic communication between Bordeaux and the north of France is restored.

A fleet of transports is preparing to sail from Brest with a considerable force, the destination of which is unknown.

It is estimated there are now six hundred thousand effective German soldiers in France, half of whom are before Paris.

The Duke of Aosta was to have left Florence this morning for Spain. Dispatches thence up to four o'clock this evening report demonstrations on the occasion, but make no mention of his actual departure.

Mont Cenis tunnel approaches completion. Working parties opposite the shafts exchanged greetings, through the last wall of the rock on Christmas afternoon.

New York, Dec. 26.—The Herald has the following on the French situation: The defeat of General Chausey at Le Mans has not been confirmed, and probably will not be for some time. We are prepared to hear of his retirement to Alencon.

This, in fact, was foreshadowed by our correspondent, writing from Le Mans a few days ago, and whose letter was sent by cable specially to the Herald. Nor will such retirement be necessarily a compulsory retrograde movement. Chausey's plan evidently is to move as far north as he possibly can, so that he may relieve Bonaparte's forces from the danger of an attack following the sudden junction of the two German armies operating in the vicinity of the Loire. Besides, if Chausey succeeds in his flank movement and throws his army in a position northwest of Paris, he will cover Havre and Cherbourg, and will be heavily reinforced by the forces gathered to defend those cities. Meanwhile General Faidherbe will keep Mantauzel employed near Amiens.

Bonaparte, who is certainly the ablest officer now in the French service, may succeed in forcing his way to Fontainebleau, or by a vigorous offensive movement compel the Germans to concentrate against him, and thus give Chausey a chance to push on to St. Denis or some point on the west of Paris.

The following is a summary of the latest news:

The battle which opened so favorably for General Faidherbe at Novion, on the twenty-third instant, is reported to have ended on the twenty-fourth with a complete defeat for him. The details are yet wanting, but the bare fact of a defeat appears to be fully sustained by the reports which have been received from various sources.

Tours has been again entered by the German troops.

The citizens of Chalons, like those of Rheims, have resisted the demand of the German garrison, but have been summarily suppressed, and a number of leading citizens have been sent to Germany as hostages.

The line of railroad communication between Versailles and Metz is being fortified.

The advance on Lyons has caused a great excitement in that city, and a rising among the "Reds" is reported.

London, Dec. 27.—A dispatch from Versailles, of the twenty-third, says:

A scheme to assassinate King William, General Von Moltke and Count Von Bismarck was discovered here a few days since. A number of strangers arrived in the city on Wednesday, when the gates were closed and the citizens ordered to remain in their houses on pain of death. Patrols then searched every place and arrested two hundred persons, of whom seventy were armed with guns and pistols.

Bordeaux, Dec. 27.—At the grand review of twenty thousand national guards, held here Monday, Crenieux presented flags to various regiments, and made a speech, in which he assured the soldiers that the republic would surely save France. The officers and men were all enthusiastic in their cries for the republic, and as they passed the residence of the American consul gave utterance to a hearty demonstration of friendship to the government and people of the United States.

A dispatch from Sisa announces that the Alps were pierced through yesterday, and that the workmen from both ends of the mountain tunnel joined in congratulations upon the completion of the work.

Viyssai, Dec. 27.—The official press argues that as the neutralization of Luxembourg, under a collective guarantee, has failed, the future of the duchy is now open for the consideration of the great powers.

London, Dec. 27.—The Standard of to-day, in an article reviewing the work of Dr. Francis Lieber on arbitration, expresses the opinion that, considering the political as well as legal aspects of the question, a royal umpire is preferable to any faculty of law.

London, Dec. 27.—The schooner

Mamta, of New York, put into Fiyal with a loss of her sails.

Beauvais, Dec. 27.—Count Von Bismarck urges upon Switzerland a better observance of neutrality.

London, Dec. 27.—A delegation of the inhabitants of Luxembourg today presented to Prince Henry a patriotic address. The Prince, in reply, expressed confidence in their ability to defend the rights of the duchy. He said he had faith in the justice of their cause and loyalty of the signers of the treaty of 1867.

Hon. W. E. Gladstone has published a letter indignantly denying the report of his conversion to the Roman Catholic faith.

Dresden, Dec. 27.—A dispatch from the commanding general of the Saxon troops before Paris announces the bombardment of Fort Avron. It commenced to-day. This fortification is the most advanced of the French outworks east of Paris, and crowns Mount Avron, of considerable elevation, six miles from the city walls.

London, Dec. 27.—The Shipping Gazette, which first doubted, now admits the truth of the reports concerning the treatment of British vessels in the Seine by the Prussians, and declares that the government must instantly demand explanation and redress from Prussia.

Madrid on the Day of Aosta's Election.

The city of Madrid, on the day of the Duke of Aosta's election to the throne of Spain, was turned into a vast military camp. Upward of thirty thousand troops occupied the city. The surroundings of the congressional palace were crowded with soldiers, and the Theatre de la Zarzuela, which is about eighty yards from the State House, was held by two thousand picked men. The houses of some members of the Grandeza, known as opponents to the Italian Prince's election, such as the Dukes of Alba and the Marquis of Alencas, were guarded by the police; the country men were on horseback during the whole day; the cannon loaded and the balance of the infantry consigned to the barracks. The civil and military governors of Madrid appeared for the first time in their uniforms as generals in the Cortes, ready to mount their horses and take command of the troops. Notwithstanding the leaders of the republican party had advised their friends to abstain from any act of violence, the party in power prevented the republicans from the provinces entering Madrid on the thirteenth of November and the following days, and the preparations were, in general, so well made that, in spite of almost every man, woman and child being on the streets, no element broke out, and the day passed without any serious disorder.

The meeting of the Cortes was one of the stormiest on record. A protest, signed by 7 dukes, 25 marquises, 23 counts, 17 previous cabinet ministers, 54 former senators, and 117 former deputies, 9 generals and 4 admirals, was read and laid on the table. There were 344 members of the Cortes present; only three were by sickness prevented from attending. The president decided that no discussion of any character could be permitted, but the election was delayed until late in the evening by successive attempts to make it impossible at all. A Carlist deputy by the name of Vinader required the president to read the bull of the Pope, by which Victor Emmanuel, the father of the Prince of Aosta, is excommunicated, and amidst the universal hilarity created by this movement the president ordered the vote to be taken. The voting lasted for three consecutive hours. Only 311 of the members present cast their votes. Of these Aosta received 191, Montpensier 27, his wife 1, Espartero 8, Alfonso 2, the federal republic 60, and the centralized republic 2. The Esparterists and the Moderados will probably support the new King.

Immediately after the election a committee of twenty-four members was appointed, which, jointly with the president and the four secretaries of the Cortes, were ordered to announce to the King, elect the wish of the people of Spain. It is known that he has accepted the crown, and that he is on his way to his new kingdom.

A little girl in a Western town, after studying for a time a picture of the Magdalen reclining on her face and weeping, suddenly exclaimed: "Mamma, I know why Mrs. Magdalen is crying. It is because Mr. Magdalen does not buy her clothes enough."

Appointments of West Texas Conference.

SAN ANTONIO DISTRICT.—John S. Gillet, P. E. San Antonio station, Backner Harris; Sutherland Springs, R. M. Leaton; Cibola circuit, E. G. Duval; Pleasanton mission, to be supplied by W. C. Newton; Sammeret circuit, A. J. Porter; Uvalde circuit, William H. Hays; Kerrville circuit, to be supplied; San Antonio colored charge, R. H. Belvin.

Lancaster; Blanco mission, Cyrus M. Carpenter; Walnut Creek mission, to be supplied; Seguin colored charge, to be supplied by Henry Mosely; Gonzales colored charge, Henry Brown.

GOLIAD DISTRICT.—E. Y. Seale, P. E. Goliad station, O. M. Rogers; Helena and Escudilla station, to be supplied by O. S. Farwell; Yorktown circuit, Charles R. Shapard; Leesburg circuit, A. A. Kilgough; H. A. Graves, supernumerary; Sandies mission, to be supplied by M. A. Black; Clinton circuit, L. M. McGhee; Goliad colored charge, to be supplied by J. Holt; Guadalupe colored charge, to be supplied by R. Coleman; Helena colored charge, to be supplied.

VICTORIA DISTRICT.—O. A. Fisher, P. E. Victoria station, J. W. Cooley; Indianola and Lavaca, to be supplied by H. G. Horton; Kemper circuit, to be supplied; Texana circuit, to be supplied by J. A. Light; Hallettsville circuit, to be supplied by J. F. Cook; Conereto circuit, Robert Blassengame; Texas colored charge, to be supplied.

CORPUS CHRISTI DISTRICT.—J. W. De Vilbiss, P. E. Corpus Christi station, J. W. Brown; Rockport circuit, J. H. Tucker; Lamar mission, to be supplied by Thomas Myers, supernumerary; St. Mary's circuit, to be supplied; Beeville circuit, R. Gillet; Meansville circuit, A. F. Cox; Nueces River mission, J. C. C. Black; Sunday school agent, James G. Walker; agent for Guadalupe Male and Female College, G. W. Cottingham.

A. B. Duval and Jesse Heard, supernumeraries.

NOT ONLY THOSE WHO DARE.—From the records of the Internal Revenue Bureau it appears that the spirit-producing capacity of the distilleries of the United States is over 900,000 gallons daily, of which about 760,000 gallons are made from grain, and the balance from fruit and molasses. The average running time for grain distilleries is 150 days in the year, so that the annual production from that source amounts to about 114,000,000 gallons. Adding 4,000,000 gallons manufactured from other material, we have a grand total of 118,000,000 gallons of spirits annually distilled in the United States. Of this amount about 75,000,000 gallons are yearly consumed by our own people, leaving 43,000,000 gallons for exportation. In the manufacture of this "liquid fire," the source of immeasurable ill to society, over 100,000,000 bushels of precious grain are annually used.

SAVE SOMETHING.—Save something, no matter how little it may be, always save something. Never turn your hand from small savings; they are the foundation of great ones. A penny is not much. Many a man would rather throw away a penny than pick it up, if it lay before him. Yet a penny a day is nearly four dollars a year, four dollars is the interest of nearly one hundred dollars capital. "Waste not, want not," is an old saying; and he who is extravagant enough to cast idly away what can be made useful, though it is but a trifle, may expect to see the day when even that trifle would be acceptable.

WE ARE GLAD to state that there is a gracious season of refreshing in McKendree church, Nashville. On Sunday, December 11, ten persons were received into the communion of the church; and on Sunday, December 18, thirty-nine came forward as candidates for admission—two or three of them, without invitation, at the night service. Dr. Kelley, the zealous pastor, is keeping up the meetings, morning and night. We hope for still greater things.—Nashville Christian Advocate.

The reputation of Murfee's Subsoil is unequalled in all history of plows.

The Christian Advocate.

SATURDAY, DECEMBER 31, 1870.

THE KINGDOM OF HEAVEN.

BY WILLIAM RANKIN DUTCH.

Dark is the night, and still and drearily
Rises the wind like the waves of the sea;
Little care I, as here I sing cheerily,
While at my side and my baby on knee:
King, King, crown me the King:
Home is the kingdom, and Love is the King!

Flashes the lightning upon the dear face,
Dearest and dearest as onward we go,
Forces the shadow behind us, and places
Brightness around us with warmth in the glow.
King, King, crown me the King:
Home is the kingdom, and Love is the King!

Flashes the lightning, increasing the glory,
Beaming from bright eyes with warmth of the soul,
Telling of trust and content the sweet story,
Lifting the shadows that over us roll.
King, King, crown me the King:
Home is the kingdom, and Love is the King!

Richer than miser with perishing treasure,
Served with a service no conquest could bring;
Happy with fortune that words cannot measure,
Light-hearted, I on the hearthstone can sing.
King, King, crown me the King:
Home is the kingdom, and Love is the King!

King, King, crown me the King:
Home is the kingdom, and Love is the King!

OUR GREAT WANT.

Mr. BORTON: Doubtless many of the attendants at the last session of the Louisiana Conference were astonished to find Shreveport a town of such commercial prosperity and promise. Those that were astonished then would probably marvel again if they were to behold the developments of the current year—so many have been the new stores, shops, residences and villas erected, and so greatly has the city spread out on every side. This city of the hills (for such it really is) bids fair to be a very Chicago for enterprise in trade and commerce. It is the objective point of half a dozen prospective railroads. Some of them will be built, no doubt, very soon, if there is any logical connection between freights and locomotives. Of cotton alone, not to speak of various other articles of produce seeking a market here, and hence to New Orleans and elsewhere, more than one hundred thousand bales changed hands at this point during the commercial year ending on the first of September; and this annual return will be largely increased by the recent extension of the railroad running west from this city. The shipment of cattle is also greatly on the increase here. Some idea of the amount of forwarding and receiving, with all the collateral trade and traffic attending same, may be formed from the fact that, beside a host of smaller craft, there are now about thirty large class steamboats plying constantly between this port and that of New Orleans and St. Louis.

In all the conveniences of city life Shreveport is well up, save in the matter of dwelling houses, the supply of which does not nearly meet the demand. But we have gas and ice of home manufacture; we have mills and foundries and workshops of almost every variety; we have a city railroad and a city park, the latter not quite ready for visitors yet; we have three newspapers, two of which are issued daily; we have wholesale houses and banking houses and insurance offices; we have a skating rink and a theater, and sundry institutions of that ilk. An agricultural fair ground is in prospect too—indeed the land has been already secured.

As an item of prime importance to our people, I may mention that several mines of genuine coal have recently been discovered in this vicinity, some of which are being worked with energy. The steamboat Gladiola was supplied with two hundred boxes of this coal on her last trip down. It is pronounced by judges to be of the cannel or lignite species.

The moral character of Shreveport is not so good as a lover of righteousness would desire; but it is not half so bad as those at a distance are wont to suppose. It is a remarkable fact that the most worthless class, "the baser sort," of this community, does not include many

young men; the gamblers, the topers, the loungers are, most generally, the *débris* of ante-bellum days. The tone of society here is morally healthful; the leading families are church-going people; but there is a great lack of the energy of aggressiveness in the religious character of the communicants. In the matter of giving of their means for the support of the gospel and the like, the congregations here are not of the Post Oak sort—indeed they give liberally. The Presbyterians are now building a fine brick church that will do honor to their munificence—it will cost about \$30,000.

Our own Methodist people are not a whit behind the most liberal anywhere in proportion to their numerical and financial strength. Though they number but one hundred and twenty, and none of them abounding in wealth, they have not only paid their pastor a generous salary of \$2,500, but they have contributed about an equal amount for other church purposes this year—averaging fully \$40 per member. The ladies of the Shreveport Methodist church are certainly worthy of the honorable mention they so often receive in our Conference. To work for the church is to them indeed a labor of love, and in the graces of piety they will "adorn the doctrine of God our Saviour in all things." Holy women are the chief ornament of the Christian church—as mothers and wives and sisters they are the richest "salt of the earth." Thank God there are so many of them here! But I must add a word in behalf of the brethren here; they are now in number much more than sufficient to fill all the offices of the church; they comprise many of the leading citizens of the place; they take a hearty interest in the affairs of the church, most of them attending faithfully to such duties as devolve upon them, cheerfully co-operating with the pastor and readily responding to his calls upon them. Some of them are models in respect to diligence in behalf of the church, and all of them will compare well with the average of any church with which I am acquainted.

It is to me a matter of painful regret that I am not able to report any revival here during the year, though repeated efforts to that end have been made since the spring. We have had, however, a steady increase during the year—amounting to forty-two. We feel encouraged, but we yearn to see the windows of heaven opened, and a gracious outpouring of the Holy Spirit rained down upon us. It is our great, our crying want. May the blessed visitation come quickly! "Even so come, Lord Jesus." J. W.

SHREVEPORT, LA., Dec. 20, 1870.

ANACOCO, LOUISIANA.

Mr. Editor: Oftentimes, when our coolest calculations of success have in some measure been out short, the "memoirs of the way" assume an interesting aspect. The year with us has about closed, and with it probably the hope of some unconverted yet precious soul, who has for the last time had the offers of mercy. Before another year they will be dead. This thought should chasten our hearts and deepen our resolves for future usefulness.

Our dear presiding elder, Bro. Pipes, has faithfully performed his duty among us in every point, great and small. Some think he went "into the regions beyond" when he presented temperance and liberality to them. They wanted a revival; but know ye, brethren, that a revival without these two virtues partakes too much of the mushroom nature. It is said that every man has his hobby. Well would it be for all were their hobbies as safe and as well stuck to as is this one, called temperance, by the presiding elder of this district and the worthy president of the Mansfield Female College. They have made this country a hot climate for life wine, whiskey, beer and cider men, many of whom are making "double-quick" time for the temperate zone. On this circuit fifty-eight signed the pledge. Oh! may the good work continue.

We noticed at our district meeting, after the Committee on Temperance reported, it was considered unfortunate for one to complain of neuralgia or "weariness" after the morning's business. We have heard of many excuses for dram-drinking, but none more forcible than that offered by a colored brother in February last, who, when tried in the church for this vice, "pleaded snake-bite," and would have been excused had not an old brother exclaimed: "Brudder, snakes don't crawl in February." He was excluded without a dissenting voice. Oh! that neuralgia and weariness were o'er, and that we could say: "There are no snakes."

We attended the East Texas Conference. They seem to be on rising ground. Their Colored Conference was organized under favorable auspices. We do not think that the missionaries of the "Korah or sword" (Methodist) Church ever collected as intelligent and as well satisfied a body of colored men as this is. In admitting one on trial, a colored brother very pertinently asked:—"Does he tiddle with liquors of any sort?" This was asked with a vim that would have put many of his superiors to the blush. Bishop Marvin presided with them. Kindness, precision and piety seem to pervade everything he does. General satisfaction prevailed on hearing the appointments. His sermon on Sunday was in effect like the fire, the rushing wind and the still small voice, when the Prophet of Horeb stood before the Lord. Sighs, groanings and loud praises attest the preacher's power with God.

The result of our labors this year has been about as follows: Accessions, fifty-seven; baptisms, forty-one; while many heretofore destitute have been preached to. We now number four hundred and seventeen. "Mansfield," in a letter to the Advocate of November 5, refers to a circuit of four hundred members. Thank you, Bro. M. We set no standard in our report. It is not our paying men or our—men that are the only models. We object to making greenbacks and cold water the only criterion by which a high standard of Christianity may be determined. A widow of two mites cast in more than they all. We received a dollar, not long since, from a young lady for the foreign missions. She picked cotton for it. Beat that, Bro. M. Nimble fingers, sharp needles, well filled dairies and crowded poultry yards can work wonders for the Lord when placed under his control. Sisters of Methodism, while preparing dainties for the holidays, have you laid by a portion for the Master? (A sister at my elbow says: "Brethren, have ye a gift for the Lord?") And now this eventful year is closing. Through many dangers, toils, snares and criticisms we have come, and still the Lord is gracious. Believing that he yet has work for us to do, and that Bishop Doggett will know where it is, we are encouraged to go on, crying "Behold the Lamb!" until the Master shall say: "It is enough; come up higher." We pray, Mr. Editor, that you may be there.

Yours in love, PRATINE.

ANACOCO CIRCUIT, November, 1870.

I WILL TRY TO WIN ONE.—Fellow-Christians, have you ever experienced the pleasure of winning a soul to Christ? Suppose you resolve, "I will try to win a soul to Christ this winter." Is that too large a work to undertake for him who loved you, and gave himself for you? Suppose every Christian should so resolve, and be successful in his efforts; plainly there would be such a revival as there never was before, and which would attract the attention of the whole Christian world. The membership of our churches would be doubled, and thousands of souls saved from eternal death. If only half of Christ's professed followers should succeed, the result would still be wonderful and unprecedented. And may not this glorious work be done if the resolve he only made, remembered and acted upon? Ought you not to accomplish as much for Christ in six months? Who that calls himself a friend of Christ will not undertake to do this much?—*Congregationalist*.

Nothing so disturbs our peace of mind as to hear another declare his intention to give us a piece of his,

ROMA E NOSTRA!

We doubt if so momentous a change was ever before announced in words so simple and so domestic as those which have told us that Rome now belongs to the Italian people. They are like the words of a lover who has won his bride—bursting out of a heart too full to tell more than the fact, which has filled it. What ardor of desire, what sickness of heart through hope deferred, what long-lasting struggle of hope against hope, what ecstasy of ardent longing at last fulfilled, the words denote—it were hardly possible for a stranger to conceive. The intensity of the passion must be all the greater that in a material point of view the possession of Rome as a capital must be embarrassing to Italy. A capital infested by malaria, where for a considerable part of the year men can reside only at the risk of their life, must be very far from an unmitigated blessing. But every consideration of that kind seems to vanish from the view in the delight which is felt at the possession of the eternal city. The one dazzling fact is alone present to the Italian mind—*Roma e nostra!*

To us, readers out of the way—"penitus toto diviso orbe Britannos"—the significant fact is, not that Rome now belongs to the Italians, but that it no longer belongs to the Pope. The temporal power has come apparently to an end. The holy father is no longer sovereign of the imperial city. A mock sovereignty is indeed stipulated for him—over six thousand people, with such an amount of pomp and revenue as the Italian government may allow, to break his fall. If the Pope chooses to avail himself of this concession, it will serve for little else than to remind him of his humiliation. It seems even doubtful whether it will be possible to induce the six thousand to town the priestly scepter in which they are called to rejoice. Anyhow the triple crown is virtually gone. The system that for twelve centuries has been such a power, and for a great part of that time such a terror in Europe, is shattered. The Pope must hereafter depend on the spiritual power, and get what comfort and aid he can out of the infallibility which in an evil hour his hungry bishops were constrained to vote to him.

But will this change last? The Pope, it is said, has often been an exile from Rome before this, and sacrilegious kings and emperors have usurped his dominions for a time, but only to show at last how God protected and cared for his earthly vicar. There is, however, no human likelihood that the Pope will ever be restored. The whole current of the age is against a priestly rule. The Roman people have shown by their vote how unanimously they condemn it. The old allies of the Pope are either helpless or turned against him. France, with her old boasting motto, "Nec pluribus impar," is now, as Trail foretold two centuries ago, "singularis impar." Austria has repudiated her concordat; Roman Catholic Germany is disgusted with the "infallibility"; Italy has risen on the papal ruins; Spain has begun a new regime of religious liberty; Belgium and Ireland are about equally powerless to help. The Pope is literally friendless. The indifference with which his old allies have witnessed the fall of his throne must be one of the most painful elements of his distress. They have acted as if it were hardly worth their while to turn round to notice him. There is little likelihood, indeed, that among any changes that the course of events may bring round, the restoration of the Pope will be so much as a dream of.

Another question arises—What will be the effect of the loss of the temporal power on the spiritual? Some have argued pretty confidently that the spiritual will gain rather than lose by the change. To us it seems very clear that it will be quite the other way. In the first place, it was by means of the temporal power that the vast spiritual empire of the Pope was originally founded. Further, the papal religion is such that it depends greatly on prestige—on a certain fascinating influence, by means of which it persuades the people that it is under the special protection of heaven. Rome seldom reasons—never, indeed, while she can dazzle. Now the loss of the temporal sovereignty will go far to impair this power of fascination. If her spiritual power were of a right sort it might be true that the loss of the temporal would increase it. But in reality, with the mass of the people, it has been ghostly, not spiritual. With the unthinking masses the absence of the temporal prestige will shake their confidence in the spiritual authority. With the more intelligent of the clergy and people the dogma of infallibility must have a similar effect. Thus it would seem that the attachment of both classes will be greatly shaken. If the Jesuits counted on an increase of the spiritual power—from the loss of the temporal, they will find they have been leaning on a broken reed. For, indeed, the ex-

citement among the Pope's own friends is evidence how deeply they feel the crisis. Archbishops Manning and Oullen are in great wrath. Victor Emmanuel seems doomed to bear other seven vials of priestly rage. But the anger is nearly as impotent in moral effects as in temporal. The voting even shows clearly that it is the Pope's own subjects that have cast him off. No heretic has had his hand in the affair. No Protestant scapegoat can be found to bear the blame. The cry of robbery cannot be fairly raised where the people have voted themselves out of the papal sway. The humiliation of the Pope is as thorough as the manner of it has been noiseless.

What will now become of the Pope? Will he remain at Rome, or will he seek a home elsewhere? If the Italian court should not be removed to Rome there is little likelihood that the Pope will leave it; but should Victor Emmanuel make Rome his capital it will not be easy for the holy father to remain. It has yet to be seen what effect will be produced on the papal nerves and the papal health by the sight of the real sovereignty of Rome in the hands of the ruler of the "Cisalpine Kingdom," while only the shadow remains with him. Whether Pio Nono and Victor Emmanuel can remain so near neighbors without quarreling is, at least, problematical. And Pio Nono is now an old man. The day cannot be far off when his successor must be chosen. It remains to be seen whether even that shadow of sovereignty which is left with Pio Nono will be allowed to descend to his successor.

And what of the religious effects of the change in Rome itself? As a matter of course, the religious freedom which is enjoyed throughout the Italian kingdom will be now extended to Rome. The word of God, now allowed to be sold and circulated freely in almost every European country, will at last have free course in the States of the Church. The voice of the evangelist, proclaiming the gospel of salvation, will be echoed by walls that have heard no such sound for centuries. Alexander Gavazzi, whom Providence would seem to have raised up, once only the fearless political agitator, but now the firm believer and earnest preacher of the way of salvation, will return to the city from which he has been so long an exile, and possibly in the very buildings where in his early days the citizens hung on the lips of the eloquent monk, they will drink in the words of life from the fervent evangelical preacher. Shall we allow our hopes to carry us a step further? Shall we cherish the thought of an evangelical church of Rome, the counterpart of that which we find in St. Paul's epistle to the Romans? Shall a body of the faithful be again attracted by those simple truths which first drew saints from Caesar's household? Shall men and women, with the spirit of Clemens and Phoebe, again utter the praises of the Redeemer in the city of the seven hills? How ought the prospect of such things to stimulate us! How ought the evangelical world, north, south, east and west, to pray for such a consummation! What grace should be sought for every one called to take part in making known the truth at Rome, and in Italy generally, that he may act wisely and work efficiently in this crisis! All the more that it would seem that the Romans are not much disposed at present to think seriously of any religion. It is said that the prominent feeling in the minds of the people is disgust at all that is "sacra." Let us hope and pray that ere long they may be able to distinguish the real "sacra" from the sham.—*Sunday Magazine*.

TERRIBLE NEWS, AND RELIEF!—The London English Independent says the Established Church was in a very critical condition last week. It was announced that the Queen had taken the holy communion at Crathie church. That would have meant that she had turned Presbyterian. The English clergy held their breath in dismay—they did not know what to say; for an establishment is an establishment, whether Presbyterian in Scotland or Episcopal in England. But now they draw breath again. The dreadful crisis is past. Her majesty did not take the communion; she only stopped to see others take it. That is bad enough. Her daughter is going to marry a Presbyterian. That had enough too.—*New York Christian Advocate*.

"RIGHTS!"—An old lady was brought as a witness before a bench of English magistrates, and when asked to take off her bonnet obstinately refused to do so, saying: "There's no law compelling a woman to take off her bonnet." "O," imprudently replied one of the magistrates, "you know the law, do you?" "Perhaps you would like to come up and sit here and teach us?" "No, I thank you, sir," said the woman, tartly; "there are old women enough there now."

Mass Meeting of Southern Methodists.

The vitality of our church in Baltimore manifested itself in the most signal manner by the proceedings had at Central church on the evening of Tuesday, the twenty-ninth of November ultimo. The Bond Street Church, Rev. T. B. Sargent, pastor, was about to be sold for debt, and the danger was so imminent that no delay was possible, the church having been already informally transferred to its creditors. Under these circumstances the matter was taken in hand by the associated official boards of the city stations as one requiring the assistance of the whole church in Baltimore.

The effort was wisely made, and its success such as to assure Southern Methodists everywhere of the ultimate triumph of our cause in this city. On the night in question a vast crowd thronged Central church at an early hour, composed for the most part of members and friends of our form of Christianity.

The sermon by Rev. W. E. Manssey, D. D., the pastor, was the first of a series on "Ezekiel's Vision" of the "Living Creatures" and the "Wheels." It is sufficient to say that for one hour and twenty minutes the preacher swayed his audience by the magic spell of truth and eloquence, interspersed with irresistible appeals for pecuniary aid. The faith of the speaker must have been great when he advised his brethren to save this church or to pack up and depart from Baltimore as Southern Methodists. But his confidence was nobly realized by the sequel. Bro. Thomas J. Magruder, on the part of the board, ably seconded the sermon and appeal by the most effective programme we have ever witnessed on such an occasion. At the conclusion of the services the joyful announcement was made that Bond street was safe, the sum of \$3,600 having been raised at the meeting.

We sincerely thank God and take courage at this manifestation of the union and strength of our infant church, and hail it as an earnest of the great things yet to be accomplished in Baltimore by a heaven-blessed Southern Methodism.—*Baltimore Episcopal Methodist*.

AN EYE TO BUSINESS.—At one of the prominent Fourth street churches, Jersey City, a worthy deacon had been very industrious through the week in selling a new church book, costing seventy-five cents. At a late Sunday service the minister, just before dismissing the congregation, rose and said: "All you who have children to baptize will please present them next Sabbath." The deacon, who was a little deaf, and having an eye to selling the books, and supposing his pastor was referring to them, immediately jumped up and shouted: "All you who haven't any can get as many as you want by calling on me, at seventy-five cents each." The preacher looked cross-eyed at the brothers, the brothers looked at the deacon, the audience punched the audience in the side, the bubble grew larger until it burst in a loud guffaw; ladies colored up, crimsoned, blushed, and thanked the Lord for the low price of peopling the earth. There was no benediction that morning worth speaking of. The deacon, after he had found out his mistake, changed his pew from the front of the church to the third from the rear; and though he cannot hear the sermon, he is consoled with the thought that the young ladies can't sneaker at him.

TAMAHANA.—A New Zealand chief, so called, who visited England a few years ago, was remarkable for the deep spirituality of his mind and his constant delight in the word of God. One day he was taken to see a beautiful mansion—one of the show places near London. The gentleman who took him expected to see him greatly astonished and much charmed with its magnificence and splendor; but it seemed, to his surprise, to excite little or no admiration in his mind. Wondering how this could be, he began to point out to him its grandeur, the beauty of the costly furniture, brought from all parts of the world, the view from the windows, etc. Tamahana heard all silently, then looking round upon the walls, replied: "Ah! my Father's house finer than this." "Your father's house!" thought the gentleman, who knew his father's home was but a poor mud cottage. But Tamahana went on: "My Father's house finer than this;" and began to speak, in his own expressive, touching strain, of the house above—the house of "many mansions"—the eternal home of the redeemed.

As there is no corn to be had at harvest without sowing, so there is no happiness to be had in heaven without sowing. And as it is not every seed, nor every kind of sowing, that will bring forth corn, so it is not any sowing but by righteousness, and that in peace, that will fructify unto eternal life; they that by well doing seek immortality, are recompensed with everlasting life, if they continue patiently so to do.—*John May*.

The Christian Advocate.

SATURDAY, DECEMBER 31, 1870.

THE DEATH OF THE FLOWERS.

The wind-flower and the violet, they perished long ago,
And the blue-rose and the orchid died amid
the summer glow;
But on the hill the golden rod, and the aster
In the wood,
And the yellow sunflower by the brook in
autumn beauty stood.

Till fell the frost from the clear, cold heaven,
As falls the plague on men,
And the brightness of their smile was gone,
From upland, glade and glen;
And now when comes the calm mid-day, as
still such days will come,
To call the squirrel and the bee from out
their winter home.

When the sound of dropping nuts is heard,
Though all the trees are still,
And twinkle in the smoky light the waters of
the fall;
The south wind searches for the flowers,
Whose fragrance late he bore,
And sighs to find them in the wood and by
the stream no more. *Dryant.*

CONFIDENCE IN GOD.

"Why hast thou forsaken me?"
So, indeed, many a one is crying at
this moment. Why hast thou forsaken
this weary, solitary soul? Why hast thou
left the parent to bear the burden of ungrateful,
rebellious children? Why hast thou
left the wife or mother to bewail
her only joy? Why hast thou cast
these poor children on the world,
with none to help them? Why
hast thou permitted those cruel op-
pressors to go on under the sun,
unchecked and unchecked? Why
hast thou permitted those vast mul-
titudes to be born and die, as sheep
without a shepherd? Why hast thou
forsaken so many churches
which thy right hand had planted?
Why hast Christendom gone so far
astray from its original purpose?
Why has the human race—why has
this church and nation—been al-
lowed to lose so many great oppor-
tunities? Why has so many a noble
spirit been snatched from us when
we most needed him? Why do the
evil prosper—why do the good fail?
Why is human life so mysterious
and so sad? Why is the divine life
so far off—so difficult to attain unto?
We ask these questions—we cannot
help asking them; we even do well
at times to ask them. Christ asked
this one question which compre-
hends them all. There is no other
answer but that which he gave to
himself—not in word, but in act.
He did not give way; he did not
despair. He waited; he endured.
He looked forward and upward.
Though God seemed to have for-
saken him, he yet had not forsaken
God. God was still to him his
God. "My God." And therefore,
in the strength of his endurance,
the darkness broke away, and the
desolation ceased. He felt that
God was not only his God, but as
always, his Father. "Father," he
said, "into thy hands I commend
my spirit." The work which he
came to do, and which seemed for
the moment forsaken and inter-
rupted, he felt was, after all, accom-
plished. "It is finished," he said.
So we may be sure that, if we per-
severe, our Father will receive our
spirits in calm and peace. Our
work will be finished; if not by
ourselves, by others, when God's
good time is accomplished. *Dean Stanley.*

A PRIZE is a gift or a reward that
is within the reach of but one or
two persons. We hope that the day
may soon come when prizes will
cease to be offered in any of our
Sunday schools. The Central Chris-
tian Advocate has an article stating
that a Sunday school girl named
Susie Farnacht, aged eleven years,
died at Holden, Missouri, November
5, from typhoid fever, superinduced
by long-continued effort in memor-
izing the Scriptures. The superin-
tendent of the Sunday school where
the child belonged had offered a
prize to the scholar who should
commit the greatest number of
verses. Susie had committed all
the New Testament, the Book of
Psalms, and a large number of
verses from other books in the
Bible, making in all twenty thou-
sand. Another girl had committed
nearly nineteen thousand verses. All
this the Central justly charges as
martyrdom. One to six verses
memorized each week, and in the
exact term of the Scriptures, can be
accomplished by any child or adult,
without injury, and this much is
infinitely better than hundreds and
thousands of verses learned and re-
cited in parrot style.

ON SABBATH, December 4, at Sand
Hill, Kentucky, while Rev. J. B.
Hough, of the Christian Church,
was administering the rite of bap-
tism in Crooked Creek, he and Dr.
A. P. Pownall, who desired baptism,
after passing some distance in the
stream, suddenly came to an abrupt
bank and fell, and in the struggle
that ensued Mr. Hough was enabled
to reach the shore, but Dr. Pownall,
not being a swimmer, was swept
under a floodgate and was drowned.

"THERE'S UNCLE JOE!"—A corre-
spondent of the Baptist Standard,
Chicago, tells a good story of the
late Dr. Colver, who was once pas-
tor of the Court street Baptist
church, Cincinnati, whose expe-
rience with tobacco we noticed last
week:

When he was pastor at Union
Village, New York, a man lived
there familiarly known as "Uncle
Joe"—a profane old reprobate,
but still of jovial good humor that
made him and Elder Colver very
good friends. Uncle Joe, like many
others of his class, was a great
Universalist, and a Universalist
preacher passing that way, Uncle
Joe bestirred himself to arrange an
appointment for him. Applying for
the use of the Baptist meeting
house, which was not used on Sun-
day afternoon, he obtained a favor-
able word from Elder Colver, and
the trustees consented that Uncle
Joe's preacher might have it. When
the sermon was near its close, Elder
Colver dropped in to look around,
taking a retired seat by the door.
The meeting was quite a success.
The Universalists, of whom there
were many in town, were all out in
force, and curiosity had brought in
others, so that the house was well
filled. In a prominent seat on
the broad aisle, with chest ex-
panded, thumb in armpit of vest,
and with head erect, sat Uncle
Joe—who had not been inside
of a meeting house for years be-
fore—losing not a word of the com-
forting doctrine, except when he
turned his head to look triumph-
antly over the well filled seats,
evidently feeling that no one hence-
forth would deny that the Univer-
salists were somebody. The Univer-
salists, of course, felt good nat-
ured toward the Baptists for the
use of the house, and when the
minister finished his discourse, he
said: "I see that Elder Colver is
present. Bro. Colver, will you lead
in prayer?" "Brother" Colver
arose with an honest-looking face,
and said: "O, I think it would be
more appropriate for some of our
Universalist friends to lead in
prayer;" and, looking inquiringly
over the house, he suggested "There's
Uncle Joe!" Never did mind trifle
draw in his head as quickly as Uncle
Joe collapsed at being called on in
public to lead in prayer. A sup-
pressed titter ran through the house,
for all appreciated the joke, and it
was evident that that sermon was
spoiled.

THE PASSOVER IN JERUSALEM.—By
the kindly offices of a friend, a
Christian Israelite, we gained—says
a recent traveler—admission to the
houses of several Hebrew families
on the night of the Passover. The
same general order of things was
observed in them. A long table was
arranged for the sacred meal, in the
center of the chief room of the
house, and both chamber and table
were adorned according to the
wealth and taste of the occupier.
In the center of the table was a
basket containing unleavened bread.
Dishes containing hard-boiled eggs
and salads were scattered about the
table representing the bitter herbs
of old; and wine from the vine-
yards of Bethlehem, sweetened with
raisins, was plentifully supplied.
At sunset the entire family, old and
young, gathered round the fragrant
board, the men at one end and the
women at the other, while the chil-
dren occupied places between. In
front of the male members of the
family was set a platter containing
a piece of roast lamb, usually a cut-
let from the loin. Before the repast
was commenced the narrative of the
exodus was read in Hebrew by one
of the younger sons, and the patri-
arch of the group occasionally inter-
rupted the reader by throwing in
some explanation of the text, or an-
swering questions which were pro-
posed. The narrative concluded,
the head of the family led the de-
votions of the evening by reading
some liturgical prayers. Then the
feast commenced, at which only the
males partook of the paschal lamb,
while the women contented them-
selves with eggs and salad. At the
conclusion of the repast the an-
cient Psalms of David were sung in
their peculiar nasal fashion, which
occupation often advances far into
the night. To us these Jews dis-
played courteous hospitality, and
pressed upon us their unleavened
bread and very excellent wine, and
when, in parting from the interest-
ing scene, we asked an ancient pa-
triarch whether he still anticipated
the advent of the Messiah, a ray of
gladness lit up his furrowed face as
he replied: "I am expecting his ap-
pearance every day."

ACTION.—The life of man can, in
its true sense, consist only in con-
stant, active exertion, not only of
body, but also of the mental facul-
ties. He is a stranger to happiness
who passes his days in listless inac-
tivity. That man can alone possess
true joy who devotes all the ener-
gies of his soul and body to one
great specific end and aim; who
lives for a great object, and strives
with all the powers he can command
to attain to the fulfillment of his
wishes.

HOW MOTHER DID IT.

If we were to suggest one which,
above all other things combined,
would most contribute to the happi-
ness of the young housekeeper, it
would be to learn how to cook as a
husband's mother cooked. Mother
used to make coffee so and so! Mother
used to have such waffles! and mother
knew just how thick or
how thin to make a squash pie! And,
oh! if I could only taste of
mother's biscuit! Such are the
comments of the husband, and of
too many meal-tables. It would be
only a little more cruel for the hus-
band to throw his fork across the
table, or to dash the contents of his
tassoon in his wife's face. The expe-
rience of a contrite husband is good
reading for those men whose daily
sauce is "How mother did it." He
says:

"I found fault, some time ago,
with Maria Ann's custard pie, and
tried to tell her how my mother
made custard pie. Maria made the
pie after my recipe. It lasted longer
than any other pie we ever had. Maria
set it on the table every day for
dinner; and you see I could not
eat, because I forgot to tell her to
put in any eggs or shortening. It
was economical; but in a fit of
generosity I stole it from the pantry
and gave it to a poor little boy in
the neighborhood. The boy's funeral
was largely attended by his former
playmates. I didn't go myself. Then
there were the buckwheat cakes. I
told Maria Ann any fool could beat
her making those cakes; and she
said I had better try it. So I did.
I emptied the batter all out of the
pitcher one evening and set the
cakes myself. I got the flour and
the salt and water; and, warned by
the past, put in a liberal quantity of
eggs and shortening. I shortened
with butter—no roast beef, because
I could not find any beef. The bat-
ter did not look right, as I lit my
pipe and pondered. Yeast, yeast,
to be sure. I had forgotten the
yeast. I went and woke up the
baker, and got six cents' worth of
yeast. I set the pitcher behind the
stove, and went to bed. In the morning
I got up early and prepared to enjoy
my triumph; but I didn't. That yeast
was strong enough to raise the dead,
and the batter was running all over the
carpet. I scraped it up and put it into
another dish. Then I got a fire in
the kitchen and put on the griddle.
The first lot of cakes stuck to the
griddle. The second did too, only
more. Maria came down and asked
me what was burning. She advised
me to grease the griddle. I did it.
One end of the griddle got too hot,
and I dropped the thing on my
tenderest corn while trying to turn
it around. Finally the cakes were
ready for breakfast, and Maria got
the other things ready. We sat
down. My cakes did not have ex-
actly the right flavor. I took one
mouthful, and it satisfied me. I
lost my appetite at once. Maria
would not let me put one on her
plate. I think those cakes may be
reckoned a dead loss. The cat
would not eat them. The dog ran
off and stayed away three days after
one was offered to him. The hens
wouldn't go within ten feet of them.
I threw them into the back yard, and
there has not been a pig on the
premises since. I eat what is put
before me now, and do not allude to
my mother's system of cooking."

AN EFFECTUAL REBUKE.—On his
way home from his last tour in
Ireland, Rev. Rowland Hill was
very much annoyed by the reprobate
conduct of the captain and the mate,
who were greatly addicted to the
ungentlemanly habit of swear-
ing. "First the captain would swear
at the mate, and then they would
both swear at the wind."
"Stop, stop," shouted Hill, "let
us have fair play, gentlemen; it's
my turn now."
"At what is your turn?" said the
captain.
"At swearing," replied Hill.

After waiting until his patience
was exhausted, the captain urged
Mr. Hill to be quick and take his
turn, for he wanted to begin again.
"No, no," said Hill, "I can't be
hurried; I have a right to take my
time and swear at my own con-
venience."

"Perhaps you don't intend to
take your turn," responded the
other.
"Pardon me," said Hill, "but I
do, as soon as I can find the good of
doing so."

The rebuke had its desired effect;
there was not another oath on the
voyage. As a preacher, Hill was
simple, clear and fluent. His pow-
ers of imagination were far above
mediocrity, and he had remarkable
talent for illustrating and simpli-
fying great and important truths.

A HIDDEN LIGHT soon becomes dim,
and if it be entirely covered up, it
will expire for want of air. So it is with
hidden religion. It must go out of
sight. There cannot be a Christian
whose light in some aspect does not
shine.

KANSAS CITY has a Chinese lan-
dry.

RELIGIOUS INTELLIGENCE.

The American Board calls on the
children for \$10,000 to build a new
"Morning Star," to take the place
of the one that was wrecked. They
are asked to take up the collections
on the second Sabbath in January.

The Second Baptist church in
Chicago has 1,089 members, and
raised last year \$48,390, of which
less than one-quarter went for home
purposes. It never gets up fairs,
but gives outright what money it
raises.

A WEALTHY and learned Moham-
medan of high rank, who has lately
joined the Protestants in Syria, at
great personal peril, says there are
forty others who have the Bible, and
who would, if they dared, declare
themselves Protestants.

MINNESOTA.—There are but four
Congregational missionary churches
in Minnesota, two of which are un-
supplied, and one of these two is
not in a condition to receive more
than an occasional supply (which it
will have) for the present.

The New York Bible and Com-
mon Prayer Book Society is now on
the threshold of its fourth year.
During the past three years it has
distributed throughout the United
States 13,097 Bibles and Testa-
ments, and 59,548 prayer books—
giving a total of 72,645 volumes.

A MISSIONARY in Turkey remarks
that there is a great work going on
under the surface in all that region.
The faith of many in the national
superstitions is shaken. There is
an interesting convert in Western
Turkey, a merchant, who is very
successful in his work.

METHODIST STATE CONVENTION.—
The Methodists of Rhode Island
lately held their convention at
Providence. The membership of
the churches in that State is one for
every forty-seven of the population,
and in twenty years the average
salary of pastors has been increased
from \$360 to \$1,015.

The whole Bible is now published
in fourteen of the principal languages
of India, the whole New Testament
in five others, and some books in the
Old and New Testament in seven
more, so that the word of God, in
whole or in part, is printed in no
less than twenty-six of the living
languages of India.

ANCIENT EPISCOPAL CHURCH EDI-
FICE.—The oldest church edifice now
standing in Boston is that of Christ
church, Salem street. It was erected
in 1723, and yet the old pews and
singing seats, the sounding-board
and the splendid chandelier, with
its five hundred burners for candles
or oil, all remain unchanged.

THE Methodists in San Francisco
have dedicated their mission build-
ing for the Chinese. The Chinese
in that city subscribed \$440 toward
its erection. Dr. Li Po Tai gave
\$50, Tuck Chong & Co. \$30, three
other firms \$15 each, and five \$10
each. The Chinese Sunday school
scholars gave sums ranging from
five cents to \$3 each.

The revival in Bitlis (Eastern
Turkey), of which we have before
spoken, has added forty-two to the
church, which now numbers sev-
enty-four. The Sabbath congrega-
tion numbers about one hundred
and fifty, though four hundred were
present on the Sabbath of the an-
nual meeting, soon after the chapel
had been enlarged and improved by
the people.

The Advent Herald says that
Rev. Mr. Adams, of Holyoke, Mas-
sachusetts, recently immersed forty-
four candidates in twenty-two min-
utes, and that Elder Pike, of New-
buryport, once immersed ninety-
seven persons in less than sixty-five
minutes. It thinks that the apos-
tles could have easily baptized by
immersion the three thousand con-
verts on the day of Pentecost.

A REMARKABLE missionary success
is that of the efforts of the churches
in the Sandwich Islands among the
Islands of Micronesia. In Tap-
tenca, one of the Gilbert Islands,
we believe, where the Hawaiian mis-
sionaries labored less than two years
ago, Mr. Kapu reports one thousand
eight hundred and fifty pupils, and
that one thousand three hundred
have already learned to read. They
have erected four school houses and
are engaged on their second church.

BISHOP JACOBSON, an eminent Div-
ine among the Moravian Brother-
hood, died at Bethlehem, Pennsyl-
vania, on the twenty-fourth ultimo.
He was born in what was formerly
the Duchy of Schleswig, Denmark,
in 1795, and came to this country
in 1816. In 1848 he visited Europe
as a delegate to the General Synod.
In 1854 he received his ordination
as Bishop. The organ of the de-
nominational speaks of his sweet
humility, his culture, and his breadth
of religious sympathy.

The Plymouth Bethel Sunday
school, in connection with Plymouth
church, Brooklyn, New York, has
an average attendance of seven
hundred scholars and eighty teach-
ers. The school gives great promi-
nence to class teaching; the super-
intendent seldom, or never, con-
sumes so much as five minutes in

speech-making, or in the general re-
view; the black board is seldom
used, except in the infant classes,
and twenty minutes is devoted every
Sunday to singing. The teachers'
meeting meets weekly, and is largely
attended.

TOLERATION IN PORTUGAL.—The
question of religious liberty is being
stirred up in Portugal. A Jew has
been selected to the legislature by
an immense majority, but cannot
take his seat because the constitu-
tion requires him to take an oath
that he belongs to the Catholic
faith. All liberal papers of the
country advocate the repeal of this
clause, and the proclamation of
complete religious liberty through-
out the country.

The papers in Rome which pub-
lished the papal encyclical denounc-
ing and excommunicating the Italian
King and ministers for invading the
Roman territory have all been seized
by the Italian government. The
pretext is that the Pope has the
right to publish anything he pleases
in Rome; but, as this document
was first printed in Geneva, it is a
forgery, and these papers have made
themselves liable to penalty for pub-
lishing false news with a malicious
intent.

GERMAN REFORMER.—There are
about four thousand Hollanders in
the city of New York, among whom
there is one colporteur. There are
two Reformed missionaries among
the Germans. On Norfolk street
there is a mission with over five
hundred communicants, and in the
Sabbath school there is an average
attendance of over five hundred
pupils. The mission on Fortieth
street has one hundred and eighty-
four communicants and a Sabbath
school attached.

THE increase of Ritualism in the
Episcopal churches of Bengal, un-
der the direction of the Bishop of
Calcutta, calls forth considerable
remark and displeasure in India.
The cathedral in Calcutta is well-
nigh deserted, because of the intro-
duction of this semi-popery, and
large numbers of the leading people
gather to the church in which they
hear the able preaching of the
church missionary secretary. The
diocesan charities, which have been
in some, if not in many, instances
made by the Bishop subsidiary to
Ritualism, are badly supported.

REV. T. DE WITT TALMAGE, in a
letter to the Sunday School Work-
man, about the Sunday schools and
churches in London, says the Sun-
day schools are generally only a
milder form of inquisition. The
school of Dr. John Canning is
without a picture or pleasant sight,
and has an average of thirty-seven
scholars. Spurgeon's school room
is a sepulcher. The seats are nar-
row and without backs, and remind
one of the Irishman's remarks on a
fine cemetery, that he thought it
"a very healthy place to be buried in."

"The people in England," says Mr.
Talmage, "do not much like to have
an American come into their Sab-
bath schools. They always apolo-
gize and say: 'You are ahead of us
in these things.'"

STATISTICS OF PLYMOUTH CHURCH.
At the annual business meeting of
Henry Ward Beecher's church, held
recently, the clerk reported the fol-
lowing statistics:

Admissions, 173; present mem-
bership, 1,982; baptisms, 64; deaths,
11; membership of Plymouth and
Bethel schools, 2,067; collection of
schools, \$1,611; collection for poor,
\$1,500; church collections, \$15,846;
pew rents, \$56,000; total, \$74,957.
The net gain of church membership
has been greater than in any year
since 1858. The Music Committee
reported a very favorable state of
the music in choir and congregation.
They have furnished for the year a
valuable music library. The ex-
penses of the quartette and organist
for the year amounted to \$6,000.

PROF. KNAPP reports that there
were in Madrid, September 1, two
strict communion Baptist churches,
of which the first, the Lavapios, of
which he is pastor, had forty-eight
members, and the second, the Liber-
tad street church, had forty-two.
The latter was connected with the
Plymouth Brethren; "but, by dint
of incessant labors," he says, "I got
the leaders to see that a consistent
course was to admit to the Lord's
table only those whom the New
Testament recognizes as full Chris-
tians." He says it would be easy
to increase the number in his own
church to one hundred, if he had a
baptistery, with proper facilities for
immersions. But the river margin
is infested with laundresses, who
with their families and friends set
up a derisive howling, mingled with
abusive and obscene language, when-
ever a candidate is baptized; and
besides, as the season advances, the
water, which comes down from the
mountains, is very cold, and the ex-
posure reacts upon "the weak
frames of this degenerate people,
not accustomed to diverse ablu-
tions."

COTTON MATHER, the eccentric New
England divine, published during
his life three hundred and seventy-
two works.

LIGHT.—One of the finest pas-
sages in the recent lecture of Rev.
William Morley Panshion, in Troy,
New York, was the following—a
passage embodying a most brilliant
metaphor, to which the large au-
dience listened with rapt attention,
and which they will be glad to see
in print:

Light is presented to us in ever-
varying conditions; but it is always
the same—there is a oneness in its
essence after all. It is the same
light that glistens on the wing of
the fire-fly, and blazes on the ruddy
hearthstone, and sparkles on the
jewels in the diadem, and flashes in
beauty in the morning. Science
tells us that those prolific beds of
coal in the bowels of the earth were
once forests on the surface—forests
of luxuriant vegetation; that they
incorporated the sun's rays, and
then, in merciful convulsions, were
imbedded in the center of the lower
earth by an all-provident foresight
for the wants of an inhabited world.
Science tells us, too, that time was
when the shapeless crystal was yet
new to the covering of the earth.
Subjected to the wheel of the lapi-
dary, it sparkles out to view as a
gem of the first water. It is but
the release of imprisoned rays which
shone from the same great source
long centuries ago; so that, in both:
the cottage fire-light and in the
monarch's gem, we have just the
resurrection of some olden summer
—the great return of some sepul-
chral sunlight, from which man has
rolled away the stone.

A CHRISTIAN'S COMFORT.—The best
ground of comfort and confidence
which a man can feel, that he is
God's son and abiding in his favor,
is that he is "led by the Spirit of
God." Nor is it difficult for any
one to discover whether this be his
case or no; since "the fruit of the
Spirit is love, joy, peace, long suffer-
ing, gentleness, goodness, faith,
meekness, temperance." If, there-
fore, a man find these graces in his
own heart and conduct, he may be
sure that they must be planted
there by God—the fruits of his good
Spirit; and that he, being led by
the Spirit, is the son of God. And
as this is their support and comfort,
so it is a caution to the best and
wisest, that from that blessed emi-
nence they may at any moment fall;
and consequently no care can be
too great to preserve themselves
from the sin of grieving the Holy
Spirit of God, by whose presence in
their hearts they are sealed to the
day of redemption. Be diligent,
therefore, in using these outward
means of grace, whereby God sanc-
tifies his children from the world;
be studious to walk where the Spirit
leads, lest that blessed Spirit be
withdrawn; and be lowly and hum-
ble before the Most High, since it is
to such only that an increase or
continuance of the divine favor is
promised. *Bishop Dober.*

IN SEARCH OF A BOY.—A gentle-
man wanted a trusty boy. His friend
came to his office one day, saying:
"I've got a boy for you—smart,
active, intelligent—just the boy that
will please you."

"Who is he?" said the gentleman.
The friend told his name. Just at
that minute the boy passed the
window, and was pointed out to him.
"Don't want him," said the gen-
tleman. "He has a bad mark; I
met him, the other day, with a cigar
in his mouth. I don't want a
smoker."

While the two were talking an-
other gentleman entered the office.
"I understand you want a good,
trusty boy, Mr. —?"

"Yes, sir. Have you got one for
me?"

"I think I have," was the reply.

"Well, sir," said the gentleman,
"what do you know of him?"

"I don't know much," said the
other; "he is in my Sunday school,
always has his lesson, and never
smokes."

"He is the boy for me. The boy
that gets his Sunday school lesson
and never smokes can be trusted."

AFRAID OF GOD.—Some years ago
a band of missionaries in the Fiji
Islands found their home surround-
ed by a troop of savages armed for
battle. Being both unable and un-
willing to fight, they shut their door
and began to pray.

Presently the howling of the sav-
ages ceased. Then one of the mis-
sionaries went out, and found only
one savage there. Said the mission-
ary: "Where are your chiefs?"
"They are gone. They heard
you praying to your God; and they
know your God is a strong God;
and they are gone."

The savages were right at last.
God is a strong God; strong to
help those who love him; strong to
punish his enemies. This strong
God is the friend of loving little
children. What good news this is
for the weak and helpless!—S. S.
Advocate.

ROME THE CAPITAL OF ITALY.—A
public meeting is soon to be held at
the Cooper Institute, to express
American congratulations to Victor
Emmanuel and the Italians, upon the
occupation of Rome as the capital
of united Italy.

The Christian Advocate.

Official Organ of the Mississippi, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, DECEMBER 11, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address: Rev. J. S. PARKER, 112 Camp Street, New Orleans, La.
Agents—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEE

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. W. ANDREWS, D. D.

FOR MISSISSIPPI CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAFER.
REV. J. B. COBBLE.

FOR LOUISIANA CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. J. G. JONES.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEEFER, D. D.
REV. J. B. WALKER, D. D.
REV. L. S. PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

POST OFFICES.

As changes are being made in the post offices of the preachers, they will greatly oblige us by furnishing their addresses as early as possible. Don't forget to give the post office from which your paper is to be changed, as well as that to which it is to be sent.

Meeting of the Publishing Committee.

The Publishing Committee of the NEW ORLEANS CHRISTIAN ADVOCATE will hold their annual meeting on Saturday, the seventh of January. The members representing the patronizing Conferences are requested to be present at that date.

BISHOP D. S. DOGGETT reached the city on Thursday morning, the twenty-ninth instant, in good health, and prepared for the duties of our approaching Conference session. The Bishop will preach on Sunday, January 1, at the Felicity Street Church.

CONFERENCE SESSION.—The Louisiana Conference meets in New Orleans, at the Carondelet Street Church, on Wednesday, January 4. Preachers and lay representatives will call at 112 Camp Street on their arrival.

EXCURSION, PANORAMA.—Attention is called to the advertisement of the Panorama of New York, which appears in another column. This beautiful work of art is highly commended by the religious and secular press of the country. It will afford the young especially a great deal of pleasant and useful instruction. Such works deserve encouragement, and afford the most profitable holiday entertainments.

A NEW TEMPERANCE PAPER.—We have received the first number of the Temperance Family Visitor, published in Houston, Texas, and edited by Rev. B. T. Kavanaugh, D. D. It is to appear, we believe, semi-monthly, and is to be the official organ of the friends of temperance. The appearance of the first number is very neat—an eight-page sheet—and well filled with choice reading matter. The editor, Dr. Kavanaugh, is an eminent minister in our church, and a most sturdy and veteran advocate of temperance. We welcome the Temperance Family Visitor, and pray that it may live long and prosper. It will be mailed to subscribers at the low price of \$1 a year.

GOETHE has wisely said: "Of all thieves, fools are the worst; they rob you of time and temper."

NEW YEAR.

A life without dates, and with nothing to mark the lapse of time, would be highly unsatisfactory. Gray hairs, wrinkles and bodily decay might indicate the fact that we are growing old, but we like to know how old the world is, and how old we are ourselves. There is a certain beneficence in the existence of dates, of epochs and definite way-marks in the journey of life. It is well, in many respects, that the year has a recognized beginning and end; that there is this mile-stone to remind the traveler of the ground he has passed over, and of the lessening distance between him and "the house appointed for all living." Time passes inexorably and swiftly. It can neither be arrested nor retarded; but the motion seems accelerated by every revolution of the earth, so that, as our days decrease in number, they appear to grow more rapid in their flight.

We may pause to speculate upon the years that remain, and where we are in reference to the entire picture of our probation. Have we but fairly entered, have we reached the meridian line, or are we near the night which, sooner or later, shuts down upon every mortal life? In many instances it is more than a mere conjecture that this new year shall be the last. The extremely aged do not look beyond it, the hopelessly diseased are waiting the final summons, and many who, in health, are passing out of middle life, are reminded by the lengthening shadows of the nearness of eternity. With thousands, however, who are in the bloom of youth, "the morning cometh and also the night." Instead of the gradual and mellow tints of the sunset, their end will come with the suddenness and gloom of a solar eclipse. Their sun will go out without going down. Death's harvest of the past year is sure to be repeated in the present, and among those that fall will be representatives of every age and condition.

New Year's day is not, therefore, to be a time of gloom, because an occasion of serious reflection. Those who have a right to be joyous, under any circumstances, may be so to-day. To the Christian there is nothing saddening in the brevity of life, nothing calculated to cause gloom in the lengthening shadows. With him, "To live is Christ, and to die is gain." He is one year nearer home, and if this year be his last on earth, it will record his entrance into the rest of God's people. The impenitent sinner has no right to cheerfulness, at any time, and never less than the very time which he most devotes to thoughtless mirth and extravagant demonstrations of joy. To him the past is one of condemnation, and he is a year nearer the judgment, a year nearer hell! He is a guiltier being than he was twelve months ago, and the time to come only deepens that guilt. Of the Christless soul, even in the holidays, we may adopt the inspired words: "I said of laughter, it is mad; and of mirth, what doeth it?" What greater madness than laughter, mirth and reveling whilst men are "without God, and having no hope in the world!" What place is there for mirth when the fleeting years are only hurrying them unprepared into the presence of an angry God? What doeth it, this unseemly and incongruous mirth, when there is but a step between the soul and eternal death? The one condition and element of real happiness is wanting, and it is a farce, a mockery, a solemn delusion to think of its possession until we have given up our sins, and surrendered all at the Savior's feet.

By many the beginning of the new year has been looked forward to as the occasion of carrying their good resolutions into effect. Christians have purposed to enter upon a closer walk with God, and to give more attention to their religious duties. The unconverted have set it apart as the time for their entrance into the visible church, and the beginning of their religious profession and practice. It is the appointed day for reformation, the breaking off of bad habits, and the inauguration of a new and better order of

living. But will these good resolutions be kept? If the believer has felt the need of a deeper work of grace, why has he put it off until this day? How has he dared thus to limit the Holy One of Israel, and to defer what duty, conscience and reason demanded at once? The serious-minded sinner will find no mystical or talismanic spell in the day which begins the calendar of another year. The self-renunciation will be harder, the conflict with the corrupt nature will be even more difficult than six months ago. The act in every case should be contemporaneous with the serious conviction and purpose. The resolve was a bribe to conscience, and the performance is easily postponed. Everything is lost when men consent to defer an obvious present duty, and especially when they race themselves with the obligation of a definite day. There was sin in the postponement, and it will not be wanting, in most cases, when the set time arrives. The probabilities are strong that the Christian who has been waiting for the new year in order to realize a higher type of piety will continue to live in a low and deplorable state. It is almost certain that the majority of those who have determined upon moral and religious reformation will pass the assigned limit, and go on in their sin. The very worst use of the day is to make it the axis, and target of good resolutions. The same influences that led to the putting off of the call of God will carry the procrastinator beyond the prescribed limit, and launch him upon another year of unbelief. To resolve to be a Christian or to resolve to be a better Christian, at some future day, is a most heinous sin. It is trifling with God, and insulting his goodness and authority. It can only be done by resisting the Spirit, and by deliberate rebellion against the divine government.

The voice of the old year is a sermon of manifold instruction and application, calling for gratitude for mercies temporal and spiritual, for humiliation and self-abasement, for penitence, and for honest searching of heart. Above all its lessons, is the importance of an immediate and decided choice of "that good part." In view of the failures and sins of the past, the waste of time, the perversion of opportunities, we shall do well to adopt the Psalmist's prayer: "So teach us to number our days that we may apply our hearts unto wisdom." If we have come so far without having enlisted for Christ, by all means set up the tabernacle "on the first day of the first month," and let this be the glad day of our espousals. A happy New Year it will be, if it marks the beginning of a new life, or if it is signalized as its triumphant end. Toil and care, poverty and suffering may be in store, but it will be a happy year if God go with us. Doubtless the year dawns gloomily upon many. The earthly outlook is most disheartening, and they venture forth with fear and trembling; but it may be a happy year, nevertheless, if Christ's footsteps are on the billows, and if his form moves amidst the tumult of the elements. Through all the weary pilgrimage, through the waste, howling wilderness, and in the face of the mightiest enemies, the ancient promise stands: "My presence shall go with thee, and I will give thee rest."

A NEW YEAR'S HYMN.

Lord, thou art good—we say it when
Thy fierce east breeze blows;
Lord, thou art good—we still repeat
In thy soft summer glow;
And whether next day rain or shine,
Shadow and sunshine both are thine.

We cannot thank thee as we would
For all our past has been;
Such sweet white blossoms thou hast dropped
From fields of living green,
Bidding us think how fair is made
Thy land, where such flowers never fade.

The future still is hid with thee,
The secret thou dost know;
We cannot guess its coming bliss,
And we would have it so;
Content, when this year's course is o'er,
We shall but love and trust thee more.

As little children, called to see
Their father's face and land,
Are sure that whatsoever he send,
They will be satisfied;
We thank thee ere we know thy gift,
And wait till thou its veil shall lift.

And most we thank thee, Lord, that thou,
Who givest our wine and corn,
Came down to bear the shameful cross
And wear the crown of thorn;
Thy sacrifice makes all our gain,
Our joy grows perfect through thy pain.

Isabella Fyvie Mayo.

AN EVIL UNDER THE SUN.

The Christian Union notices, in very fitting terms, an unbecomingly habit which some journals have of bestowing extravagant praise upon themselves. There can be nothing objectionable in calling attention to the character and claims of a newspaper, and both editors and publishers are justified in soliciting patronage by a modest and truthful exhibition of the merits of their publications. But the thing is often overdone, and an amount of cheek and brazen conceit is displayed which is as wonderful as it is offensive and disgusting. The language of the Christian Union is both forcible and just.

"But! Anon, we are sorry to see a very sound and sensible contemporary speaking of itself, in a double-edged editorial, as 'the largest and cheapest and best newspaper in the denomination.' It may be quite true of the journal in question, but the more deserving the journal, the more unworthy is this self-praise. In truth this sort of thing, used to be the morning sign of inferiority. It was generally confined to the posters of the playhouse, which would betray to the knowing ones a desperate state of things—a 'beggarly account of empty boxes.'—By an unusually pretentious boast of the 'brilliant and unexampled success' of the 'Bloody Milkmaid, or the Hatchet of Horror.' We heartily wish the custom might be relegated to the showmen, the auctioneers and the cheap newspapers, whence it took its rise. Even the publishers, with their magniloquent manifestoes, might infer the utility of this idle boasting from its universality, because every journal now in existence is known to enjoy the distinction of being the 'cheapest and best in the world,' but out of our editorial columns, at least, let us jealously exclude it."

We find in the Baltimore Christian Advocate the portraiture of an evil akin to that mentioned above. The habit of fulsome praise, of unsparing and eulogistic notice of preachers, or of other living men, has reached such a height that we are glad Dr. Bond has taken it in hand. This extravagant glorying in men is not good. The church and our religious press seem to be degenerating into a mutual admiration society. The whole thing is a breach of good taste and of good manners, and utterly foreign to the spirit of the gospel. Editors may indulge in this wholesale and indiscriminate laudation as expedient for themselves, and polite in reference to the welfare of the church; but if the church and its press can be maintained by no other means we should wish them both to go by the board. Too often, however, it springs from intense egotism, and ministers to vanity and a morbid hunger for eulogistic notoriety. Dr. Bond thus discourses of modern miracles:

The age of miracles has returned. If there are any now-a-days who "ask for a sign," we know of a church that can satisfy them. It has in its ministry a host of wonder-workers. Never having seen any of their marvelous doings, we can only repeat the testimony of unimpeachable eye-witnesses, even religious papers, famous for sobriety, discretion, critical acumen and hatred of hollow pretensions. From these highly esteemed acquaintances we learn that our modern thaumaturgists have selected the pulpit as the theater of their preternatural powers, and that owing, perhaps, to some extraordinary inspiration specially imparted for such occasions, they perform with self-surpassing success at district meetings and Annual Conferences. It is difficult to get any definite information concerning the character of their astonishing feats further than that they occur only in the aerial realms of oratory. So dazed, bewildered, entranced, awed and stupefied are the journalistic spectators, that in reply to our most minute and searching interrogatories we can elicit from them nothing but the incoherent exclamations, "Transcendently grand!" "Superlatively sublime!" "Beggaring all description!" What makes these wonders the more wonderful is the frequency of their occurrence and the homogeneity of their type, as well as the fact that the power of performing them seems confined to one denomination of Christians. They happen almost every week, they are always mentioned in the same set of timid terms, and they receive the notoriety of print in no church papers but our own. Surely, while we have great reason to be thankful for this gift which confers peculiar rank and title on our preachers, we should

cultivate the spirit of meekness lest the Tempter turn it into an occasion of vainglory. Are we not favored above all our contemporaries, and above all our predecessors? What era of the church ever saw such prodigies of eloquence as many of our ministers can evoke at will from the vasty deep of their intellects? Imagine the ecstasy with which the early saints who never beheld anything more marvelous than healing the sick and talking in strange tongues, would have read an editorial item such as often graces the columns of our latter-day ecclesiastical journals. Something of this kind, for example, which we will suppose to have appeared in the Corinthian Episcopalian Eclogist about the year 54:

"Rev. Dr. Apollon.—On last Sunday morning we had the ineffable pleasure of hearing Rev. Dr. Apollon, formerly of Alexandria, Egypt, preach to our citizens upon the harmony of Christian dogmas with Platonic speculations. His discourse was a most masterly effort. It literally sparkled with valuable gems of thought. In range of research, acuteness of analysis, gorgeousness of diction and flights of imagination that outstripped the soarings of an archangel, we never heard anything comparable to Dr. Apollon's sermon. For three hours and a half he held the vast audience spell-bound. The eager, forward-bent faces, the breathless silence, the sighs of relief that simultaneously escaped from the multitude as some long strain of eloquence reached its conclusion, all attested the marvellous might of the orator. It is not necessary to say that the congregation went away in raptures. At the close of the services this prince of preachers received a tribute worthy of his genius in the shape of an invitation to dine with Mr. Crispus, one of our wealthiest citizens and ex-ruler of the synagogue. We are happy to state that Dr. Apollon is a regular reader of the Corinthian Episcopalian Eclogist."—Baltimore Christian Advocate.

THE CENTENARY COLLEGE.

At the recent session of the Mississippi Conference the interests of this institution came in review. The Conference by resolution requested the presiding Bishop to appoint an agent to raise the full amount yet needed to complete the repairs of the college, and afterward to raise an endowment fund. Judging by observation, the determination to sustain this college was never stronger among the members or the ministers of our church throughout Mississippi, as well as Louisiana. The committee who have the repairs in charge are making collections and all the arrangements for that purpose as fast as is possible. What we now need is that the preachers in these two States shall use all their influence to direct students to the college. The total yearly expenses is \$150 for board and \$60 for tuition. Some forty students are in attendance, but there should be three times this number. The college is conveniently located for all persons who live near the Mississippi river. It is only twelve miles back of Bayou Sara. As yet we have no college in Arkansas. To our friends there I can recommend Centenary. Their sons will be thoroughly taught and properly disciplined by the professors who now fill the several chairs of this college. They are among the most experienced and efficient teachers in the South. Let the members of the Louisiana and Mississippi Conferences take pains to increase the patronage of Centenary. It is the most effective way for repairing and fully rehabilitating it. Urge our people to educate their sons. Many of them are denying their boys an education under the false notion that it is better to give a son the sum required to graduate him in the form of either money or land. There can be no greater mistake. Our young people of the South must be educated as well as those of New England, or become hewers of wood and drawers of water to their more fortunate countrymen. A New England farmer will spend his money and strain his credit to give his sons and daughters the very best educational advantages. We must do the same or fall behind. Methodist people must either have colleges or make up their minds to see their sons pass into the Presbyterian or some other church that is offering facilities for the education of the young men of the country.

J. C. KEEFER.

THE ALABAMA CONFERENCE.

We take some liberal extracts from Dr. Stimmer's interesting notes of the recent session of the Alabama Conference:

The Alabama Conference closed its session on Wednesday afternoon, December 14. It was truly pleasing to see how the "two sticks" of Joseph and Judah—"the old" and "the new"—again—the unity being perfect. The old Alabama Conference—minus the portions regretfully, though perhaps on the whole advantageously, merged into other bodies—renewed its youth and goes on its way rejoicing. We have already given an account of the first part of this session. It grew in interest toward the close. Excellent weather on Saturday night precluded the usual missionary meeting, but Dr. McFerrin gave a missionary character to his discourse on Sunday night, and two or three hundred dollars more was added to the liberal contributions to the missionary cause at this session.

There was an affecting scene at the superannuation of the venerable Morgan C. Tarrington, who for about half a century had labored in the itinerancy with great success, among the three States in the Carolinas, Georgia, Alabama and Florida. A purse of some \$350 was handed over to him by the preachers as a token of their high appreciation of this faithful servant of the church.

As Eugene V. Levert is one of the two surviving ministers who organized the Alabama Conference when set off from the Mississippi Conference, and as next year, if he lives, he will complete the fifth year of continuous service in the itinerancy, he was specially requested by resolution to deliver a semi-centennial discourse on the second night of the next session, which is to be held in Mobile. Bro. Levert has a memory richly stored with the origins of Alabama Methodism, and we anticipate a rich treat when that discourse shall be delivered. The following resolution was adopted by the Conference:

Whereas, the Rev. Eugene V. Levert is one of the only two survivors of the preachers who constituted the Alabama Conference at its organization in 1832; and whereas, at the close of next year, if God should prolong his life, he will have completed the fifth year of continuous service in the itinerancy; therefore,

Resolved, That Bro. Levert be and is hereby requested to deliver a semi-centennial discourse on the second night of our next session.

The educational interests of the Conference were reported as generally prosperous, and judicious measures were adopted for their promotion.

The Sunday school cause received great attention. A discourse on the subject was delivered on Sunday, and a committee of the whole was held on Monday night, when all the salient points were discussed, and a report was acted upon, which was adopted by the Conference. It is an elaborate paper, and is to appear in our columns, together with the names of the delegates to the convention. The Rev. E. D. Pitts was chosen corresponding secretary.

The vote on the constitutional question stood one hundred and twenty-two, two ways.

There was a gratifying improvement in all the interests of the Conference, as will appear in the reports and proceedings, which are to be furnished to our columns by the secretaries, who did their work well.

Bro. Harp, agent of the New Orleans Depository, was present two or three days toward the close, and ably advocated the interests he has in trust. The New Orleans Christian Advocate, as the special organ of the Conference, is viewed with great favor, and deservedly so. Meanwhile, the Nashville Christian Advocate and other periodicals of the Publishing House have warm friends, and will have a wide circulation, within the bounds of this Conference. By careful inquiry it was found that wherever the church papers were largely circulated all the interests of the church were in a prosperous state. This was, perhaps, the most orderly and deliberative session of the Alabama Conference we ever attended. The Bishop made haste slowly, attending to everything, and keeping every one to the matter in hand. The statistics were minutely rendered, being read in open Conference by the preachers at the passage of their characters—thus securing full and correct returns.

At this session J. M. Massey, P. B. Saffold, T. C. M. Golland and D. C. Stanley were admitted on trial. Bro. Golland is in deacon's orders, having been ordained by the Bishop of London; he is a master of arts of Cambridge University, England, and brings with him high testimonials from that renowned institution. John Wesley could not get the Bishop of London to ordain one of his preachers for America; but we have one now who was ordained by a worthy successor of his lordship. R. F. Nabors, A. M. Gillespie, were

The Child's Corner.

CELESTIAL PROSE.

BY MACKELLAR.

The sun had put his nightcap on,
And covered o'er his head,
When countless stars appeared amid
The curtains round his bed.

The moon arose most motherly,
To take a quiet peep
At all the stars that were so white,
Her sovereign, was asleep.

She saw them wink their silvery eyes,
As if in regular play;
Though silent all, to her they seemed
As if they'd much to say.

So, lest their twinkling should disturb
The sleeping king of light,
She rose so high that her mild eye
Could keep them all in sight.

The stars, amazed, stole softly back,
And looked demure and prim,
While the moon began to nod,
Her eyes becoming dim.

Then sleepily she sought her home—
That's somewhere—who knows where?
But as she went the playful stars
Commenced their twinkling glare.

And when the moon was fairly gone,
The lumps with silvery eyes
Had so much fun it woke the sun,
And he began to rise.

He rose in glory from his eyes
Sprang forth a new-born day,
Before whose brightness all the stars
Ran hastily away.

A BOY'S TRUE STORY.

WRITTEN BY HIMSELF.

I was born in Texas. My first recollection is of Indians coming in daylight, and driving off our horses. My father and the herdsman were out, and had a hard ride to escape the arrows. One stuck in my father's hat, and I have it now. My mother was so alarmed that she fainted. I remember well how pale and beautiful she looked, as my father rubbed her hands and bathed her face. I stood by. It was the first time I had ever felt or thought much. Presently she opened her eyes, and, looking at me, said:

"My darling, kneel down by me, and let us thank God that your father was not killed to-day."

I did so, my father standing near. After this my mother taught me, daily, how to say my name, my father's name, and the name of the State and country where I lived, that if I should be taken by the Indians and ever escape, or be bought from them, I might be able to tell who I was, and where I came from.

When I was large enough to ride my father gave me a pony, a beautiful iron gray, very gentle and very swift. I soon learned to ride him, and to love him. One day, after I had owned the pony a long time, and could ride well, I was out with father hunting cattle. Presently we saw the cattle running in every direction, and one cow came up to us with an Indian arrow sticking in her side. My father said:

"Now, my boy, we must ride for life. Your pony can outrun my horse; try to get home, my son."

I started, under whip and spur. I was excited and afraid. The dust nearly blinded me; but I knew my pony was taking me home. I heard a great crash among the rocks behind me, and a groan. I stopped and looked back. My father was just behind me. His horse had been stricken with an arrow, and had fallen under him. I jumped down and said:

"Papa, mount; pony can take us both home!"

I felt like a man when papa said: "God bless you, my son." And we both got home, safe and sound, on the dear, good pony.

My mother was always uneasy about me and father when we were looking after stock, so father concluded to sell his horses and cattle, and leave the frontier. I was old enough now to be at school, and father thought my education must not be neglected. We packed up provisions for two or three days, and took long ropes to stake our horses on the grass, and started out with a number of herders to gather the stock.

Mother bade us good by with tears in her eyes, and said: "I hope this is the last time my dear ones will ever go out from me in this wild country."

We had been out two days, and had been very lonesome in our hunt. Father and I were a little way from the herders, lying on our blankets, talking. Father was telling me what I must do if the Indians should ever kill him, when he saw about twenty-five savages charging right down upon us. Father took his six shooter from his belt, and was saying to me:

"Remember, my son, what I have told you. The Indians may kill me and take you captive. Be a brave, good boy, and try to get back to your mother."

I had a Derringer pistol, and took it in my hand; I hardly knew what for, but thought may be I could kill one Indian. Most of the herdsman, I think, got away; but my poor father was surrounded. He fought

till he fell, then one big Indian cut round his head with a knife, tore off his scalp and struck me in the face with it. All the time of the fight I do not think I moved. I felt paralyzed. But my father's blood struck in my face, roused me. Without thinking of consequences I fired my Derringer at the savage, and he fell. Immediately I was thrown down and tied, hands and feet, with rawhide strings, rolled and kicked about in the dirt, and much of my hair pulled out. Then I was bound flat on the back of a horse, and started off on a gallop.

How long this ride lasted I do not know. My sufferings were so great that I must have been delirious, for I thought I had ridden through seas of blood and fire, and was going through rivers of water. When I became conscious I was in deep water, the horse was stumbling over rocks, and I was frequently entirely under. The water had lengthened the rawhide bonds, and I could feel. Oh! how I suffered.

After the Indians all got over the river, with all the horses they had stolen, they unbound me, took me off the horse, and loosed my hands and feet, which were badly cut and swollen. My head ached, O, so badly! and my eyes seemed to be balls of fire. My tongue was so swollen and dry that it stuck out of my mouth. But I remembered all except the ride. That seemed to have been years ago. The Indians had got home, I reckon, for there were some tents and squaws and children; and I saw my father's fine horse and my dear pony.

I could not get on my feet, though my bonds were loose. One old squaw brought her little boy where I lay, and made him spit upon me. Then she went away, and the boy stooped down and felt my tongue, then brought some water and poured upon it, and put some in my mouth, and a portion ran down my throat. After that I slept a long time, I reckon, for the sun was rising when I awoke, so thirsty and hungry, so stiff and sore. I had been lying in the dew all night. The good boy that spit on me, the day before, brought me some more water and some meat. I drank and ate, and then I remembered what my father had told me, "to be a brave, good boy, and try to get back to my mother."

I prayed to God, as my mother had taught me from infancy, that he would take me home.

I do not know how long I had been with the Indians, but I had got well and strong, and had learned a good many things from them, such as swimming, shooting with bow and arrows, and to live a long time without eating. They had left off sticking me with arrows and throwing me in the river, and were as kind as they knew how to be. My boy friend was very good; but all my thoughts and prayers were about making my escape. I was always watching for a chance.

One evening the hunters brought up their horses, and "bopped" them near the camp. My pony was with them. I did not sleep that night. There was no moon, but a little starlight. I prayed God to help me; and as soon as all was still I crawled softly out to where I had seen the horses, soon found my pony, and with a tug that was round his neck and his "bopples" I made a "bosall" round his nose, and mounted him. He was fat and fresh, and the grass did not grow under his feet. I had no idea where we were going, but pony knew. We traveled all night, and till sunrise next morning; then I thought we had better rest. So we went into a snag little "mot" of timber, where there was some grass, and pony browsed, and grazed; but I held him all the while. I cannot describe how joyous and free I felt. I believed that God was taking me home.

I was afraid to ride in the daytime, in that strange, Indian country, so, when I thought pony was full, I hopped him, and soon he lay down, and then I laid down and went to sleep. When I awoke the sun was down, and pony was standing by me. I thanked God for his goodness, and we started on our journey. Next morning, after daylight, we came into a road, and this helped me greatly. I was nearly starved, for I had eaten nothing since I left the Indians. Pony, though he had traveled all night, now started off in a canter, and then he neighed, and very soon ran into a camp of white hunters. With them I ate and slept, and in a few days they took me home.

My dear mother did not live many days after I got home. When my father was brought to her, murdered and scalped, and her only child taken off by Indians, her heart was broken, and she prayed for death. I told her what my father had said, and that it was for her sake that I had dared to make my escape; and she said:

"God forever bless my child, be to him a father and mother and guide, and direct him in all things. And, my son, when I am dead, go to your grandmother. She is childless and lonely, and though I was disobedient, and she never forgave me,

till he fell, then one big Indian cut round his head with a knife, tore off his scalp and struck me in the face with it. All the time of the fight I do not think I moved. I felt paralyzed. But my father's blood struck in my face, roused me. Without thinking of consequences I fired my Derringer at the savage, and he fell. Immediately I was thrown down and tied, hands and feet, with rawhide strings, rolled and kicked about in the dirt, and much of my hair pulled out. Then I was bound flat on the back of a horse, and started off on a gallop.

How long this ride lasted I do not know. My sufferings were so great that I must have been delirious, for I thought I had ridden through seas of blood and fire, and was going through rivers of water. The good boy that spit on me, the day before, brought me some more water and some meat. I drank and ate, and then I remembered what my father had told me, "to be a brave, good boy, and try to get back to my mother."

I prayed to God, as my mother had taught me from infancy, that he would take me home.

I think she will be kind to you for my sake."

When mother was buried I and pony started for grandmother's. We are with her now, and she is kind to us.—Little Corporal.

The Farm and Garden.

HEDGES.

As lands are being subdivided and farms lessened in area, the question of fencing and inclosure is becoming of increased importance to the Southern people. Public opinion based on public convenience will soon necessitate the keeping of stock by every one on his own lands.

Fencing has ever been a severe burden on the Southern farmer and planter. With the present system of labor every land-owner knows the almost impossibility of keeping up "lawful fences." Somehow or other, I know not why, the negro has the greatest aversion to "splitting rails." He scorns the offer of anything less than \$1 per hundred for making rails. Law or no law, men will not labor and toil through the hot summer to make a crop, and then see it eaten up and destroyed by their neighbor's stock. They will kill them and abide the consequences. This renders the question of hedges a very important one. The Southern people must, in self-defense, resort to hedges. They may, by proper attention when the growth is young, be made thoroughly efficient, and they are highly ornamental. When well set they need no other repairing but an occasional use of the shears or pruning knife. They are good for a lifetime. I know of no branch of agricultural economy on which our agricultural papers can be more instrumental for good than by giving correct and useful information on the subject of growing and preserving hedges.

The question is, What is the best material for hedges? Various plants or shrubs have their advocates. Much, no doubt, depends on the adaptability of the soil to this growth or that.

I have had very little experience with hedges. I have tried the Osage orange in a small way, and although it seems to be the principal favorite, I confess it was not satisfactory with me; and I have never seen an Osage orange hedge that was a success. I never saw one that was an effective barrier against hogs, or cattle even. They promise well; they grow off vigorously at first, but the shrub has a constant tendency to make new growth upward from the top, and the lower lateral limbs near the ground to decay.

It is too much of a tree in its nature, and not enough of the shrub. I have never seen a hedge of it that did not have gaps or openings in it every twenty or thirty feet, through which stock could pass. This can't be remedied by setting out young plants in the gaps, for the older and more vigorous growth on either side will impoverish them. I tried to fill up the gaps by layering the limbs of the large bushes; but they will not take root as layers. From what I have read on the subject I have no doubt that the *Pyracantha* is the best of all growth for hedges. It is by nature a shrub or bush. It does not aspire upward, but is content to live and grow near the surface of the earth. It is said to be hardy, and its lateral branches tractable to training.

May I suggest to you to impart to the readers of your most excellent and useful journal all the information at your command on the subject of hedges? Give the peculiar qualities and advantages of each—the honey locust, berberry, privet, Cherokee rose, buckthorn, etc. Is it best, in rearing a hedge, to plant the seed—of course after thorough preparation of the soil—or to set out rooted plants, or put down cuttings when cuttings will answer? Will the *Pyracantha* grow from cuttings? or, if from seed, where can the seed be had? Of what growth are the ten thousand hedges that border the lanes and highways throughout England? Will that succeed with us?

Our Southern people must soon come to growing hedges. Our timber will soon be too valuable to make unsightly worm fences of the locks of which are mere harbors for weeds and snakes; besides, the expense of keeping up such fences is too great a burden to be borne.—Correspondent of Southern Farmer.

MEN NOT CONVERTED BY PHILOSOPHY.—I do not suppose that the fishermen of Galilee, or even the accomplished and erudite Paul, had any distinct philosophical notion as to what they taught. But they were only the better fitted for their work because they had no pronounced philosophy of sacred things; for the capacity of fruitifying faith exists in unnumbered minds that have neither the ability, taste nor culture requisite for this philosophy; and such minds are best reached by the simple statements which plain, non-philosophizing men may give of accredited facts, and of truths resting on adequate authority.—Professor Peabody, of Harvard.

Scientific.

ROAD STEAMERS.

The great saving which would be effected if animal power could successfully be replaced by steam on common roads has for some time received considerable notice from the American press. A machine to perform such work successfully must be simple, and at the same time durable, and calculated to overcome obstacles in the shape of steep grades and inequalities which are never encountered by a railroad locomotive. In Great Britain the steamers have been in practical use for the past two years, and has received many complimentary notices, both from the press and from scientific men, as well as from those who have personally put it to a practical test. By far the largest portion of the weight of the entire machine is supported on the driving wheels, thus rendering the friction to be overcome, before the driving wheels could slip on the ground, very great in proportion to the entire weight of the locomotive. Whenever the question of the adaptability of steam road locomotives is discussed in reference to this country the objection is raised that our ordinary roads are too bad for the employment of such machines. This objection is the very one which the Thomson machine is intended to obviate. All the wheels, both on the locomotive and wagons, are made very broad, the driving wheels of the former, which, as before remarked, carry the greatest weight, being the broadest. These wheels are also provided with tires of vulcanized rubber twelve inches in width and five in thickness, in order to give a certain degree of elasticity; and at the same time the breadth of the wheel gives it a firm bearing. For this reason these driving wheels have been compared to the broad, flat, elastic foot of the elephant or camel, which enables these animals to travel with ease and rapidly across sandy barrens almost impassable to such animals as the horse, whose foot is much smaller in proportion to his weight.

Mr. D. D. Williamson, No. 32 Broadway, has commenced the building of these road steamers under the American patents, and from the performance of one which has been on exhibition for some time near Paterson, New Jersey, we have confirmation of its adaptation to this country. It combines all the improvements as contained in the best modern railway locomotives, having a steel boiler, double cylinder engine and reversing gear. Over the rubber tires is a chain of steel plates half an inch thick, connected at the sides, and forming a steel bracelet which conforms to every movement of the elastic tire, and which thoroughly protects the rubber from injury. The weight of the engine flattens the rubber tire and brings a large part of its circumference in contact with the road, thus giving a very large adhesion for traction, enabling it to climb the steepest hills and to pass over sand or soft roads without sinking. Owing to the elastic tires the machinery is saved from all injury when working on rough roads, and thus very simple gearing is used in communicating power to the wheels. The road steamer, with a train of four or six heavily loaded wagons, will turn with perfect ease in a road of twenty-five feet width. Hundreds of snob trains could be worked to the greatest advantage in hauling ores, coal and freight of every description over such portions of our country as will have no railroads for many years to come. The saving over animal power is fully one-half, and in the mining districts of the Pacific States it would be still greater.

Next in value for road purposes, this road steamer is bound to play an important part as a steam plow. In Great Britain, where horses and labor are so cheap, over four hundred steam plows are to-day at work, yet on our level, stoneless prairies there is scarcely one. At a recent trial before the Farmers' Club of the American Institute the road steamer drew a gang of seven plows, plowing seven feet wide and eight inches deep, and turning as quickly as horses. The advantages of direct traction, as compared with wire ropes stretched across a field, will commend itself to all engineers. The addition of a fly-wheel and governor transforms it immediately into a portable engine, with power to drive thrashing machines, saws, pumps or other machinery. It is to be hoped that our national characteristics of energy, pluck and progress will be shown in the employment of the road steamer, and that we shall no longer be content to use horses where others employ steam.—Manufacturer and Builder.

SOME IDEA of the railway travel into and out of London may be had from the fact that the total number of trains entering and leaving the city in one day is fifty-four per hour, or very nearly one per minute during the whole of the twenty-four hours of the day; and this immense business is conducted with a freedom from accident that is almost exemption.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN.

SOUTHERN MUSIC HOUSE.

60 & 62.....BARONNE STREET.....80 & 82

New Orleans.

The house of WERLEIN is the oldest established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS AND ORGANS that this country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS.

HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS.

Strings, Violins, Guitars, Banjos, Flutinas, Accordions, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our factory.

Very respectfully,

PHILIP WERLEIN.

Southern Agent for Dunham & Sons, Marshall & Mitten, and Hale Piano Manufacturers, New York; and Needham & Son, manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rosewood case, carved legs, front round corners, serpentine moldings, possessing sweet, powerful and deep tone, with perfect touch.....price.....\$450 00

Style 6 Organ—Five stops, diapason, violin, octave, piccolo and tremolo, five octave, two sets reeds, with "on and off" tremolo and combination swell, oil-finished black walnut case, paneled all around, with moldings, brackets and engraved ornaments, music desk and carpeted double blowing pedals..... 150 00

Style 10—Six stops, two sets reeds..... 165 00

Style 13—Eight stops..... 185 00

Style 24—Eleven stops..... 365 00

Please send for price lists of Pianos and Organs. nol4 15

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS.

We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	WT. of Bell.	Price.
28-Inch Bell.....	250 lbs	\$65 00
36-Inch Bell.....	600 lbs	135 00
40-Inch Bell.....	800 lbs	175 00
48-Inch Bell.....	1200 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and a small dark mark near the bottom center. The right edge of the page is dark, suggesting the binding or the edge of the book.

NEW ORLEANS MARKETS.

THE N. O. PRICE CURRENT.
Christmas coming on Sunday, the holiday season has thus far caused less interruption to business than usual, but still it has had a restrictive influence, diminishing the supply of labor on the levee and at the presses, and retarding deliveries and sampling. The demand for sugar has fallen off, and, with liberal receipts, prices have been unsteady, with a tendency in favor of buyers; but molasses has continued in active request, and commanded full prices. Corn has been in good demand at previous rates, but the movement in other articles of Western produce has been limited, and prices have ruled in favor of buyers.

We have no intelligence of any importance from the country with regard to the crops. How much our receipts of cotton will exceed last year's is an uncertain question, on which there is a great diversity of opinion. Had all the yield been saved there would undoubtedly have been a considerable increase over the increase in acreage.

COTTON.—The following are the arrivals since the twenty-third instant:

Louisiana and Mississippi bales.	28,657
Arkansas	1,244
Mobile	143
Texas	197
Total	31,099

On Saturday the movement was restricted by moderate supplies, and buyers being reluctant to go on at the previous advance. Increased difficulty in effecting deliveries of previous sales had also an unfavorable influence, and as factors showed no disposition to stimulate the demand by meeting it more freely, the sales were confined to 3,750 bales, prices, however, were if anything stiffer, and there was no longer any low middling to be found under 14½¢. On Monday the market opened with a leaning to outside figures, but as the demand continued limited, factors subsequently met it more freely, without, however, succeeding in imparting any spirit to the movement, and 4,700 bales changed hands, mostly at easier prices, but without any quotable change except dropping ½¢. On Tuesday the market opened with a light supply and moderate demand, which continued slack throughout the day, although, in accordance with an equal demand at New York, and rather discouraging telegrams from Liverpool, factors gave way ½¢, the sales summing up 5,350 bales. Low middling ruled at 14½¢, but with some sales as low as 14¢.

This makes an aggregate for the past three days of 13,800 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 485,536 bales, against 424,782 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 278,056 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 208,390 bales to Great Britain, 9,073 to other foreign ports, and a decrease of 113,452 to France.

Referring to our remarks above, we quote as follows:

Ordinary	12 to 12½
Good ordinary	13 to 13½
Low middling	14 to 14½
Middling	14½ to 15
Strict middling	15 to 15½

COTTON STATEMENT.

514,332

SUGAR.—The sales on Saturday and Monday were confined to 1,000 hogsheads at 6 to 6½¢ per pound for inferior, 6½ to 7½¢ for common, 7½ to 8½¢ for fair, 8½ to 9½¢ for good fair, 9½ to 10½¢ for fully fair, 10½ to 10½¢ for prime, 10½ to 11½¢ for seconds and centrifugal, 10½ to 11½¢ for yellow clarified, and 11½ to 13¢ for white.

MONEY.—Gold, 110½ to 111.
American silver half dollars, 108½ to 109, and Mexican dollars at 1 to 1¼ per cent premium in gold.

The sales of warrants include \$4,000 Blue Metropolitan Police on Saturday at 80, \$1,500 new State small, on Monday at 72½; and \$650 new Metropolitan Police at 83, and \$3,700 new State on Tuesday at 71 for large, and 72 to 73 for small. Dealers have bought State at 71 to 72 for new, and sold at 72 to 74.

City Treasury notes are quoted at 25 to 27 per cent discount.

CATTLE MARKET.

NEW ORLEANS, Dec. 27, 1870.
Texas cattle, choice, per head. \$10 to 15
